VUSQA'S EDUQUEST

Module 187 to 214 (MS-WORD)

Module 187

1. Word Processing: MS Word

One of the most important application software are the word processors. These software help individuals and companies to prepare digital documents in a proper format. One of the famous word processing software is MS Word, which is included in the Microsoft Office.

Figure 130 is the screen short for windows XP to open MS Word 2007.

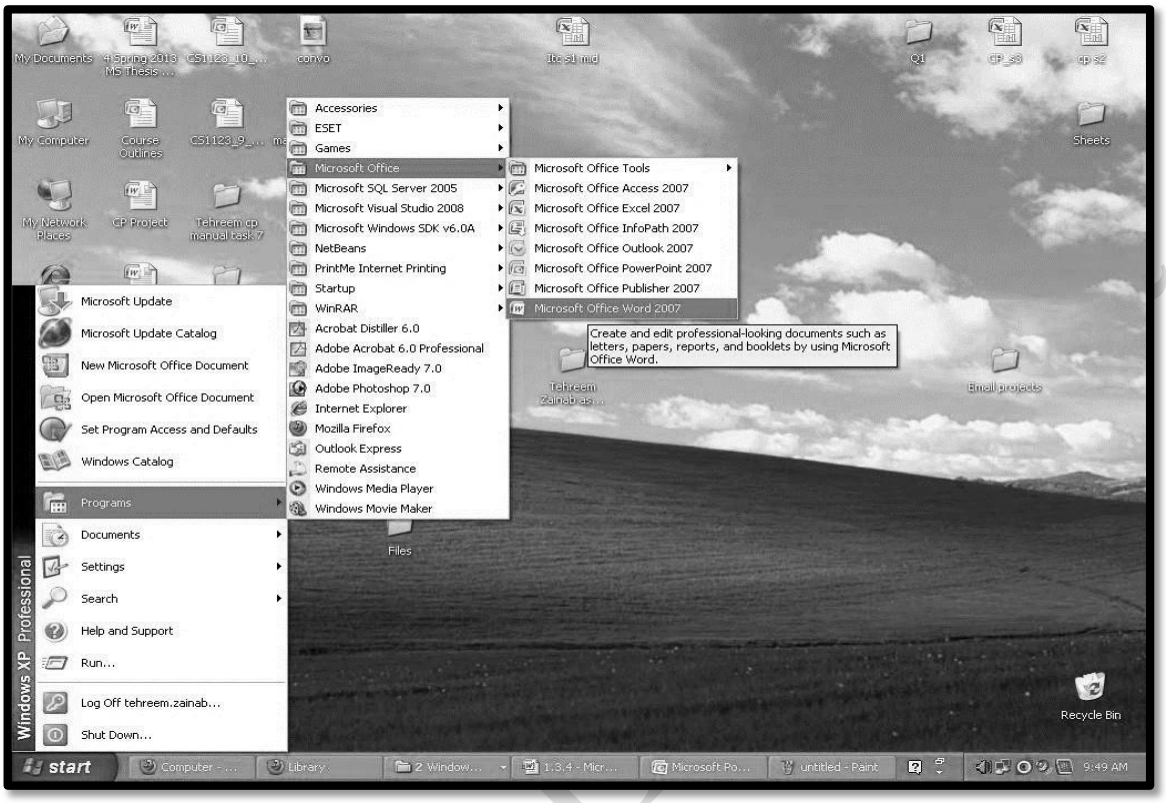

Figure 130: Start Menu to launch MS Word

The Office Button

Figure 130 shows the MS word home ribbon.

Figure 131: MS Word Home ribbon

The colorful icon in the top left-hand corner of the **Word** window (Figure 131) is the **Office button.** When you point to the Office button with the mouse pointer it will turn orange**.** When you click the left mouse button while pointing to the Office button, a menu will open that contains some of the most commonly used commands which used to be found in the **File** drop-down menu in earlier versions of **Word**. **Recent documents** are listed in the **Recent Documents** pane on the right side of the menu as shown in Figure 132.

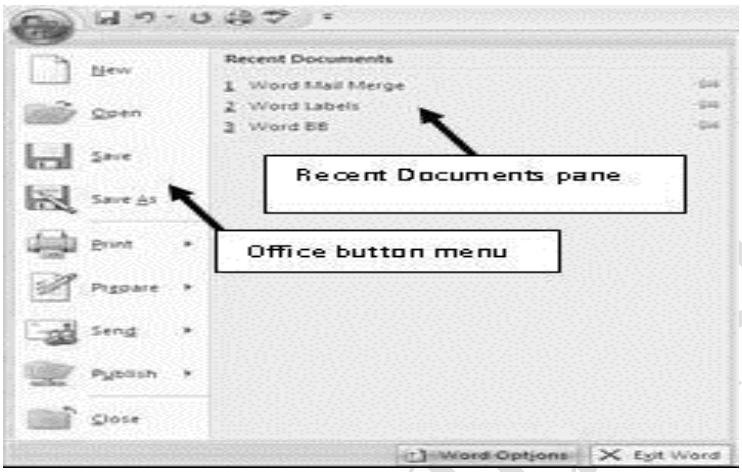

Figure 132: MS Word home ribbon after click

The ribbon is divided into Tabs, Groups, and Commands.

Each tab opens a different ribbon with groups of commands inside it. Microsoft has tried to make the placement of the commands within both groups and tabs as intuitive as possible to make them easy to find. By using the Ribbon system, the user has many less mouse clicks to execute the desired command.

The items on the ribbons are grouped together by common task. The main ribbon is the Home Tab/ribbon. The home tab/ribbon in Excel and PowerPoint are similar. Below is the image of MS Word Home Ribbon.

Below is the explanation of different components in the home ribbon of MS Word 2007.

In the lower right-hand corner of some groups is a small down pointing arrow. These are referred to as **Dialog Expanders** or **Launchers**. Clicking on the arrow will open a **Dialog window** or a **Command pane**. The dialog box may provide additional options that may not be contained on the active tab. Most of the dialog boxes that appear should be familiar; many are taken directly from earlier versions of the program.

The Ribbon has three types of Commands:

- Simple Buttons
- Drop-down menus Buttons
- Launchers (or Dialog Expanders) Buttons

Simple Buttons work as **Toggles** or **on/off switches**. When the command is off it will be surrounded by blue and look like all other commands as shown in the Figure 133. When a command button is on, it will be surrounded by orange. A command will only work when it is on. **Bold** is an example of a button as shown in Figure 133.

Figure 133: Font Panel

If you aren't sure what a command is or what a command does, place the mouse pointer over the command and hold it there. A text box will open up. The text box contains the command name, the keyboard shortcuts for the command, along with an explanation of the command as shown in the Figure 134.

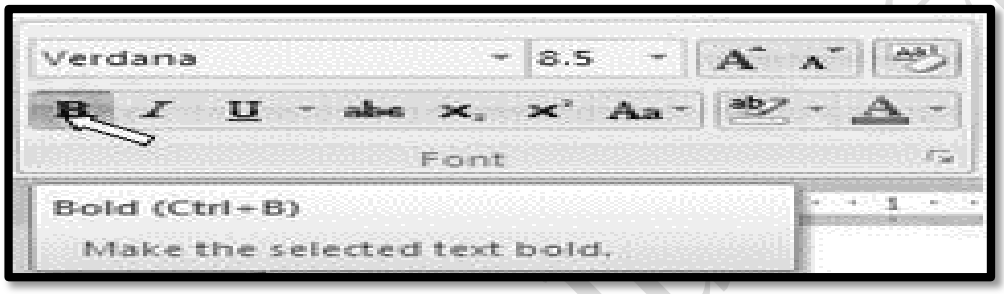

Figure 134: Bold Clicked in Font Panel

Drop-down menu buttons will have a down arrow to the right of the command. Just like buttons, the drop-down menu command will be surrounded by orange and the drop-down list will open up. **Change case** control is an example of a drop-down menu as shown in the Figure 135.

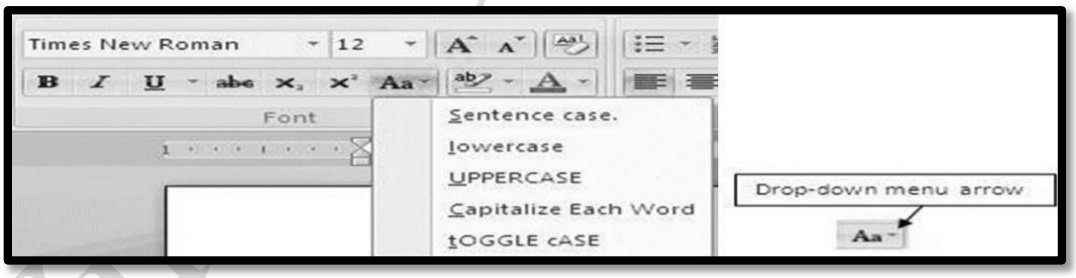

Figure 135: Font Panel Changing Case

Some commands are a combination of a **simple button** and a **drop-down menu button**. There are two buttons for these commands. The left button is a simple button and the right buttons is drop-down menu arrow button. If one clicks on the simple button the default value will be used, if one click on the drop-down menu arrow there will be a number of options available from which to choose. The default value is the last used value for the command. **Underline** is an example of a combination command as shown in the Figure 136.

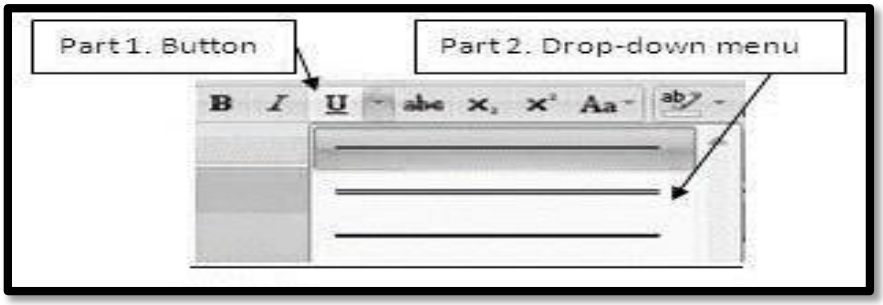

Figure 136: Underline Panel

Launcher (or Dialog Expanders) buttons

Launcher (or Dialog Expanders) buttons as shown in figure 8are usually displayed in the bottom right corner of some groups. Clicking the launcher button will open up a series of options either in a Task pane (such as the Clipboard) or a Dialog window such as the Font group.

Figure 137: Panel Launch Buttons

Mini Tool Bar

The Mini Toolbar appears automatically whenever you select text and contains common text formatting commands as shown in the Figure 138. To Use the Mini Toolbar: Select the text you want to format and click the desired command on the Mini Toolbar. Click anywhere outside the Mini Toolbar to close it.

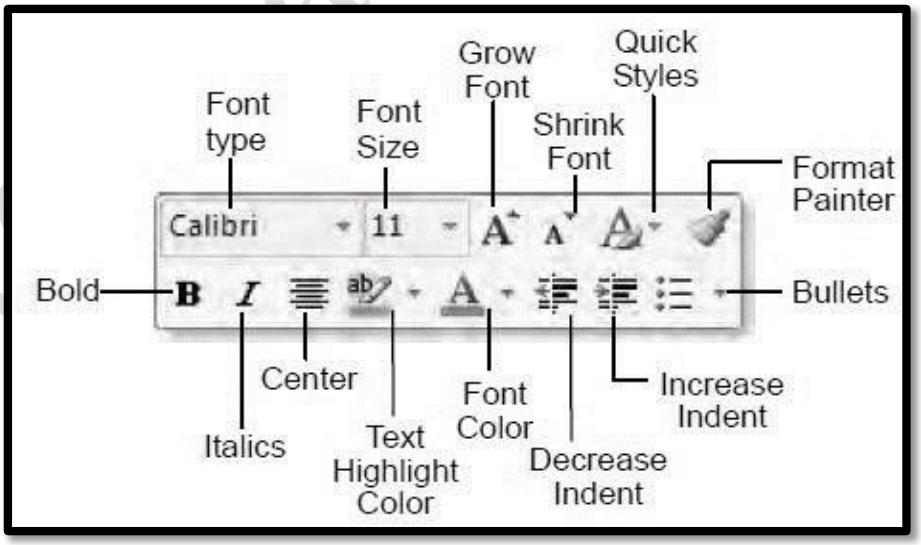

Figure 138: Mini Toolbar

Module 188

2. Word Processing: MS Word (Quick Access bar)

The Quick Access Toolbar (Figure 139) provides easy access to the commands you use most frequently. The Save, Undo, Redo/Repeat, and Quick Print buttons appear on the Quick Access Toolbar by default, but you can add and remove commands to meet your needs. You can quickly reverse most commands you execute by using Undo. If you then change your mind again, and want to reapply a command, you can use Redo as shown in the Figure 139.

