100 % CORRECT MCSQ

AND Many MoRe

CS-101

1. In binary Notation 11111111 is =

✓ 128

✓ 255

✓ 567

✓ 127

2. What will be output of following OR expression 1010 OR 1111?

✓ 1111

✓ 0101

✓ 0000

✓ 1010

3. Data were stored in memory program were part of the _____.

✓ CPU

✓ Cable

✓ BUS

✓ CACHE

4. Which type of registers is used in program execution?

✓ General purpose

✓ CPU register

✓ Special purpose

✓ Memory address register

5. Which of the following is used to store data in computer?

✓ Hard Disk

✓ Floppy Disk

✓ Optical Disk

✓ All of the Given

6. UTF-8 Uses 24 to ____ bits.

✓ 32

✓ 30

✓ 21

✓ 90

7. To identify individual cells in a Computer's main memory, each cell is assigned a unique "name" called its_____.

✓ Path

✓ Address

✓ Place holder

✓ Location

8. The repetitive use of an instruction or sequence of instruction is called_____.

✓ Loop

✓ Statement

✓ Condition

✓ Pseudocode

9. This finding maximum number function will keep on going until we reach at the last value [12,18,299,38,999,89,101,500,801,45]

✓ 45 each time

✓ 801 each time

✓ 12 each time

✓ 38 each time

10. Dynamic ram-stores bits as tiny electric Charge.

✓ Refreshes no time a second

✓ Refreshes many times a second

✓ Refreshes one time a second

✓ Refreshes two time a second

11.The Binary Search Algorithm, what will be the mid value in second level of recursion in the following array.

[45, 77, 89, 90, 94, 99,100] and key = 99

✓ 89

✓ 90

✓ 94

✓ 99

12.Robots can be guided by an

✓ An external control device or the control may be embedded within

✓ An internal control device or the control may be embedded within

✓ Remote

✓ Application

13.Bit Is

✓ Basic unit of storage

✓ Basic program of storage

✓ Secondary unit of storage

✓ Not a unit of storage

14.Which of the following language is used for server side scripting?

✓ HTML

✓ JavaScript

✓ CSS

✓ PHP

15.Process states include the value of the program counter as well as the contents of the_____.

✓ Related memory cells

✓ Registers and related memory cells

✓ Registers

✓ Registers and cache memory cells

16. How many iterations are required to find 88 in the following array?

[5, 6, 77, 88, 99]

✓ 1

✓ 2

✓ 3

✓ 4

17. 10.011 added to 100.11 produces

✓ 111.088

✓ 111.007

✓ 111.001

✓ 111.099

18. The instruction code to halt machine cycle is

✓ C400

✓ C1000

✓ C000

✓ 35CE0

19. Which Excess notation is used to represent 100 as Zero?

✓ Excess 4

✓ Excess 8

✓ Excess 2

✓ Excess 16

20. _____ Tag is used to write paragraph in HTML document.

✓ <p>

✓ <pr>

✓ <pa>

✓ <pg>

21. Let a list Fred, Alex, Diana, Byron, Carol

After sorted first sublist our list would be

✓ Alex, Fred, Diana, Byron, Carol

✓ Fred, Alex, Diana, Byron, Carol

✓ Alex, Diana, Fred, Byron, Carol

✓ Alex, Fred, Byron, Diana, Carol

22. Which of the following is not true about pseudo code?

✓ Pseudo code is an unambiguous representation

✓ Pseudo code is an informal representation

✓ Pseudo code is an algorithms representation

✓ Pseudo code is an ambiguous representation

23. Which of the following statement is true?

✓ Repeater is more complex than a bridge

✓ Bridge is more complex than a repeater

✓ Bridge and repeater both are complex

✓ Bridge and repeater both are not complex

24. The storage of a value with a fractional part requires that we store not only the pattern of 0s and 1s representing its binary representation but also the position of the_____.

✓ Decimal Point

✓ Radix point

✓ Number

✓ Factorial

25. Software packages that allow user to access hypertext on the internet are called_____.

✓ Hypersofts

✓ Browsers

✓ Linkers

✓ Routers

26. _____ is also consider as character.

✓ Numbers

✓ Small caps

✓ Large caps

✓ Space

27. Word processor like Microsoft Word is an application that

✓ Build editable word documents

✓ Build editable Program

✓ Build editable Questions

✓ Build editable excel files

28. _____ Keyword is used in python language to define a word.

✓ Define

✓ Def

✓ Dfi

✓ Dfn

29. Average amount of time required for the desired data to rotate around to the read/write head once the head has been positioned over the desired track.

✓ Random TIME

✓ Access time

✓ Seek time

✓ Rotational delay

30. Appearance of each pixel is encoded to form_____.

✓ Pixel

✓ Geometric Structures

✓ Bitmap

✓ Scaling

1. _____ is a package containing a party's name and that party's public key.

a. certification

b. Antivirus

c. Security

d. Contract

2. _____ refers to the address of a file (resource) accessible on the internet.

