BT603 VU Current Final Term Papers Spring 2020 (10 September onward)
Bt603

Four main fermentor during 1900-1940 (2)

Role of inhibitor in fermentation medium (2)

Limitations of dynamic gassing out (2)

3 names of chelating agents (3)

Types of fermentation on the basis process(3)

Lab, pilot and industrial scale fermentation (3)

Techniques for storage and preservation (10)

Note on chelators (5)

Johnson equation (5)

Random mutagenesis (5)

Current Paper BT603.

replica plating
5 marks
stiometric equation for oxygen 5 marks
define aeration 2 mark
various methods of indentify the microbes
five enzyme name with inducer 3 marks
10 marks ka lyphozation process
baki 2 scientist k work pochy thy wo yad nh

Current Paper BT603. (**08:00 AM, 20-02-2020**)
MCQs
_Mostly %agr and formulas
_Lypholyzation temperature.
_Which type of fermentation need no oxygen
Questions
Technique of microbial culture storage explain it? 10 marks
What is the difference between positive selection or negative selection mutant?
What is random mutant genesis?
What is the role of inhibitor in fermentation medium?

vustudents.pk

What is protoplast?
What is organism accordingly bull man?
Henry law?
Phynotypic characteristics of microorganisms?
Trace elements in fermentation media ?
Equation of oxygen transfer from air bubble to liquid?

Bt603
Mcqs almost same thy
Questions b i think milty julty e thy bs prepare nae kiye thy lol
1:name of trace elements used in fermentation
2:draw a graph showing dissolved oxygen aesa e kch tha
3: draw a graph showing increasing concentration of time n oxygen
4: streak plate method 10 marks
5: wt r various phenotypic methods to characterize n to Identify microorganisms ?