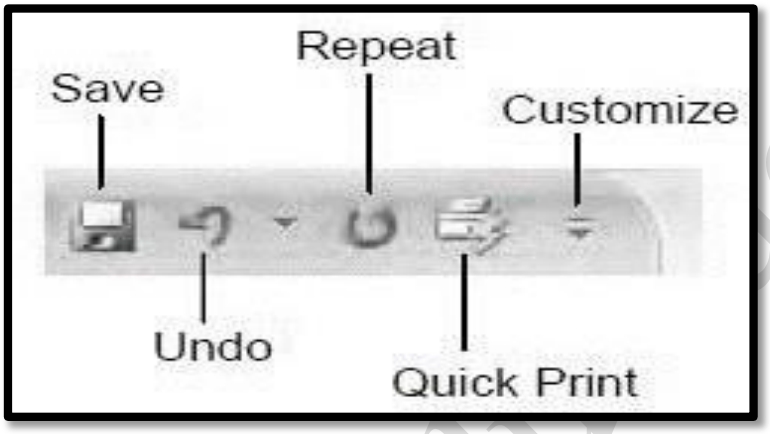

Figure 139: Quick Access toolbar

Exercise

1. Type word “Undo example”.
2. Click the Undo button on the Quick Access menu. The typing disappears.
3. Click the Redo button on the Quick Access menu. The typing reappears.
4. Select "Undo example."
5. Press Ctrl+b to bold. Word bolds the text.
6. Press Ctrl+i. Word italicizes the text.
7. Press Ctrl+u Word underlines the text.
8. Click the down arrow next to the Undo icon. You will see the actions youperformed listed. To undo the underline, click Underline; to undo the underline and italic, click Underline Italic; to undo the underline, italic, and bold click Bold etc.
9. To redo, click the Redo icon several times.

Alternate Method -- Undo & Redo by Using Keys

1. Type word “Undo example”.
2. Press Ctrl+z. The typing disappears.
3. Press Ctrl+y. The typing reappears.
4. Select "Undo example."
5. Press Ctrl+u to underline.
6. Press Ctrl+z. The underline is removed.
7. Press Ctrl+y. The underline reappears.

Module 189

3. Word Processing: MS Word (Home Ribbon)

The home ribbon is one of the most important ribbon available in the MS Word. Figure 140 shows the home ribbon. It contains different important groups such as: Clipboard, Font, Paragraph, Styles and Editing. We will be learning each module of home ribbon in the next modules in details.

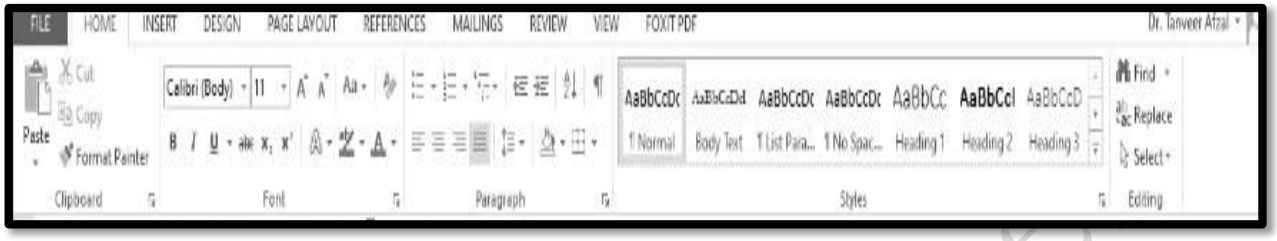

Figure 140: Home ribbon

Vusqa's EduQue

Module 190

4. Word Processing: MS Word (Clipboard Group)

The **Home** ribbon is made up of the most used commands in Word. The first group on the **Home** ribbon is the **Clipboard. Copy**, **Cut**, **Paste** and **Format Paste** are the commands within the Clipboard group as shown in the Figure 141. The Clipboard commands are on the Home ribbon of **Word** and all other Office 2007 applications that use the ribbon. The dialog expander arrow of the Clipboard group will open up the **Clipboard pane**, showing all items that can be pasted.

Figure 141: Clipboard Group

Cut and Paste

You can use Word's Cut feature to remove text from a document. You can use the Paste feature to place the information you cut anywhere in the same or another document. In other words, you can move information from one place in a document to another place in the same or different document by using the Cut and Paste features. The Office Clipboard is a storage area. When you cut, Word stores the data you cut on the Clipboard. You can paste the information that is stored on the Clipboard as often as you like.

Cut with the Ribbon

1. Type the following:
   I want to move. I am content where I am.
2. Select "I want to move."
3. Choose the Home tab.
4. Click the Cut button 

in the Clipboard group as shown in the Figure 142. Word cuts the text you selected and places it on the Clipboard. Your text should now read:
"I am content where I am."

Vusa's EduQuest

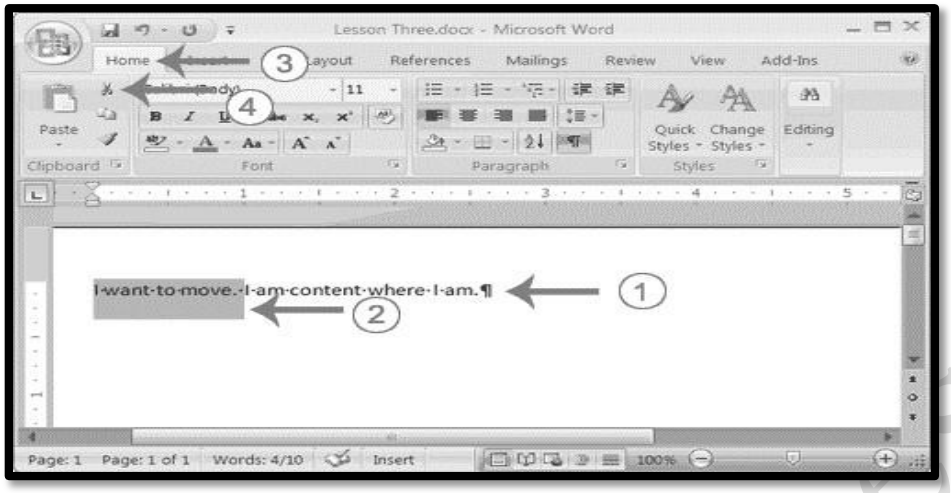

Figure 142: Cut option in clipboard group

Paste with the Ribbon

1. Place the cursor after the period in the sentence "I am content where I am."
2. Press the spacebar to leave a space.
3. Choose the Home tab.
4. Click the Paste button 

in the Clipboard group as shown in the Figure 143. Word pastes the text on the Clipboard. Your text should now read:

"I am content where I am. I want to move."

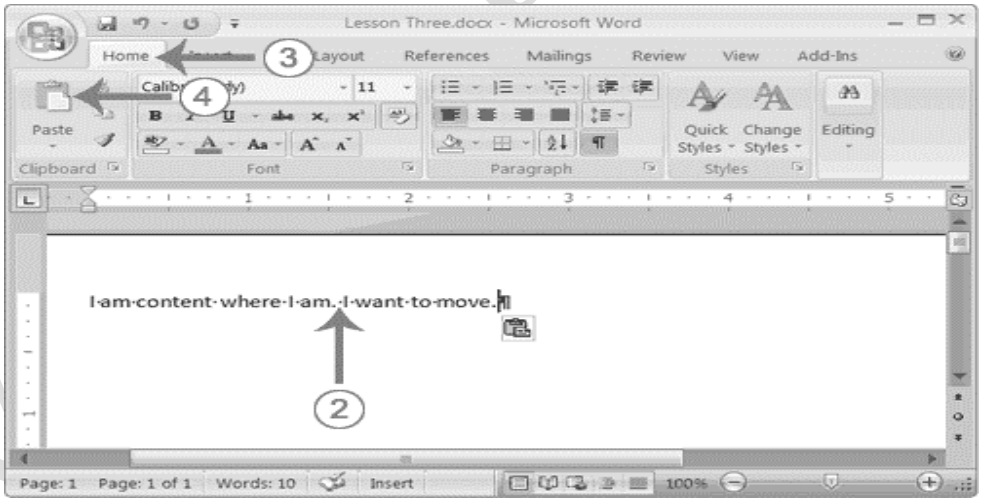

Figure 143: Pasting in Document

Alternate Method—Cut with a Context Menu

1. Type the following:
   I want to move. I am content where I am.
2. Select "I want to move."

EduQuest

3. Right-click. The Mini toolbar and a context menu appear.
4. Click Cut on the menu as shown in the Figure 144. Your text should now read: "I am content where I am."

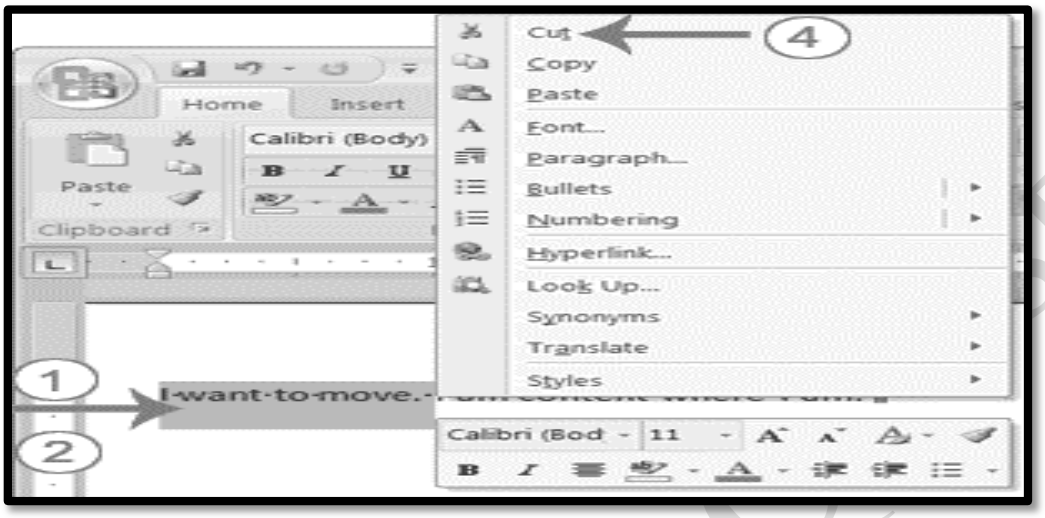

Figure 144: Pasting in Document (Alternate Method)

Alternate Method—Paste with a Context Menu

1. Place the cursor after the period in the sentence "I am content where I am."
2. Press the spacebar to leave a space.
3. Right-click. A Mini toolbar and a context menu appear as shown in the Figure 145.
4. Click Paste. Your text should now read:

"I am content where I am. I want to move."

