

ENG507

Quiz for Mid-Term

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Maha Malik

Phonetics and Phonology

Quiz from Mid-Term Papers

1. Subtypes of phonology (3)
2. When the focal folds are tight together the resultant sounds are called Voiced.
3. the sponge like tissues contained within air range is called the diaphragm.
4. Another name of phonemic transcription is (Broad Transcription)
5. the length of the VOT is dependent on the practical measurement is based on the practical measure of aspiration
6. In auditory phonetics we study sound with
7. In English there are (24) consonants
8. Voiceless stops at syllable initial are ASPIRATED
9. Consonants at the end of syllable are LONGER
10. Voiced stops at syllable initial are VOICELESS.
11. Right Transcription of furiously... Choose from options 'fjə:ri-i-
12. Voiceless stops are ASPIRATED in onset position
13. Unaspirated voiceless stop has Voice onset time near ZERO
14. all sound produced..... Help of air compressed by LUNGS
15. Frequency, pitch, and loudness are PHYSICAL features.
16. another name for phonemic transcription is _____. (a) Narrow transcription; b) broad transcription; C) orthographic transcription; d) technical transcription)
17. Which of the following branches of phonetic focuses on methodologies and aspect of experimental work on----- speech sounds? Experimental phonetics
18. in English there are ---- consonant types (2; 3; 5; 7)
19. the short symbols which are used for indicating suprasegmental----- diacritics [j]
20. noticeable event accruing at regular intervals (a. Tone; b. pitch; c. rhythm; d. intonation)
21. In order to describe intonation, we need to analyze the role of a 'stressed syllable'
22. /3/ and /a/ are examples of vowel (a. lax; b. Tense; c. lenis; d. forties)
23. How many sub types does phonology has (2; 3; 4)
24. Phonology is the study of..... Structure of language (Sound; Grammar)
25. lenis refers to a sound made with a relatively..... Muscular effort. (Less; quick; Strong; Weak)
26. the velaric airstream mechanism involves an air flame produced by a movement of the back of tongue against the (Hard palat; Soft palat)
27. Higher overtone F2 tells about the position of TONGUE.

ENG507_Phonetics and Phonology
Quiz for Mid-Term

28. In IPA small symbols superimposed on segments are called **DIACRITICS**
29. Lax sounds are produced with **LESS** muscular effort.
30. Optimality theory has stemmed from **GENERATIVE** phonology.
31. Human speech production is studied under the **branch** of phonetics.
32. While studying vowels on spectrogram overtone F2 tells us about the position of ____
33. phonemic transcription is enclosed in slashes or **oblique lines**
34. fricatives are also known as **spirants**
35. A phoneme is the smallest **meaningful** unit of sound
36. In typical tone languages linguistic function of **phoneme** is to change meaning of word.
37. /b/ /d/ fall under the category of ____ (**voiced**; voiceless)
38. Which word used in long vowels **barn**
39. When a sound is not primarily articulated and some other sound is added to it known as. **Articulation**
40. Intonation refers (very) simply to the **variations** in the pitch of a speaker's voice (f0).
41. In order to describe intonation, we need to analyze the role of a '**stressed syllable**'.
42. This term is used to describe some varieties of English (e.g., American) pronunciation in which the **/r/** phoneme is found in all its phonological contexts.
43. The term '**stop**' is used in the phonetic classification of consonant sounds on the basis of their manner of articulation.
44. The North wind and the sun is a folktale taken from (**Arne Thompson**)
45. /ɛ:/ and /a:/ are the examples of ... (**Tense**)
46. The glottis is defined as the space (**vocal folds**)
47. In English /p t k/ at the beginning of a syllable are **aspirated**
48. All three English nasal sounds are **voiced**.
49. Which is non-rhotic accent [a) Urdu b) Punjabi c) American English d) **BBC English.**]
50. Speech sounds are not [a) **Static**. b) Mobile c) Dynamic d) All]
51. In what types of accent /r/ may occur before consonant [a) Rhotic b) Nassal c) Non_rhotic d) **American.**]
52. ____ terms are used for the phonetic clarification of consonantal sound (manner of articulation).
[a) **Fortis and lenis**. b) Strong and weak c) tense and lax]
53. Where the length of each syllables remains more or less the same, are called **Syllable-timed Languages.**
54. The diacritic 'small /h/ above the letter shows that the sound is [a) Velarized b) **Aspirated.** c) Nazalized]
55. **Auditory** phonetics deals with understanding how human ear perceives sound and how the brain recognizes different speech units.
56. Which is the lax vowel? [**a) u:** b) i: c) ɜ: d) a:]

