ENG514_Glossary

1. **Accuracy** :The quality or state of being correct or precise
2. **Ambiguity** :The quality of being open to more than one interpretation; inexactness.
3. **Anaphora** :The use of a word referring back to a word used earlier in a text or conversation, to avoid repetition, for example the pronouns he, she, it, and they and the verb do in I like it and so do they.
4. **Assimilation** :The absorption and integration of people, ideas, or culture into a wider society or culture.
5. **Back channelling** :Back channelling is the feedback which a listener gives to a speaker to show that (s)he is following, or understands what the speaker is saying.
6. **Behaviorism** :Behaviorism is a learning theory that only focuses on objectively observable behaviors and discounts any independent activities of the mind.
7. **Bilingual** :Speaking two languages fluently
8. **Cognitive load** :Cognitive load refers to the used amount of working memory resources. Cognitive load theory differentiates cognitive load into three types: intrinsic, extraneous, and germane.
9. **Cohesive devices** :Cohesive devices are words used to show how the different parts of a text fit together. In other words, they create cohesion. Some examples of cohesive devices are: determiners and pronouns, which can refer back to earlier words. Conjunctions and adverbs, which can make relations between words clear.
10. **Colloquial speech** :Colloquial speech conversational, informal refer to types of speech or to usages not on a formal level
11. **Communicative competence** :Communicative competence is a term in linguistics which refers to a language user's grammatical knowledge of syntax,

morphology, phonology and the like, as well as social knowledge about how and when to use utterances appropriately.

12. **Competence** :The term linguistic competence refers to the unconscious knowledge of grammar that allows a speaker to use and understand a language
13. **Competency-based assessment** :Competency-based assessment is a form of assessment that is derived from the specification of a set of outcomes. It states clearly the expected outcomes
14. **Computational linguistics** :Computational linguistics is the branch of linguistics in which the techniques of computer science are applied to the analysis and synthesis of language and speech.
15. **Conversational adjustments** :Conversational adjustments are the modifications that are made in terms of the interaction and content of the utterance
16. **Deictic reference** :A deictic expression or deixis is a word or phrase (such as this, that, these, those, now, then, here) that points to the time, place, or situation in which a speaker is speaking .Deixis is expressed in English by way of personal pronouns, demonstratives, adverbs, and tense
17. **EAP** :English for Academic Purposes
18. **EFL** :English as a Foreign Language
19. **ESP** :English for Specific Purposes
20. **Fallacies of reasoning** :A fallacy is the use of invalid or otherwise faulty reasoning, or "wrong moves" in the construction of an argument. A formal fallacy can be expressed neatly in a standard system of logic, such as propositional logic, while an informal fallacy originates in an error in reasoning other than an improper logical form.

ENG514_Glossary

21. **Fluency** :The quality or condition of being fluent
22. **Grammar translation method** :grammar–translation method is a method of teaching foreign languages derived from the classical (sometimes called traditional) method of teaching
23. **Historical corpus linguistics** :The modern field of corpus linguistics – based around the computer-aided analysis of extremely large databases of text – is largely a phenomenon of the late 1950s onwards.
24. **IELTS** :International English Language Testing System
25. **Interactional linguistics** :linguistics is an interdisciplinary approach to grammar and interaction in the fields of linguistics, the sociology of language, and anthropology
26. **Interactive listening** :Interactive listening requires learners to engage in face-to-face interactions where they often alternate between the roles of listener and speaker
27. **Language acquisition** :Language acquisition is the process by which humans acquire the capacity to perceive. Input in the linguistic context is defined as "All words, contexts, and other forms of language to which a learner is exposed, relative to acquired
28. **Language-focused learning** :Language-focused learning has many names ? focus on form, form focused instruction, deliberate study and deliberate teaching, learning as opposed to acquisition, intentional learning and so on. It involves the deliberate learning of language features such as pronunciation, spelling, vocabulary, grammar and discourse.
29. **Lexical resource** :A lexical resource (LR) is a database consisting of one or several dictionaries. Depending on the type of languages that are addressed, the

LR may be qualified as monolingual, bilingual or multilingual. For bilingual and multilingual LRs, the words may be connected or not connected, from a language to another.

30. **Lexicography** :The activity or occupation of compiling dictionaries.
31. **Metacognition** :Metacognition is our ability to think about our own thinking or “cognition
32. **Metacognitive awareness** :Metacognitive awareness refers to a state of consciousness of our own thoughts as we focus on a particular cognitive or learning situation
33. **Metacognitive instruction** :Metacognitive instruction refers to pedagogical procedures that enable learners to increase awareness of the listening process by developing richer metacognitive knowledge about themselves as listeners, the nature and demands of listening, and strategies for listening
34. **Natural Approach** :In the natural approach, language output is not forced, but allowed to emerge spontaneously after students have attended to large amounts of comprehensible language input.
35. **Oral channel** :Oral communication is the process of expressing information or ideas by word of mouth.
36. **Performance** :The term linguistic performance was used by Noam Chomsky in 1960 to describe "the actual use of language in concrete situations".[1] It is used to describe both the production, sometimes called parole, as well as the comprehension of language.
37. **Podcasts** :Podcasts are audio or video files published via the internet
38. **Pragmatic competence** :In linguistics, pragmatic competence is the ability to use language effectively in a contextually appropriate fashion. Pragmatic

competence is a fundamental aspect of a more general communicative competence

39. **Pragmatic processing** :Dealing with things sensibly and realistically in a way that is based on practical rather than theoretical considerations. "a pragmatic approach to politics"

40. **Pre-listening** :Pre-listening activities are things learners do before a listening activity in order to prepare for listening. Pre-listening tasks include discussion questions, true or false statements, vocabulary work, prediction tasks and brainstorming the topic.

41. **Prosody** :The patterns of stress and intonation in a language

42. **Register analysis :**Register analysis can be used to determine authenticity of language in relation to lexical and grammatical features

43. **Schema** :Schema theory states that all knowledge is organized into units. Within these units of knowledge, or schemata, is stored information.

44. **Schemata** :A schema is a generalized description or a conceptual system for understanding knowledge-how knowledge is represented and how it is used.

45. **Selective listening** :selective listening refers to listening with a planned purpose in mind

46. **Semantic processing** :Semantic processing is the processing that occurs after we hear a word and encode its meaning. Semantic processing causes us to relate the word we just heard to other words with similar meanings. Once a word is perceived, it is placed in a context mentally that allows for a deeper processing.

47. **Social cues :**A social cue can either be a verbal or non-verbal hint, which can be positive or negative. These cues guide conversation and other social interactions.
