(Bt101)

Ecology biodiversity & Evolution

I

Final past papers

BT101 Final past papers:

BT101

- 1-Kinds of factors important in population (2)
- 2- Two rules by Biologist Edward O. Willson based on coloration (2)
- 3- Diatomaceous earth (2)
- 4-Define torpor with example (3)
- 5- DMS (dimethyl sulfide)? (3)
- 6-Neurospore and it's use (3)
- 7-Define the following terms (5)

Habitat

Tolerance range

Optimum range

Limiting factor

Taxis

8- Major types of mycorrhizae (5)

9- Enlist 5 factors that influence the biodiversity (5)

10- After effects of forest removal (10)

BT101

1. Write down the characteristics of population under study? 2

2. Write down the Types of simbiosis? 2

3. What is Mycoplasma? 2

4. Differentiate between Prokaryotes and eukaryotes with examples? 3

5. What is El Niño? 3

6. Write some Human effects on the environment? 3

7. Causes of global warming ? 5

8. Describe and classify Invertebrate species with two examples? 5

9. Effects of biodiversity destruction? 5

Write a short note on types of protozoa? 10

BT101

Enlist after effects of removal of forests. 10

Lifecycle of fungi 5

Difference b/w endoparasite and ectoparasite 5

Enlist benefits of marine water 5 red tide 3

examples of ascomycetes 3

Difference b/w endemic species and indigenous species 3 logistic population growth 2

Eutrophication 2 Mimicry

2

BT101

Short questions (Demography, Eutrophication, red tides,) 2 marks

(factor that affects ecosystem diversity, survival of mechanism of endotherm in hot and cold environment, short note on parts of ecosystem) 3 marks

Strategy to protect ecosystem 5

coevolution 5 Cryptic

coloration 5

After effects of forests removal 10

BT101

- 1-Kinds of factors important in population (2)
- 2- Two rules by Biologist Edward O. Willson based on coloration (2)
- 3- Diatomaceous earth (2)
- 4-Define torpor with example (3)
- 5- DMS (dimethyl sulfide)? (3)
- 6-Neurospore and its use (3)
- 7-Define the following terms (5)
- Habitat
- Tolerance range
- Optimum range
- Limiting factor
- Taxis
- 8- Major types of mycorrhizae (5)
- 9- Enlist 5 factors that influence the biodiversity (5)
- 10- After effects of forest removal (10)

BT101

Define population diversity.
 What is torpor with example
 Define intrinsic environmental growth ..biological factors.
 How do organisms survive in cold n warm weather? ? Explain
 marine water ?

Bt101 4:00pm

- 1-what factor are important in population dynamic?
- 2-define torpor with example?
- 3-enlist the sub field of ecology?
- 4-enlist at least three specific sites of secondary succession occur?
- 5-define species and enlist the primary concepts that define species?
- 6-define the survival mechanism of organism in both cold and hot environment?

BT101 Today paper at 11:00 am

- 1- Define species hotspot. (2)
- 2- Define Eutrophication. (2)
- 3- Define genetic diversity. (3)
- 4- Enlist at least two specific sites where secondary succession can occur? (3)
- 5- What do you know about El-nino? (3)
- 6- Three examples of phycomycetes? (3)
- 7- Define Coevolution with examples. (5)
- 8- Causes of global warming. (5)
- 9- Define invasive species and describe its effects with two examples. (5)
- 10- What is ozone layer and how it produced? Explain (10)

Bt101

Q1.Pellicle

Q2.eutrophication

Q3.DMS
Q4.community ecology.
Q5.Coevolution
Q6.invasive species
Q7.factor influence the biodiversity
Q8.types of biodiversity Q9.symbiosis.

BT101

Write name of insects that such nectar from male flowers? 2
Define eutrophication? 2
What is meant by diatomaceous earth? 2 Def
ectotherm and ectotherm with example? 3
Why Linnaeus two Kingdom system of classification is not suitable? 3
write you know about DMS? 5 what are strategy to protect our
ecosystem? 5
What is ozone layer and how it is constructed? Explain 10

BT101 [03/09 2:43 PM]

Write rules of coloration by Edward O.Wilson 2 Define eutrophication 2
Write two taxonomic groups of slime mold 2
Define cryptic coloration with example 2
Define neurospora and its uses 3
How solid waste is categorized after collection.3
Common interspecific adaptations 5
Characteristics of deuteromycetes 5
How solid waste is managed 5
Types of biodiversity over spatial scale

(Final term papers year 2017)

Short questions:
Red tides?
Genetic diversity?
Aquatic and terrestrial biomes?
Neurospora and its uses?
Long question?
Reproductive cycle of fungi?
Coevolution with example?
Types of protozoans? Effect

of global warming Red
tides?