- a. Protocol
 - b. Uniform Resource locator
 - c. Web Browser
 - d. HTML
3. While sending a message it is the _____ layers responsibility to provide an address that is compatible with the internet infrastructure.
- a. Application
 - b. Network
 - c. Link
 - d. Transport
4. If we have to insertion sort on name Fred Alex Diana Byron Carol one approach to sorting this list is to note that the sublist consisting of
- a. Both fred and Alex
 - b. Only carol
 - c. Only top name
 - d. Sub list having 3 name
5. A sequence of transactions in which the user establishes initial contact with a computer operating system is called_____?
- a. Logout
 - b. Process
 - c. Login
 - d. Boot state
6. Program counter is a_____.
- a. General purpose register
 - b. Memory address register
 - c. Special purpose register
 - d. Common purpose register
7. Who have highly privileged access to the operating system?
- a. Admin or administrator
 - b. Administrator or authorized user
 - c. Super user or authorized user
 - d. Super user or administrator
8. Bit is:
- a. Basic unit of storage
 - b. Basic program of storage
 - c. Secondary unit of storage

- d. Not a unit of storage
9. Within a transfer category which instruction is used to communicating with device the CPU?
- a. STORE instruction
 - b. COM instruction
 - c. I/O instruction
 - d. LOAD instruction
10. CPU required at least _____ to fetch the instruction form memory.
- a. Two nanosecond
 - b. Nanosecond
 - c. Three nanosecond
 - d. One billion second
11. Which loop structure refers as a pretest?
- a. While
 - b. Do while
 - c. For
 - d. For each
12. Pseudo code is language _____.
- a. Dependent
 - b. Independent
 - c. Algorithm
 - d. Sequence
13. Average amount of time required for the desired data to the read write head once the head has been positioned over the desired track.
- a. Random TIME
 - b. Access time
 - c. Seek time
 - d. Rotation delay
14. Who introduce the idea of storing the program in main memory?
- a. John W. Mauchly
 - b. John Von Neumann
 - c. J. presper Eckert
 - d. Konrad zuse

15. The memory manager allocates———.

- a. Mass storage space
- b. Memory space
- c. Space in the process table
- d. Storage space

16. What is the full form of ASP?

- a. active start pages
- b. Active server page
- c. Alternate server page
- d. Alternate start pages

17. When you search in the Google by typing Google find all those page which contain

- a. all the terms given in the query
- b. None of the terms given in the query
- c. Some of the terms given in the query
- d. Random

18. Which protocol is suitable for wireless star network?

- a. CSMA/CD
- b. CSMA/CA
- c. ETHERNET
- d. TCP/IP

19. Which of the following is not the form of existing VoIP system?

- a. Soft phones
- b. Hard phones
- c. Analog telephone adapter
- d. Embedded VoIP phones.

20. Three –dimensional interfaces allow human users to communicate with computer by means of.

- a. 2D projection system
- b. 3D projection system
- c. Dimensional system
- d. Projection system

21. GIF can obtain additional compression by using adaptive dictionary system which technique is used by adaptive dictionary system for this purpose?

- a. Uniform length codes
- b. LZW techniques

- c. Frequency dependent codes
- d. Consecutive data units.

22. Time required to move the read/write heads from one track to another.

- a. Random time
- b. Access time
- c. Seek time
- d. Rotational time

23. Which of the following is the component name of iterative structures in which initial state is established.

- a. Modify
- b. Initialize
- c. Test
- d. Declaration

24. The execution of an algorithm must lead to.....

- a. Start
- b. End
- c. Cycle
- d. Flow

25. We need Memory to store data permanently.

- a. Volatile
- b. RAM
- c. Non-Volatile
- d. Address

1. In analysis of algorithms —————generally measured in term of the number of steps required to execute an algorithm

- a) Bandwidth
- b) Time
- c) Memory

d) Logical functions

2. An anchor tag consists of two parts: action and label. virtual university! in above example, which of the following is action part?
- a) Virtual university!
 - b) HTTP
 - c) www.vu.edu.pk
 - d) HREF
3. ————— help in finding synonyms as well as antonyms in word processors
- a) Tables
 - b) Thesaurus
 - c) Spelling & Grammar
 - d) Word count
4. Grammar and spell accuracy can be increased with the help of ————— in word processor.
- a) Word count
 - b) Table Auto Format
 - c) Spell and grammar checker
 - d) Text box
5. Attribute/attributes of the good application software is/are:
- a) Easy to install
 - b) User interface
 - c) Consistent
 - d) All of the above
6. If a computer could pass the Turing test then it would test then it would be able to:
- a) Win a million dollar prize
 - b) Think like human beings
 - c) Think but slower than humans
 - d) Do the things faster
7. ————— Contains the name of the protocol required to access the resource, a domain name that identifies a specific computer on the internet and a pathname on the computer.
- a) HTML
 - b) HTTP
 - c) WWW
 - d) URL

8. VGA port is use to connect — device

- a) Input
- b) Monitor
- c) Modem
- d) No of above

9. What will replace transistors?

- a) Electro-machanical computing
- b) Vacuum tube computing
- c) Quantum computing
- d) Nothing can replace transistors

10.VULMS is an example of — software

- a) Engineering
- b) Entertainment
- c) Educational
- d) Assume Scientific

11. Assume that you are developing washing machine. In your opinion. Which operating system will be better to fulfill requirements of a washing machine?