ENG507_Phonetics and Phonology
Quiz for Mid-Term

57. Which dictionary gives by American as well as British English pronunciation? [a) English pronouncing dictionary b) Longman's pronouncing dictionary c) Oxford dictionary of pronunciation for current English. d) dictionary of English pronunciation]
58. In phonetics, ----- refers to degree of force used in producing a syllable? (Stress)

Quizzes from Assessments

1. This course focuses on the linguistic study of speech sounds in a phonetic and phonological perspective. (true)
2. RP stands for (Received Pronunciation)
3. The suprasegmental features of a language relate to, "What you say?" (False)
4. Human sounds are divided into _____ broad categories. (two)
5. A speech sound in which air is at least partly blocked is called . (consonant)
6. The phonology component examines the internal structure of word forms. (True)
7. At the end of this course, student will be able to understand the segmental and suprasegmental feature of the connected speech. (True)
8. Transcription will not be important part of the evaluation. (False)
9. Phonetics and phonology is the branch of linguistics which deals with the speech sounds. (human)
10. GDB stands for _____. (Graded Discussion Board)
11. At the end of the course, the students will only be able to transcribe any kind of English text. (False)
12. In this subject, we'll study the sets of phonemes and sound patterns within a human language. (True)
13. In British English (BBC accent), we have _____ sounds. (44)
14. Phonologist describe the consonants and vowels in a sound system (language). (contrastive)
15. Diphthong is a vowel sound in which the tongue changes position to produce the sound of _____ vowels. (TWO)
16. English diphthongs are divided into two categories. (true)
17. IPA stands for _____. (International Phonetic Alphabet)
18. English sounds have 9 Plosive sound. (false)
19. A speech sound produced by completely or partly stopping the air being breathed out through the mouth is called _____. (consonant)
20. Long vowels produce a _____ vowel sound. (long)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

21. Phonetic transcription is the _____ representation of speech sounds by means of symbols. (visual)
22. In phonology, it matters whether sounds are _____ or not, that is, whether substituting one sound for another gives a different meaning. (contrastive)
23. Phonetics include the understanding of how sounds are using mouth, nose, teeth and tongue. (articulated)
24. There are three major types of phonetics: articulatory phonetics, acoustics phonetics and _____ phonetics. (auditory)
25. The IPA is also maintaining a vibrant (website)
26. Phonetics has been derived from the Greek word 'phonetic' meaning sound or voice. (False)
27. Phonetics deals with production, transmission and _____ of all human speech sounds. (reception)
28. Phonetics as a field of study has a long history, going back certainly to well over _____ years ago. (two thousand)
29. When soft palate is lowered and there is an obstruction in the mouth, we say that there is a nasal consonant. (true)
30. In which branch of phonetics, we study the principal articulators and other processes related to speech production? (Articulatory)
31. In most speech, soft palate is raised so that there is a velic closure. (true)
32. A graph of a sound wave is very similar to a graph of the movements of the eardrum. (true)
33. In the auditory field we do _____ tests to discover how the listener's ear and brain interpret the information in the speech signal. (perceptual)
34. Like other areas of grammar, a major change in the theory of phonology came about in _____. (1960s)
35. Articulatory phonetics is the branch of phonetics which studies the way in which speech sounds are made ('articulated') by the vocal organs. (True)
36. Acoustic phonetics is primarily dependent on the use of instrumental techniques of investigation such as _____ software. (Praat)
37. What did Peter Ladefoged explore about the areas of experimental phonetics in 1967? (The nature of vowel quality, Stress in respiratory activity, Perception and production of speech, All of the given options)
38. The area of phonology is mainly related to specific _____ rules within languages. (phonological)
39. Most of the movements relevant to speech take place in the mouth and _____ area. (throat)
40. The phonation process is the name given to the actions of the _____. (vocal folds)
41. In most speech, soft palate is raised so that there is a velic closure. (True)
42. Sibilant fricatives are weak and less audible and strident fricatives are strong and clearly audible. (False)
43. The quality and intensity of fricative sounds varies greatly, but all are acoustically composed of energy at relatively high frequency. (True)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