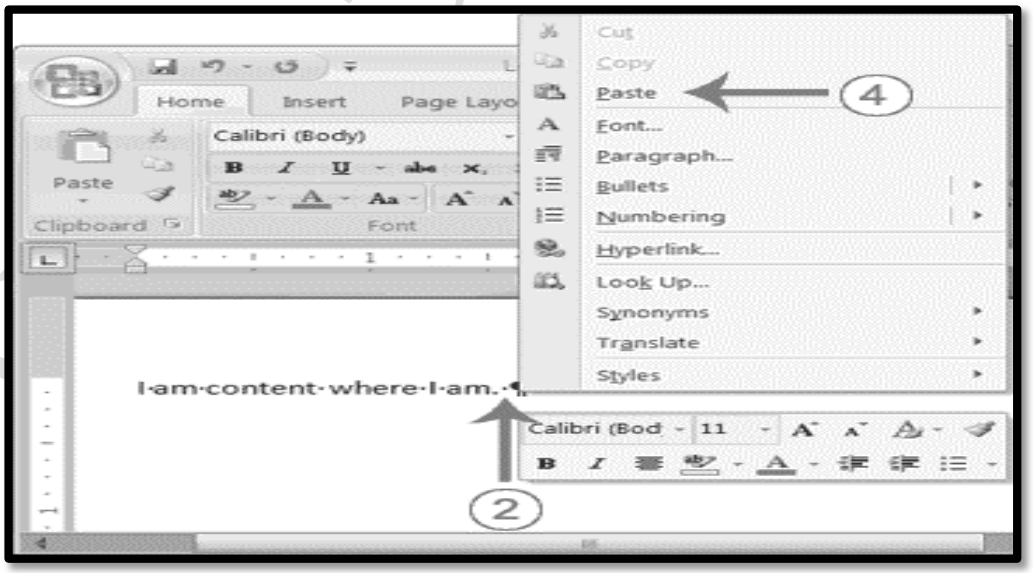

Figure 145: Pasting in Document (Alternate Method)

Alternate Method—Cut with Keys

1. Type the following:

I want to move. I am content where I am.

2. Select "I want to move."
3. Press Ctrl+x.

Your text should now read: " I am content where I am."

Alternate Method—Paste with Keys

1. Place the cursor after the period in the sentence: "I am content where I am."
2. Press the spacebar to leave a space.
3. Press Ctrl+v.
4. Your text should now read:
   "I am content where I am. I want to move."

Vusqa's EduQuest

Module 191

5. Word Processing: MS Word (Font Group)

The second group of commands on the Home ribbon is the Font group. The font group commands are format enhancing tool that includes font typefaces, font size, font effects (bold, italics, underline, etc.), colors and more. Remember that you can preview how the new font will look by highlighting the text, and hovering over the new font typeface as shown in the Figure 146. The expander arrow in the Font group will open up the Font dialog window.

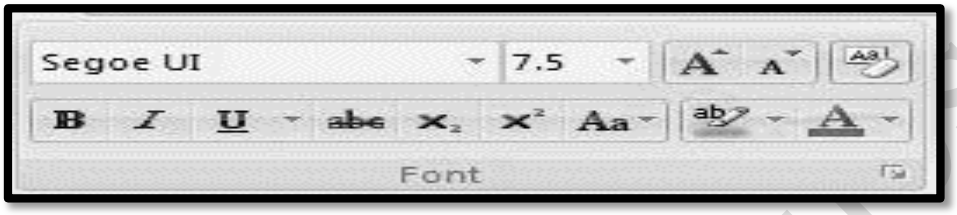

Figure 146: Font group

7.1.1 Basic Text Editing (Font Group Task)

Type your name in document window at insertion point as shown below in the Figure 147.

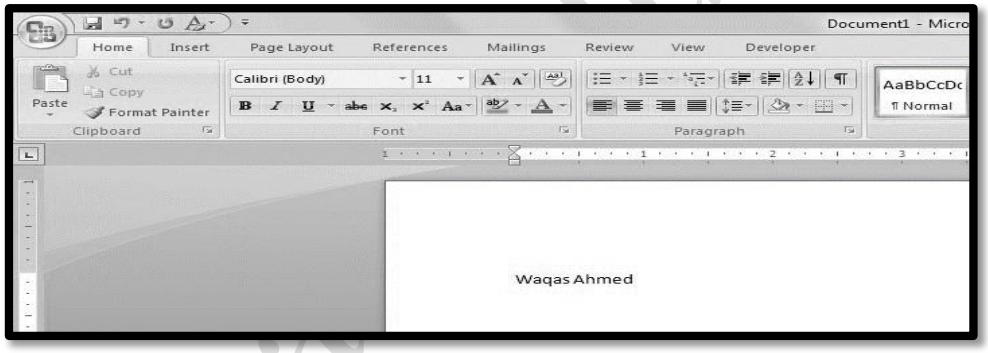

Figure 147: Typing your name

Change the font of your name to Arial. (Home Tab -> Font Group -> Font Arrow) as shown in the Figure 148.

Figure 148: Changing font

By keep selecting the name, make it bold and underlined. (Home Tab ->Font Group -> Bold & Underline Buttons) as shown in the Figure 149.

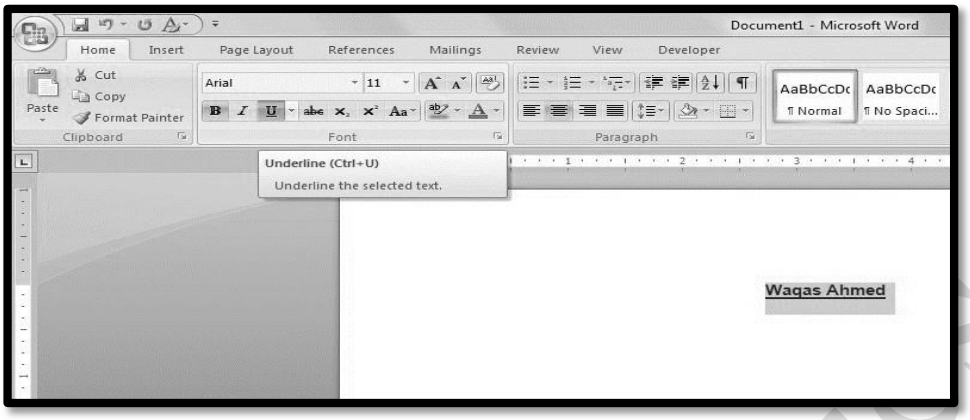

Figure 149: Applying bold and underline

Change the font size of your name to 24. (Home Tab -> Font Group -> Font Size Arrow) as shown in the Figure 150.

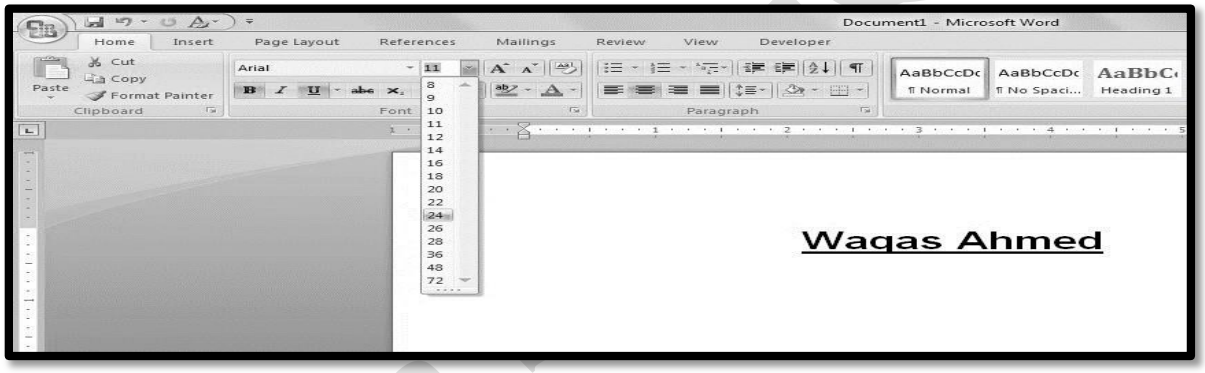

Figure 150: Changing Font Size

Vusqa Quest

Module 192

6. Word Processing: MS Word (Paragraph Group-I)

The third group on the Home ribbon is the **Paragraph** group. The paragraph group allows you to change **Paragraph Alignment** (left, right, centered, or justified), adjust **Line Spacing** within a paragraph, and adjust **spacing before and after paragraphs,** along with working with paragraph **Indentation** as shown in figure 151**.** This is also the area where you can add **bullet lists**, number **lists**, or **outlines form** to a documents. The Dialog expander arrow will open the **Paragraph dialog** window.

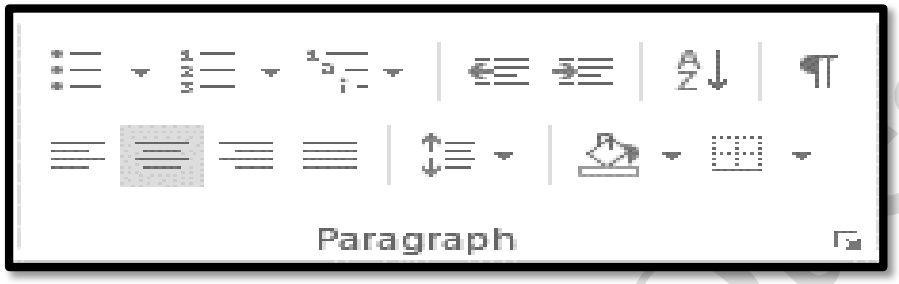

Figure 151: Paragraph Group

Bullets and Numbers

If you have lists of data, you may want to bullet or number them. When using Microsoft Word, bulleting and numbering are easy. The first part of this lesson teaches you to bullet and number.

In Microsoft Word, you can easily create bulleted or numbered lists of items. Several bulleting and numbering styles are available, as shown in the examples. You can select the one you wish to use as shown in the Figure 152 and Figure 53.

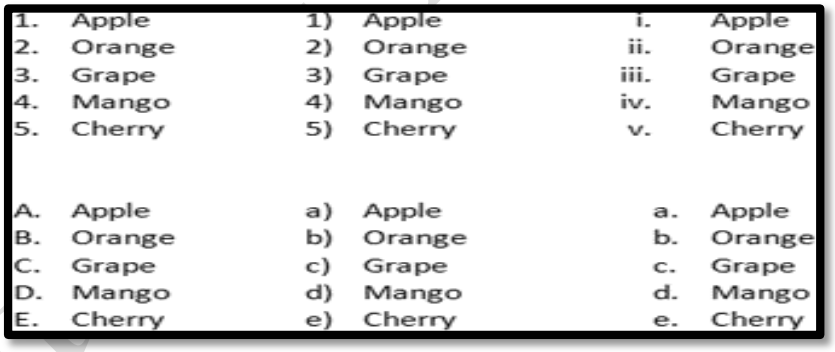

Figure 152: Numbers varriations in paragraph group

VuQuest

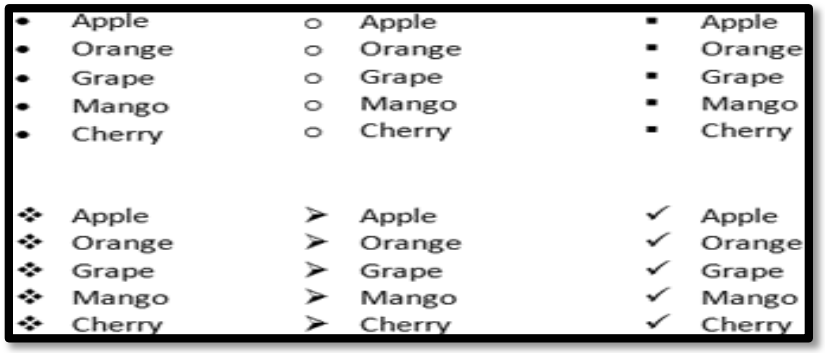

Figure 153: Bullets variations in paragraph group

Vusqa's EduQuest

Module 193

7. Word Processing: MS Word (Paragraph Group-II)

You can create your own bullet library. Perform the following steps:

1. Type the following list as shown:

   Apple
   Orange
   Grape
   Mango
   Cherry

2. Select the words you just typed.
3. Choose the Home tab.
4. In the Paragraph group, click the down arrow next to the Bullets button . The Bullet Library appears.
5. Click to select the type of bullet you want to use as shown in the Figure 154. Word adds bullets to your list.

Note: As you move your cursor over the various bullet styles, Word displays the bullet style onscreen.