- a) Multi user operating system
- b) Real time operating
- c) Distributed operating system
- d) None of the above

11.Which one of the following operating system has highest security?

- a) Windows
- b) Linux
- c) Unix
- d) Mac

12.Analytical engine was a computer for

- a) Scientific use
- b) Micro processing
- c) Embedded device
- d) General purpose

13.Which one of these is not an example of storage device?

- a) CD
- b) Floppy

- c) Hard disk
- d) RAM

14. An HTML document development is developed in a plain-text editor called ———.

- a) Note Pen
- b) Notepad
- c) Text pad
- d) Editor

15. Loop in flow chart or pseudo code means

- a) A set of instruction to be executed if a specific condition is true
- b) A set of steps to be performed at once if a specific condition is true
- c) A set of step to be repeated as far as a specific condition remain true
- d) Terminating the program as soon as loop is encountered

16. The word first communication network was:

- a) WAN
- b) APPANET
- c) Intranet
- d) LAN

17. Digital computer possess two natural states ——— and ———

- a) On & on
- b) On & off
- c) Off & off
- d) None

18. Microcontroller is used to control ———

- a) Electronic equipment
- b) Mechanical equipment
- c) Electro-mechanical equipment
- d) None of above

19. Which of the following is a computer storage device that saves and retrieves the data when required?

- a) Hard disk
- b) RAM
- c) ROM
- d) None of the given choices

20. In anchor tag HREF attribute contains————

- a) Numeric value
- b) A URL
- c) A test value
- d) None of above

21. An anchor tag consists of two parts: action and label.

`<a href="http://www.vu.edu.pk">virtual university! </a>`

In above example, which of the following is action part?

- a) Virtual university
- b) HTTP
- c) www.vu.edu.pk
- d) HREF

22. If a computer could pass the Turing test then it would be able to:

- a) Win a million dollar prize
- b) Think like human beings
- c) Think but slower than humans
- d) Do the thing faster

23. Disk operating system is ————operating system

- a) Menu drive
- b) Graphical user interface
- c) Command driven
- d) None of the given

24. Punched cards were replaced by:

- a) Floppy disk
- b) Zip drives
- c) Magnetic storage
- d) None of the given choices

25. In this URL <http://www.msn.com>, what identifies the domain name?

- a) http
- b) www
- c) msn
- d) com

26.——— Consist the name of the protocol required to access the resource, a domain name that identifies a specific computer on the internet and a pathname on the computer.

- a) HTML
- b) HTTP
- c) WWW
- d) URL

27.You Need to Place University Name On top of the every page of 100 pages document and page. This can be down with the help of ———

- a) Reference initials
- b) Bullet and numbering
- c) Borders and shading
- d) Header and footer

28.A parallel port is use to connect a ———

- a) Speakers
- b) Printer
- c) Mouse
- d) Keyboard

29.Which one of these is NOT an example of embedded computers

- a) Microwave oven
- b) IMB PC
- c) Refrigerator
- d) Calculator

30.Vacuum tubes were replaced by:

- a) Transistors
- b) Electrodes
- c) Electric relays
- d) None of the given choices

31.Algorithm is a sequence of steps that can be taken to solve a given ———

- a) Task
- b) Process
- c) Problem
- d) All of given

32.A date cell of a table contain

- a) Only text

- b) Images
- c) Tables
- d) All of the given

33.To select multiple options in a list we use _____control

- a) Radio button
- b) Check box
- c) Selection list
- d) Ordered list

1	compact disk is consist of material:	Reflective
2	Digital versatile disk capacity isMB	600 to 700
3	SSDs stand for.....	solid state disk
4	ASCII codes have combinations	2 ⁷
5	Unicode's have a unique pattern ofbits.	2 ¹
6	MIDI stands for.....	musical instrument digital interface

7	Integer representation in 2's complement used normallybits	32
8	When data being compressed consist of long sequence ofsamevalue,thecompressiontechniqueiscalled	Run length encoding
9	SDHC (high capacity) can provide.GBs	32
10	Mostly computers have additional storage devices called.....	Mass storage
11	Most computers have additional memory device called mass storage is	DVD,s and flash drive
12	When you want to search Google or search a query on a particular social media, you can add a symbol?	d):"@"
13	Fact sheet of ENIAC having weight	30 tons
14	Example of search engine is -----	Google, Yahoo and MSN
15	The rate at which data transfer to or from disk	transfer rate
16	Computer hardware is the collection of of computer system	Physical parts
17	A machine especially one programmer by a computer are called	Robot s
18	Computer science applications are.....	7
19	-----Databaselearnaboutwillbeimplementedusing -- tool like Microsoft access	DBMS
20	-----Oneoftheearliercomputerdevicewasthe	Abacu

0	--	s
2 1	1 kilo byte is equal to -----	1024 byte
2 2	1 tear byte is equal to -----	1024 GB
2 3	-----Inonebitwecanrepresenttwopattern	0 or 1