44. BBC English has _____ approximant sounds. (four)
45. The sound which is produced with back of the tongue and the soft palate (such as /k/ and /g/) is called _____. (velar)
46. Consonantal sounds are divided, in terms of their manner of articulation, into two major types: obstruent and sonorants. (true)
47. There are several basic ways to pronounce a consonant sound based on the configuration and _____ of the articulators involved. (interaction)
48. The term 'fricative' is used in the phonetic classification of consonant sounds on the basis of their manner of articulation. (False)
49. Plosion is the term used to refer to the _____ movement of air upon release. (outwards)
50. Approximant is a phonetic term used to denote a _____ which makes very little obstruction to the airflow. (consonant)
51. Trill is up and down movement of the top of the tip of tongue. (False)
52. Which of the following is an example of affricate sound at the beginning and end of the English word church? (tʃ)
53. A contrast of length (between short and long) is also sometimes encountered with _____. (vowels)
54. In the articulation of vowels, the articulators do not come _____ together and the air stream is relatively undisturbed. (close)
55. In case of a stop sound, the closure and the burst are also _____ to judge. (easy)
56. The term 'suprasegmental' means _____. (above sound)
57. Vowel sounds are articulated without a complete closure in the mouth or a degree of narrowing which would produce audible friction. (True)
58. The difference between a vowel and a consonant in the waveform is very easy to understand. (True)
59. If some air is simultaneously released through the nose, the vowels are _____. (nasal)
60. Some languages (such as English) have phonemic differences between long and short sounds, contrasting short vowels with long vowels. (True)
61. Phonetic symbol [j] is a/an _____ sound. (approximant)
62. How many plosive sounds are there in the BBC accent of English? (six)
63. How many nasal sounds are there in the BBC accent of English? (three)
64. Phonetic symbol [v] is a/an _____ sound. (fricative)
65. Transcription is a useful _____ for highlighting the phonemes of a language during documentation and description. (technique)
66. In order to learn the transcription of vowels, we need to start exploring the IPA chart for _____. (vowels)
67. International Phonetic Association (IPA) Established in _____. (1886)
68. There are said to be seven short vowels, five long ones and _____ diphthongs. (eight)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

69. Phonemic transcription shows allophones in square brackets: []; it gives more details of the physical pronunciation. (False)
70. The IPA is also maintaining a vibrant website where tools for phonetic study and language teaching are available. (True)
71. The last revision of the IPA charts was carried out in _____. (2015)
72. The IPA charts are used as a useful tool for transcribing not only the segments but the detailed phonetic variation. (True)
73. Broad transcription represents basic speech sounds of a dialect. (True)
74. How many 'long vowels' symbols are there in the BBC accent of English? (five)
75. The IPA provides various tools for the phonetic study of human languages. (True)
76. The name of the IPA story is 'The North Wind and the Summer'. (False) [it is true but false is saved in system]
77. In which kind of transcription are the sounds symbolized on the basis of their articulatory/auditory features? (Phonetic transcription)
78. The home page of the International Phonetic Association has many very helpful links, for example: (Information about how to join the IPA, All of the given options, Sound files illustrating the IPA, Links to free and professional IPA fonts)
79. Select the correct title of the IPA story? (The North Wind and the Sun)
80. While transcribing the text phonemically, you are required to take care of using slashes at the beginning and ending of the transcription. (True)
81. It is now realized by experts that important changes happen to _____ when they are used in a connected speech. (sound units)
82. How many variations do we have among various accents of a language? (four)
83. Symbol ['] above the line and before the stressed syllable is used to indicate the _____ stress. (primary)
84. In phonetics, stress refers to the degree of _____ used in producing a syllable. (force)
85. Assimilation is concerned with one sound becoming phonetically similar to the _____ sound. (adjacent)
86. While transcribing, it is also important to take care of the noticeable events at regular intervals as part of the connected speech. (True)
87. Two sounds come together to form a single sound in _____. (assimilation)
88. Connected speech is a type of transcription which required when a spoken language is analyzed as a continuous sequence. (true)
89. While transcribing, it is also important to take care of the noticeable events at regular intervals as part of the _____. (connected speech)
90. There are many Englishes today with many national and regional varieties based on the typical way (called accent) of pronunciation. (True)
91. How many consonants are there in the RP accent of English? (24)
92. Stop is often used as if synonymous with _____. (plosive)
93. The consonantal sounds in which the air escapes through the nose are called _____. (nasal)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