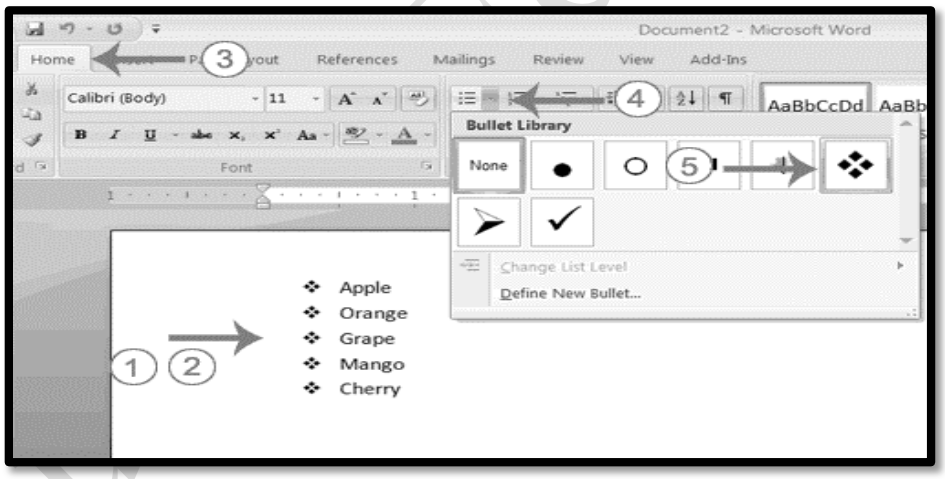

Figure 154: Bullet selection

To remove the bulleting:

1. Select the list again.
2. Choose the Home tab.
3. In the Paragraph group, click the down arrow next to the Bullets icon. The Bullet dialog box appears.
4. Click None. Word removes the bullets from your list.

Numbers Task

1. Type the following list as shown:

Apple Orange Grape Mango Cherry

2. Select the words you just typed.
3. Choose the Home tab.
4. In the Paragraph group, click the down arrow next to the Numbering button  . The Numbering Library appears as shown in the Figure 155.

Click to select the type of numbering you want to use. Word numbers your list. **Note:** As you move your cursor over the various number styles, Word displays the number style onscreen.

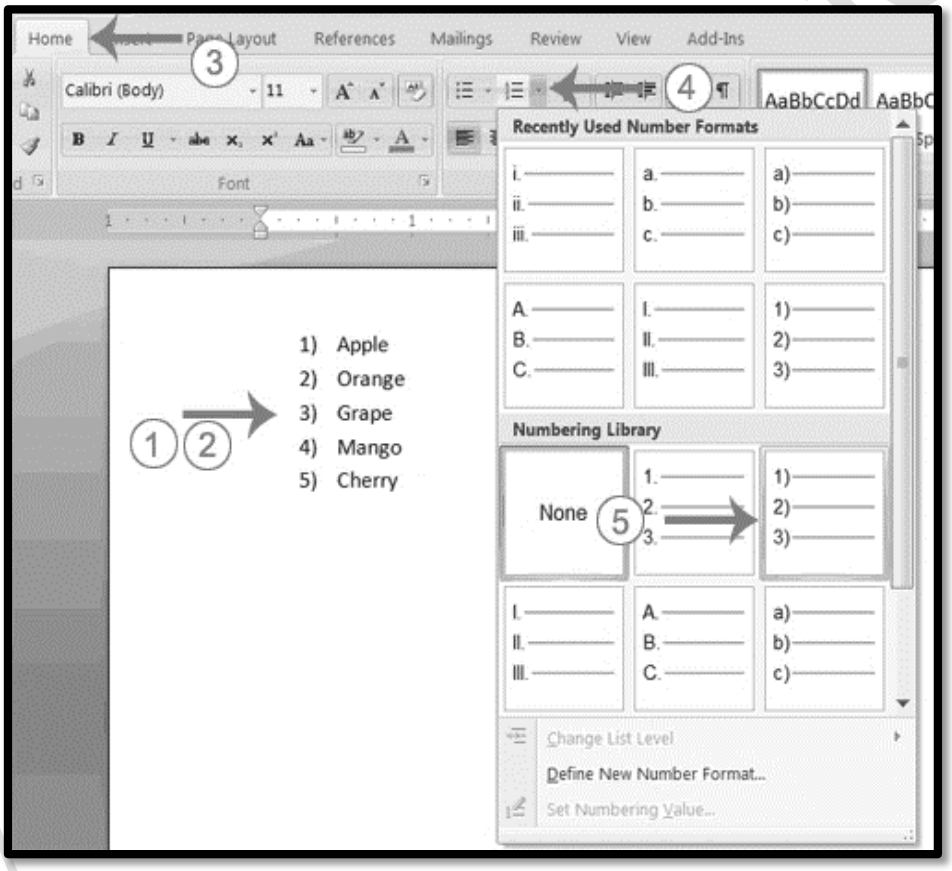

Figure 155: Adding Numbered Lists

To remove the numbering:

1. Select the list again.
2. Choose the Home tab.
3. In the Paragraph group, click the down arrow next to the Numbering icon. The Number dialog box appears.
4. Click None. Word removes the numbering from your list.

Module 194

8. Word Processing: MS Word (Style Group)

The fourth group on the Home ribbon is the **Style** group as shown in the Figure 156. Styles are a collection of formatting options that you can apply to text. When you use styles to format your document, you can quickly and easily apply a set of formatting choices consistently throughout your document.

Figure 156: Style Group

A **style** is a set of **formatting characteristics**, such as font name, size, color, paragraph alignment and spacing. Some styles even include borders and shading. For example, instead of taking three separate steps to format your heading as 16-point, bold, Cambria, you can achieve the same result in one step by applying the built-in Heading 1 style. You do not need to remember the characteristics of the Heading 1 style. For each heading in your document, you just click in the heading (you don't even need to select all the text), and then click Heading 1 in the gallery of styles.

Vusqa's Edu Quest

Module 195

9. Word Processing: MS Word (Editing Group)

The Fifth and final group (Figure 157) on the Home ribbon is the **Editing** Group. The commands in the Editing group are **Find**, **Replace**, and **Select**. When you create a document in Microsoft Word, you may decide to change a certain word or phrase that is repeated throughout the document. Let the computer do the hard work with the **Find** and **Replace** feature in Word and you can be sure you didn't miss any.

Figure 157: Editing group

Under the **Find** command, there is the **Go To** command. The Go To command can be used to immediately go to a page, a section or any marked location within your document.

The **Select** command can be used for different purpose.

- To select all of the text in the document, click **Select All**.
- To select shapes that are hidden, stacked, or behind text, click **Select Objects**, and then draw a box over the shapes.
- To select text with similar formatting, click **Select Text with Similar Formatting**.

Module 196

10. Word Processing: MS Word (Insert Functionalities)

Insert Tab can be used if you want to add to graphics or link your document with another document. The initial part of the insert tab in word ribbon has been shown in the Figure 158.

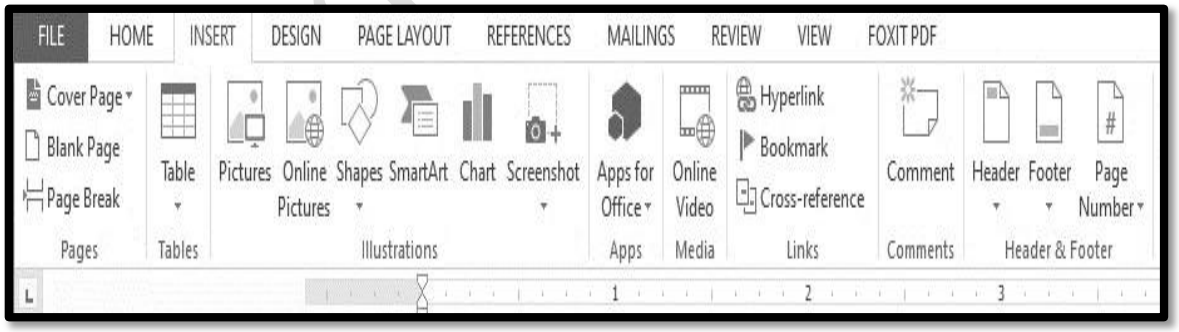

Figure 158: Inert tab

In the insert tab, the following groups are available which will be covered in the next modules:

- ✓ Pages Group
- ✓ Tables Group

Ida's EduQuest

- ✓ Illustrations Group
- ✓ Media
- ✓ Links
- ✓ Comments
- ✓ Header & Footer
- ✓ Text
- ✓ Symbols

Vusqa's EduQuest

Module 197

11. Word Processing: MS Word (page Group)

Pages group is in the far left of the insert tab. You can insert from the three categories for pages which are; Cover Page, Blank Page, and Page Break as shown in the Figure 159. These features are useful if you are creating a professional or long document.

Figure 159: Pages group in the insert tab

Cover Page

Cover Page is the title page of the document. Word 2007 provides a number of preformed cover pages to give your document a professional look.

Cover page Exercise: Creating a Cover Page

1. Click the **Insert** tab to make it the active tab as shown in the Figure 158.
2. To open the **Built-in Cover Page Gallery**, click the **down arrow** to the right of **Cover Page** in the **Pages** group on the **Insert** tab as shown in the Figure 160.

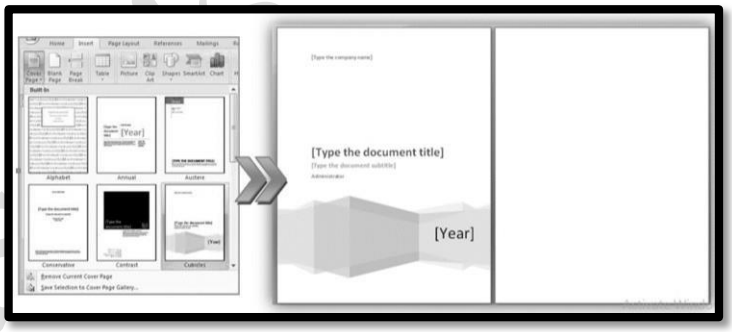

Figure 160: Inserting Cover Page

3. Scroll down and **click** the desired cover for the document from the **Cover Page Gallery**. Use the scroll bar or scroll arrow to see all the cover page choices.
4. A Cover page will be added to your document.

Remove the Cover Page

1. Click the **Insert** tab to make it the active tab.
2. To open the **Built-in Cover Page Gallery**, click the **down arrow** to the right of **Cover Page** in the Pages group on the **Insert** tab.

Yusuf's EduQuest

3. Scroll down and select **Remove Current Cover Page** as shown in the Figure 161.

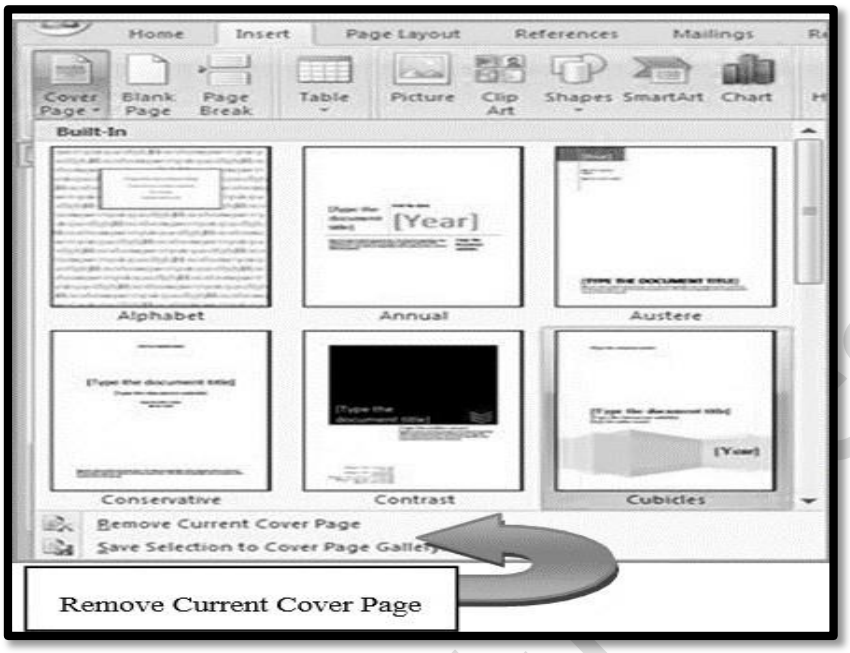

Figure 161: Removing cover page

Blank Page

Generally, Word inserts a blank page automatically while you are typing. Blank Page in Insert tab can help you add a new page anywhere in a document when required.