24	The bit receiver is known as the machine	Main memory
25	RAM access for -----	Random access memory
26	The rate at which can be transferred to or from the disk	Transfer rate
27	BDs stand for -----	Blue ray disk
28	CAD stand for -----	Computer added design
29	Loosy techniques can often provide than ----- compression than lossless	More
30	A variation of dictionary encoding is -----	Adaptive dictionary encoding
31	----- is storage organization in which are ordered in FIFO fashion	Queue
32	Techniques that allow the steps in the machine cycle to overlap	Pipelining
33	MP3 do not require transfer rate more than....	64 Kbps
34	____successfully relayed on communication paths having 40 Mbps	MPEG

	Transfer rate.	
35	CPU and main memory connected via.....	Bus
36	MP3 is short for.....	MPEG layer 3
37	The best known system for compressing audio is.....	MP3
38	The idea of storing a computer's programme in its main memory is called.....	Stored program concept
39	CPU is designed to recognise instructions encoded as	Bit patterns
40	Collection of instructions along with the encoding system is called	Machine language
41	RISC stands for	Reduced instructions set computer
42	A request to transfer the contents of a register to a memory cell is called.....	STORE instructions
43	The commonly used standards for encoding and compressing audio and video were developed:	MPEG
44	CPU consistsparts:	3
45	The use of AND operation is an example of the process.....:	Masking
46	8Kbps=.....:	1KB per second

47	Communication between computer and other device is handling through apparatus called.....:	Controller
48	The ability of a controller to access main memory called.....:	DMA
49	WAN is abbreviated of:	wide wire network
50	The best known system of compressing audio is.....	mp3
51	Mp3 recording generally require transfer rates of no more than -----kbps.	64
52	To compare sequence of picture in MPEG only some of the pictures called	I-frame
53	A machine CPU and main memory are connected by a collection of wires called?	Bus
54	The idea of storing a computer's program in its main memory is called?	Store data
55	The now decode the content of its instruction register and executes its by activating the two's complement addition circulatory with inputs being register?	5 and 6
56	The use of AND operation example of the process called ?	Masking
57	The result of circular shift is called?	Rotation

58	Usb and Fire wire provide several?	Hundred Mbps
59	Communication between computing device is handled over path?	Serial and parallel communication
60	Gbps is?	Billion Bits
61	The portion of an operating system that handles this communication is often called the	:user interface
62	Most file manager allow files to be grouped into a bundle called	:folder
63	A chain of directories within directions calledpath	Directory
64	Components of an operating system's kernel is the	memory manager
65	The memory manger reserves of storage space on a magnetic disk	4GB
66	Rom stands for	Read only memory
67	Culprit that auditing systems are designed to detect in the presence	sniffing software

68	A network of former type is called network	Open
69	Computer network is often classified as:	All of these
70	The technique of holding data for output at a later but more convenient time is called	Spooling
71	A technique that transfer the distribution problem to internet routes --	Multi cast
72	A programme that enter a computer system disguised as a desirable programmed -----	Trojan horse
73	Transporting audio and video across the internet in real time is known as	Streaming
74	If a user is using CGI script on a UNIX server, then the script type is called.....	server side scripting
75	XML stands for	Extensible markup language
76	OSI stands for	Open system interconnection
77	3... Is a software that infects a computer by inserting itself into programs that already reside in the machine	Virus
78	is an autonomous program that transfers itself through	Worm

	a network, taking up residence in computer and forwarding copies of itself to other computer.	m
79	Another form of malicious software is	Spyware
80	Dos stands for	Denial of service
81	Problem associated with an abundance of unwanted messages is the proliferation of unwanted email called.	Spam
82	Prevention tool that has filtering connotation is the.....	Proxy server
83	SSL stands for	Secure socket layer
84	Public key is used formessages	Encrypt
85	Virus is executed in a computer	Before execution of Host
86	Explosion of replicated copies that degrade the performance of legitimate application. This is property of	Worm
87	Trojan can enter	through games and utility package
88	Spyware also called	Sniffing software
89	Process of overloading a computer with messages.	DOS

90	Software that act as a shield to protection from adverse actions	proxy server
91	Spam filter can distinguish between desired mail and spam	True
92	Which key is required to decrypt messages	private key
93	Computer Fraud and abuse act Cover	Theft of Information and worms and viruses
94	Repeaters passes signals between	Two original buses
95	A bridge is similar to a	Repeater
96	Peer-to-peer often abbreviated as	P2P
97	_____ service allow clients to rent virtual computers by the hour, without concern for where the computer hardware is actually located.	Amazon's Elastic Compute Cloud
98	The distinction between the tier-1 and tier-2 ISPs is often a matter of opinion.	True
99	An access ISP is essentially an independent internet, sometimes called	Intranet
100	The process of using DNS to perform a translation is called	DNS Lookup
101	VoIP is the abbreviation of	Voice over

		Internet Protocol
10 2	An enormous portion of current internet traffic is used for transporting audio and video across the internet in real time, is known as	Streaming
10 3	WWW is the abbreviation of World Wide Web	True
10 4	A networking technology called _____, which enables an end user to automatically connect to the closest server out of a defined group of servers helps to make CDNs practical	Anycast
10 5	A second form of VoIP consists of	Analog Telephone Adapters
10 6	The point at which one network is linked to an internet is often called	Gateway

