

ENG 529 SOLVED PAST PAPER

Q1: There was a Dragon software question for 3 marks.

Dragon software is a dictation tool that converts spoken words into text for multiple English accents and other languages (e.g., French, German).

It helps language learners improve pronunciation by identifying errors when their speech doesn't align with programmed norms.

Provides a feedback loop for learners to refine their speech and improve comprehension.

Q2: What is L2 writing-based analytics?

Writing-based analytics, like Mi-Writer, track the entire writing process (planning, drafting, revising, and editing).

These tools record interactions with teachers and peers, offering insights into writing habits.

They provide personalized feedback, improving both writing quality and learning outcomes.

Q3: Define blended learning and give its two different learning environments.

Blended Learning: A teaching method combining face-to-face (synchronous) and online (asynchronous) learning.

Learning Environments:

1. **Face-to-Face:** Classroom learning with direct teacher-student interaction.
2. **Online:** Independent, flexible learning through digital platforms.

Q4: What are three forms of assessment and e-assessment?

Forms of E-Assessment:

1. Online tests, quizzes, and exams.
2. E-submission and e-marking of assignments.
3. Peer-assessment and student response systems for collaborative learning.

Q5: How do linguists use computer technology?

Linguists use technology to study second language acquisition (SLA) in controlled environments.

For example, they use computers to conduct grammar tests or speed-based assessments.

CALL (Computer-Assisted Language Learning) evolved in the 1980s to focus on using technology for language learning.

Q6: Why was accessing information on the internet not easy in the past?

Early internet access was limited by slow speeds, lack of user-friendly tools, and restricted resources.

Searching for information required specialized knowledge, and only limited content was available online.

Q7: What are the benefits of CAPT (Computer-Assisted Pronunciation Training)?

CAPT Benefits:

1. Provides a risk-free environment for learners to practice pronunciation.
2. Offers immediate feedback without judgment.
3. Can simulate diverse speech sounds and accents for better learning.

Q8: What is self-assessment in e-learning?

Self-assessment allows learners to evaluate their progress and learning independently.

Benefits: Encourages critical thinking, autonomy, and reflection on learning.

Q9: Define LMS and list its benefits.

LMS (Learning Management System): Software for managing and delivering educational content online.

Benefits:

1. Tracks grades, assignments, and resources.
2. Offers consistency across institutions.
3. Can integrate with external tools for additional features.

Q10: What is the CCA program?

Colossal Cave Adventure (CCA): A text-based game created in 1975-76 by Will Crowther.

It combined real-world cave exploration with fantasy elements, marking the beginning of virtual worlds.

Q11: What is the PLATO program?

PLATO was an educational software system created using the TUTOR programming language.

It enabled teachers to design their own exercises, focusing on grammar, vocabulary, and reading skills.

Features included multiple-choice questions, touch-sensitive screens for interactive learning, and multimedia tools like audio.

Q12: What is meant by 'affordance' in digital tools?

Affordance: The potential uses or benefits of a technology perceived by its users.

For example:

1. Subtitles in videos can aid comprehension.
2. Interactive features like pausing and annotating videos can enhance learning.

Q13: What are e-book libraries, and why are they important?

E-Book Libraries: Digital collections of books accessible online, like Project Gutenberg.

Benefits:

1. Free access to a wide range of books.
2. Portable and convenient for reading anytime, anywhere.

Q14: What are the benefits of interactive whiteboards?

Interactive Whiteboards: Large touch-sensitive screens used in classrooms.

Benefits:

1. Make lessons engaging and interactive.

2. Allow students to touch, draw, and collaborate.
3. Simplify teaching by integrating multimedia tools like videos, graphs, and images.

Q15: What are two types of web-based management education systems?

Web-Based Training Types:

1. Synchronous: Real-time training through live classes or webinars.
2. Asynchronous: Self-paced learning with pre-recorded content or online resources.

Q16: What is curriculum design?

Curriculum Design: Organizing the learning objectives, content, and methods for a course.

Purpose: Ensures alignment between what students learn at different stages (e.g., elementary to high school).

Q17: What are three general cognitive science principles?

1. **Channel Assumption:** The brain processes information through verbal and visual channels.
2. **Limited Capacity Assumption:** Each channel has a limited capacity for processing information.
3. **Active Processing Assumption:** Learning happens when learners actively organize and integrate new information.

Q18: What are three categories of general technology for L2 learning?

1. **Computer-Assisted Language Learning (CALL):** Includes language software and online exercises.
2. **Computer-Mediated Communication (CMC):** Tools like video conferencing for communication.
3. **Computer-Based Language Testing (CBLT):** Online language proficiency assessments.

Q19: What is the MUD gaming program?

MUD (Multi-User Dungeon): A text-based online role-playing game created in 1978 by Roy Trubshaw.