Genetic diversity?

Aquatic and terrestrial biomes?

Neurospora and its uses?

Long question?

Reproductive cycle of fungi?

Coevolution with example?

Types of protozoans?

2.growth forms of lichens 10

3.global warming 5

Ozone (O₃)

4. invasive species 5

5. Counter shading with two examples 6.bad
things in linnaeus two kingdom system?

7.define red tide

8.define genetic diversity

9.two major forms of symbiosis

1.define pellicle

3.after effects of forest removal.(10 marks)

4 nitrogen cycle steps.(10 marks) 6.define
mimicry with examples.

7.define coevolution with examples 5 marks.

8.define genetic diversity M.c.q's:

1.common carp is an example of.....

2.humming bird and insect pollinated is an example of....

3.word ecosystem was coined by....

4.....high biotic potential.(large animals or small animals.) 5.small
organisms have (high population density.)

6.beaver is an example of....

7.non-native spp. are introduced through.....

8.tropical rain forest covers area.....

9.main cause of habitat loss is.....

10.cage song birds is an example of....

11.how many types of mutualisms are....

12.biomes have elements.....

13.main cause of ozone depletion....

14.SO₂ released in year 1991 (20.000.000)

15.one blank related to global warming definition.....

1- symbionts forms2

2- taxonomic forms of slime molds 2

3-genetic diversity 2

4-lineaus kingdom shortcomings 3

5-pollutant types 3

6- effects of water pollution 5

7-value of biodiversity 5

8-nitrogen cycle 10

9- types of biodiversity over spatial scale
 name of insect fed on male flower's nector (2)
 define eutrophication(2) what is el-nino (3)
 how solid wastes are managed (10) what is
 ozone ? how it is formed (10)
 (write three growth forms of lichens and benefits of lichens (5)
 nme insect fed on male flower's nectoar (2) define
 eutrophication(2) what is e1-nono (3)
 write three types of escomycetes (3) how
 solid wastes are managed (10) what is
 ozone ? how it is formed (10)
 write three growth og lichens and benifits of lichens (5)
 or 5 marks ka que bholgyahy ,
 mcqs easy thy first 6 mcq mid sy thy baki finals sy ,diffrentchezoki %age walymcqs bhi thy ,
 paper bht easy tha 1.define pellicle
 2.rules of colurtaion
 3.afer effects of forest removal.(10 marks)
 4nitrogen cycle steps.(10 marks)
 5.loss of biodiversity effects
 6.define mimicry with examples.
 7.define coevolution with examples 5 marks.
 8.define genetic diversity 9.strategies
 to protect ecosystem M.c.q's:
 1.common carp is an example of....
 2.humming bird and insect pollinated is an example of...
 3.word ecosystem was coined by....
 4.....high biotic potential.(large animals or small animals.) 5.small
 organisms have (high population density.)
 6.beaver is an example of....
 7.non-native spp. are introduced through.....
 8.tropical rain forest covers area.....
 9.main cause of habitat loss is.....
 10.cage song birds is an example of...
 11.how many types of mutualisms are....
 12.biomes have elements.....
 13.main cause of ozone depletion....
 14.SO2 released in year 1991 (20.000.000)
 15.one blank related to global warming definition.....

(Final term papers before 2017)

Types of protozonans 10
 Nitrogen cycle 10
 Water cycle 5
 Protection of ecosystem 5
 Solid wastage 3
 Cryptits definition with example 3
 Red tide definition 2
 Eutrophication 2
 Direct nd indirect exploitation
 Types of symbiosis
 Allogenic and autogenic succession

Nitrogen fixing bacteria kingdom
protista

Carbon cycle and photosynthesis

Global warming and effects What

is Eutrophication? 2 what is

Pacilli? 2

How collected solid waste is categorized? 3

What is the variety of Biodiversity? 3

What is chemical warfare and examples? 5

Write shortly the step involved in Nitrogen Cycle? 10

Write briefly the types of Biodiversity on spatial scale? 10

Define red tide? after effects of deforestation How solid
state is managed

define= climax community, sere, serial stage, pioneer community, primary succession

effects of solid state types of symbiosis

Write name of insect which feed on male flowers nectars? Define

red tide?

2 Q (3 marks)

Write examples of phycocyanins?

Difference between aquatic biomes and terrestrial biomes?

2 Q (5 marks)

Write invasive species and write its two examples?

What is global warming?

2 Q (10 marks)

Write types of growth of lichens and write its benefits? Write
short note on photozones?
