Question # 1 of 10 (Start time: 04:19:33 PM, 26 June 2025)

Which of the following properties is NOT typically associated with Nebla-Implications?

Select the correct option

○	Monotonicity
○	Associativity
○	Symmetry
○	Continuity

Question # 2 of 10 (Start time: 04:20:37 PM, 26 June 2025)

In fuzzy implication, for any fuzzy number x, $x.(\eta(x))$ is equal to _____.

Select the correct option

○	$x - x^2$
○	x
○	x^2
○	$1-x$

Question # 3 of 10 (Start time: 04:21:18 PM, 26 June 2025)

What is a characteristic of the Hamming distance between two fuzzy sets?

Select the correct option

- ○ It squares the differences in membership values before summing them.
- ○ It is the sum of absolute differences in membership values. ✓
- ○ It measures the total number of elements in the fuzzy sets.
- ○ It only considers the maximum difference between memberships.

Question # 4 of 10 (Start time: 04:22:31 PM, 26 June 2025)

What is the primary purpose of calculating the distance between fuzzy sets?

Select the correct option

○	To defuzzify the fuzzy sets.
○	To find their union.
○	To measure the degree of similarity or dissimilarity between them.
○	To determine their intersection.

Question # 5 of 10 (Start time: 04:23:10 PM, 26 June 2025)

Which of the following is a common method for calculating the distance between two fuzzy sets?

Select the correct option

○	Euclidean distance
○	All of the above
○	Hamming distance
○	Minkowski distance

Question # 6 of 10 (Start time: 04:23:54 PM, 26 June 2025)

What is the primary characteristic of Nebla-Implications in fuzzy logic?

Select the correct option

○	They use only the minimum operator.
○	They are defined based on a continuous t-norm.
○	They use only the maximum operator.
○	They are defined based on probabilistic interpretations.

MTH645 - Fuzzy Logic and Applications (Quiz No.4)

Question # 7 of 10 (Start time: 04:24:45 PM, 26 June 2025)

Nebla-Implications are derived from which of the following types of operators?

Select the correct option

- ○ Residual operators
- ○ Disjunction operators
- ○ Negation operators
- ○ Conjunction operators

Question # 9 of 10 (Start time: 04:25:59 PM, 26 June 2025)

In the context of fuzzy sets, what does the Euclidean distance measure?

Select the correct option

Reload M

- The maximum difference between corresponding membership degrees.
- The total area under the fuzzy sets.
- The square root of the sum of squared differences between corresponding membership degrees.
- The sum of the differences between corresponding membership degrees.

Question # 10 of 10 (Start time: 04:26:44 PM, 26 June 2025)

If two fuzzy sets are identical, what is the distance between them?

Select the correct option

- ○ Infinity
- ○ One
- ○ It cannot be determined
- ○ Zero
