CS101 Most Important Topics List for Mid term 2023

01. Search Engines
02. Roots of Computing
03. Boolean Operators
04: Hexadecimal Notation
05: Binary Addition
06: 2's Complement Notation
07: Floating Point Notation
08: CPU Basic
09: Compressing Audio & Video
10: Program Execution & Logical Operation
11. Arithmetic operators
12. Deadlock
13. Software Classification
14. OS Basic Concepts
15: OS Components
16: Network Classification
17: Layersd Approach to Internet Software

- ✓14: module no 76
- ✓15: module no 79

Current MCQS:

Pop3 stands for?

Post Office Protocol Version 3

SGML stands for?

Standard Generalized Markup Language,

In hexadecimal notation 1011 represent?

1011 represent 11 in Binary but here it is representing 3 (excess of 8).

which refers to single sender involved with multiple unicasts

multicast

Usually IP address was a pattern of how many bits?

32 bits

The simplest of these is the repeater, which is little more than a device that passes signals back and forth between the two original buses

Repeater

Subscribe PLEASE

what is the symbol of wild card?

“* ”

----- gives you advertisement based on your search queries and history?

Google

which notation uses a single symbol to represent a pattern of four bits?

Hexadecimal notation

how many manageable unit cell in the main memory?

8 bits

which devices are designed to take place of magnetic disks?

SSDs (Solid State Disks): (Larger Flash memory devices designed to take place of magnetic disk)

Which of the following language is used for client side scripting?

____JavaScript

which OS software is used to store the files in memory.

ANCI

American National Standards Institute (ANSI)

American Standard Code for Information Interchange (ASCII)

An enormous portion of current internet traffic is used for transporting audio and video across the internet in real time, is

A clear flag (value 0) indicates that the printer is available and a set flag (value 1) indicates that the printer is currently allocated.

1-Both input are 1, output is 0 which logic gate is

Answer: XOR

2-..... retrieve data from CD.?

Answer: Retrieval using a **Laser** that detects the irregularities on the reflective surface of the CD as it spins

3- The condition in which two or more processes are blocked from progressing because each is waiting for a resource that is allocated to another.

Answer: **Deadlock**

4-Pop 3 stand for

Answer: **Post Office Protocol Version 3 (POP3)**

5-DNS stand.....

Answer: domain name system (DNS)

6- Real time processing

Answer:

Computer performs the tasks in accordance with the deadlines in its external real-world environment. Example of Cruise Missile, Radar etc
