Eng 529 Solved Recent Papers

Q: Technologies in reading?

In this section, the technologies most relevant to L2 reading are described. They include:

(1) self‐developed course and commercial courseware

(2) online activities with individual tools and mobile devices

(3) CMC

Q: writing Pal?

Writing Pal (W-Pal) is a smart tutoring system created by the Science of Learning and Educational Technology (SoLET) Lab at Arizona State University. It is mainly designed for high school students who speak English as their first language. However, some studies have also included English learners in high school and college freshmen in the U.S. Unlike other automated writing tools, W-Pal focuses on teaching writing strategies.

It follows four key principles:

1. Strategy Instruction
2. Modularity
3. Extended Practice
4. Formative Feedback

Q: E-marking?

E-marking is the process of giving marks and feedback by staff to students online. This can include:

Online comments (e.g., using Blackboard inline grading)

Annotated files (e.g., adding comments in Microsoft Word)

Audio or video feedback

Online forms for grading

It makes grading easier and more accessible for both teachers and students.

Q: Multimedia, individual difference and advance difference principle?

1. **Multimedia Principle** – Students learn a language better when text is combined with pictures instead of just text alone.

2. **Individual Differences Principle** – Students learn better when they can choose between visual or verbal explanations based on their preference.

3. **Advance Organizer Principle** – Using advanced organizers (like summaries or previews) helps students understand reading and listening tasks better, especially when both visuals and words are used instead of just words alone.

Q: Functions of Google Book and Google Ngrams Addon?

Google Books NGram Viewer: This tool shows how often a word has been used in books over time. It helps track how language changes.

Culturomics - Google Ngrams Addon: This is an extra feature for the Google NGram Viewer, allowing you to download more data to study word trends.

Q: Different Forms of E-assessment?

Some of the most widely-used forms of e-assessment are:

a. online tests, quizzes, and exams

b. e-submission and e-marking

c. self- and peer-assessment

d. student response systems

Q: Reading theories for both L1 and L2 have attempted to explain reading processes from three perspectives? **structural**

Structural perspectives believe readers just take in the meaning from the text.

cognitive

The cognitive view says reading is a process where readers use their background knowledge to actively understand the text.

metacognitive

The metacognitive view sees reading as an active process where readers use strategies to understand the text and monitor their comprehension.

Q:Drawing on the work of Chapelle (2003) among others, they divide help options into four categories?

operational

regulatory

compensatory

explanatory

Q: Benefit of ecomma ?

eComma is an open-source web tool that turns reading into a group activity, where learners work together to understand a text. Developed by the Center for Open Education Resources and Language Learning, it allows learners to help each other understand a text by annotating it together.

Q: The interactionist hypothesis?

The Interactionist Hypothesis says that language learners first realize what they don't know and then learn by interacting with others. When communication problems happen, learners work together to understand new words or grammar. The Focus on Form approach helps learners focus on these language gaps during activities.

Q: Benefits of E-assessment?

E-assessment offers several benefits, including:

Immediate feedback to help students improve.

Access from anywhere and at any time for students.

Detailed reports to identify areas needing more focus or improvement.

The ability for students to take multiple online tests to reassess their knowledge.

Q: Thing remember the teachers when designing curriculum with the help of technology?

1. **Clear Learning Goals**: Set what students need to learn and how tech helps.

2. **Integration of Technology**: Use tools like e-learning to improve learning.

3. **Alignment Across Stages**: Make sure the curriculum connects different learning stages.

4. **Student Engagement**: Use tech to make lessons more interactive.

5. **Adaptability**: Adjust the curriculum to fit different learning styles using tech.

Q:What is meant by 'affordance' in digital tools?

Affordance: The potential uses or benefits of a technology perceived by its users.

For example:

1. Subtitles in videos can aid comprehension.

2. Interactive features like pausing and annotating videos can enhance learning.

Q: How does technology develop learners' thinking, and what are three benefits?

Development of Thinking: Technology promotes critical, analytical, and problem-solving skills.

