

ENG505

Final-Term (✨✨✨✨✨✨

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Language Learning Theories

ENG505_Language Learning Theories
Final-Term (✨✨✨✨✨)

1. Psycholinguistics

Psycholinguistics studies how language is processed, understood, produced, and acquired in the human mind.

2. Language and Brain

Language is controlled by the brain. Different areas handle speaking, understanding, reading, and writing.

3. Broca's Area

Controls speech production. Damage causes slow, broken speech.

4. Wernicke's Area

Controls language comprehension. Damage causes fluent but meaningless speech.

5. Mental Lexicon

Mental dictionary in the brain where words, meanings, and sounds are stored.

6. Language Processing

Understanding and producing language through sounds, words, sentences, and meaning.

7. Speech Production Stages

Conceptualization → Formulation → Articulation

8. Speech Perception

Ability to hear and understand spoken language.

9. Slips of the Tongue

Unintentional speech errors showing how language is organized in the brain.

10. Language Acquisition

Process of learning a language, especially first language naturally.

Maha Malik's Compilation

11. First Language Acquisition

Children acquire language without formal teaching and follow fixed stages.

12. Stages of Language Development

Babbling → One-word → Two-word → Telegraphic → Adult-like speech

13. Second Language Acquisition (SLA)

Learning another language after the first language.

14. Learning vs Acquisition

- Learning: conscious and formal
- Acquisition: unconscious and natural

15. Learning Strategies

Techniques learners use to improve language learning.

16. Oxford's Language Learning Strategies

Rebecca Oxford classified strategies into two main types:

A. Direct Strategies

Used directly with language.

- **Memory strategies**: remembering words
- **Cognitive strategies**: practicing, analyzing
- **Compensation strategies**: guessing meaning

B. Indirect Strategies

Support learning.

- **Metacognitive strategies**: planning, monitoring
- **Affective strategies**: controlling emotions
- **Social strategies**: learning with others

17. Social Strategies

Learning language through interaction, asking questions, and cooperation.

18. Memory Strategies

Using images, repetition, and association to remember words.

19. Cognitive Strategies

Practicing language, summarizing, reasoning, analyzing.

20. Metacognitive Strategies

Planning, organizing, evaluating learning.

21. Affective Strategies

Reducing anxiety and encouraging oneself.

22. Compensation Strategies

Guessing meaning, using synonyms, gestures.

23. Factors Affecting SLA

Age, motivation, aptitude, attitude, exposure.

24. Motivation

- Integrative motivation
- Instrumental motivation

25. Errors in SLA

Errors show learning progress.

26. Error Analysis

Study of learner errors to understand learning problems.

27. Interlanguage

A learner's developing language system.

28. Fossilization

Permanent errors in second language learning.

29. Critical Period Hypothesis

Language learning is easier before puberty.

30. Input and Interaction

Comprehensible input and interaction help learning.

31. Role of Teachers

Guiding, motivating, and providing input.

32. Role of Learners

Active participation and strategy use.

33. Classroom Interaction

Group work and discussion improve learning.

34. Individual Differences

Learners differ in style, pace, and strategy use.

35. Learning Styles

Visual, auditory, and kinesthetic learners.

36. Autonomy in Learning

Learners take responsibility for their own learning.

37. Anxiety in Language Learning

High anxiety blocks learning.

38. Confidence

Confidence improves communication.

39. Importance of Strategies

Good strategies make learning faster and effective.