Try inserting a blank page to your document.

1. Click where you want to insert a new page i.e. before or after some text.
2. Click on Blank Page in Insert Tab (Figure 158).

Page Break

Page Break button will force a page break anywhere you select in your document.

1. click where you want to insert Page Break
2. Click page break (Figure 158).

Vusqa's Edu Test

Module 198

12. Word Processing: MS Word (Table Group)

Word provides tables option for placing data in a more formal way.

1. Click on table in insert tab. (Figure 162).

Figure 162: Tables group

2. To add Rows and Columns, select top to bottom for rows & left to right for columns (Figure .163)
3. Click to apply when happy with the selection.
4. Click on the box to enter text.
5. Observe the new tab opened "Table Tools". You can use this tool to apply further formatting to your created table

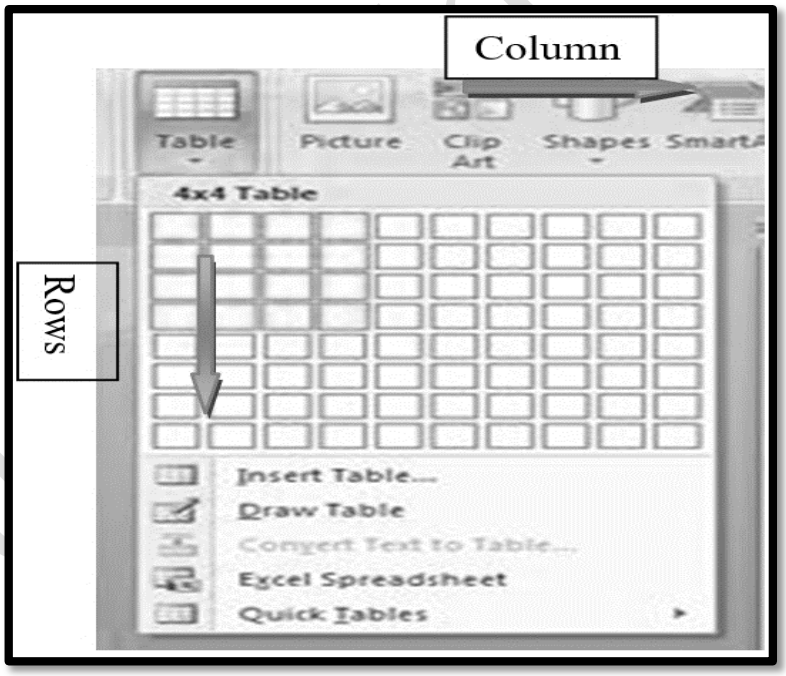

Figure 163: Selecting Rows and Columns

VuQuest

Module 199

13. Word Processing: MS Word (Illustration Group)

Using Illustrations (Figure 164), you can add pictures of all types and styles to your document. Followed is detail description on how to add illustrations.

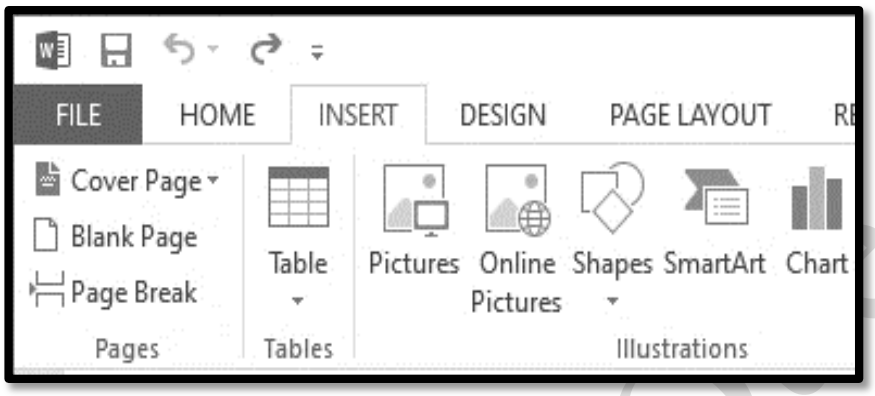

Figure 164: Illustrations

Picture

The first selection in Illustrations is Insert a picture from a file. When you click on this a window will open for you to browse to a photograph or other picture you have saved on your computer.

Clip Art

To illustrate a specific concept, you can Insert Clip Art in your document, including media file (sound and video clips) and drawing.

Shapes

Word 2007 provides a wide range of shapes (Figure 165) to select and insert in your document as per your requirement. It also provides Canvas to place all the Shapes at one place without being disturbed when further changes are made as shown in the figure 166. Each shape belongs to one of the following subcategory i.e. Lines, Basic Shapes, Block Arrows, Flow Charts, Callouts, Stars and Banners.

1. Click on Shapes in Insert Tab and draw a new Canvas Figure 165.
2. Insert shapes given in Figure 166.
3. Arrange inserted shape to form Snow Man as done in Figure 167.

Vusat's EduQuest

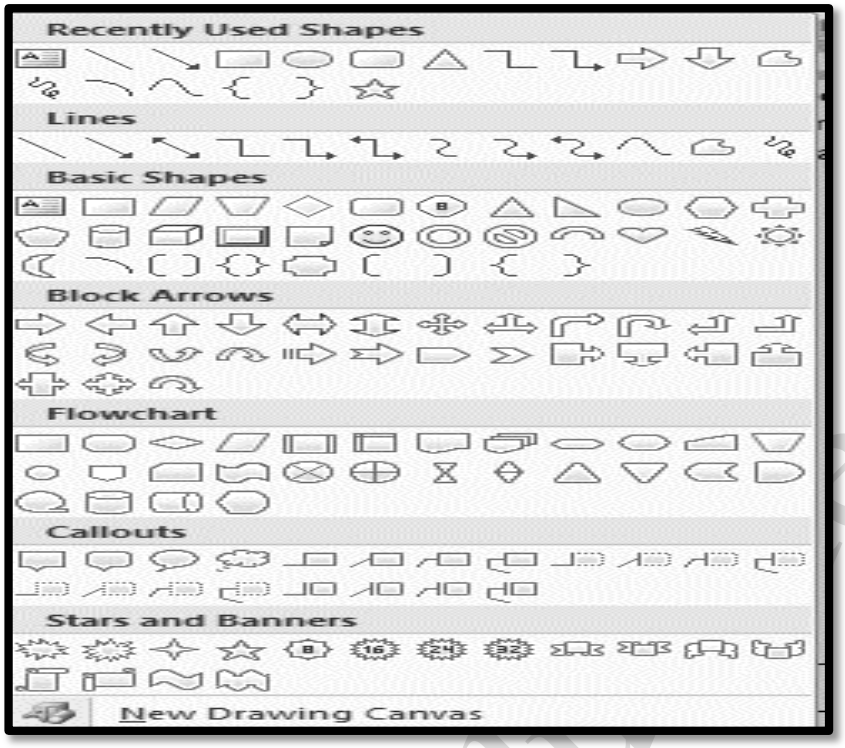

Figure 165: Shapes types in Word

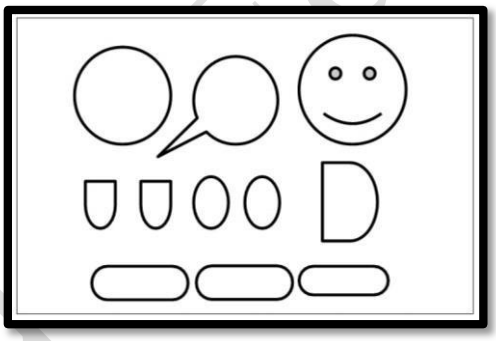

Figure 166: Shapes required to make snowman

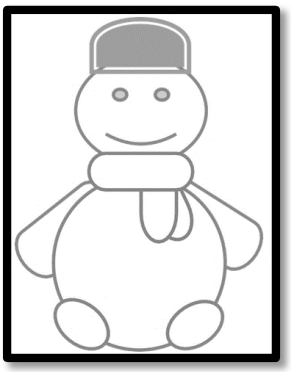

Figure 167: Snowman

Vusq Educ est

Smart Art

A new feature introduced in Word 2007 is Smart Art. Using Smart Art, you can communicate your ideas visually. Whether it's a process, hierarchy or life cycle all can be illustrated using Smart Art as shown in the Figure 168.

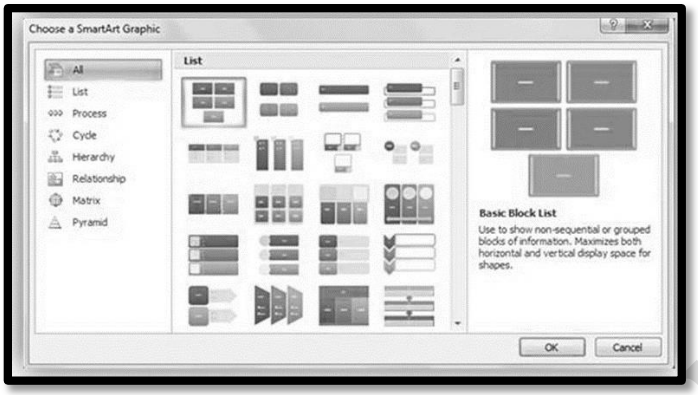

Figure 168: Smart Art

Exercise: How to add Cycle Smart Art

1. Click on Smart Art Button in Illustration group of Insert Tab
2. Click Cycle in the left pane of opening window (Figure 169)
3. Select Basic Cycle Figure 169.
4. Click On [TEXT] to add text. "Baby", "Child", "Teen" and "Adult". Notice the extra Circle left (Figure 170).

Click on the remaining circle and press Delete (Del) Key on your keyboard to remove it (Figure 171).