Three Benefits:

1. Encourages higher-order thinking (analysis, synthesis).

2. Supports critical thinking through real-world scenarios.

3. Enhances problem-solving with interactive tools.

Q: Sociocultural theory?

Sociocultural Theory Says that language is learned through social interaction. Working with others, like native or non-native speakers, helps learners improve their language skills. This idea is used in modern language teaching, especially in CALL, where collaboration and interaction are important for learning.

Q: characteristics of blended learning?

1. **Mix of Online & Face-to-Face Learning** – Combines classroom and online teaching.

2. **Use of Different Media** – Includes print, audio, video, and interactive content.

3. **Flexible Learning** – Students and teachers can connect anytime, anywhere.

4. **Student-Centered Approach** – Focuses on active and engaging learning.

5. **Technology Integration** – Brings all learning tools together online.

6. **Better Learning Experience** – Makes learning more effective and enjoyable.

Q: Motivation in Blended learning?

Motivation in Blended Learning:

1. **Independent Learning** – Encourages students to learn on their own.

2. **Discovery Learning –** Students explore and find knowledge themselves.

3. **Active Learning** – Shifts from being taught to taking responsibility.

4. **Control Over Learning** – Students manage their own learning process.

5. **Clear Goals** – Transparent objectives keep students focused.

6. **Cultural Relevance** – Learning can be adapted to students' backgrounds.

Q: Challenges for L2 Learners?

Challenges for L2 Learners in the Digital Age:

1. **Easily Distracted** – Too much information can reduce focus.

2. **Informal Language** – Short texts and slang can weaken learning.

3. **Lack of Deep Thinking** – Digital reading may limit critical thinking.

4. **Fast-Changing Technology** – Hard to keep up with new tools.

5. **Unclear Learning Approach** – Many tools lack proper guidance.

Q: Two other names of Google docs?

Two other names related to Google Docs:

1. **Google Drive** – Described as the office suite where Google Docs is available.

2. **An online word processor** – Google Docs is referred to as a free online word processor.

3**. A collaborative writing platform**

Q: Dragon Software?

Dragon software is a dictation tool that converts spoken words into text for multiple English accents and other languages (e.g., French, German).

It helps language learners improve pronunciation by identifying errors when their speech doesn't align with programmed norms.Provides a feedback loop for learners to refine their speech and improve comprehension.

Q: What are the benefits of CAPT (Computer-Assisted Pronunciation Training)?

CAPT Benefits:

1. Provides a risk-free environment for learners to practice pronunciation.

2. Offers immediate feedback without judgment.

3. Can simulate diverse speech sounds and accents for better learning.

Q: Define E-assessment, E-Submission or E-marking?

E-assessment is the use of technology, such as computers or the internet, to conduct various types of assessments like tests or evaluations.

E-submission is when students submit their work online for review, feedback, or marking, sometimes using tools like Turnitin for plagiarism checking.

E-marking is when teachers provide feedback and grades online, which can include annotations, comments, or multimedia like audio or video.

Q: Define Text to Speech?

Text-to-Speech (TTS) is the process of converting written text into natural-sounding speech using computer programs.

Q: What is CMC (Computer-Mediated Communication)?

CMC: Using computers for communication between learners and teachers.

Examples:

1. Text-based chats and forums.
2. Voice-over-IP tools (e.g., Skype).
3. Collaboration in real-time or asynchronous discussions.

Q: Examples of Human computer interaction?

1. Touchscreen Smartphones
2. Artificial intelligence (AI)
3. Virtual Reality (VR)
4. Gaming Consoles
5. E-commerce Websites
7. Smart Home Devices

Q: write any two web-based courses?

1. Coursera - Teaching English as a Second Language (TESOL) Specialization
2. Duolingo for Schools
3. BBC Learning English
4. Khan Academy - English Grammar

Q: web-based course management systems?

1. **Moodle**: An open-source platform for creating and managing online courses.

2. **Blackboard**: A popular tool for managing courses, assignments, and communication.

