HISTORY AND VALUE

William Caxton (c1483) produced a French-English dictionary. Travellers needed a bilingual dictionary when visiting countries with a different language than their own. Ancient writings were not useful until they could be translated.

The discovery of the Rosetta Stone in 1799 helped unlock many ancient languages. The stone was written in Greek and two forms of Egyptian.
In 1822 the messages were finally deciphered.

In 1755, Samuel Johnson produced the earliest English language dictionary. A facsimile reprint of this dictionary is available here at the McKay Library in the Reference collection. (Ref PE 1620.J6 1979) As a facsimile reprint, letters appear as they were written in 1755. Alternate spellings are given without preference. Some word derivation is shown.

Noah Webster printed the first modern dictionary in 1828 which set the standard for spelling and pronunciation.
His dictionaries also distinguished American word usage from usage common in England.
Sir James Murray gathered historical background on words.

The Oxford English Dictionary traces the origin of words and their usage through time with examples.
While the British usage is emphasized, recent editions include English usage in other parts of the world. This dictionary is now available as an Internet subscription under

SUMMARY

Dictionaries are important reference tools for writers to use.
Different kinds of dictionaries are available for various needs.

LECTURE 8

ALL ABOUT WORDS

WHAT ARE WORDS MADE OF?

The study of structure of words is called MORPHOLOGY. Look at this sentence:

"The plogs glorped bliply"

MORPHEMES: a **morpheme** is the smallest linguistic unit that has semantic meaning.

One morpheme: dog, elephant, child

Two morphemes: dog s, elephant s, child ish.

Three morphemes: child ish ness

Six morphemes: anti-dis-establish-ment-arian-ism

Free Morpheme: This can stand alone. E.g. dog, elephant, child, etc.

Bound Morpheme: This can't stand alone. E.g. s, ish, ness, ism, etc

HOW WORDS ARE FORMED?

Word forms

words or ex 1/1

Some dictionaries emphasize

Slang includes popular expressions which may not be considered proper in formal use.
Some slang may have vulgar, obscene or profane connotations.
In academic settings formal language usually does not include slang or non-standard forms of expression.
Usage guides will set the standards for formal writing or expression.
A thesaurus is a dictionary that gives synonyms.

USING A DICTIONARY

Remember that preliminary pages (first pages) often explain abbreviations and other special features.
End pages may have tables or charts.
The auxiliary pages (other pages) may also have information, such as a list of colleges or cities.
A separate appendix may give geographical and biographical entries.
The table of contents or list of illustrations will help locate information on these preliminary or auxiliary pages.
Especially school textbooks may have a vocabulary or glossary section.
Glossary is a list of technical words or expressions used in a field of study or book.
As mentioned before, appendix or auxiliary sections of books may contain a glossary section.
Dictionary order has become a synonym for alphabetical order.

modifies a 1/3

The **flock** of geese spends
The **jury** is dining on take-
The steering **committee** m
The **class** was startled by the bursting light bulb.

WHAT IS A VERB?

The verb is perhaps the most important part of the sentence. A **verb** or compound verb asserts something about the subject of the sentence and express actions, events, or states of being. The verb or compound verb is the critical element of the predicate of a sentence.

In each of the following sentences, the verb or compound verb is **highlighted**:

Dracula **bites** his victims on the neck.
In early October, Giselle **will plant** twenty tulip bulbs.
My first teacher **was** Miss Crawford, but I remember the janitor Mr. Weatherbee more vividly.
Karl Creelman bicycled around the world in 1899, but his diaries and his bicycle **were destroyed**.

WHAT IS AN ADJECTIVE?

An **adjective** modifies a noun or a pronoun by describing, identifying, or quantifying words. An adjective usually precedes the noun or the pronoun which it modifies.

In the following examples, the **highlighted** words are adjectives:

The **truck-shaped** balloon floated over the treetops.
Mrs. Morrison papered her **kitchen** walls with **hideous** wall paper.
The **small** boat foundered on the **wine dark** sea.

© Copyrights Virtual University of Pakistan

The **coal** mines are **dark** and **dank**.

Journalistic Writing – MCM310

third 1/23

The qualities of a second-rate writer can easily be defined, but a first-rate writer can only be experienced. It is just the thing in him which escapes analysis that makes him first-rate. Willa Cather (1873–1947)

Writing is an art as well as a science. Writing is an art since it has various styles to it and it is a science as you would use different techniques to write it.

Good writing however has much more to it than just the common techniques used. [It depends on who your target audience is and whether you know your audience well]
The parameters for a good writer depend on the audience who is going to read it.

For instance, the differences between the style content writers use and the style full-time is that the content-writers mostly use first and second person; whereas a writer for a newspaper would use an objective tone (third-person reporting). The language used is also different for different media of communication.

The general yardsticks to determine whether one is a good writer are to check whether his/her article has a good flow, eye-catching content and the language. The sentence structure, grammar, ideas and the form used are some of the other factors that play an important role in determining whether one is a good writer.

However, there is no one way to find out who a good writer is. Let's see what qualities do newspaper w display? Besides having

* A lively interest in people, places and events
* An ability to write in a style which is easy to understand
* Good spelling, grammar and punctuation
* An appreciation of the part a local newspaper plays in the community
* A willingness to accept irregular hours

Journalistic Writing – MCM310

synony 4/5

Syllabication shows how the word is divided when the word is separated at the end of a line of print.

Derivation traces what root words are used to form the word.
Understanding from which language the word comes helps explain differences in phonetic rules.

"Goethe" may not seem to be pronounced the way it was spelled except to those who understand the German language. Our English language is a result of the many cultures from which it is drawn.

Etymology is the study of the word's history including both derivation and how the word's usage has changed.
Usage reflects how different areas use words in unique ways.

Meaning or definition is explained or shown through examples.
Synonyms (words with the same meaning) and antonyms (words with the opposite meaning) also contribute to an accurate definition.

Illustrative quotations, such as those from Shakespeare give insight into meaning and derivation.

Maps and plates of illustration give pictures to provide reference points.
For example, maps can show where Guam is located in relation to other islands.

Geographical facts and history also give the significance of places.
Guam was the site of a major battle in World War II.

Biographical facts are needed because many words have origins in personal names.
A "curie" is one word that is associated with the scientists who discovered it.
A dictionary that contains geographical and biographical information is called an encyclopedic dictionary.

Some dictionaries may have a separate section with geographical and biographical information.

Quiz