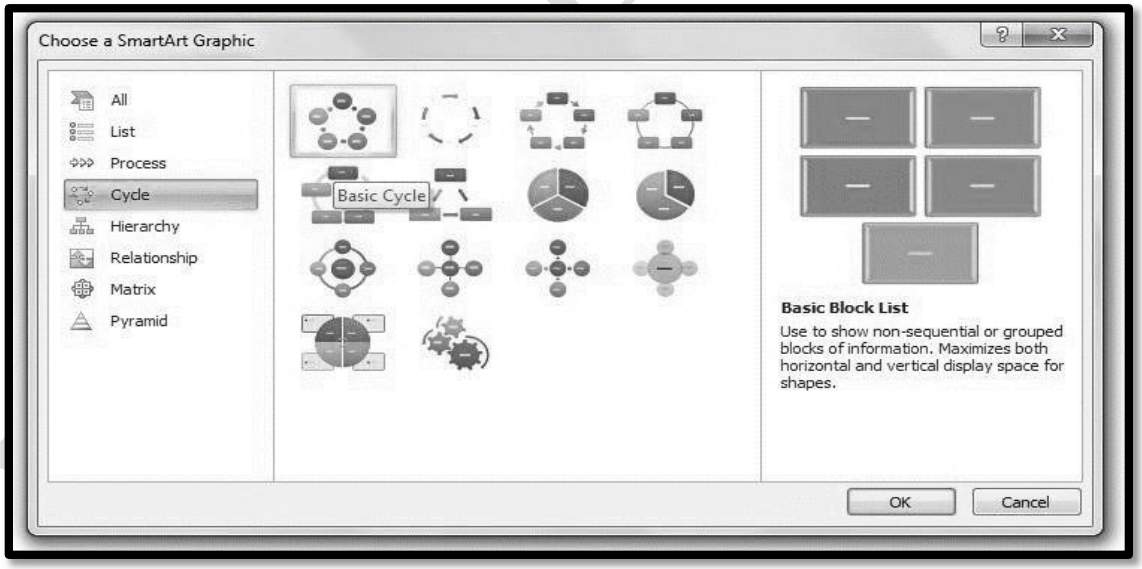

Figure 169: Basic cycle

EduQuest

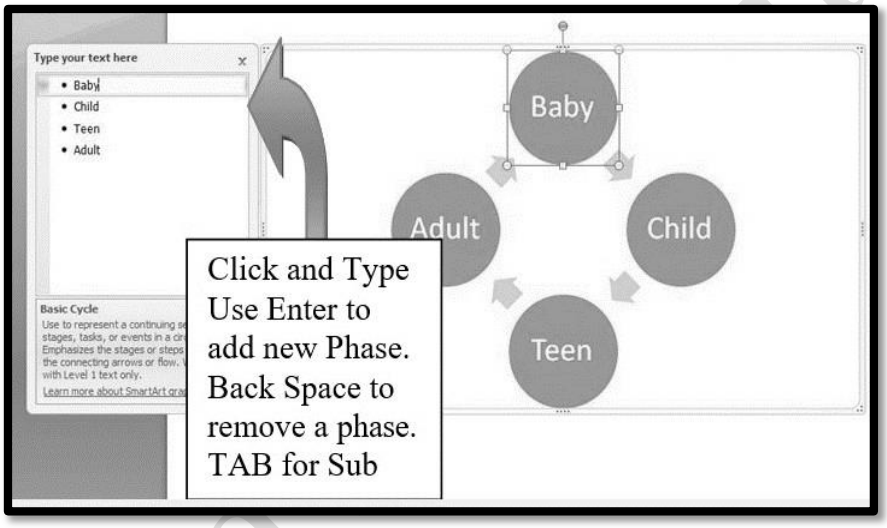

Figure 171: Adding and Removing Objects

Vusqa Guest

Module 200

14. Word Processing: MS Word (Media and Links Groups)

Links toolbox (Figure 172) in Insert tab helps link other documents in your current document and also helps you keep track of reading by providing Bookmark facility.

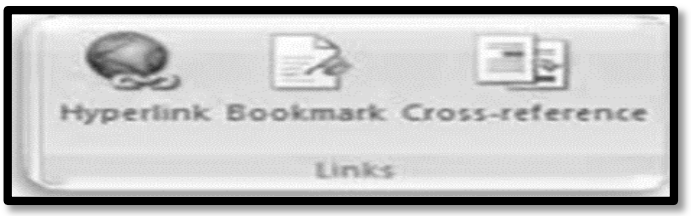

Figure 172: Links group

Hyperlink

Hyperlink is used to add link of other documents or web pages in your Document. Here is how you can add Hyperlink. Click on hyperlink in insert ribbon tab, a window will open as in the Figure 173.

1. Enter word or phrase to display hyperlink
2. Click to add text displayed when mouse is over the hyperlink text
3. Select Bookmark
4. Select respective option to locate file or web links that you want to add in document
5. Address bar
6. You can link to various files i.e. existing file in your system, link to place within document (ideal to link table of contents with headings).

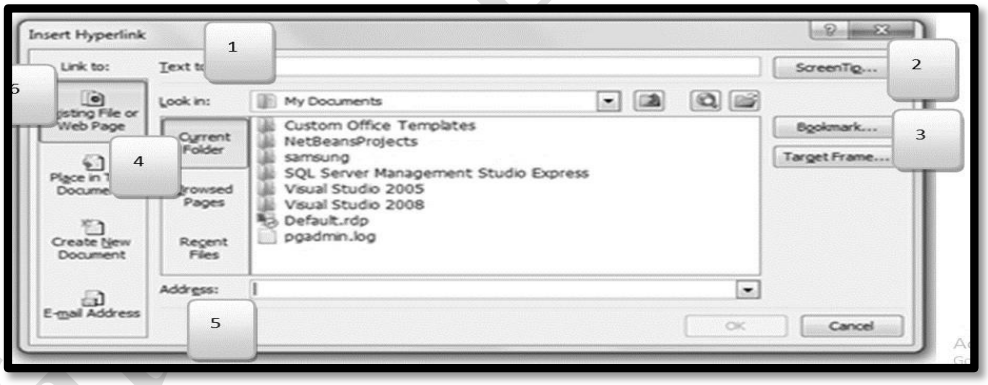

Figure 173: Adding Hyperlink

Bookmarks

Bookmarks are a way to keep track of reading. They are similar to bookmarks you keep while reading a favorite novel or story book like, turn the corner of the page or place pen or pencil.

Bookmarks Exercise: How to Use Bookmark

1. Click where you want to place bookmark.
2. From insert ribbon tab select bookmark (Figure 174)
3. Enter bookmark name say" Mark1" (without space) and click add.

VU EduQuest

4. To continue from where you placed bookmark repeat step 2 and select saved “Mark1” bookmark.

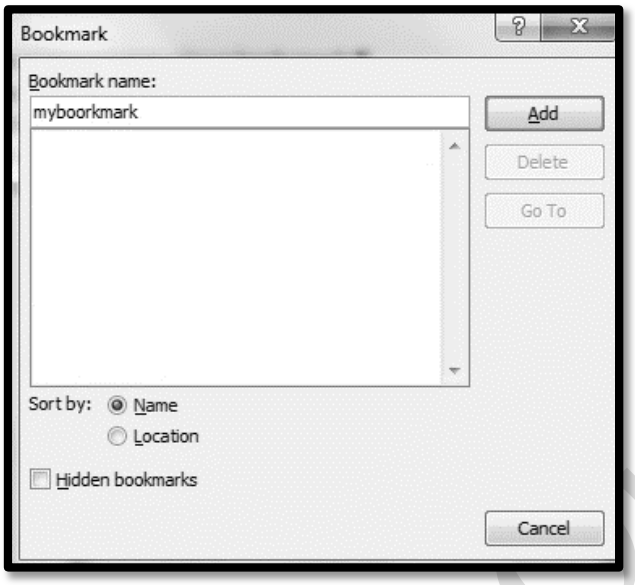

Figure 174: Adding Bookmark

Vusqa's EduQuest

Module 201

15. Word Processing: MS Word (Comments and Header & footer)

Header and Footers are areas where you can add Text or Graphics. Any formatting applied in these areas will be shown throughout the document. A header is at the top margin; a footer is printed in the bottom margin For Example observer the top of this page and all the pages in the document you will see same header and footer format.

Figure 175: Header and Footer

Exercise: How to Use Header & Footers

1. Click on insert ribbon tab select header.
2. Page header will open in edit mode. (Figure 176)
3. Enter text "Virtual University of Pakistan, as shown in the Figure 176.
4. Close header& footer (Figure 177).

Similarly, you can add footer. Please note you can even add images to the header, footer or both.

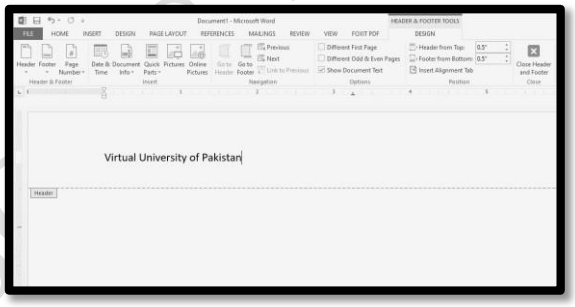

Figure 176: Header in edit mode

Figure 177: After Header Insertion

VuStudent EduQuest

Module 202

16. Word Processing: MS Word (Text Group (Part-1))

Text Box in Insert Ribbon tab can be used to add graphical formatting. This has been shown in the Figure 178.

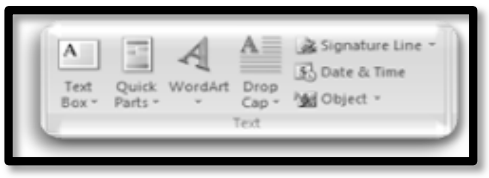

Figure 178: Text group

Exercise: How to Use Text box (Figure 179)

1. Click the Text Box button, located in the Text group on the Insert tab. From the menu that appears, choose Draw Text Box.
2. Click where you want one corner of the text box to appear and drag to where you want the opposite corner.
3. Release the mouse button and then type your text.

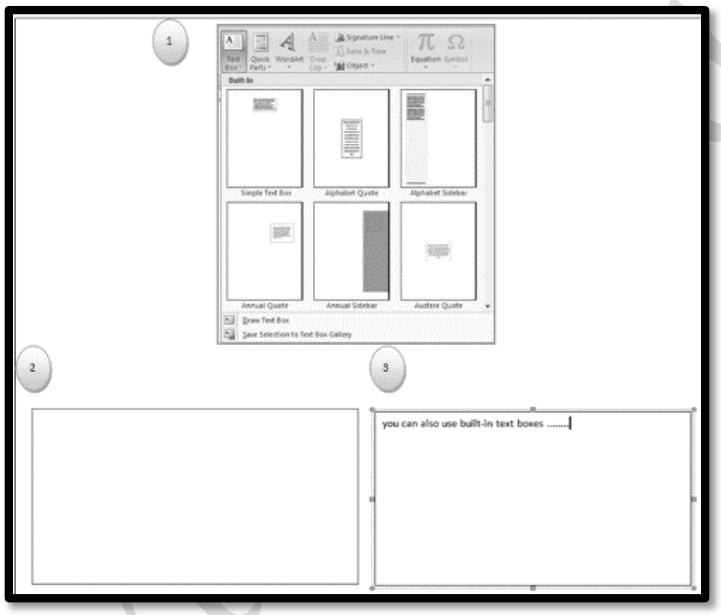

Figure 179: Adding Text Box

Quick parts

Quick Parts are a new feature in Word 2007 that allows you to save text or graphics in what Microsoft calls "Building Blocks" and then call it up quickly when you need it. This is especially handy for inserting information such as a Company Name, Logo, Company Address or any other information that you use often.

Exercise: How to Create a Quick Part

1. Select the text you want to reuse. To include paragraph formatting, make sure you select the ending paragraph mark.
2. Click the Insert tab on the Ribbon.
3. Click the Quick Parts button and click Save Selection to Quick Part Gallery.
4. Enter in the desired properties for the Quick Part.
5. To insert a Quick Part that you have saved, click the Quick Parts button and choose the Quick Part you want to use.

Word Art

WordArt can be used to produce special text effects in a Microsoft Word document. For example, you can create curved, slanted, or three-dimensional text by inserting a WordArt object.

Exercise: How to add Word Art

1. On the Insert tab and then Click WordArt.
2. In the WordArt Gallery dialog box, double-click the style that you want (Figure 180).
3. In the Edit WordArt Text dialog box, type your text and select font and size.
4. Click Bold or Italic to make all the text bold or italic. (Note you cannot apply bold or italic to only a part of the text.).

5. In the Edit WordArt Text dialog box, click OK. To insert into the document.

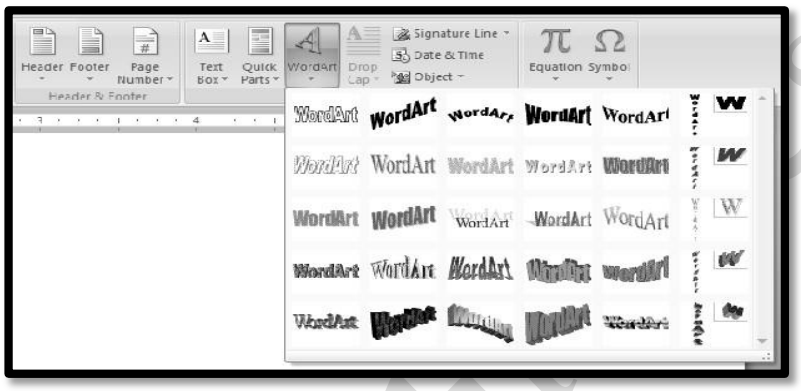

Figure 180: Word Art Gallery

Vusqa's Edu Test

Module 203

17. Word Processing: MS Word (Text Group (Part-II) and Symbols Group)

Drop Cap

A drop cap is a specially formatted letter that appears at the beginning of a paragraph just like you see in newspapers or in books. Microsoft word offers drop caps in two styles. Most commonly used drop cap begins the paragraph with a large letter that spills down into the text. Thus, the drop cap shifts the first few lines of the paragraph.