107	Distributed system in which many independent computer work closely together to provide computation or service comparable to a much larger machine?	Cluster computing
108	Each domain must be registered with ICANN process handled by companies called?	Registrars
109	DNS mean?	Domain name System
110	Software packages that allow users to access hypertext on the internet fall into categories?	Browsers and Webserver
111	Essentially a notational system by which a text document along with the document's appearance can be encoded as a simple text file	HTML
112	Hypertext document also contain special symbol called?	Tags
113	URL means?	Uniform Resource Locator
114	Common Internet browsers include.....	Firefox, safari
115	The distinction is that a hypertext document also contains special symbol..	Tags

116	A traditional hypertext document is similar text file because text is HTML - encoded...	source version
117	HTM is essentially a notional system by which text document's...	simple text file
118	)Music is traditionally reperseted does not conform the character by character..	text file
119	The additional activity by either the browser or the web browser..	client side
120	Then it hands these segment known ..	Packet s
121	OSI standard for	Open system interconnection s
122	Origin perpare a packet it appends a value called ..	hop count
123	If two functins were performed 'PROCESS LOAN' AND ' REJECT APPRECIATION' what should be structure of problem	If-else method
124	What should be sequenc	Problem-devise plan-carry plane
125	Stepwise refinement is a strategy to conquere ____ at once	Task

126	Which strategy is contrast to stepwise refinement	Bottom-up methodology
127	Which has cause Computer science to grow so much	Algorithms and problem solving
128	As a general rule the use of a loop structure produces..... Of flexibility	higher degree
129	A method of implementing repetition is the iterative structure known as	Loop
130	Change the state in such a way that it moves towards the termination condition	Modify
131	In each iteration "i" the current value of "i" will..... With current value of "f"	Multiplied
132	The control of a loop consists of how many activities	Three
133	Repeat loop structure referred to as a	posttest loop
134	If we reach the end of the list without finding the target value our search terminates as....	Failure
135	In which collection of instructions called...	body of loop
136	Write a___ for finding maximum number from a list.	pseudo-code
137	The loop will keep executing until___ remains smaller	I

	or equal to n.	
138	Set of steps that define how a task is performed is called	Algorithm
139	In Unambiguous, the information in the state of the process must be sufficient to determine uniquely and completely the actions required by each step.	True
140	A single algorithm can be represented in _____	Many ways
141	The sentence, _____ could mean either that the grandchildren cause problems when they come to visit or that going to see them is problematic.	“Visiting grandchildren can be nerve racking”
142	One semantic structure is the _____ of a computed value.	Saving
143	Another common semantic structure is no any repetition execution of a statement or sequence of statements as long as some condition remains true.	True
134	In..... a man in Texas received very high radiations.	1986
135	Which is not the advantage of software verification	None

CS101-Introduction to Computing

All Solved MCOS With References In One File

136	Computer can execute.....of instructions in a second	Billions
137	A measure of the execution time necessary for an algorithm to complete work in a set of	Data
138	In general a recursive function is designed to test for the termination condition often called	Base or degenerative case
139	One method of implementing such repetition is the iterative structure known as:	Loop
140	In which execution of function the tested condition we're true. ??	process loan
141	select the entry in the list known as:	test entry
142	A.....methodology progresses from the specific to the general :	bottom up
143	the collection of instructions called??	Body
144	the loosely defined problem solving phases presented by the mathematicians G.polya in.....??	1945
145	Test for termination is performed before the body is executed in pretest loop:	True
146	In insertion sort Algorithms lists are sorted out into:	alphabetical order
147	IF our target value is not present in oriental list, our	By dividing into

Question No: 1 (Marks: 1) - Please choose one

Vacuum tubes were replaced by _____

- ▶ Punch cards
- ▶ **Transistors**
- ▶ Micro Processors
- ▶ Resistors

Page 14 .Prior to the transistor the only alternative to its current regulation and switching functions (TRANSfer resISTOR) was the vacuum tubes

Question No: 2 (Marks: 1) - Please choose one

Hexadecimal number system is based on ----- digits

- ▶ 2
- ▶ 8
- ▶ 12
- ▶ **16**

Question No: 3 (Marks: 1) - Please choose one

Java script interact with user through_____

- ▶ Special control
- ▶ **Internet explorer**
- ▶ Event handlers
- ▶ Java script does not interact with user

The most compelling reason people have to use *JavaScript* for web pages are to allow *interaction with users*.

<http://www.bellaonline.com/articles/art39576.asp>

Question No: 4 (Marks: 1) - Please choose one

Which one is correct for JavaScript?

- ▶ **onMouseOver**
- ▶ OnMouseOver

CS101-Introduction to Computing

► ***All Solved MCQS With References In One File***
onmouseover

CS101-Introduction to Computing

All Solved MCQS With References In One File

- ▶ All of the given

JavaScript understands onMouseOver – it is one of the pre-defined keywords in JavaScript

Page 97:

Question No: 5 (Marks: 1) - Please choose one

Programs that reside on Web servers and receive info that a user enters in a form, are known as:

- ▶ **Server-Side Scripts**

- ▶ Client-Side Scripts

- ▶ Super Scripts

- ▶ Form Scripts

Page 94: Are programs that reside on Web servers
Receive info that a user enters in a form

Process that info and take appropriate action
Examples:

CGI scripts on UNIX servers ASP
scripts on Windows servers

Question No: 8 (Marks: 1) - Please choose one

CS101-Introduction to Computing

All Solved MCQS With References In One File

The _____ is connected to all other modules of the microprocessor.

