BIF401 Final term 11:00Am 1 Sep, 2018

1. Advantages nd disadvantages of Ab initio Modeling 10 marks
2. Pk value is less then pH value 2 marks
3. What is hydrophobicity? 3 marks⁴. Difference between folding protein nd denature protein, role of folding protein, forces act on protein (yh aik e qstion hy 10 marks ka.⁵
Prediction of protein structure⁷. How can we predict amino acid in alpha halix and beta sheets⁸.
Chos fasman (loop formation after alpha and beta sheet)

1. How biological simulation help society.

2. Difference between FASTA and BLAST.
3. Protein infolding. Advantages and disadvantage of Ab initio.
4. Improvement of chou Fasman algorithms.
5. How chou fasman predict alpha helix structure.
6. Explain the formula of scoring matrix.

Pk and ph value ,coding of proteins,phylogenetics tree and to determine its way,slico fragmentation,forces acts on proteins ,scoring peptides sequence,loops,chou fasman algorithm

Greenhouse effect and it's causes,survivorcurves,specie hotspot,bio magnification, eutrophication,benififs and drawback of cockroach,biological component of phosphate, effects of water pollution, difference direct indirect exploitation

What is auto radiography. Does plasmid drive from colE1 belong to restricted or broad host range blasmid. What is green biotechnology give an example. What do you mean by oryhologs in comparative genomics. What is the role of microarrays in human health problem. What is the advantage of using low molecular weight plasmid for cloning
