

ENG518 OBJECTIVES Spring2020

by Ahmad Mahboob

1. MLA found in **eight** Editions.
2. Teachers attempt to study their problem in **action research**

Theoretical, **action**, description, basic

3. Computer software saves researcher from? **Delaying process**
4. Not included in survey method? **Summary and writing**
5. Survey is most used in : **social sciences**
6. Factorial design has features common with : **treatment x level**
7. Basic experiment is replicated in: **random replication**
8. **Historical research** evaluate data on the basis of: **truth content**
9. Common in all research type : **validity**
10. CMS stands for the **Manual of Style**.

Chester, **Chicago** chile

11. The plot is the general background of the story line or literary work that presents the sequence of **in which the characters in possible conflict are involved.**

figures, **events**, individuals, dialogue

12. Which of the following depicts the underlying meaning of the writing? (**Theme**)
13. Which of the following is the step in case study? (**unit of attention**)
14. Which of the following are not the features of case study? (**Longitudinal**)
15. Historical research in the field of education, historical research helps **understand problems and issues.**

instructions, doctors, relatives, **educators**

16. Which of the following is not the characteristics of experimental study?

valid, objective, accurate, **passive**

17. Which of the following studies not a type of survey method?

cross-sectional, **cause effect,** longitudinal

18. The CMS provides a method for source documentation in most

Humanities Science **History** Language

19. The MLA provides a method for source documentation in most

Humanities Science History Language

20. Most university libraries in the United States and Europe, as well as some public libraries, have such **computerised** search capabilities.

21. Which of the following researcher studies practical problem? **Action**

22. Which of the following assumption is false for the law of single variable?

two identical situations one element added

zero development concept o cause and effect

23. Which of the following is a type of case study?

co rational cross-sectional longitudinal **cumulative**

24. Catalogue, syllabus, prospectus are the data. that can helpful to called a historical

remains **documents** journals registers

25. There are ___ basic types of research design .

2 4 5 6

26. A survey consists of a ___ list of questionnaire. **(Formal)**

27. ___ Characteristics and attributes are considered important in survey research. **(socio-economic)**

28. The design of action research project should be economical from _.

Money Time Energy **All the given option** ✓

29. A case study is a research ___ that has commonly used in social sciences. **(Methodology)**

30. Action research is a process in which participants examine their own ___ practice. **(Educational)**

31. Idea catagories that emerge from grouping of lower level data points . **(Theme)**

Subjective

1. Survey method

- It is the commonly-used method of collecting information
- A survey consists of a formal list of questionnaire
- Firstly, every survey asks about demographic interests
- Population of interest is always preferred in survey method
- Mostly large cases
- Mostly cross-sectional study

2. Steps in a case study

- Unit of attention
- Collection of data
- Diagnosis and identification of casual factors
- Treatment
- Follow up program

3. Essential components of Article/Paper

- Title
- Author(s)
- Abstract
- Introduction
- Methodology
- Results
- Discussion
- References
- Appendices

4. Quantitative research

Quantitative research has come mainly from the field of psychology, where there has been heavy emphasis on the use of statistics to make generalizations from samples to populations. It is characterized by the use of numbers as its data.

It produces numerical data and hard facts. It aims at establishing cause and effect relationship between two variables by using mathematical, computational and statistical methods. The research is also known as empirical research.

5. Types of case studies

- **Cumulative Case Studies** - Aggregate information from several sites
- **Critical Instance Case Studies** - Unique cases

- **Exploratory (or pilot) Case Studies** - For large scale studies
- **Illustrative Case Studies** - Typically utilizing one or two instances

6. Considerations while choosing the computer software for your study

- Theoretical approaches to analysis
- Type and amount of data
- Time to analyze
- Level of analysis
- Any cost constraints
- Individual or working as a team