3. **Canvas**: A user-friendly platform for course creation and management.

4. **Google Classroom**: A free tool for managing assignments and communication in schools.

5. **Schoology**: A system that combines course management with social learning features.

6. **Google Sites:** A simple tool for creating educational websites and courses.

Q: The two critical elements of motivation in blended learning?

1. **Self-discipline**: Students need to manage their learning on their own.

2. **Responsibility**: Students shift from being taught to learning independently.

Q:Name five major publishers that sell front-list e-books directly to consumers.

1. HarperCollins.
2. Random House.
3. Macmillan.
4. Simon & Schuster.
5. Penguin.

Q: What are the technologies used in teaching and learning L2 reading?

1. **Self-Developed and Commercial Courseware:** Custom tools and software for teaching.
2. **Online Activities**: Tools for independent learning (e.g., apps, online

exercises).

3. **CMC**: Communication technologies like chatrooms and email.

Q: How has the application of technology changed English classrooms?

Technology has replaced traditional teaching methods with interactive tools like multimedia content and the internet.

Benefits:

1. Enhances vocabulary and cultural understanding.

2. Makes learning engaging with videos, games, and online resources.

Q: Benefits of peer assessment?

Peer assessment

• Students practice softer skills e.g. constructive criticism

• Help students learn from each other and place their work

• Students naturally compare themselves with their peers

• Encourage engagement with marking criteria

• Promote deep learning e.g. evaluation

• More efficient & timely feedback for large groups

Q: Define LMS and list its benefits?

LMS (Learning Management System): Software for managing and delivering educational content online.

Benefits:

1. Tracks grades, assignments, and resources.

2. Offers consistency across institutions.

3. Can integrate with external tools for additional features.

Q:What are two types of web-based management education systems?

Web-Based Training Types:

1. **Synchronous**: Real-time training through live classes or webinars.

2. **Asynchronous**: Self-paced learning with pre-recorded content or online

resources.

Q:Explain the Text-to-Speech (TTS) process?

TTS converts written text into spoken words using computer programs.

Examples: Voki, Google Chrome's TTS tools.

Benefits:

1. Assists struggling readers.
2. Enhances L2 learners' listening and reading comprehension.

Q:What are three characteristics of task-based instruction?

1. **Real-World Tasks:** Focuses on meaningful activities like problem-solving.
2. **Learner-Centered**: Empowers students to take responsibility for their learning.
3. **Interaction**: Promotes collaboration and communication among learners.

Q: Three other names of cognitive assignment or assessment?

1. Mental tasks
2. Cognitive tasks
3. Thinking tasks
4. Intellectual tasks
5. Reasoning tasks
6. Problem-solving tasks
7. Cognitive evaluation
8. Neurocognitive testing
9. Mental ability assessment
10. Neurobiological assessment

Q: What are three characteristics of virtual worlds (VWs)?

1**. 3D Environment**: Simulates real or imaginary settings for interaction.

2. **Avatars**: Users are represented by virtual characters.

3. **Real-Time Interaction**: Users can communicate and engage with others synchronously.

Q: What are two web-based systems for higher education?

1. **LMS** (Learning Management System): Platforms like Moodle for managing courses online.
2. **Web-Based Training**: Synchronous and asynchronous training modules delivered online.

Q:What are five considerations before adopting a blended learning approach?

1. **Teacher Training**: Prepare teachers to manage both online and offline learning.
2. **Choosing an Appropriate Blend**: Balance classroom and online activities based on students' needs.
3. **Costs**: Consider budget for technology and resources.
4. **Attrition and Motivation**: Keep students engaged and minimize dropout rates.
5. **Peer Support**: Facilitate collaboration among students for better learning .

Q:What are the five levels of virtual worlds?

1. **Age Level**: Appropriate for different age groups.
2. **Game Level**: Low, mid, or high levels of gameplay.
3. **Socialization Level**: Levels of interaction with others.
4. **Educational Focus**: How much learning is integrated.
5. **Technical Requirements**: Complexity of technology needed.