94. Choose the correct transcription of the word 'church'. (/tʃɜ:tʃ/)
95. Consonants are described in terms of voicing, manners and places of articulation. (True)
96. The consonants which make very little obstruction to the air flow are called _____. (approximants)
97. Very common fricative sounds are /f, v, s, z, θ, ð, h/ whereas _____ is a less common fricative sound. ([ʒ])
98. When two articulators come close to each other that the air moving between them produces audible friction, the resultant sound is called _____. (fricative)
99. In the British English, there are _____ stops. (nine)
100. Stop is often used as if synonymous with _____. (plosive)
101. How many affricates do we have in English? (Two)
102. As a notion, overlapping was introduced by American structural linguists in the _____. (1940s)
103. Alveolar stops are reduced or omitted when between two _____. (consonants)
104. Voiced obstruents (b, d, g, v, ð, z, ʒ) are voiced only when they occur at the end of an utterance or before a voiceless sound. (True)
105. Overlapping is a common _____ of connected speech. (feature)
106. Voiced stops (b, d, g) and affricate (dʒ) are voiced when they are syllable initial (except when immediately preceded by a voiced sound). (False)
107. Speech sounds are produced with the movement of the artifacts. (False)
108. A consonant is shortened when it is before an identical consonant (e.g., /k/ in cap and kept). (True)
109. In experimental phonetics, _____ is a way of finding out how the brain controls the production of speech sounds. (co-articulation)
110. The differences between various allophones of a phoneme can be explained in terms of targets and _____ gestures. (overlapping)
111. Co-articulation is an articulatory phenomenon which involves a simultaneous overlapping at one point in the vocal tract. (False)
112. A vowel can also be _____ in words like man. (nasalized)
113. The diacritic marks may be placed over a symbol, under it, before it, after it, or through it. (True)
114. Aspiration is a _____ made when a consonantal contraction is released and air is allowed to escape relatively freely. (puff of noise)
115. In co-articulation, velarization is a process whereby a _____ in the vocal tract is added to the primary constriction which gives a consonant its place of articulation. (constriction)
116. A 'nasalized consonant', is a consonant which, though normally oral, is articulated in a nasal manner because of some adjacent oral sound. (False)
117. For a detailed transcription, diacritics are used to a symbol in order to narrow its meaning. Which symbol is used for 'syllabic n' sounds? ((small vertical line below)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

