IMPORTANT MCQS
BT401

1. Together with the components, which fulfill agriecological functions, they are grouped under the concept____ **Agrobiodiversity**
2. Plant genetic resources are--- of biodiversity which sustain the humankind__ **components**
3. Land race is known as……**weed**
4. Conservation of plant genetic resource is necessary for…….. **Food security and Agro-biodiversity (both A&B)**
5. ex-situ conservation include …… **all given (Seed Gene bank, Botanical gardens, zoological parks)**
6. Gene banks are also known as…….. **Germplasm banks.**
7. Plant diversity is urgently & effectively conserved is an objective of…….**GSPC**
8. National strategy of PGRFA need to be review if ------- changes …… **world**
9. Sustainable Use of Plant Genetic Resources____ **Article 6**
10. _____is a pioneer species, easily regenerated from seed……. ***Acacia nilotica***
11. An emollient is……. **moistrizer**
12. Snow leopard population in Pakistan left **200**
13. Himalayan brown beer population in Pakistan…….**150-200**
14. Some crustaceans migrate for…… **mating , breeding**
15. Example of extinct species……. **Passenger pigeon, white rhino**
16. Anthropogenic impact is apparent in the …….. **Coastal zone**
17. The Indus River dolphin is one of the world's ……**rarest mammals.**
18. Phenylketonuria caused by……. **Mutation**
19. Gene pool types ……..**3**
20. If the advantage gene is removed then the effect is called…… **genetic drift**
21. Mild breeding is type of…….. **inbreeding**
22. Crow follow migration…….. **Daily**
23. There are_____ types of genome transfer …… **two**
24. Rhino are hunted for……**horns**

25. _____produce by dart poison frog……. **Toxins**
26. Extinction species_____ **5 billion**
27. Sigillaria was a tree ……..**spore bearing**
28. Species that are threatened are sometimes characterized (population dynamics measure of critical dispensation, a mathematical measure of biomass)related to population growth rate…… **all are given**
29. Cryopreservation in liquid nitrogen ……. **-196degrees**
30. Cryopreservation is storage of materials at ____ temperature…….. **low**
31. ___ Are preserved by cryopreservation method…….....**genetic material**
32. _____is a strategy wherein samples of animal genetic materials are preserved cryogenically……. **Cory-conservation of animal genetic resources**
33. Genetic materials that are typically cryogenically preserved include ……**sperm, oocytes, embryos and somatic cells.**
34. FAO stands for……. **Food and agriculture organization**
35. OHSS stand for …….. **Ovarian hyper stimulation syndrome**
36. Thermal gradient can induce_____ due to uneven expansion or contraction in the biochemical system ……. **Mechanical Stress**
37. Cryopreservation helps in the preservation of biological materials……. **Sperm, gametes, embryos**
38. The problem in strict nature reserves is (a disease b, climate change, air pollution)……..**Both B & C**
39. WCPA stands for……**world commission on protected areas**
40. CBD stand for…….**Convention on Biological Diversity**
41. Natural geological and geomorphological features…… **Waterfalls, cliffs, craters, caves etc.**
42. Which one of the following is culturally influenced in natural reserve…….**Cave Dwelling**
43. "protected areas aiming to protect particular species or habitats and management reflect this priority____ **habitat-species management area**
44. Encourage the conservation of agrobiodiversity and aquatic biodiversity……. **Land & seascape**
45. Conversion of plant genetic resources is necessary for food security, agro bio diversity, commercial use____ **both A & B**
46. In the game reserve the major focus is specifically --------? **The Animals**

47. When species has been reintroduced in Lal suhanra national park..... **Blackbuck**

48. Tissue Culture Conservation is an alternative to _? **Vegetative Propagation**

49. Vegetative propagation is……. **tissue culture**

50. Special care unit_____? **EX_SITU**

51. _____can be used to introduce species that left an area……. **Ex-situ conversion**

52. National park spreading in an area of -……**100 sq. km. to 500 sq.**

53. Sir Sadiq Muhammad Khan established……..**Bahawalpur Zoo**

54. Bahawalpur zoo covers…….**25 acres**

55. In 2013,_____rasmar sites has been declared in Pakistan……**19**

56. Chashma and Tuansa barrage declared wild life sanctuaries by……. **Punjab government**

57. If hunting is prohibited, a game reserve may be considered a …….**" Nature Reserve"**

58. _____an area wherein controlled hunting and shooting is permitted on permit basis" is known as……..**game reverse**

