26 total questions

10 mcqs

Q: Define Positive peace.

ANS: Presence of conditions of well-beings and just relationships: social, economic, political, ecological

Q: Relationship btw quality education and environment education.

ANS:

Quality	Environment
Quality education enables people to develop all of their attributes and skills to achieve their potential as human beings and members of society.	Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment.
Quality education provides the foundation for equity in society.	Knowledge and understanding of the environment and environmental challenges

Q: Implementation of environment education.

ANS: Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment. As a result, individuals develop a deeper understanding of environmental issues and have the skills to make informed and responsible decisions.

Q: Demand side pressures.

ANS: In many countries, education is viewed as an important way to gain social and economic advancement. Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parent seeks private suppliers. This type of demand is 'excess demand', over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is 'differentiated demand' and it may encourage privatization across all three sectors.

Q: Systematic research and population studies.

ANS: Systematic research – investigations that might survey, for example the relevant literature concerning the nature of the learner and his learning context.

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

Q: Forms of privatization.

ANS: The three most common privatization forms include:

1. Private Provision
2. Private Funding
3. Private Regulation

Q: Privatization Policies in Education.

ANS: The main policies and programs include:

1. Educational Vouchers
2. Public School Liberalization
3. Private Contracting
4. Tuition Credits and Deductions
5. Subsidies and Assistance Grants
6. Home – Schooling
7. Private Payments
8. Competition among Schools and Education Agencies

Q: What is Madrassa Education?

ANS: The term ‘Madrassa’ originates from the Arabic word ‘Darasa’ which means ‘To Study’. Madrassa, in general, is referred to a school that imparts Knowledge. But in the context of Pakistan or even in the contemporary South Asia the term ‘Madrassa’ is often used for Islamic educational institutions along with ‘Dar-ul-aloom’ and ‘Jamia’. The main subjects of Madrassa Education include:

1. Qur’an
2. Hadith
3. Fiqh

Q: Discuss demands of Madaris reforms.

ANS: Since 1999, the issue of madaaris reforms has been negotiated between the government and the administrations of wafaqs or boards. It is not clear what development has been made so far. Madaaris are major societal institutions. They have ardent followers, and thus they can play vital roles for reforms of society, but they do not pay much attention to the society besides influencing religion. It remains to be seen how madaaris can play a positive role for promoting peace and harmony in the society.

Q: What is Privatization?

ANS: ‘Privatization’ is also thought of as ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems.

Q: EU definition about Non formal learning.

ANS: Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

Q: Characteristics of informal learning described by Beckett and Hager.

ANS: Characteristics to informal learning:

- Practice-based informal learning is organic / holistic.
- Practice-based informal learning is contextual
- Practice-based informal learning is activity and experience-based
- Practice-based informal learning arises in situations where learning is not the main aim
- Practice-based informal workplace learning is activated by individual learners rather than by teachers / trainers
- Practice-based informal workplace learning is often collaborative / collegial

Q: Terms use for attitude.

ANS: Following are the terms related with the attitude

- Empathy
- Reconciliation
- Solidarity
- Social responsibility
- Sense of justice and equality
- Joy in living

In attitudes these things are of importance.

Q: What role environment friendly schools play for climate change? Discuss.

ANS: With a view to promoting a child friendly environment in schools and to ensure children's rights to learn in their own mother tongue, children's mother tongue should be employed as the medium of instruction.

Q: Why population education is necessary?

ANS: The "World Population Plan of Action" urged the need of population education in the following way: "Educational institutions in all countries should be encouraged to expand their curricula to include a study of population dynamics and policies including, where appropriate, family life, responsible parenthood and relation of population dynamics to socio- economic development and to international relations" Programs of population education can contribute to solve either the population or the educational problems faced by individuals and nations. The solutions of these problems depend basically upon social changes that will lead to greater equity and social justice, greater independence and self-determination.

Q: What are 3 sources from which internal efficiency comes?

ANS: Internal efficiency is expected to come from three sources:

- (a) Greater competition
- (b) Superior ownership and managerial structures within the enterprises
- (c) Enhanced accountability / incentive systems

Q: Why privatization happening? Write dominants of pressure of privatization.