118. In some languages (such as English) aspiration being phonemic while in others (such as Urdu) it is allophonic. (False)
119. The International Phonetic Association (IPA) recognizes a range of such marks (diacritics) for both vowels and consonants. (wide)
120. For a detailed transcription, diacritics are used to a symbol in order to narrow its meaning. Which symbol is used for 'nasalized' sounds? (~ (tilde symbol above))
121. The diacritic marks may be placed over a symbol, under it, before it, after it, or through it. (True)
122. Velarisation is a very common feature of _____ and it is quite important and interesting for acoustic analysis. (Arabic)
123. Variations in vowels are describable in terms of quality, (e.g., the distinction between [i] and [e] vowels etc.) would be called a _____ difference. (qualitative)
124. Many of the American vowels are essentially different than those of British and that is why the former is a different English. (True)
125. Cardinal vowels are a set of _____ vowels used by phoneticians in describing the sounds of language. (reference)
126. A cardinal vowel is a vowel sound produced when the tongue is in an extreme position either front/back, or high/low. (True)
127. Quality is a term used in auditory phonetics and phonology to refer to the characteristic resonance, or timbre of a sound. (True)
128. A speech sound produced by humans when the breath flows out through the mouth without being blocked by the teeth, tongue or lips is called _____. (vowel)
129. The difference in English vowels is not only related to the number of vowels but it is also found in the 'length' and 'quality' of vowel sounds. (True)
130. The vowels [ʊ, u] as in good and food also vary considerably as they have a much unrounded vowel in good and a rounded but _____ vowel in food. (central)
131. Most speakers of American English speak with a _____ accent, but there are non-rhotic areas including the Boston area, lower-class New York and the Deep South. (rhotic)
132. A consonant may take one out of three forms: stressed, unstressed and reduced. (False)
133. A vowel may take one out of three forms: stressed, unstressed and _____. (reduced)
134. Diphthong is a single vowel consisting of the features of _____ vowels. (two)
135. The term 'rhotic' is used to describe some varieties of English pronunciation in which the /r/ phoneme is found in all its phonological contexts. (True)
136. Diphthongs, or 'gliding vowels', are usually classified into phonetic types depending on one of the two elements that is the more sonorous. (true)
137. The terms fortis and _____ are used in the phonetic classification of consonantal sounds on the basis of their manners of articulation. (lenis)
138. A reduced vowel may be voiced when it is before a voiceless stop. (False)
139. Lax sounds are produced with less muscular effort and movement, and are relatively short but prominent vowel sounds compared to tense sounds. (False)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

140. Tense and lax are the labels given to vowels on the basis of their _____. (behavior)
141. Fortis refers to a sound made with a relatively _____ degree of muscular effort and breath force compared with the other sound. (strong)
142. In phonological analysis, most of the experts only distinguish among three degrees of stress namely 'primary', 'secondary' and '_____'. (weak)
143. In terms of linguistic function, stress is often treated under two different headings: word stress and _____ stress. (sentence)
144. In the American structuralist tradition, four such degrees are usually distinguished namely primary, secondary, tertiary, and _____. (weak)
145. Stress on a word or certain words in a phrase or sentence is called _____ stress. (prosodic)
146. The 'strong' form is the result of a word being _____. (stressed)
147. The difference between citation speech and connected speech is the variable degree of emphasis placed on different words in the connected speech. (True)
148. Stress is basically the prominence of syllable in terms of loudness, length, pitch and quality and all of them work together in order to make a syllable stressed. (True)
149. Which of the following refers to the degree of force in the production a syllable? (Stress)
150. The citation speech and conversational speech difference is particularly noticeable for the _____ class of words. (closed)
151. Intonation does not mean to convey emotions and attitudes. (False)
152. Intonational phrasing is an unstructured hierarchy of the intonational constituents in conversation. (False)
153. In conversational speech, the sentence rhythm is a bit _____, but it is clear that the timing of speech is not random. (complicated)
154. ToBI stands for _____. (Tone and Break Indices)
155. Intonation refers (very) simply to the variations in the _____ of a speaker's voice used to convey or alter meaning. (pitch)
156. Although 'tone' as a word has a very wide range of meanings and uses in ordinary languages, its meaning in phonetics and phonology is quite _____. (restricted)
157. Languages where the length of each syllable remains more or less the same as that of its neighbors whether or not it is stressed are called _____ languages. (syllable-timed)
158. 'Intonation' is pitch variation at sentence level and it could be described in terms of _____. (intonational phrase)
159. As the part of suprasegmental phonology, intonation refers to the distinctive use of patterns of pitch, or _____. (melody)
160. 'Tone' refers to an identifiable movement or level of pitch that is used in a linguistically contrastive way. (True)
161. Intonation does not mean to convey emotions and attitudes. (False)
162. Click sounds (ingressive velaric) are much rarer, but occur in a number of southern _____ languages. (African)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