59. In the game reserves, the major focus is specifically the……. **animals.**

60. Hunting habitat loss and fragmentation have reduce the number of this specie…… **Great Indian bustard**

61. Plant seeds are stored in _____for long-term storage……. **In-vivo Gene Bank**

62. The removal of the medium and transfer of cells from its previous culture into fresh growth medium for further propagation of the cell is called……. **Sub culturing**

63. Light intensity for most plants culture require .....… **50-200 umol-S-1-m-2**

64. ____can now be considered as a means of complimentary conservation…….. **DNA banks**

65. Gene sanctuaries not only preserve the existing genetic diversity present in a population due to which new _____ combination would appear with time…….. **Allele and gene**

66. In _____gene sanctuaries for conservation of wild relatives of coffee was setup in 1984…… **Ethiopia**

67. ____is a relatively cheap method for conserving a broad range of germplasm……. **Seed storage**

68. Pollinator are_____ major group of invertebrates……**SECOND**

69. ___ Organisms are described as engineers of ecosystem…… **earthworms**

70. Some larger soil-dwelling invertebrates, such as earthworms, ants and termites help maintain the chemical fertility needed for ……..**plant growth**

71. Some larger soil-dwelling invertebrates, such as earthworms, ants and termites, have been described as .....…..**"ecosystem engineers".**

72. _____help to maintain soil structure and the availability of water throughout the soil profile……. **Earthworms**

73. The capacity of ecosystems to adapt is diminished when biodiversity of_____ is lost…… **invertebrate**

74. Considering the better studied mammals and birds 100% of the currently described species have been evaluated for their conservation statuses and out of these ____ out of 9,990 birds species are considered to be endangered…….**12%**

75. Forests are important due to……**all given (stand, population or landscape of trees, and typically other associated woody plants)**

76. In Europe one estimate put the role of value marketed _____ non wood goods from forest at……. **€2.3 billion**

77. Anthropogenic climate change leading to future large-scale "dieback" in……. **Amazonian rain forest.**

78. Tree populations rely on_____ interplaying mechanisms to respond to environmental change…… **three**

79. Climate change may however cause range expansion is___ **herbivore insects**

80. Candidate genes for drought tolerance include those involved in…….. **(All given) the synthesis of abscisic acid, transcriptional regulators**

81. Using microarray analysis, detected that up to _____were significantly induced by drought in two Mediterranean pine species……**113 genes**

82. To date, one of the most extensive programmers to develop trees with resistance to insect pests in temperate regions is in…… **British Columbia.**

83. ----------are verities developed as since the advent of scientific agriculture in the late nineteenth century____? **Obsolete Varieties**

84. Cartagena protocols not cover products derived from……**LMOs**

85. Cartagena protocols deals with……**biosafety**

86. (IABGR) stand for ……..**Institute of Agricultural Biotechnology and Genetic Resources**

87. Number of lab in plant genetic resource in Pakistan…… **six**

88.

89. Large natural areas comes into……**category VI**

90. The category VI is not designed to accommodate……. **large-scale industrial harvest.**

91. Which of the following category encourage biodiversity aquatic biodiversity _? **category-V**

92. They are generally quite small-protected areas and often have high visitor value category VIII…… **National Monument-Feature**

93. ___protected areas act as buffer ……**Category V**

94. The Pakistan Animal Quarantine Ordinance…….. **1979**

95. _____will be fine for cutting tree in 1992 act ……**5000 rupees**

96. The Wild Birds and Animals Protection Act…… **1912**

97. Convention on biological diversity……. **1992**

98. Nagoya protocol ratified by _____ partie……..**97**

99. Cartagena protocol was adopted on ……..**June 2001 in Cartagena, Spain.**

100. In _____the Food and Agriculture Organization of the United Nations published the first State of the World's FGR……**2014**

101. The 1st report on fish sperm cryopreservation was published by…… **Blaxter (1953)**

102. Hingol national park declared reserved in ……**1988**

103. Since the_____ population of the Indus Dolphin has significantly increased here……**1970**

104. In _____conservation of habitats rich in genetic diversity was recommended in the UN conference……. **1972**

105. an International Board for Plant Genetic Resource (IBPGR) was established in……. **1972**

106. Since ____in situ conservation has received high priority in the world conservation strategy……..**1980,**

107. Ramsar conversion was negotiated in ____by countries and NGOs …….. **1960**

108. ABSA stands for ……**access and benefit sharing agreement.**

109. PGRFA stands for……..**plant genetic resource for food and agriculture**

110. NCCP stands for ……. **national culture collection of Pakistan**

111. GEWIS stand for…… **A genome wide interaction scan**

112. The Buler's Fruit bat is listed as _____ on the IUCN red list……..**Critically Endangered**

113. The IUCN has listed Great Indian Bustard as_____ in 2011……. **Critically Endangered**