▶ **Control unit**

▶ Memory unit

▶ Floating Point unit

▶ Arithmetic and Logic unit

Page 36: A control unit is the part of a CPU or other device that directs its operation. The outputs of the unit control the activity of the rest of the device. A control unit can be thought of as a finite state machine.

Question No: 7 (Marks: 1) - Please choose one

WWW stands for:

▶ Wide World Web

▶ **World Wide Web**

▶ World White Web

▶ World Web Wide

Tag used to make a Text Bold is _____

- ▶ <BOLD></BOLD>
- ▶ **** sure
- ▶ <BODY></BODY>
- ▶ None of these

Question No: 7 (Marks: 1) - Please choose one

Which one of these is NOT an example of embedded computers?

- ▶ **IMB PC**
- ▶ Microwave oven
- ▶ Refrigerator
- ▶ Calculator

Question No: 8 (Marks: 1) - Please choose one

Supercomputers are used in:

- ▶ Weather forecasting

CS101-Introduction to Computing

All Solved MCQS With References In One File

- ▶ Aeroplane manufacturing
- ▶ Atomic bomb experiments
- ▶ **All of the given choices** Repeated

CS101-Introduction to Computing

All Solved MCQS With References In One File

Question No: 9 (Marks: 1) - Please choose one

Which one of these is NOT an example of storage devices?

- ▶ Tape
- ▶ **RAM Repeated**
- ▶ Floppy
- ▶ DVD

Question No: 10 (Marks: 1) - Please choose one

In which case Cache Memory is used

- ▶ To increase RAM speed
- ▶ To overcome BUS speed
- ▶ **To overcome Speed rate between RAM and CPU Not sure**
- ▶ To overcome CPU speed

Question No: 11 (Marks: 1) - Please choose one

CS101-Introduction to Computing

All Solved MCQS With References In One File

A set of stand alone productivity applications designed to work together known as

CS101-Introduction to Computing
All Solved MCQS With References In One File

▶ **Productivity software suites** page 84

▶ Compiled software

▶ Secure software

CS101-Introduction to Computing

- ▶ Intelligent software

Question No: 12 (Marks: 1) - Please choose one

File handling in java script is done_____.

- ▶ In more accurate way
- ▶ In more easy way
- ▶ Both more easy and in accurate way
- ▶ **Not at all**

Question No: 13 (Marks: 1) - Please choose one

Which one of the following is a valid variable name?

- ▶ Break
- ▶ Switch
- ▶ Catch

CS101-Introduction to Computing

All Solved MCQS With References In One File

► **None of the given** Lecture 21

Question No: 14 (Marks: 1) - Please choose one

An algorithm that always takes the best immediate or local solution while finding an answer is called _____

- Deterministic Algorithm
- Non deterministic Algorithm
- **Greedy Algorithm** Page 102
- Randomized Algorithm

Question No: 15 (Marks: 1) - Please choose one

A	B	C	D
4	ABC003	65	=c4=c4

Expression format in cell D4 is NOT correct.

- **True** According to Ms-Excel
- False

MIDTERM EXAMINATION Spring 2010 CS101- Introduction to Computing (Session - 5)

Question No: 1 (Marks: 1) - Please choose one

_____ language is very good for writing well-structured and readable programs, but it is not as flexible as the C programming language

- ▶ BASIC
- ▶ **PASCAL** Page 131
- ▶ JAVA
- ▶ FORTRAN

Question No: 2 (Marks: 1) - Please choose one

_____ interacts directly with the computer Hardware

- ▶ Compiler
- ▶ **Operating system** Repeated
- ▶ Application software
- ▶ Assembler

Question No: 3 (Marks: 1) - Please choose one

If type attribute of INPUT tag is set to "reset", then it will:

- ▶ Save all the data
- ▶ Set the shape of all the fields

CS101-Introduction to Computing

All Solved MCQS With References In One File

► Set all fields to their default values Sure

CS101-Introduction to Computing

All Solved MCQS With References In One File

- ▶ Do nothing, you have to write code for it

Question No: 4 (Marks: 1) - Please choose one

Programs that reside on Web servers and receive info that a user enters in a form, are known as:

▶ **Server-Side Scripts** Page 71 (Repeated)

- ▶ Client-Side Scripts
- ▶ Super Scripts
- ▶ Form Scripts

Question No: 5 (Marks: 1) - Please choose one

The world first computer program was written to compute:

- ▶ Simple sequence
- ▶ Multiple sequence
- ▶ **Bernoulli's sequence** page 9
- ▶ Increasing sequence

Question No: 6 (Marks: 1) - Please choose one

The key strengths of computers are

- ▶ Speed
- ▶ Storage
- ▶ Do not get bored
- ▶ **All of the given choices** Sure

Question No: 7 (Marks: 1) - Please choose one

_____ is the interface in computer that supports transmission of multiple

- ▶ Serial Port
- ▶ **Parallel Port** page 24
- ▶ Universal Serial Bus
- ▶ None of the given choices

Question No: 8 (Marks: 1) - Please choose one

Which of the following is NOT supported by PC's power supply.