163. Consonants produced with velaric airstream mechanism are called _____. (clicks)
164. A glottalic airstream is produced by making a tight closure of the vocal folds and then moving the _____ up or down. (larynx)
165. Which of the following involves an airflow produced by a movement of the back of the tongue against the velum? (The velaric airstream)
166. In addition to pulmonic and glottalic airstream mechanisms, there is a third possibility involving _____. (velum)
167. Pulmonic airstream mechanism is the most commonly used mechanism for speech production by human beings. (True)
168. The ingressive glottalic consonants and egressive ones are found in many European languages. (False)
169. When the air is moved inwards or outwards by initiating air movement involving 'lungs', it is called the _____ airstream. (pulmonic)
170. A more widely open glottis is found in most voiceless _____. (consonants)
171. The process of phonation is also known as 'voicing' and laryngeal activity. (True)
172. When there is a slight opening in the front and the arytenoid cartilages are tight together, so that the vocal folds can vibrate only at the anterior end, it is called _____ voice. (creaky)
173. 'Phonation' is a general term used in phonetics to refer to any vocal activity in the _____. (larynx)
174. Obstruents are the most frequently found sounds that have only voicing as a distinctive feature. (False)
175. Voicing is an important feature of speech sounds which is used not only as a feature but also as a distinction for describing sounds. (True)
176. 'Phonation' is a technical term used for describing the forms of vibration of the vocal folds (or vocal cords). (TRUE)
177. During the phonation process, the air passes between the vocal folds and modification to the air passage takes place in the _____ area. (laryngeal)
178. Ladefoged and Keith Johnson (2010) discuss the four possible states of the glottis: 1) Voiced, 2) voiceless, 3) murmur, and _____ voice. (Creaky)
179. VOT stands for _____. (Voice Onset Time)
180. The timing of the voicing in relation to the _____ articulation is also very important. (consonant)
181. The Navajo aspirated stops have a very short VOT value. (False)
182. VOT is an important feature in _____ phonology and it is used in order to analyze the nature of different languages and their stop sounds. (experimental)
183. The timing of the voicing in relation to the _____ articulation is also very important. (consonant)
184. The voicing of a vowel begins at or near to when the stop is released. (true)
185. Voice Onset Time (VOT) is a term used in phonetics referring to the point in time at which _____ vibration starts in relation to the release of a closure. (vocal-fold)

ENG507_Phonetics and Phonology
Quiz for Mid-Term

186. The onset of voicing in a plosive may lag behind the plosive release, or it may precede contrarily, resulting in a fully or partially voiced plosive. (True)
187. In English and most of other languages nasals are voiced. (True)
188. Laryngealized (creaky) sound /b/ exists in _____. (Hausa)
189. The fricatives [s, z, ʒ, ʃ] are called _____ sounds. (sibilant)
190. A better way of dividing fricatives is to separate them into groups on a purely _____ basis. (auditory)
191. Ejective affricate /tsʰ/ is found in _____. (Navajo)
192. As voiceless nasals are comparatively rare, they are symbolized simply by adding the voiceless diacritic [̥] above the symbol for the voiced sound. (False)
193. Gestures are treated as the abstract characterizations of articulatory events with an _____ time dimension. (intrinsic)
194. In phonetics and phonology, speech sounds (segments), using basic units of contrast, are defined as gestures. (True)
195. An articulatory target refers to the _____ target position of the articulators for the production of a specific speech sound. (hypothetical)
196. Many languages (including English) have the labiodental fricatives [f, v]. (False)
197. It is a usual /r/ approximant or unusual rhotic approximate [ɹ] found in _____ English. (American)
198. Speech segments are modeled as sets of gestures that have their own _____ temporal structure allowing them to overlap one way or the other. (intrinsic)
199. In the sections on various stop sounds in world languages, we studied _____ types of stop sounds. (13)
200. Laterals are usually presumed to be _____ approximants unless a specific statement to the contrary is made. (voiced)
201. An 'oral gesture' would specify characteristics of phonation. (False)
202. A 'laryngeal gesture' would specify all supraglottal characteristics. (False)
203. In all forms of English, the air flows freely without audible friction, making this sound a _____ alveolar lateral approximant. (voiced)

[B.Ed. \(1.5 Years\)](#)

[BS English](#)

[Files](#)

Compilation

When two sounds are articulated together, it is known as _____.

Select the correct option

- ☐ articulation
- ☒ co-articulation 
- ☐ contra-articulation
- ☐ supra-articulation

According to rules for English Consonantal Allophones(ECA), approximants /w, r, j, l/ are _____ after initial /p, t, k/ sounds, as in play, twin, etc.