Exercise: How to Use Drop Cap

1. Type the paragraph as you normally would.
2. Open the Insert tab on the Ribbon and click the Drop Cap button.(Figure 181)
3. Choose the drop cap style you want to use.
4. Adjust the drop cap, if you want to.

Symbols

Another feature found is Microsoft Word is Symbols. You can add pre-made mathematical Equations and various Symbols where required in your document. However, if you cannot find what you want, you can also create your own equations.

Exercise: Using Symbols

1. Locate the Equation button in the Symbols group of the Insert tab on the Ribbon.
2. Click the button (not its menu triangle), and two things happen. First, an equation control is inserted into your document at the insertion pointer's location. Second, the Equation Tools Design tab appears on the Ribbon.

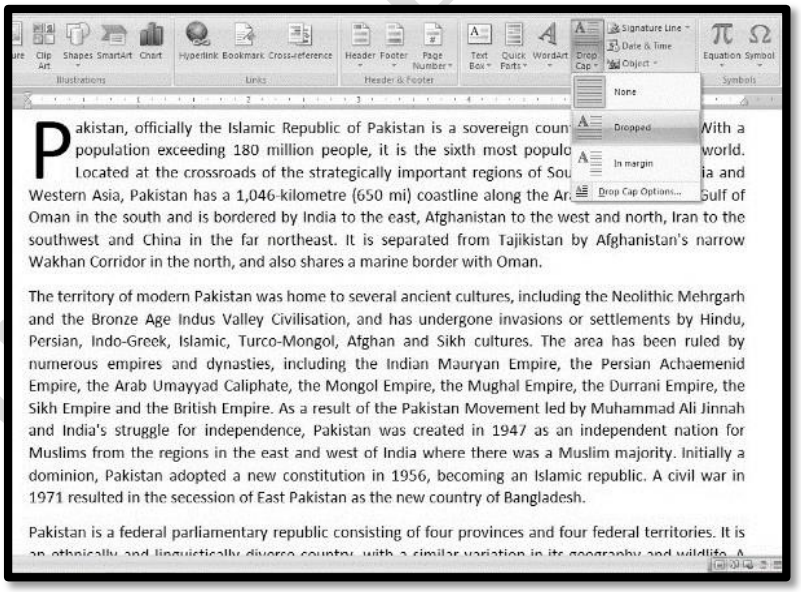

Figure 181: Drop cap 'P'

EduQuest

Module 204

18. Word Processing: MS Word (Design Ribbon)

Design ribbon (as shown in the Figure 182) contains the following groups:

Figure 182: Design Ribbon

Themes - Drop-Down. The drop-down contains the commands: Built-in, More Themes on Microsoft Office Online, Browse for Themes and Save Current Theme. The built-in themes are: Office, Apex, Aspect, Civic, Concourse, Equity, Flow, Foundry, Median, Metro, Module, Opulent, Oriel, Origin, Paper, Solstice, Technic, Trek, Urban and Verve. Tooltip indicates the current theme. The default theme is "Office". Tooltip indicates the current theme. Quick Access to more themes saved down on Microsoft Office Online. Default theme is "Office". Changes the overall design of the entire document including colors, fonts and effects. This drop-down has an additional command not found in Excel or PowerPoint which is "Reset to Theme from Template".

Style Set - Change the look of your document by choosing a new style set. Style sets change the font and paragraph properties of your entire document.

Colors - Drop-Down. Displays a list of all the available colors and lets you change the color component of the active theme.

Fonts - Drop-Down. Displays a list of all the available fonts and lets you change the font component of the active theme.

Paragraph Spacing - Drop-Down. Quickly change the line and paragraph spacing in your document. The drop-down contains the commands: No Paragraph Space, Compact, Tight, Open, Relaxed, Double, Custom Paragraph Spacing.

Effects - Drop-Down. Displays a list of all the available effects and lets you change the effect component of the active theme. The drop-down contains the commands: Office, Apex, Aspect, Civic, Concourse, Equity, Flow, Foundry, Median, Metro, Module, Opulent, Oriel, Origin, Paper, Solstice, Technic, Trek, Urban and Verve.

Set As Default - Use the current look for all new documents.

Page Background – This tab contains watermark, page color and page borders as shown in the Figure 183.

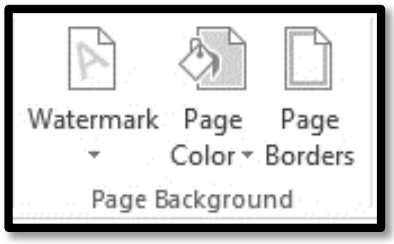

Figure 183: Page background group

Page Color – Drop-Down. Let's you change the background color of the page. Displays the full theme color palette.

Vusqa's EduQuest

Page Borders – Displays the "Border and Shading" dialog box.

Watermarks

Watermarks in the documents can be attractive, but they aren't just about looks: A watermark can be a way of letting the reader know that the document is confidential.

Exercise: How to add Watermark

1. Click the Watermark button on the Page Layout tab.
2. Click one of the watermarks to insert it or select Custom Watermark from the bottom of the gallery.
3. To select text for your custom watermark, select the Text Watermark option in the Printed Watermark dialog box. Then use the controls to select the language and the text to be used. Click OK.

You can also select a picture to be used for the watermark by selecting the Picture Watermark option and then using the Select Picture button to find the image you want to use. For most images, you want to leave the Washout option selected, which makes the text on top of the image easier to read.

Vusqa's EduQuest

Module 205

19. Word Processing: MS Word (Page Setup Group in Page Layout Ribbon)

Using page setup group (Figure 184), you can easily place margins, display text in two or three columns, Add section break or even set page setup.

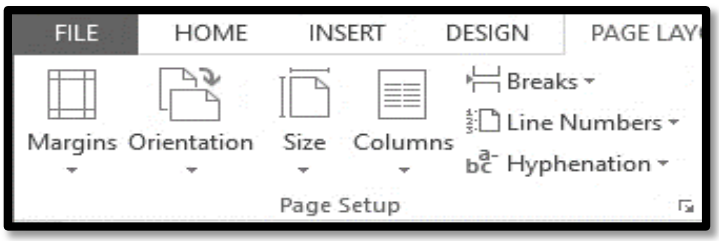

Figure 184: Page setup group

Displaying Text in two Columns

As you might have observed in newspapers text is displayed in two or three columns. Microsoft Word provides this feature in Page Layout Ribbon tab. By default the text is displayed in one column format. Here's how you can display in two columns.

Exercise: How to add Columns

1. Select text that you want to display in column form. (Figure 185)

In Page Layout Tab click on Columns and select "Two". See Figure 186.

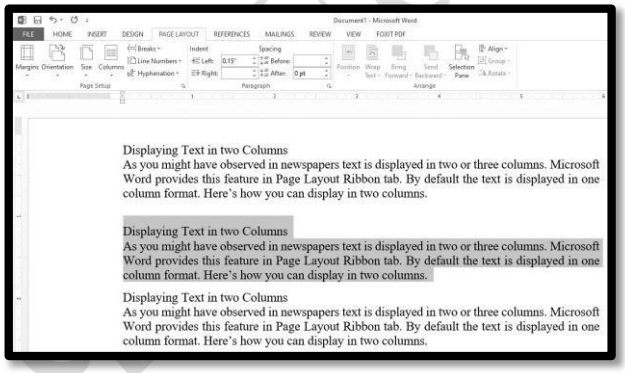

Figure 185: Text selections for 2-columns display

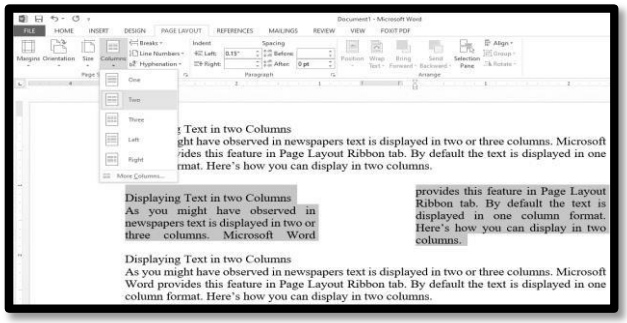

Figure 186: Text in two columns

VusiEduQuest

Module 206

20. Word Processing: MS Word (Page Setup Group in Page Layout Ribbon)

You can quickly display the "Paragraph" dialog box, Indents and Spacing tab, by clicking on the launcher in the bottom right corner of this group. These are options taken from the (Format Paragraph)(Indents and Spacing tab) for quick access.

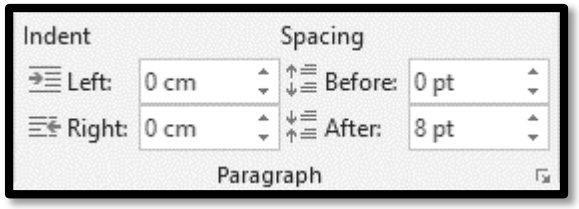

Figure 187: Paragraph group in page layout

Indent Left - TextBox. This automatically updates to indicate how much indentation has been applied to the paragraph of the current selection. This can be used to change the left indentation for the current selection.

Indent Right - TextBox. This automatically updates to indicate how much indentation has been applied to the paragraph of the current selection. This can be used to change the right indentation for the current selection.

Spacing Before - TextBox. This automatically updates to indicate how much spacing is defined before the paragraph of the current selection. This can be used to change the spacing for the current selection. **Spacing After** - TextBox. The automatically updates to indicate how much spacing is defined after the paragraph of the current selection. This can be used to change the spacing for the current selection.

Module 207

21. Word Processing: MS Word (Arrange Group in Page Layout Ribbon)

This group also appears on the Drawing Tools - Format contextual tab as shown in the Figure 188.

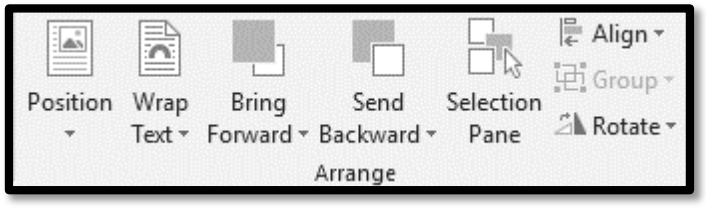

Figure 188: Arrange Group

Position - Drop-Down. Displays a list of picture positioning options. The drop-down contains the commands: In Line with Text and Text Wrapping. You can select More Layout Options to display the "Advanced Layout" dialog box.

Wrap Text – Drop-Down. The drop-down contains the commands: In Line with Text, Square, Tight, Through, Top and Bottom, Behind Text, In Front of Text, Edit Wrap Points and More Layout Options.

Bring Forward - Button with Drop-Down. The button brings the selected object forward one level. The drop-down provides a command to bring the selected object in front of all the other objects. **Send Backward** - (Send to Back in 2007). Button with Drop-Down. The button brings the selected object back one level. The drop-down provides a command to send the selected object to the back of all the other objects.

Selection Pane - (Added in 2010). Displays the Selection Pane task pane.

Align - Drop-Down. The drop-down contains the commands: Align Left, Align Center, Align Right, Align Top, Align Middle, Align Bottom, Distribute Horizontally, Distribute Vertically, Align to Page, Align to Margin, Align Selected Objects, View Gridlines and Grid Settings. The Grid Settings displays the "Drawing Grid" dialog box.

Group - Drop-Down. The drop-down contains the commands: Group, Regroup and Ungroup.

Rotate - Drop-Down. The drop-down contains the commands: Rotate Right 90, Rotate Left 90, Flip Vertical, Flip Horizontal and More Rotation Options.

Vusqa's EduQuest

Module 208

22. Word Processing: MS Word (References Ribbon)

This tab gives you access to all the commands for creating references within your documents.