ANS: There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Following are the dominant pressures for Privatization:

1. Demand – Side Pressures
2. Supply-side Pressures
3. General Pressures

Q: Madarasa reform 2006

ANS: In 2006 when the curricula were revised, the government focused on revising the old curricula of the country to build reforms.

Final Term Paper Edu401

19. How Private education reduce the burden of Govt Schools? 3 marks

20. What is social cohesion ? 3 marks

Answer:

Social Cohesion :

Schools should promote the social good; this is the main reason why they are publicly funded. What constitutes the 'social good' will vary from one society to another.

21. Write a note on Livingstone (2001) 5 marks

Informal education or training occurs when teachers or mentors take responsibility for instructing others without sustained reference to an intentionally-organized body of knowledge in more incidental and spontaneous learning situations, such as guiding them in acquiring job skills or in community development activities.

- Informal learning is any activity involving the pursuit of understanding knowledge or skill which occurs without the presence of externally imposed curricular criteria ...in any context outside the reestablished curricula of educative institutions

This definition has a different organizing principle – the relationship between the teacher / mentor and learner.

22. Question: EU's Definitions (EC 2001) | 5 marks

Formal Learning:

Learning typically provided by an education or training institution, structured (in terms of objectives, learning time or learning support) and leading to certification. Formal learning is intentional from the learners' perspective

Non-Formal Learning:

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

Q23: Why Student should study the population education? 5 marks

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

Facts, theories and concepts from a broad spectrum of academic disciplines and professional fields are needed to help individuals and societies fully understand population interactions and thus the effect of population factors on the quality of their individual and collective lives. The sum of this knowledge is referred to as population studies.

These studies raise a number of issues. Since the potential sources of information are vast, and since culture and ideology, among other things, will play a large role in determining what is most relevant to the needs of any particular group, there is no agreement on what should or should not be included.

Various factors and assumptions act as filters in determining the priority given to areas of knowledge and the framework used to organize the knowledge selected for inclusion.

Unfortunately, much of what is known deals with larger population units, making it difficult to extrapolate findings that can be applied to smaller units, like the community, the family and the individual. This encourages the generalized belief that population education deals primarily with national or global concerns, whereas in reality, the problem is caused by the inadequacy of available data.

Question 24 Describe briefly Productive Efficiency. 5 marks

This criterion refers to the maximization of educational results for any given resource constraint. It is important that any activity be conducted efficiently, because the resources used for it could be used for other activities.

Education privatization may be an important way to enhance efficiency: economists have given many reasons as to why private agents use resources in a more efficient manner than government agencies.

The strong argument for privatization rests mainly on productive efficiency. We note here that this argument refers to internal efficiency, i.e. how efficiently a chosen output is performed.

Question 25

Briefly describe the ways to Evaluate Privatization Programs. 5 marks

Answer: A comprehensive framework for evaluation presented here has four criteria, allowing for many aspects of the privatization policy to be understood and assessed.

1. Freedom to Choose

This criterion refers to the rights of families to choose schools for their children that are premised on their values, educational philosophies, religious teachings and political outlooks.

Advocates argue in favor of increasing opportunities for parents to choose their children's education for two reasons.

First, and clearly a priority, parents have a fundamental right to decide what is in the best interest of their children.

Parents are likely to have greater incentives to sustain and improve their children's welfare than would a government agent. Parents have a better idea of the educational needs of their children and of which learning styles they prefer.

Although some parents may be derelict in their obligations to their children, this is likely to be the exception rather than the norm. Where there are varied preferences among students, freedom of choice becomes especially important.

Q 26: What are the implications of diversity in the provision of education? 5 marks

It is important to understand that unlike the government schools, different types of private schools entail different implications in terms of their impact on policy and socio-economic milieu.

From one point of view, diversity in the private educational marketplace is a response to variance in the demand which already exists in the society.

However, some believe that from the vantage point of harmony and equality in the society, the very fact that private educational institutions are configured to a diverse range of social, economic, ideological and religious lines is a matter of concern.

This apprehension is best explained by the fact that a textbook used in a private school preaches to the students that listening to music, watching television and even playing carom board or flying kites are sinful acts.

On the other hand, there are many private schools which teach music to children in regular classes and promote liberal arts.

Therefore, the two types of schools are producing two groups of students with entirely opposite worldviews. This case illustrates the potential implications of different types of schools for social harmony, peace and national integration.