- ▶ -12 and +12 V DC
- ▶ **-10 and +10 V DC**
- ▶ -5 and + 5 V DC
- ▶ All are supported

Question No: 9 (Marks: 1) - Please choose one

NOWRAP extends _____ of a cell, if necessary, to fit the contents of the cell the in a single line

- ▶ Height
- ▶ Length
- ▶ **Width** page 56
- ▶ Value

CS101-Introduction to Computing

All Solved MCQS With References In One File

Question No: 10 (Marks: 1) - Please choose one

We need _____ for memory management in computer

- ▶ Software
- ▶ Hardware
- ▶ **Operating System** OS is used for memory management. From Handouts.
- ▶ Application Software

Question No: 11 (Marks: 1) - Please choose one

The first component of an operating system that runs when a typical computer is turned ON, is:

- ▶ Device Manager
- ▶ File Manager
- ▶ Loader
- ▶ Device Driver

Question No: 12 (Marks: 1) - Please choose one

Speakers fall into the hardware category.

- ▶ **True**
- ▶ False

Question No: 13 (Marks: 1) - Please choose one

HTML pages are edited by _____

- ▶ MS Front page
- ▶ Notepad
- ▶ Dream weaver
- ▶ **All of These** (These all are Code Editors.)

Question No: 14 (Marks: 1) - Please choose one

PowerBuilder falls in the category of _____.

CS101-Introduction to Computing

All Solved MCQS With References In One File

- ▶ Assembly Languages
- ▶ 4-th Generation Languages
- ▶ Machine Languages
- ▶ **High-Level Languages**

Question No: 15 (Marks: 1) - Please choose one

Java script is an.

- ▶ Object based language

▶ **All of the given** page 96

- ▶ Interpreted language

- ▶ Event driven language

Question No: 16 (Marks: 1) - Please choose one

In java script objects may have _____properties.

- ▶ Single

- ▶ Several

- ▶ Multiple

▶ **All of the given options** Repeated

Question No: 10 (Marks: 1) - Please choose one

Communication protocol is a _____ that governs the flow of information over a network

- ▶ Set of protocols
- ▶ **Set of rules**
- ▶ Device
- ▶ Set of methods

CS101-Introduction to Computing

All Solved MCQS With References In One File

Question No: 11 (Marks: 1) - Please choose one

_____ If a computer could pass the Turing test then it would be able to:

- ▶ **think like human beings**
- ▶ do the things faster
- ▶ win a million dollar prize
- ▶ store more information

Question No: 12 (Marks: 1) - Please choose one

_____ The first Web browser with a GUI was generally available in:

- ▶ 1992
- ▶ **1993 Page 209**
- ▶ 1994
- ▶ 1995

Question No: 13 (Marks: 1) - Please choose one

_____ Web is a unique invention by humans in terms that it is:

- ▶ accessible to only the owners who control it
- ▶ accessible from particular locations only
- ▶ **accessible to all humans sure**
- ▶ accessible to only the educational institutes

Question No: 14 (Marks: 1) - Please choose one

_____ In this URL http://www.msn.com , _____ identifies the domain name

- ▶ http
- ▶ www
- ▶ **msn**
- ▶ com

Question No: 15 (Marks: 1) - Please choose one

_____ is simply a fast port that lets you connect computer peripherals and consumer electronics to your computer without restart.

Applications

► Scientific
Applications

► Business
Applications

CS101-Introduction to Computing

All Solved MCQS With References In One File

Question No: 18 (Marks: 1) - Please choose one

In Spreadsheets, you can create a relationship between two cells by using_____.

- ▶ Numbers
- ▶ Text
- ▶ **Formulas** Lecture 22
- ▶ None of the given choices

Question No: 19 (Marks: 1) - Please choose one

Which of the following symbol is used for multiple line comments in JavaScript?

- ▶ /
- ▶ //
- ▶ **/*** Lecture 21
- ▶ **/****

Question No: 20 (Marks: 1) - Please choose one

_____ is a system software that converts the source code written in high level language into machine language code.

- ▶ Utilities
- ▶ Drivers
- ▶ **Language Translator** Repeated
- ▶ None of the these

Question No: 21 (Marks: 1) - Please choose one

_____ is a particularly good language for processing numerical data, but it does not lend itself very well to large business programs

- ▶ BASIC
- ▶ PASCAL
- ▶ JAVA
- ▶ **FORTAN** page 131

Question No: 22 (Marks: 1) - Please choose one

CS101-Introduction to Computing

Which of the following number system is used by microprocessor?

CS101-Introduction to Computing

All Solved MCQS With References In One File

▶ Binary Lecture 8

- ▶ Decimal
- ▶ Octal
- ▶ Hexadecimal

Question No: 23 (Marks: 1) - Please choose one

The _____ Processor is specially designed for PDA?

