ENG509 FINAL TERM FILES OBJECTIVE

OBJECTIVE PART:

1. There are traditionally said to be two different types of word; namely content words and function words. **(True)**
2. The main lexical/substantive categories found in English are noun, verb, adjective, adverb and preposition. **(True)**
3. Which of the following is a determiner? **(this)**
4. Which of the following is a complementizer? **(if)**
5. Finite clauses must contain a verb which shows tense. **(True)**
6. Over 85% of languages usually place the subject first, either in the sequence SVO or the sequence SOV. **(True)**
7. The sentence 'Colorless green ideas sleep furiously.' is correct ----------. **(syntactically)**
8. Most linguists believe that human infants are born pre-programmed to learn language the way as they are pre-programmed to walk upright. **(True)**
9. SVO is the basic word order of ----------. **(English)**
10. Over 85% of languages usually place the subject first, either in the sequence SVO or the sequence SOV. **(True)**
11. The sentence 'Colorless green ideas sleep furiously.' is correct ----------. **(syntactically)**
12. Most linguists believe that human infants are born pre-programmed to learn language the way as they are pre-programmed to walk upright. **(True)**
13. SVO is the basic word order of ----------. **(English)**
14. The passive involves promotion of an object phrase to a new position in the sentence, known as the subject position. **(True)**
15. At what age, children can acquire native like syntactic competence? **(9 or 10)**
16. Run' is a two-morpheme word. **(False)**
17. Chomsky claims human beings are biologically endowed with an innate language faculty. **(True)**
18. English is a non-null-subject language. **(True)**
19. At what age, children generally produce their first recognizable word (e.g. Mama or Dada)?
    (12)
20. Each word consists of one or two morphemes. **(True)**
21. John laughed. In this sentence John is a ___phrase. **(Noun)**
22. 'IC' analysis stands for Immediate Constituent. **(True)**

23. The clause is regarded as the largest or highest unit on the hierarchical scale of constituents. **(False)**

24. The syntactic analysis of the sentence does not usually go below the level of the word. **(True)**

25. Cleft sentence is considered a sentence in which some part is moved from its normal position into a different place to give it more emphasis. **(True)**

26. Pseudo-cleft sentence is a kind of cleft sentence in which the subordinated clause is a relative clause headed by an interrogative pro-form. **(True)**

27. Passivisation is a way of rearranging the information in a sentence. **(True)**

28. The term passivisation was coined by linguist Noam Chomsky. **(True)**

29. Word order in English is fixed to a large extent. **(True)**

30. 'A beautiful flower' is _____. **(Determiner phrase)**

31. A sentence which consists of a string of coordinated clauses (conjoins) is called a____ sentence. **(compound)**

32. English also has verbless clauses. **(True)**

33. The young German girl is ___ phrase. **(noun)**

34. Myself, yourself, himself, itself, ourselves, yourselves and themselves are known as ____ pronouns. **(reflexives)**

35. Coordinate clauses are introduced by coordinators (and, but, or, for, etc.). **(True)**

36. The head of an adjective phrase is a/an adjective. **(True)**

37. What is the verb phrase (VPs) in the following sentence? Jeffry is going out for a vacation. **(Is going out for a vacation)**

38. Label the underlined phrase in the following sentence. Sam is studying in his room. **(Verb Phrase)**

39. Non-finite VPs are those which exhibit no contrast between past and present tense. **(True)**

40. All Noun Phrases (NPs) happen to end with the Head noun (N). **(True)**

41. The Head of an AdvP is an ____. **(adverb)**

42. The Head of an AdjP is an adjective. **(True)**

43. Words are grammatical units which a speaker of a language can intuitively recognize. **(True)**

44. Lexical verbs can be preceded by one or more auxiliaries. **(True)**

45. Adjectives in English change in form to show number. **(False)**

46. 'To the tramp' is a _____. **(prepositional phrase)**

47. Dative movement refers to the transformation that relates a prepositional indirect-object construction. **(True)**

48. Unfortunately, certainly, in my view, in fact are referred as sentence adjuncts. **(True)** **49.** The function of a Predicative Complement (Pc) is that of ascribing some property to the Subject of the sentence. **(True)**

50. The verb phrase (VP) contains two constituents in addition to the VP- Head and its specifires:
an NP and a PP. **(True)**