It allowed multiple players to interact and compete in a virtual environment, paving the way for modern online games.

Q20: How does technology improve language learning and teaching?

Technology offers tools like multimedia and online resources to make language learning engaging.

Examples:

1. Online games and apps for vocabulary.
2. Multimedia content for grammar and pronunciation practice.
3. Video conferencing for real-time communication practice.

Q21: What are Juxta and Wordle, and how do they help in language learning?

Juxta: Compares different versions of a text, highlights differences, and allows annotations.

Wordle: Creates word clouds from text, highlighting frequently used words.

Uses in Language Learning:

1. Analyze and compare texts.
2. Visualize vocabulary patterns.
3. Improve text comprehension and creativity.

Q22: What types of research can learners conduct in CALL (Computer-Assisted Language Learning)?

1. **Tool Functionality:** Testing accuracy of tools like Voyant and Wordle.
2. **Human Interaction:** Studying how tools impact learning and cognition.
3. **Extending Tools:** Adding languages or features to existing tools.
4. **Social Media Analysis:** Using tools for analyzing trends or detecting language patterns.

Q23: What are the benefits of personal computers in language learning?

Benefits:

1. Access to affordable, user-friendly software for teaching grammar, vocabulary, and pronunciation.
2. Creation of custom courseware using authoring tools like HyperCard.
3. Integration of multimedia (audio, video) for a comprehensive learning experience.

Q24: Explain the Text-to-Speech (TTS) process.

TTS converts written text into spoken words using computer programs.

Examples: Voki, Google Chrome's TTS tools.

Benefits:

1. Assists struggling readers.
2. Enhances L2 learners' listening and reading comprehension.

Q25: What are three technology tools related to Juxta and Wordle?

1. **TagCrowd:** Creates word frequency visualizations.
2. **Tagxedo:** Shapes word clouds creatively.
3. **WordItOut:** Simplifies word cloud generation.

Q26: What is an online 3D environment, and how is it different from interactive environments?

Online 3D Environment: Virtual spaces like Second Life where users interact in real-time with 3D graphics.

Interactive Environment: Digital spaces that respond to user input (e.g., video games, simulations).

Key Difference: Not all interactive environments are 3D or online.

Q27: What are digital books, and what are their advantages?

Digital books: E-books available online or on devices like tablets.

Advantages:

1. Portable and convenient.
2. Store thousands of books in one device.
3. Environmentally friendly compared to printed books.

Q28: How does technology enhance students' learning?

Benefits:

1. Makes learning materials accessible anytime, anywhere.
2. Engages students through interactive tools and multimedia.
3. Personalizes learning based on individual needs.

Q29: What is peer support in a blended learning approach?

Peer support involves students helping each other in online and classroom settings.

Benefits:

1. Encourages collaboration and idea-sharing.
2. Builds communication and social skills.
3. Reduces reliance on teachers for every query.

Q30: What are five considerations before adopting a blended learning approach?

1. **Teacher Training:** Prepare teachers to manage both online and offline learning.
2. **Choosing an Appropriate Blend:** Balance classroom and online activities based on students' needs.
3. **Costs:** Consider budget for technology and resources.
4. **Attrition and Motivation:** Keep students engaged and minimize dropout rates.
5. **Peer Support:** Facilitate collaboration among students for better learning .

Q31: What are the advantages and disadvantages of computer technology for teachers and learners?

Advantages:

1. Connects learners and teachers to global communities for expanded learning.
2. Offers tools to meet individual learning needs effectively.

Disadvantages:

1. Over-reliance on technology may hinder creativity.

2. Some learners might struggle with technical issues.

Q32: What is e-submission?

E-Submission: Submitting assignments or work online for marking, feedback, or plagiarism checks.

Benefits:

1. Convenient for both students and teachers.
2. Allows originality checking through tools like Turnitin.

Q33: How does technology develop learners' thinking, and what are three benefits?

Development of Thinking: Technology promotes critical, analytical, and problem-solving skills.

Three Benefits:

1. Encourages higher-order thinking (analysis, synthesis).
2. Supports critical thinking through real-world scenarios.
3. Enhances problem-solving with interactive tools.

Q34: What are three uses of learning analytics in L2 writing?

1. **Tracking Writing Process:** Monitors learners' drafting and editing habits.
2. **Assessing Writing Quality:** Evaluates grammar, vocabulary, and coherence.
3. **Providing Personalized Feedback:** Identifies areas for improvement based on writing data.

Q35: What are three key points for effective blended learning?

1. **Clear Objectives:** Set well-defined learning goals for the course.
2. **Balanced Activities:** Combine online and offline tasks effectively.
3. **Ongoing Feedback:** Use analytics to give real-time feedback and support learners.

Q36: What are three characteristics of virtual worlds (VWs)?

