CS201 - Introduction to Programming (Quiz 1)

Question # 10 of 10 (Start time: 01:32:08 PM, 12 November 2025)

!(x > 3) means in C++ that

Select the correct option

○	x is less than 3
○	x is less than or equal to 3
○	x is equal to 3
◉	x is greater than 3

CS201 - Introduction to Programming (Quiz 1)

Question # 9 of 10 (Start time: 01:31:46 PM, 12 November 2025)

What will be the result of the expression
j = i++;
if initially j = 0 and i = 5?

Select the correct option

○	6
○	4
○	0
◉	5

CS201 - Introduction to Programming (Quiz 1)

Question # 8 of 10 (Start time: 01:31:30 PM, 12 November 2025)

If a function has not been declared before its definition, it is a --------

Select the correct option

◉	Compilation error
○	Late binding error
○	logical error
○	run time error

CS201 - Introduction to Programming (Quiz 1)

Question # 5 of 10 (Start time: 01:30:29 PM, 12 November 2025)

Computers can understand only _____ language code.

Select the correct option

◉	Machine
○	High level
○	Natural
○	Low level

Question # 7 of 10 (Start time: 01:31:13 PM, 12 November 2025)

When the logical operator OR (||) combine two expressions exp1 and exp2 then the result will be false only,

Select the correct option

- ○ When exp1 is false and exp2 is true
- ○ When exp1 is true and exp2 is false
- ◉ When both exp1 and exp2 are false
- ○ When both exp1 and exp2 are true

CS201 - Introduction to Programming (Quiz 1)

Question # 3 of 10 (Start time: 01:29:42 PM, 12 November 2025)

Why do we use "cin"?

Select the correct option

○	To send data to printer
○	To display output on the screen
○	To display message
◉	To read data from keyboard

CS201 - Introduction to Programming (Quiz 1)

Question # 4 of 10 (Start time: 01:30:05 PM, 12 November 2025)

Find out the logical error in following lines of code.

```
If (x = 10)
cout << "x is 10";
```

Select the correct option

○	10 should be enclosed in quotations
○	There is no semicolon at the end of if condition
◉	Assignment operator should not be used for comparison
○	Variable x should not be inside parenthesis

Question # 2 of 10 (Start time: 01:29:14 PM, 12 November 2025)

When the logical operator AND (&&) combines two expressions exp1 and exp2 then the result will be true only, _____

Select the correct option

- ○ When exp1 is false and exp2 is true
- ○ When both exp1 and exp2 are false
- ○ When exp1 is true and exp2 is false
- ◉ When both exp1 and exp2 are true