51. Give, offer and pour are known as ____. **(ditransitive verbs)**

52. Complement is the obligatory constituent to complete VP. **(True)**

53. Each clause contains a VP preceded by an NP. **(True)**

54. Remain is a _____. **(transitive verb)**

55. Love is a ____ verb. **(monotransitive)**

56. In general, adverbial adjuncts are modifiers of the activity expressed by the verb. (True)

57. Snore is a/an _____ verb. **(intranstive)**

58. Eat is a _____ verb. **(monotransitive)**

59. The verbs put, word and remind are____. **(transitive)**

60. Verbs such as laugh, snore and yawn have no complement. **(True)**

61. Embedded clauses very often function as adjuncts. **(True)**

62. A verbless clause is a clause-like construction in which verb elements is implied but not present. **(True)**

63. Nonfinite verbs cannot perform action as the root of an independent clause. **(True)**

64. The morpheme -n't is not an independent word. **(True)**

65. Did you measure the distance? **(Yes-No Question)**

66. In basic sentences in English the noun phrase typically follows the____. **(verb)**

67. Wh-movement can operate in two ways. **(correct)**

68. Are you a vegetarian? **(Yes-No Question)**

69. Where are you going? **(Direct question)**

70. Ali asked if she was studying. **(direct question)**

71. Tense can never occur on its own; it must always be attached to a verb or an auxiliary. **(True)**

72. Mary wondered: 'What is John doing?' The string with quotation marks is an example of ____. **(direct speech)**

73. Relative clauses are also known as postmodifying. **(True)**

74. If the preposition is stranded, the moved wh-word on its own can be deleted. **(True)**

75. Normally, wh-question formation involves: (a)wh-movement (b)SAI, with or without dosupport. **(True)**

76. Who is eating candies? **(direct question)**

77. The WH -words which relate the subordinate clause and the head are known relative pronouns. **(True)**

78. The fact of putting a word or phrase that does not normally come at the beginning of a sentence at the beginning, in order to emphasize it is known as ____. **(fronting)**

79. Passivisation makes a text impersonal and formal. **(True)**

80. Passivisation allows to suppress the agent. **(True)**

81. Agent-less passives are especially characteristic of the style of official documents, textbooks, scientific articles, instructions rules, etc. **(True)**

82. Relative clauses like these, which lack a real head noun, are called free relative clauses. **(True)**

83. It is possible to use the auxiliary have as a substitute for the whole VP. **(True)**

84. "That men who are ... will be tempted to sleep". In the given sentence there is wrong with the balance between Subject and Predicate. **(True)**

85. "The committee found the proposal unacceptable." In the given sentence the verbless clause contains a Subject and a Predicative Complement, but there is no verb to link them. **(True)** **86.** "The shabby streets were round the little harbor". The given sentence has the pattern NP/Su [V-PP/Ac] **(True)**

87. There are alternative analyses for sentences with so-called complex transitive verbs. **(True)**

88. "They considered that she behaved badly with George very foolish." In the given sentence the subject of the verbless clause is a finite. **(True)**

89. The tendency to move heavy constituents to the right is very rare in English. **(False)**

90. Moving constituents out of an NP is also called extraposition. **(True)**

91. In the process of Pseudo-clefting, the focus remains on the VP and on other constituents at the same time. **(True)**

92. 'There were three shops in the village.' In the given sentence there are two subject candidates. **(True)**

93. Clefting is a device which is used to focus on a particular constituent in the sentence. **(True)** **94.** The process of____ involves extracting a constituent from its basic position in the sentence and putting it in a more prominent position. **(clefting)**

95. It is very rare for an ellipsis to occur without a linguistic antecedent. **(True)**

96. Speakers often reduce redundancy by leaving out superfluous information**. (True)**

97. The Vicar believed evil communications to corrupt good manners. In the given sentence the subordinate clause is non-finite. **(true)**

98. Superfluous information is the information which can easily be recovered from the situation or the context. **(True)**

99. John was eating cornflakes and Mary --- porridge. This kind of deletion is known as _____. **(verb gapping)**

100. For me to be writing a book on this subject was an irrational act. In the given sentence the non-finite clause is the Subject. **(True)**