Select the correct option

☐	voiced
☐	voiceless
☐	prominent
☐	sibilant

© 2010 Pearson Education, Inc. All rights reserved.

The terms _____ are specifically used in the phonetic classification of consonantal sounds on the basis of their manners of articulation.

Select the correct option

tense and lax

strong and weak

fortis and lenis

phonemic and allophonic

In order to describe intonation, we need to analyze the role of a _____.

Select the correct option

- ☒ stressed syllable 
- ☐ stress level
- ☐ contour movement
- ☐ moraic distribution

QUESTION MARKED AS CORRECT

In the pulmonic airstream, the air is moved inwards or outwards by initiating air movement involving _____.

Select the correct option

☒

lungs

☐

nasal cavity

☐

oral cavity

☐

velum

QUESTION 7 OF 30

In typical 'tone' languages, the linguistic function of _____ is to change the meaning of a word.

Select the correct option

- | | |
|----------------------------------|---------|
| ☒ | tone |
| ☐ | stress |
| ☐ | glide |
| ☐ | antonym |

☐	hump

ENG507 Online Quiz 1 Solved by Shahnawaz

Very tough quiz – I make many guesses so pl first verify correct answer and then also post in comments if you found any answer wrongly attempted so I would be able to make corrections in midterm mega file.

You don't need to search such quizzes which I mentioned confirmed at the end of each quiz or give answer.

Set#1

ENG507:Quiz 1

Quiz Start Time: 12:12 AM, 14 November 2018

Question # 1 of 10 (Start time: 12:13:00 AM, 14 November 2018)

Total Marks: 1

In English language there are _____ pure vowels.

Select the correct option

☒	12	
☐	8	
☐	15	
☐	5	

Confirmed

Question # 2 of 10 (Start time: 12:13:54 AM, 14 November 2018)

Total Marks: 1

By default, all vowels are _____.

Select the correct option

☐	devoiced	/
☒	voiced	/
☐	central	/
☐	None of the given options	/

Confirmed

Question # 3 of 10 (Start time: 12:15:12 AM, 14 November 2018)

Total Marks: 1

The sounds which are produced with the help of the tip or blade of the tongue are called _____.

Select the correct option

☒	labial sounds	/
☐	coronal sounds	/
☐	dorsal sounds	/
☐	lateral sounds	/

Correct answer: Coronal Sounds

Question # 4 of 10 (Start time: 12:16:38 AM, 14 November 2018)

Total Marks: 1

Phonetics is the study of _____.

Select the correct option

- | | | |
|----------------------------------|--------------------------------|---|
| ☐ | sentence structure of language | / |
| ☒ | human speech sounds | / |
| ☐ | word structure | / |
| ☐ | ideas and thoughts in language | / |

Confirmed 100% correct

Question # 5 of 10 (Start time: 12:17:16 AM, 14 November 2018)

Total Marks: 1

In phonetics, we are concerned with the _____ properties of speech sounds.

Select the correct option

- | | | |
|----------------------------------|--------------|---|
| ☒ | physical | / |
| ☐ | biological | / |
| ☐ | sociological | / |
| ☐ | geographical | / |

[Click to Save Answer & Move to Next Question](#)

Confirmed

Question # 6 of 10 (Start time: 12:17:52 AM, 14 November 2018)

Total Marks: 1

Which of the following is always at the nucleus position of the syllables?

Select the correct option

☐	Consonants	/
☐	Vowels	/
☐	Allophones	/
☐	Semivowels	/

Correct Answer is: Vowels

Question # 7 of 10 (Start time: 12:19:16 AM, 14 November 2018)

Total Marks: 1

The study of various processes used in the production of the speech sound is known as _____ phonetics.

Select the correct option

☐	auditory	/
☒	articulatory	/
☐	acoustic	/
☐	stylistic	/

Confirmed

Question # 9 of 10 (Start time: 12:21:16 AM, 14 November 2018)

Total Marks: 1

Lower articulators are _____.