- ▶ PowerPC

▶ StrongARM page 24

- ▶ Crusoe
- ▶ SPARC

MIDTERM EXAMINATION Spring 2010 CS101- Introduction to Computing (Session - 2)

Question No: 1 (Marks: 1) - Please choose one

Detailed plan, specifying the required resources and expected deliverables, is done in _____ phase.

- ▶ Planning
- ▶ User Requirements
- ▶ Design

▶ Developer Specification Page 136 (Repeated)

Question No: 2 (Marks: 1) - Please choose one

A combination of word processing and graphic design is

- ▶ Corel Draw

▶ Desktop Publishing page 83

- ▶ Paint

Question No: 3 (Marks: 1) - Please choose one

----- is an electronic path within a Computer System along which bits are transmitted.

- ▶ Port
- ▶ Slots
- ▶ **Bus** Not sure
- ▶ Modem

Question No: 4 (Marks: 1) - Please choose one

The key strengths of computers are

- ▶ Speed
- ▶ Storage
- ▶ Do not get bored
- ▶ **All of the given choices** Repeated

Question No: 5 (Marks: 1) - Please choose one

We can change the background color in HTML, using_____attribute of <body>

- ▶ background
- ▶ **bgcolor** For example: <body bgcolor="red"></body>
- ▶ backcolor

CS101-Introduction to Computing

All Solved MCQS With References In One File

- ▶ backgroundcolor

Question No: 6 (Marks: 1) - Please choose one

ASCII WHITE is the fastest Super computer which can perform _____ calculations in one second.

- ▶ 1.3 billion
- ▶ **1.3 trillion**
- ▶ 1.3 million
- ▶ 1.3 thousand

Question No: 7 (Marks: 1) - Please choose one

_____ is the example of server-side scripts on Unix servers.

- ▶ ASP
- ▶ **CGI** page 71 On Unix is CGI and on windows is ASP.
- ▶ VBScript
- ▶ JavaScript

Question No: 8 (Marks: 1) - Please choose one

We need _____ for memory management in computer

- ▶ Software
- ▶ Hardware
- ▶ **Operating System** OS is used for memory management, Device driver management etc.
- ▶ Application Software

Question No: 9 (Marks: 1) - Please choose one

Data was stored and counted mechanically using -----decimal storage wheels, -----
----- rotary dial switches.

- ▶ 300,400
- ▶ 1300,1400

Question No: 11 (Marks: 1) - Please choose one

In $x = x + 20$, x is called a_____.

- ▶ Constant
- ▶ String
- ▶ **Variable**
- ▶ Number

Question No: 12 (Marks: 1) - Please choose one

The transistor is a solid state semiconductor device used for amplification and switching, and has_____terminals.

two

three page32

four

one

Question No: 13 (Marks: 1) - Please choose one

A diode functions as the electronic version of a__-way valve.

▶ **one** page 32

- ▶ two
- ▶ three
- ▶ four

Question No: 14 (Marks: 1) - Please choose one

This element of Flow Chart is called_____.

- ▶ Process
- ▶ **Off page connector** Page 105
- ▶ Decision
- ▶ Connector

Question No: 15 (Marks: 1) - Please choose one

Choose the correct html format to create a checkbox.

CS101-Introduction to Computing

All Solved MCQS With References In One File

▶ <checkbox>

▶ <input type="checkbox">

▶ <check>

▶ <input type="check">

Question No: 16 (Marks: 1) - Please choose one

-----is the process of starting or restarting a computer.

CS101-Introduction to Computing

Question No: 4 (Marks: 1) - Please choose one

A computer program that facilitates the communication between the computer and a peripheral device is called____

- ▶ Operating system
- ▶ Utilities
- ▶ **Language Translator** Repeated
- ▶ Device Drives

Question No: 5 (Marks: 1) - Please choose one

To start an ordered list from 20 instead of 1, we will write

- ▶ <OL begin = "20">
- ▶ <OL initiate = "20">
- ▶ **<OL start = "20">** Lecture 9
- ▶ <OL from = "20">

Question No: 6 (Marks: 1) - Please choose one

_____is the best known builder for supercomputers.

CS101-Introduction to Computing

All Solved MCQS With References In One File

- ▶ Sun
- ▶ **Cray Research** Repeated
- ▶ Microsoft
- ▶ Apple

Question No: 7 (Marks: 1) - Please choose one

Using COLSPAN, number of rows of the current cell should extend itself

- ▶ Upward
- ▶ **Downward** Repeated
- ▶ Both Upward and Downward
- ▶ None of the given choices

Question No: 8 (Marks: 1) - Please choose one

Interactive forms are always placed_____tag-set between

- ▶ TITLE
- ▶ HEAD
- ▶ **BODY** Repeated
- ▶ HTML

Question No: 9 (Marks: 1) - Please choose one

_____manages the HW and SW resources (memory, disk drives etc) of the computer system, often invisibly.

- ▶ Explorer.exe
- ▶ System Files
- ▶ **Operating System** Repeated
- ▶ Application Software

Question No: 10 (Marks: 1) - Please choose one

Speakers fall into the hardware category.

- ▶ **True** Repeated
- ▶ False

Question No: 11 (Marks: 1) - Please choose one

_____software directly interacts with the hardware.