Q: Initial use of Turnitin?

The initial use of Turnitin is

1. An online plagiarism prevention service
2. A plagiarism detection tool

Q: Who created COCA in which university?

COCA created by Mark Davies at Brigham Young University.

Q: The three considerations of ASR ?

1. **Specific language areas**: ASR works best with focused topics, like family or public place vocabulary.
2. **Feedback for pronunciation**: ASR gives feedback when pronunciation is wrong, helping students improve.
3. **Use in language learning tools**: ASR is used in tools like Dragon Naturally Speaking for practice inside and outside class.

Q: Intended user of writing Pal?

The intended users of Writing Pal (W-Pal) are **native English-speaking** students in high schools, as well as **English language learners** in high schools and **college freshmen** who have been included in some empirical studies.

Q: Three Benefits of Digital Book?

1. **Easy to Carry** – Digital books can be stored on devices like smartphones, tablets, and eReaders, making them easier to carry than heavy paper books.
2. **Quick Access** – You can read your favorite books anytime, anywhere with a supported device.
3. **Helpful for Learning** – E-books make studying easier by using technology to access and read books.

Q: Cardenas‑Claros and Gruba (2013) have developed a comprehensive framework?

Cardenas‑Claros and Gruba (2013) have developed a comprehensive framework called **CoDe**, which stands for **Conceptualizing (Co) and Designing (De)** help options.Which helps in designing support options for second language listening.This framework improves comprehension, processing, and learning by

providing assistance in listening environments. While mainly designed for language learning, it can also help learners understand real-world audio and video content.

Q: Three (3) examples of digital devices for listening?

1. Desktop and laptop computers

2. Tablets

3. Smartphones

4. DVD players

5. MP3 players

6. Feature phones (traditional mobile phones with MP3 capability)

7. Streaming media players (e.g., Apple TV, Google Chromecast)

Q: How blended learning refers to two different learning environments?

Blended learning refers to two different learning environments:

Face-to-Face Learning (Synchronous)

- Meet your teacher and classmates in person.
- Discuss topics and ask questions in real-time.
- Do activities and exercises together as a group.
- Get immediate feedback and help from your teacher.

Online Learning (Asynchronous)

- Learn from home (or anywhere!) using a computer or phone.
- Watch videos, read texts, and do quizzes on your own time.
- Practice what you've learned and review materials as often as you want.
- Connect with classmates and teachers through online discussions and messages.

Q: Lang - 8?

Lang-8 is a website where language learners connect with native speakers. Users write posts in the language they are learning and help correct each other’s writing.

Active users earn points to make their posts more visible for corrections. Lang-8 also offers Skype for live video chats and lets teachers create groups for writing activities.

Q: Define blended learning and give its two different learning environments?

Blended Learning: A teaching method combining face-to-face (synchronous) and online (asynchronous) learning.

Learning Environments:

1. **Face-to-Face**: Classroom learning with direct teacher-student interaction.
2. **Online**: Independent, flexible learning through digital platforms.

Q: Approaches to giving feedback in E-assessment?

Digital Feedback: Share feedback using Word files.

Comments on Work: Add comments to assignments using Word or Adobe, then upload them.

Online Forms: Use feedback forms on Blackboard or Turnitin.

Audio/Video Feedback: Record and share feedback with audio or video.

Direct Comments: Comment directly on assignments in Blackboard or Turnitin.

Q: Functions of Juxta, Wordle and Walrus?

1. **Wordle**: A tool for creating word clouds, which visually display text data. It allows you to customize the shape, color, and font of the word cloud, making it visually appealing and easy to interpret.
2. **Juxta**: A cross-platform tool used for comparing and analyzing multiple texts. It helps users collate textual objects, making it easier to study differences and similarities between them.
3. **Walrus**: (Graph Visualization Tool): This tool helps you view large, complex graphs in 3D. It allows you to zoom in on specific details while still showing the big picture, making it easier to understand the entire graph.
