ENG520 - Testing and Assessment (Quiz 2)

Question # 1 of 10 (Start time: 07:20:40 AM, 14 May 2024)

The ____ records depict actual behaviors in natural situations.

Select the correct option

- ○ split- half test
- ○ inter-rater
- ○ coefficient alpha
- ◉ anecdotal

actual be

- Determine in advance what to observe but be alert of unusual behavior.
- Analyze observational records for possible sources of bias.
- Observe and record enough of the situation to make behavior meaningful.
- Make record of the incident as soon after the observation is possible.
- Limit each anecdote to a brief description of a single incident.
- Keep the factual description of the incident and your interpretation of it separate.
- Record both positive and negative behavioral incidents.
- Collect a number of anecdotes on a student before drawing inferences concerning typical beh
- Obtain practice in writing anecdotal records.

Topic- 051: Advantages and Limitations of Anecdotal Records

Following are the advantages of anecdotal records.

- It depicts actual behaviors in natural situations.
- It facilitates gathering evidence on the events that are exceptional but significant.
- It is beneficial for the students with less communication skills.

Limitations of Anecdotal Records

Following are the limitations of anecdotal records.

It takes long time to maintain.

It is subjective in nature.

Anxiety may lead to wrong observation.

7:21

ENG520 - Testing and Assessment (Quiz 2)

Question # 2 of 10 (Start time: 07:21:06 AM, 14 May 2024)

The _____ records are factual descriptions of incidents and events that a teacher observes

Select the correct option

- ○ inter-rater
- ○ coefficient alpha
- ○ split- half test
- ◉ anecdotal

teacher ob

thinking skills, can be measured by paper pencil tests. But there are still many learning outcomes that require informal observation of natural interactions.

Types of assessment tools

Learning outcomes aspects of development can generally be assessed by:

1. Observing students as they perform and describing or judging that behaviors (Anecdotal rec
2. Asking their peers about them and assessing social relationships (Peer appraisal).
3. Questioning them directly and assessing expressed interests (Self-appraisal).
4. Measuring progress by recorded work (portfolio).

Anecdotal records

Impressions gained through observation are apt to provide an incomplete and biased picture, however, unless we keep an accurate record of our observations. The method to do so is called anecdotal records. Anecdotal records are factual descriptions of meaning incidents and events that the teacher observes.

Topic- 050: Effective Use of Anecdotal Records

One should keep in mind the following points to use anecdotal records effectively.

- Determine in advance what to observe but be alert of unusual behavior

ENG520 - Testing and Assessment (Quiz 2)

Question # 4 of 10 (Start time: 07:22:17 AM, 14 May 2024)

A correlation coefficient is a _____ representation of the relationship between the two v

Select the correct option

- (●) numerical
- ( ) condemnatory
- ( ) judgmental
- ( ) instrumental

correlation coe

Predictive
It involves testing a group of subjects for a certain construct, and then comparing them with results obtained at some point in the future.
Procedure
It compares assessment results with another measure of performance obtained at a later date (for prediction) or with another measure of performance obtained concurrently (for estimating present
Method
The degree of relationship can be described more precisely by statistically correlating the two sets of scores. The resulting *correlation coefficient* provides numerical summary of relationship

Topic- 042: Evidences of Validity: Consequence Validity
Meaning
How well use of assessment results accomplishes intends purposes and avoids unintended effects
Procedure
Evaluate the effects of the use of assessment results on teachers and students. Both, the intended positive effects (e.g., increased learning) and possible unintended negative effects (e.g. dropout of school) need to

7:23

There are___ widely used techniques of peer appraisal.

Select the correct option

- six
- three
- two
- four

peer appra

Q. write

TYPES OF ASSESSMENT TOOLS-II

Topic- 052: Peer Appraisal

In this procedure students rate their peers on the same rating device used by their teacher. It de greatly simplified procedures.

Techniques of peer appraisal

There are two widely used techniques in this area are:

1. Guess who
2. Sociometric

Guess who technique

In this technique teacher use a positive or negative behavior of a student as an example. Other students from same group try to guess the statement with that characteristic correctly. Generally behaviors used, for example are positive in nature to avoid any adverse effect on the student pointed out in the example. The guess that technique is based on the nomination method of obtaining peer ratings and is scored by simply counting the number of mentions each student receives on each description.

7:26

vulms.vu.edu.pk/

ENG520 - Testing and Assessment (Quiz 2)

Question # 10 of 10 (Start time: 07:26:09 AM, 14 May 2024)

The questions are grouped by keeping in view the responses of respondents on the ques

Select the correct option

- ○ reliability
- ○ expert judgment
- ● factor analysis
- ○ validity

responses of res

of suggest a plan for action.

Method

There are two methods to confirm construct validity of a test.

1. Expert judgment

There are experts in the field. For the above example, people who are expert in essay writing will be considered to assess the construct validity of the table and the table will be revised under their guidance.

mcq **2. Factor analysis**

In this, we group the questions by keeping in view the responses of respondents on them.

vulms.vu.edu.pk/

ENG520 - Testing and Assessment (Quiz 2)

Question # 3 of 10 (Start time: 07:29:03 AM, 14 May 2024)

Split half reliabilities tend to be ___than equivalent form of reliabilities.

Select the correct option

- (●) higher
- ( ) parallel
- ( ) lower
- ( ) equal

tend to be

Item 5	Item 6	3. Item 3
:	:	4. Item 4
:	:	5. Item 4
:	:	6. Item 4
:	:	
Odd	Even	
Score = 40	Score= 42	Total Score=82

Split half reliabilities tend to be higher than equivalent form reliabilities because split half method is based on the administration of single assessment.

Topic- 048: Method of Estimating Reliability: Kuder-Richardson Method

1. Kuder- Richardson methods and Coefficient Alpha
2. Inter-Rater Method

Kuder- Richardson methods and Coefficient Alpha

• Kuder- Richardson methods and Coefficient Alpha is also a measure of internal consistency.

7:29

vulms.vu.edu.pk/

ENG520 - Testing and Assessment (Quiz 2)

Question # 4 of 10 (Start time: 07:29:25 AM, 14 May 2024)

Kuder- Richardson methods and ____ are the measure of internal consistency.

Select the correct option

- ○ T-test
- ○ Test-retest
- ○ Equivalent test
- ● Coefficient Alpha

kuder

Score = 40	Score= 42	Total Score=82

Split half reliabilities tend to be higher than equivalent form reliabilities because split half method is based on the administration of single assessment.

Topic- 048: Method of Estimating Reliability: Kuder-Richardson Method

1. Kuder- Richardson methods and Coefficient Alpha
2. Inter-Rater Method

Kuder- Richardson methods and Coefficient Alpha

• Kuder- Richardson methods and Coefficient Alpha is also a measure of internal consistency.
• It gives test once. Score total test and apply Kuder- Richardson

As with the split half method, these formulas provide an index of internal consistency but do not require splitting the assessment in half for scoring Purposes. One formula KR20 is applicable only when student responses are scored dichotomously (0 or 1). It is the most useful with traditional test items scored correc or incorrect. The generalization of KR20 for assessments that have more than dichotomous, right-wrong scores is called Coefficient Alpha.
