PAID VU LMS HANDLING by Mam Mehwish 03184148783
Past Papers for Mids./Finals are also Available

1. Which of the following is required before the authorization process?

- Options: A) Encapsulation B) Authentication C) Abstraction D) Testing

- Correct Option: B) Authentication

2. Applications that have _____ type of architecture are common.

- Options: A) Duplicate Architecture B) Micro Services C) Monolithic D) C-Panel

- Correct Option: B) Micro Services

3. _____ is generally used to describe data centers available to many users over the Internet by providing an elastic set of resources through the use of virtual networks.

- Options: A) Microchip B) Load Increasing C) Cloud Computing D) Virtual Computing

- Correct Option: C) Cloud Computing

4. In terms of Structural Recommendations, the modules that produce data should be _____ modules that consume data.

- Options: A) Placed in the same class B) Enclosed C) Separated from D) Merged with

- Correct Option: C) Separated from

5. _____ determines what resources a user can access.

- Options: A) Sophistication B) Authorization C) Aggregation D) Authentication

- Correct Option: B) Authorization

6. _____ is a collection of principles that shapes the design of your application they may overlap and can be used in combination.

- Options: A) Architecture frame B) Application types C) Application types D) Architecture Component

MAM MEHWISH 03184148783

- Correct Option: A) Architecture frame

7. In recent times _____ has become a viable alternative for the hosting of data centers primarily for economic reasons.

- Options: A) Object Oriented Programing (OOP) B) Cloud C) Artificial Intelligence D) Local Host

- Correct Option: B) Cloud

8. Which of the following represent key areas of application design that are not related to a specific layer of the application?

- Options: A) Cross-cutting concerns B) Architecture frame C) Duplicate design abstraction D) Encapsulation

- Correct Option: A) Cross-cutting concerns

9. In terms of a deployment strategy for applications, sometimes we must make design tradeoffs due to _____ and network topologies.

- Options: A) Testing restrictions B) Development restrictions C) Requirements restrictions D) Protocol restrictions

- Correct Option: D) Protocol restrictions

10. In Client-Server Pattern, the connectors are the _____ they share among each other to carry out the system's work.

- Options: A) Messages and Servers B) Protocols and Messages C) Clients and Protocols D) Clients and the Servers

- Correct Option: D) Clients and the Servers

1. How to choose effective caching strategies?

Options:

A. Choosing strategy only depends on hiring foreign professionals and constraints of the system

B. Choosing strategy depends on office environment

C. Choosing strategy depends on problem, application type, environment, and constraints

D. Choosing strategy depends on staff skills

MAM MEHWISH 03184148783

Correct Option: C

2. _____ is a collection of principles that shapes the design of your application they may overlap and can be used in combination.

Options:

A. Architecture Component

B. Architecture styles

C. Architecture frame

D. Application types

Correct Option: B

3. In recent times _____ has become a viable alternative for the hosting of data centers primarily for economic reasons.

Options:

A. Local Host

B. Object Oriented Programing (OOP)

C. Cloud

D. Artificial Intelligence

Correct Option: C

4. Maintainability is lowered in _____ in layered pattern.

Options:

A. Closed layer

B. Open layer

C. Data layer

D. Business layer

Correct Option: B

5. Depending on your requirements, you _____ consider every quality attribute.

MAM MEHWISH 03184148783

Options:

A. Need to

B. Should always

C. Should never

D. Might or might not

Correct Option: D

6. Is an indication of the responsiveness of a system to execute any action within a given interval of time and can be measured in terms of latency and throughput.

Options:

A. Flexibility

B. Performance

C. Availability

D. Reliability

Correct Option: B

7. Which of the following helps you to turn central features such as data access, caching, workflow, and validation into actions?

Options:

A. Class diagram

B. User stories

C. Architecture frame

D. Engineering decisions

Correct Option: C

8. Applications that have _____ type of architecture are common.

Options:

A. Micro Services

B. Duplicate Architecture

MAM MEHWISH 03184148783

C. Monolithic

D. C-Panel

Correct Option: C

9. _____ determines what resources a user can access.

Options:

A. Aggregation

B. Authentication

C. Sophistication

D. Authorization

Correct Option: D

10. There are two types of quality attributes i.e. those that are measured at run time, and those _____.

Options:

A. That can only be estimated through inspections

B. That can only be estimated through unit testing

C. That cannot be estimated

D. That can only be estimated through requirements

Correct Option: A
