Q. Parts of Speech Lecture 31 (pp. 99–100):

Parts of speech are categories of words based on their function in a sentence, such as nouns, verbs, adjectives, adverbs, pronouns, conjunctions, prepositions, and interjections.

Q. What Makes a Word Difficult?

Words may be difficult due to:

- ✚ Unfamiliar phonemes
- ✚ Complex morphology
- ✚ Multiple meanings
- ✚ Irregular spelling/pronunciation
- ✚ Low frequency in everyday use

Q. Tense Lectures 32 & 33 (pp. 101–109):

Tenses express time in language (past, present, future) and include simple, continuous, perfect, and perfect continuous forms.

Q. Define "Stop" Lecture 15 (Topic 74):

Stops are consonants where airflow is completely blocked, causing pressure build-up and sudden release. Examples: /p/, /b/, /t/, /d/, /k/, /g/.

Q. Define "Fricatives" Lecture 15 (Topic 76):

Fricatives are produced by forcing air through a narrow channel, creating friction. Examples: /f/, /v/, /θ/, /ð/, /s/, /z/, /ʃ/, /ʒ/.

Q. Define "Approximants" Lecture 15 (Topic 78):

Approximants are consonants where articulators come close but don't create turbulent airflow. Examples: /w/, /r/, /j/ (as in yes).

Q. Define "Consonants" Lecture 14 (Topic 70):

Consonants are speech sounds made with partial or full obstruction of airflow. English has 21 consonant letters and 24 consonant sounds.

Q. Define "Vowels" Lecture 19 (pp. 65–67):

Vowels are sounds produced without obstruction in the vocal tract. English has five vowel letters (a, e, i, o, u) and multiple vowel sounds.

Q. Define "Diphthongs" Lecture 22 (pp. 73–74):

Diphthongs are complex vowel sounds that begin with one vowel and glide into another within the same syllable (e.g., /aɪ/ in "like").

Q. Define "Triphthongs" Lecture 23 (pp. 75–76):

Triphthongs are a combination of three vowel sounds pronounced in one syllable, like /aʊə/ in "our".

Q. Children Cannot Differentiate Alphabets – Strategies Lecture 10 (Topics 54–57, pp. 36–39):

Strategies include:

- ✚ Teaching phonemic awareness
- ✚ Using visual aids and activities (e.g., alphabet cookies, letter boxes)
- ✚ Teaching letter-sound correspondence
- ✚ Repeated practice with engaging materials

Q. Point of Articulation

Refers to where in the vocal tract the airflow is obstructed to produce different sounds. Examples:

- ✚ Bilabial: both lips (/p/, /b/)
- ✚ Labiodental: lower lip + upper teeth (/f/, /v/)
- ✚ Dental: tongue + teeth (/θ/, /ð/)
- ✚ Alveolar: tongue + ridge behind teeth (/t/, /d/)
- ✚ Velar: back of tongue + soft palate (/k/, /g/)