101. The non-lexical subject position '( )' is controlled by the subject of the higher clause. **(False)**

102. The gap left after movement cannot be filled by another lexical element. **(True)**

103. Which book did you wish for --- to become a success? The given sentence is a grammatical sentence. **(False)**

104. It seems that John has disappeared. John is the subject of the embedded finite clause. **(True)**

105. There is usually a paraphrase with a finite clause and extraposition. **(True)**

106. I did not wish (for) the book to become a family saga. I did not wish to write a family saga.

Both clauses have an embedded Object clause. **(True)**

107. I want [s¯ [s ( ) to enjoy myself]] Myself is a reflexive pronoun and must be bound within its clause. **(True)**

108. I am eager [s¯ [s( ) to come to your party]]. The above example has a raising pattern. **(false)**

109. English also has control patterns which have no overt controller. **(True)**

110. Control adjectives are followed by non-finite clauses with controlled Subject positions. **(True)**

111. Raising verbs usually have a paraphrase with a _____ clause and extraposition. **(finite)** **112.** The type of verb in the main clause determines whether the NP/Su or the NP/ Oi will be the controller**. (True)**

113. She went out. In the sentences above, the lexical verb is followed by another element that is closely linked with the verb. **(True)**

114. Adjuncts cannot be inserted between major constituents. **(False)**

115. John reads the Times and Susan reads the Guardian. In the given sentence there are three coordinated clauses. **(False)**

116. The Vicar settled down to his paper. This string is a phrasal verb. **(True)**

Join Whatsapp Group Link: 👇 👇

https://chat.whatsapp.com/GecIrau2Nit0D4F5DjDiGM

117. The Vicar settled down to his paper. In above sentence 'settle down' is intransitive. **(True)**

118. In English, there is an operation called gapping, which deletes the second occurrence of a lexical verb in a coordinated pattern. **(True)**

119. Look at, look for, look after, call on, call for, deal with are the examples of prepositional verbs. **(True)**

120. The particle of a phrasal verb may be placed before or after the NP, whereas the preposition of the prepositional verb can only occur before the NP. **(True)**

121. Phrasal-prepositional verbs are combinations of phrasal verbs and prepositional verbs. **(True)**

122. Difference between prepositional verbs and phrasal verbs is that it is usually fairly easy to insert an Adverbial Adjunct immediately before the preposition, but not immediately before the particle. **(True)**

123. NP, VP, AdjP, PP, AdvP are the phrasal categories. **(True)**

124. Phrasal categories are directly related to lexical categories. **(True)**

125. One-substitution, affect the constituents at more than one level in the representation. **(True)**

126. On the basis of one-substitution that there are good grounds for distinguishing two types of PP after the Head N. **(True)**

127. Unlike Verb Complements, Noun Complements are syntactically optional. **(True)**

128. Adjs, like Vs, take Complements. Unlike V-Complements, Adj-Complements in English cannot be NPs, but must be realised by PPs or Ss. **(True)**

129. By analogy, the distinction between levels of projection in NP and VP can also be extended to PPs. **(True)**

130. Not all NPs have Premodifiers or Postmodifiers, or N-Complements. **(True)**

131. X-bar theory is a theory of syntactic category formation. **(True)**

132. X-bar theory was first proposed by Noam Chomsky (1970). **(True)**

133. Theories of syntax that build on the X-bar schema tend to posit a large amount of sentence structure. **(True)**

134. It is possible to find the full AdjP as a Postmodifier. **(True)**

135. Discontinuous strings in AdjPs are the elements which belong together, but which are separated by intervening material. **(True)**

136. Morphology is at the conceptual center of linguistics. **(True)**

137. Linguistics involves many topics of learning a language, including the study of syntax. **(True)**

https://chat.whatsapp.com/GecIrau2Nit0D4F5DjDiGM

138. In Linguistics, the study of syntax involves learning how to structure sentences in a certain language (Smith, 2015). **(True)**

139. Most of the languages have a distinct class of adjectives. **(True)**

140. Children typically begin to say their first words between twelve and twenty months of age. **(True)**

141. Both morphology and syntax are highly important for pedagogical purpose of English as a second language. **(True)**

142. A language cannot develop without a well-established theory of word and sentence formation. **(True)**

143. Decoding and vocabulary development are pivotal to developing strong reading skills. **(True)**

144. Morphology is the study of word formation**. (True)**

145. Prince (2009) suggested four main instructional strategies from Lesaux's work with morphology. **(True)**

146. Textbooks and student writings in the early grades typically use words of Anglo-Saxon origin. **(True)**
