

CHE201 Solved MCQs for final terms.

- The mass per mole of a pure substance is called
 - Atomic mass
 - Molecular mass
 - Molar mass**
 - Avogadro's number
- Entropy is measures in
 - J/K**
 - J/mol
 - JK
 - All
- What is the normal enthalpy of vaporization water
 - 40.7 kJ / mol**
 - 40.7kJ/mol
 - 41.7 kJ/mol
 - 42 kJ/mol
- Enthalpy of formation of water is
 - 286 kJ /mol
 - 286kJ /mol**
 - 280kJ/ mol
 - 268kJ /mol
- If we double the concentration of A and quadruple the concentration of B at the same time, then the reaction rate is increased by a factor of
 - 8**
 - 6

- c) 4
d) 2
6. In zero order reaction the units of “k” are
a) Molar/s-1
b) 1/time
c) Min-1
d) M/s
7. Solubility is the maximum possible concentration, and it is given in
a) M
b) g/L
c) both
d) none
8. A solution of water and sugar is called.
a) Brine
b) Saline
c) Ammonia water
d) Syrup
9. What is the dielectric constant for methanol
a) 32.6
b) 31.6
c) 32.4
d) 36.6
10. When the free energy reaches its ----possible value, there is no more net change and the system is said to be in equilibrium.
a) Minimum

- b) Maximum
 - c) Highest
 - d) Lowest
11. The maximum diameter for a solute particle is
- a) 2 nanometer
 - b) **1 nanometer**
 - c) 0.5 nanometer
 - d) 2.1 nanometer
12. Principle which states that any change to a system at equilibrium will adjust to compensate for that change.
- a) **Le Châtelier's**
 - b) Henry's law
 - c) Van't hof equation
 - d) None
13. Kc is written
- a) With units
 - b) **Without units**
 - c) Varry Accordingly
 - d) None
14. ----- is the study of heat, work, energy, and the changes they produce in the states of systems.
- a) Physical chemistry
 - b) **Thermodynamics**
 - c) Chemistry
 - d) Analytical chemistry

15. If all visible wavelengths are transmitted (i.e., absorbs nothing), the solution sample appears ---.
- a) Blue
 - b) Black
 - c) Brown
 - d) White**
16. In zero order integral law graph slope is equal to
- a) $-ak$**
 - b) ak
 - c) 0
17. The number of particles involved in an elementary step is called
- a) Molecularity**
 - b) Order of reaction
 - c) Concentration of reactants
 - d) None
18. The steady state approximation is a method used to
- a) Derive a rate law**
 - b) Find the order
 - c) Rate of reaction
 - d) All of above
19. Automobile engines use surface area effects to---- reaction rates.
- a) Increase**
 - b) Decrease
 - c) Less

20. Henry's law is one of the gas laws formulated by William Henry in
a) 1803
b) 1809
c) 1888
d) 1880
21. Gases have a low density and are --- compressible.
a) Less
b) Highly
c) Lightly
22. For an exothermic reaction, the slope $-\Delta H / R$ is ----- and so as temperature increases, the equilibrium constant -----
a) Negative, decreases
b) Positive, decreases
c) Positive, increases
d) Negative, increases
23. Shine a light beam through colloids the pathway of the light is visible from any angle. This scattering of light is called the
a) Tyndall effect
b) Dispersing effect
c) Scattering
d) Reflection
24. AgCl is ---- chloride.
a) Insoluble
b) Soluble

Solved by; Talha Waraich, Join Facebook group VU Biology Zone

25. Gas in our cars is a --- solvent.
a) Polar
b) **Non-polar**
26. demonstrate that the free energy, not heat production, was the driver of spontaneous change in isothermal chemical reactions.
Gibbs Helmholtz
27. **Foams** are liquids or solids with a gas dispersed into them.
28. A mixture of hydrogen and chlorine will not react at all in **the dark**.
29. Dipole movement is found in?
Water
30. Freezing point is Property.
Cogitative

Remind me in your prayers & pray for my health. Regards Talha Waraich