1. **3D Environment:** Simulates real or imaginary settings for interaction.
2. **Avatars:** Users are represented by virtual characters.

3. **Real-Time Interaction:** Users can communicate and engage with others synchronously.

Q37: What are two web-based systems for higher education?

1. **LMS (Learning Management System):** Platforms like Moodle for managing courses online.
2. **Web-Based Training:** Synchronous and asynchronous training modules delivered online.

Q38: What are three characteristics of task-based instruction?

1. **Real-World Tasks:** Focuses on meaningful activities like problem-solving.
2. **Learner-Centered:** Empowers students to take responsibility for their learning.
3. **Interaction:** Promotes collaboration and communication among learners.

Q39: What are classroom clickers, and how do they benefit learning?

Classroom Clickers: Devices that allow students to respond to questions anonymously during class.

Benefits:

1. Engages students in active learning.
2. Provides instant feedback for teachers to adjust lessons.
3. Encourages participation without fear of judgment.

Q40: What are technologies relevant to L2 reading?

1. **Self-Developed Courseware:** Customized digital tools for teaching.
2. **Online Activities:** Resources like mobile apps or interactive tools.
3. **CMC Technologies:** Communication tools like email and chat for language practice.

Q41: What are the benefits of mobile devices for incidental language learning through listening?

1. **Portability:** Learners can access resources anytime, anywhere.
2. **Increased Engagement:** Tools like apps and audio content make learning interactive.

3. **Better Comprehension:** Apps like speaking tools and podcasts improve vocabulary and listening skills.

Q42: What types of classrooms can teachers use technology in?

Teachers can use technology in various classrooms by leveraging platforms and tools like:

1. **Lesson Plan Websites:** ESLkidstuff.com, PBSlearningmedia.org.
2. **Video Resources:** National Geographic, BBC Learning English.
3. **Interactive Tools:** Digital books, clickers, and interactive whiteboards.

Q43: What is COCA (Corpus of Contemporary American English)?

COCA is an online database containing over 450 million words from genres like fiction, news, and academic texts.

Uses:

1. Helps learners understand real-world language usage.
2. Provides tools to analyze vocabulary, synonyms, and collocations.

Q44: What is CMC (Computer-Mediated Communication)?

CMC: Using computers for communication between learners and teachers.

Examples:

1. Text-based chats and forums.
2. Voice-over-IP tools (e.g., Skype).
3. Collaboration in real-time or asynchronous discussions.

Q45: What are electronic glossaries and dictionaries?

Electronic Glossaries: Provide in-context word meanings for learning.

Electronic Dictionaries: Independent tools that link words to their meanings or Wikipedia entries.

Benefit: Useful for understanding vocabulary in context during reading or listening.

Q46: What are three perspectives on L2 reading theories?

1. **Structural (Bottom-Up):** Focuses on text structure and decoding individual words.
2. **Cognitive (Top-Down):** Emphasizes prior knowledge and understanding.
3. **Metacognitive:** Encourages strategies like planning and monitoring comprehension.

Q47: What are the technologies used in teaching and learning L2 reading?

1. **Self-Developed and Commercial Courseware:** Custom tools and software for teaching.
2. **Online Activities:** Tools for independent learning (e.g., apps, online exercises).
3. **CMC:** Communication technologies like chatrooms and email.

Q48: How has the application of technology changed English classrooms?

Technology has replaced traditional teaching methods with interactive tools like multimedia content and the internet.

Benefits:

1. Enhances vocabulary and cultural understanding.
2. Makes learning engaging with videos, games, and online resources.

Q49: What are the five levels of virtual worlds?

1. **Age Level:** Appropriate for different age groups.
2. **Game Level:** Low, mid, or high levels of gameplay.
3. **Socialization Level:** Levels of interaction with others.
4. **Educational Focus:** How much learning is integrated.
5. **Technical Requirements:** Complexity of technology needed.

Q50: Name five major publishers that sell front-list e-books directly to consumers.

1. HarperCollins.
2. Random House.
3. Macmillan.
4. Simon & Schuster.
5. Penguin.

Q51: What is SLA in CALL, and how does eye-tracking technology help?

SLA in CALL: Research in Second Language Acquisition using Computer-Assisted Language Learning tools.

Eye-Tracking: Tracks where learners focus while reading or listening, helping researchers understand their cognitive processes and attention to feedback.

Q52: How does the VoiceThread tool engage users in comments?

VoiceThread allows users to combine images, text, and audio for interactive projects.

Users can collaborate by adding comments, answering questions, and sharing ideas asynchronously.

Q53: What storytelling tools can learners use?

1. **Omeka:** Archiving and displaying images and content.
2. **Timeline's:** Creating interactive timelines.
3. **Canva:** Designing infographics and visual storytelling.