Table of Contents - Drop-Down. Provide an overview of your document by adding a table of contents. The drop-down contains the commands: Built-in, Insert Table of Contents and Save Selection to Table of Contents Gallery as shown in the Figure189.

Figure 189: Table of Content

Add Text - Drop-Down. The drop-down contains the commands: Do Not Show in Table of Contents, Level 1, Level 2 and Level 3.
Update Table - Updates the table of contents so that all the entries refer to the correct page numbers.

Footnotes - You can quickly display the "Footnote and Endnote" dialog box by clicking on the dialog box launcher in the bottom right corner of this group as shown in the Figure 190.

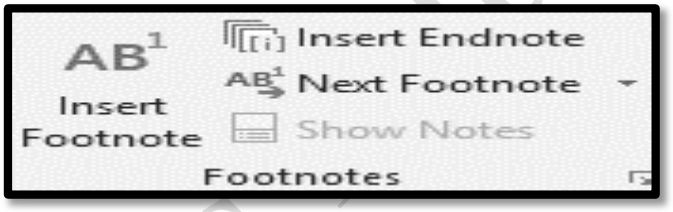

Figure 190: Footnotes Group

Insert Footnote - (Alt + Ctrl + F). Inserts a footnote at the current position. Footnotes are automatically renumbered as you move text around the document.

Insert Endnote - (Alt + Ctrl + D). Inserts an endnote at the end of the document. End notes are always placed at the end of a document.
Next Footnote - Button with Drop-Down. The button moves to the next footnote. The drop-down provides the commands Next Footnote, Previous Footnote, Next Endnote and Previous Endnote.
Show Notes - Shows where footnotes and endnotes are located.

Module 209

23. Word Processing: MS Word (Proofing Group in Review Ribbon)

The proofing group is shown in the Figure 191.

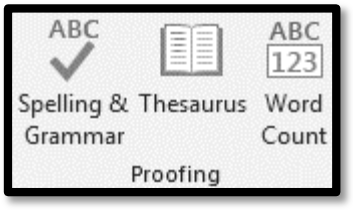

Figure 191: Proofing group

Spelling & Grammar - Displays the "Spelling and Grammar" dialog box. This allows you to check the spelling and grammar in the active document.

Thesaurus - Toggles the display of the Research task pane defaulting the research service to the thesaurus. Same as Excel.

Word Count - This displays the "Word Count" dialog box displaying the document statistics. This replaces the Word Count toolbar. This dialog box can also be displayed by clicking on the word count indicator on the status bar.

Vusqa's EduQuest

Module 210

24. Word Processing: MS Word (Language Group in Review Ribbon)

The language group has been shown in the Figure 192.

Figure 192: Language group

Translate - Drop-Down. Displays the Research task pane. This drop-down contains the commands: Translate Document, Translate Selected Text, Mini Translator and Choose Translation Language. **Language** - Drop-Down. This drop-down contains the commands: Set Proofing Language and Language Preferences. Set Proofing Language display the "Language" dialog box. Language Preferences displays the "Options" dialog box, Language Tab.

Vusqa's EduQuest

Module 211

25. Word Processing: MS Word (Comments Group in Review Ribbon)

The comments group has been shown in the Figure 193.

Figure 193: Comments group

New Comment - (Shift + F2). Inserts a comment at the active cell. This command does not change to Edit Comment when a comment is selected like it does in Excel.

Delete - Button with Drop-Down. Deletes the selected comment. The button deletes the comment in the active selection. The drop-down contains the commands: Delete All Comments Shown and Delete all comments in Document. This is disabled when the document does not contain any comments.

Previous - Goes to the previous comment in the active document. This is disabled when the document does not contain any comments.

Next - Goes to the next comment in the active document. This is disabled when the document does not contain any comments.

Vusqa's EduQuest

Module 212

26. Word Processing: MS Word (Tracking and Changes Groups in Review Ribbon)

The Tracking group has been shown in the Figure 194.

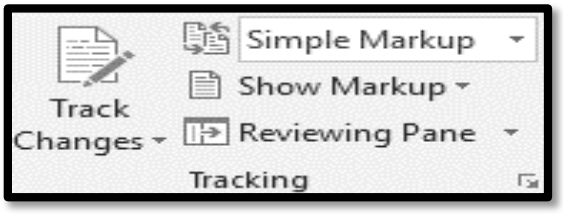

Figure 194: Tracking group

Track Changes - (Ctrl + Shift + E). Button with Drop-Down. The button is the Track Changes command from the Reviewing. It contains the commands Track Changes, Change Tracking Options and Change Username. Change Tracking Options displays the Track Changes Options dialog box. Change Username displays the Word Options dialog box (Popular tab).

Show Markup - Drop-Down. The drop-down contains the commands: Comments, Ink, Insertions and Deletions, Formatting, Markup Area Highlight.

Reviewing Pane - Button with Drop-Down. The button toggles the display of the Reviewing pane. The drop-down contains the commands: Reviewing Pane Vertical and Reviewing Pane Horizontally. There is now also summary information at the top of the pane.

The changes group is shown in the Figure 195.

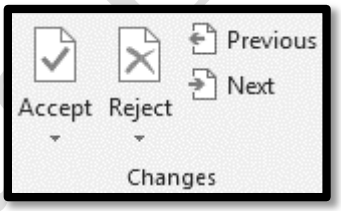

Figure 195: Changes group

Accept - Button with Drop-Down. The button is the Accept and Move to Next command which accepts the current change and moves to the next proposed change. The drop-down contains the commands: Accept and Move to Next, Accept Change, accept all Changes Shown and Accept all Changes in Document. This drop-down is disabled when the document is protected.

Reject - Button with Drop-Down. The button is the Reject and Move to Next command which rejects the current change and moves to the next proposed change. The drop-down contains the commands: Reject and Move to Next, Reject Change, reject all Changes Shown and Reject all Changes in Document. This drop-down is disabled when the document is protected.

Previous - Moves to the previous revision in the active document. This is a bit confusing as it does exactly the same as the Previous in the comments group.

Next - Moves to the next revision in the active document.

Vasqa's EduQuest

Module 213

27. Word Processing: MS Word (Compare and Protect Groups in Review Ribbon)

The Compare group is shown in the Figure 196.

Figure 196: Compare group

Compare - Drop-Down. The drop-down contains the commands: Compare and Combine. The Compare command lets you compare two versions of the same document and displays the "Compare Documents" dialog box. The Combine command lets you combine revisions from multiple authors and displays the "Combine Documents" dialog box. This drop-down is disabled when the document is protected.

The protect group is shown in the Figure 197.

Block Authors - Drop-Down. Prevent others from making changes to the selected text.

Restrict Editing - Toggles the display of the Restrict Editing task pane.
Protect Document - The drop-down contains the commands: Unrestricted Access, Restricted Access, Manage Credentials.

Figure 197: Protect group

Vusqa's EduQuest

Module 214

28. Word Processing: MS Word (View Ribbon)

The View ribbon contains Views group, Show Group, Zoom Group, and Windows group. The Views group contains all the commands relating to the different ways you can view your documents as shown in the Figure 198.

Figure 198: Views group

Read Mode – It maximizes the Word window on the screen and removes all toolbars etc to allow easy reading.

Print Layout - Displays the document as it would appear if printed and is the default view.

Web Layout - Displays the document as it would appear as a web page.

Outline - Displays the document as an outline is displays the Outlining contextual tab.

Draft - Displays the document in draft mode allowing for quick editing. When using this view certain aspects of the document are not visible, for example any headers or footers.

The show group is shown in the Figure 199.

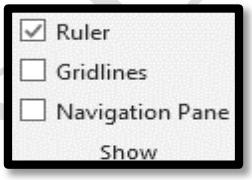

Figure 199: Show group

Ruler - Toggles the display of the ruler(s).

Gridlines - Toggles the display of gridlines.

Navigation Pane - Toggles the display of the Navigation task pane. This is a combination of the Find, Document Map and Thumbnails.

The Zoom group is shown in the Figure 200.

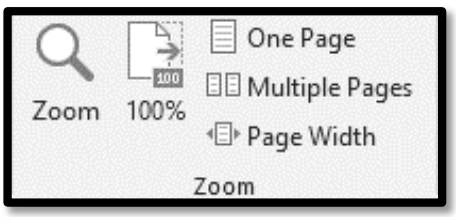

Figure 200: Zoom group

Vusqa's EduQuest

Zoom - Displays the "Zoom" dialog box. This can also be accessed from the status bar by clicking on the view percentage.

100% - Adjusts the zoom to 100% of its normal size. Lets you quickly return to 100%.

One Page - Adjust the zoom so an entire page fits in the application window.

Two Pages - Adjust the zoom so two entire pages fit in the application window.

Page Width - Adjust the zoom so the width of the page is the same as the width of the application window.

The Windows group has been shown in the Figure 201. Every document you open in Word can be thought of as a window. It is possible to open multiple windows of the same document.

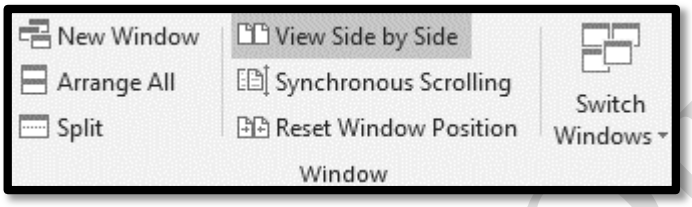

Figure 201: Windows group

New Window - Lets you create a new window of the active document. **Arrange All** - Tile all the open windows side by side on the screen. This will also maximize the application / document to a full screen.

Split - Splits the current window into two parts.

View Side by Side - Displays two documents side by side so they can be easily compared. If you have more than two documents open the "Compare Side by Side" dialog box is displayed so you can choose which document to display next to the active document, allowing you to scroll multiple windows at the same time.

Synchronous Scrolling - Toggles the synchronize scrolling of the two documents that are displayed side by side. This is only enabled when you are viewing two documents side by side.

Reset Window Position - Resets the windows positions so they take up the same amount of space on the screen when two documents are displayed side by side. This is only enabled when you are viewing two documents side by side.

Switch Windows - Drop-Down. Lets you switch between all the currently active documents. This displays all the window/documents that are currently open in the particular session.

Module 215

29. Presentations: MS-PowerPoint (Introduction)

Microsoft offers another powerful tool known as MS-PowerPoint. This is used to develop presentations. Microsoft PowerPoint is an easy program to use and a powerful tool for giving a presentation. Whether your presentation needs a visual kick, tools for collaboration, easy access or the ability to share information beyond the initial meeting, PowerPoint is a good option. It can even help reduce speaking anxiety by drawing eyes away from the speaker and towards a screen. Just do not expect this technology to substitute for sound and dynamic speaking skills. All ribbons of MS Powerpoint are shown in the Figure 202.

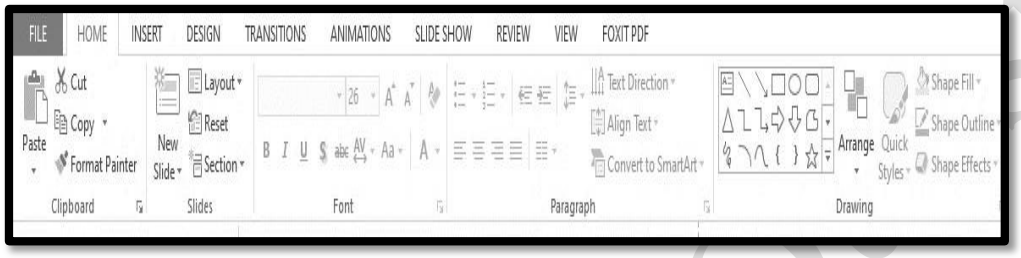

Figure 202: MS: Powerpoint

Some of the functions in different groups in Powerpoint are exactly same as per the functions in MS: Word. We will only cover those groups and functions which are new in the MS: Powerpoint as compared to the MS: Word. These groups and their functionalities will be discussed in the next modules.