Select the correct option

☐	highly mobile	/
☒	less mobile	/
☐	mostly static	/
☐	almost motionless	/

[Click to Save Answer & Move to Next Question](#)**Correct answer: Highly Mobile**

Question # 10 of 10 (Start time: 12:22:25 AM, 14 November 2018)

Total Marks: 1

Which of the following eras is the FIRST to study in the history of phonology?

Select the correct option

☐	Pre- Raphaelite	/
☒	Pre- Generative	/
☐	Pre- Dominicans	/
☐	Pre- Socialite	/

Confirmed

Set#2

ENG507:Quiz 1

Quiz Start Time: 01:30 PM, 14 November 2018

Question # 2 of 10 (Start time: 01:30:19 PM, 14 November 2018)

Total Marks: 1

Human speech sounds can be divided into two broad categories. vowels and _____.

Select the correct option

☐	articles	/
☐	nouns	/
☐	verbs	/
☒	consonants	/

Confirmed

ENG507:Quiz 1

Quiz Start Time: 01:30 PM, 14 November 2018

Question # 4 of 10 (Start time: 01:31:49 PM, 14 November 2018)

Total Marks: 1

In liquid sounds there is _____ contact between the articulators.

Select the correct option

☐	complete	/
☐	no	/
☒	approximant	/
☐	frequent	/

Question # 6 of 10 (Start time: 01:34:44 PM, 14 November 2018)

Total Marks: 1

Which of the following is always at the nucleus position of the syllables?

Select the correct option

☐	Consonants	/
☒	Vowels	/
☐	Allophones	/
☐	Semivowels	/

Confirm 100% correct

Question # 7 of 10 (Start time: 01:35:36 PM, 14 November 2018)

Total Marks: 1

The waveforms of consonants can inform us about the _____.

Select the correct option

☒	manners of articulation	/
☐	places of articulation	/
☐	obstruents only	/
☐	sonorants only	/

Confirmed

Question # 9 of 10 (Start time: 01:37:31 PM, 14 November 2018)

Total Marks: 1

The smallest unit of speech is known as _____.

Select the correct option

☐	morpheme	/
☐	phoneme	/
☐	word	/
☒	syllable	/

Phoneme (also confirmed at your end pl)

Question # 10 of 10 (Start time: 01:38:56 PM, 14 November 2018)

Total Marks: 1

In phonetics we are concerned with the _____ sounds with its physical properties.

Select the correct option

☐	abstract	/
☒	concrete	/
☐	vague	/
☐	imaginative	/

Set#3 Repeated Quizzes excluded

ENG507:Quiz 1

Quiz Start Time: 01:55 PM, 14 November 2018

Question # 1 of 10 (Start time: 01:55:27 PM, 14 November 2018)

Total Marks: 1

Linguists, speech engineers and speech pathologists focus upon sound _____ in terms of sound hearing.

Select the correct option

☐	interpretations	/
☒	waves	/
☐	visions	/
☐	vibrations	/

ENG507:Quiz 1

Quiz Start Time: 01:55 PM, 14 November 2018

Question # 2 of 10 (Start time: 01:56:45 PM, 14 November 2018)

Total Marks: 1

Which of the following sounds does NOT fall under the category of obstruents?

Select the correct option

☐	Stops	/
☐	Fricatives	/
☒	Liquids	/
☐	Affricates	/

Confirm 100% correct

Question # 3 of 10 (Start time: 01:57:37 PM, 14 November 2018)

Total Marks: 1

Nasals, liquids and glides fall under the category of _____.

Select the correct option

☐	obstruents	/
☐	laterals	/
☐	approximants	/
☒	sonorants	/

Confirmed 100% correct

Question # 5 of 10 (Start time: 01:58 57 PM, 14 November 2018)

Total Marks: 1

The Pre-Generative Era is the _____ stage in history of phonology.

Select the correct option

☒	first	/
☐	second	/
☐	third	/
☐	fourth	/

Confirmed

Question # 6 of 10 (Start time: 01:59:40 PM, 14 November 2018)

Total Marks: 1

The phenomenon of articulators interacting with each other is termed as _____.

Select the correct option

☒	stricture	/
☐	laterality	/
☐	nasality	/
☐	orality	/
