CS619 & CS519

ÂL-JÛÑÂÎD TÊCH

1. ……..refers to distributed systems that are more loosely copied than clusters but that still work together to accomplish large taskers.
   - Parallel Computing
   - Grid Computing
   - Cloud Computing
   - Quantum Computing
2. .....is called the……. tag in HTML document.
   - Actor
   - Anchor
   - Action
   - Alter
3. Cannot be used in the main memory to store the data .
   - Flash Drive
   - BDs
   - DVD
   - CD
4. In context of computer networks WWW stands for……..
   - World Wild West
   - World Wide West
   - Web World Wild
   - World Wide Web
5. We need ……. memory to store data permanently.
   - Volatile
   - RAM
   - Non-Volatile

ÂL-JÛÑÂÎD TÊCH

- Address

6. The impact of truncation error can be reduced by using……
   - Longer exponent field
   - Positive exponent notation
   - Floating point notation
   - Longer mantissa field
7. UTF-8 Uses 24 to ……...bits.
   - 32
   - 30
   - 21
8. A program under ……...is called process.
   - Maintenance
   - Execution
   - Development
   - Analysis
9. OSI stands for.
   - Optical System for interconnection
   - Optimal Service Interconnection
   - Open System Interconnection
   - Open Service for interconnection
10. When a packet reaches at the intermediate stop the network layer.
    - Discord the packet considering it irrelevant
    - Forwards it to the link layer determining the direction of the next hope
    - Hands the packet to transport layer rather than forwarding it
    - Forwards it to all the recognized networks
11. A process is a/an ……activity.
    - anonymous
    - dynamic
    - static
    - standalone

ÂL-JÛÑÂÎD TÊCH

12. The node or PC which sends requests for services is called…….
    - Server
    - ISP
    - Client
    - Protocol
13. Which of the following language is used for client side scripting?
    - JavaScript
    - ASP net
    - PHP
    - Python
14. First software for implementing the Web was released in……
    - November 1990
    - October 1990
    - December 1990
    - September 1990
15. The connection between networks to form an internet is handled by devices known as…….
    - LAN
    - Router
    - Hub
    - Bridge
16. The HTML source document consists of two sections……and……..
    - Head and Body
    - Head and title
    - Frame and Head
    - Frame and title
17. ……connects computer over a large geographical area or world.
    - WAN
    - LAN
    - MAN

ÂL-JÛÑÂÎD TÊCH

- PAN

18. ……..provides a network the internet connectivity.
    - Node
    - Hub
    - Gateway

19. Which of the following is one of the major drawbacks of Skype?
    - It uses computer resources without owner's awareness
    - Free version is not easily available
    - It takes a huge space on local drive
    - Call quality is not good
20. What does HTTP stands for?
    - Holding Text Transfer Protocol
    - Hyper Text Transfer Protocol
    - Hearing Text Transfer Protocol
    - Hexadecimal Text Transfer Protocol
21. The process is called to be in …….state if it can continue its progress.
    - Running
    - Ready
    - Waiting
    - Suspend
22. HTML supports ……levels of heading tags.
    - Six
    - Twelve
    - Ten
    - Four
23. Releasing space in the ……..can break the deadlock and can allow the remaining process to continue their tasks.
    - Process pool
    - Process list

ÂL-JÛÑÂÎD TÊCH

- Process queue
- Process table

24. The URL is used to.
    - Locate a document on the client system
    - Locate a specific system connected to the internet
    - Locate a document on any system connected to the internet
    - Locate a document on the webserver
25. It is the responsibility of the application layer to.
    - Add sequence numbers to the small segments of a message
    - Determine the direction in which to forward packets
    - Use the service of the name servers to translate mnemonic addresses into IP addresses
    - Ensure that the messages are properly formatted for transmission over the internet.
26. Which tier of ISP is the backbone of internet.
    - Tier-1
    - Tier-2
    - Tier-3
    - Tier-4
27. Which of the following protocol helps to store the email messages on a local machine while retrieving email messages from the receiving server?
    - POP3
    - IMAP
    - MIME
    - SMTP
28. ……is a type of malware that can replicate itself into other computers connected to anetwork.
    - Spyware
    - Trojan Horses
    - Worms
    - Virus
29. Which of the following protocol helps to store the email server machine while retrieving email messages from the receiving server?

ÂL-JÛÑÂÎD TÊCH

- IMAP
- MEME
- POP3
- SMTP

30. The dispatcher is the component of the……..that manages the execution of the Scheduled processes.
    - Memory manager
    - Operating system
    - Kemel
    - Utility program
31. The value of program counter is an example of……state.
    - Software
    - Process
    - Kemel
    - Operating system
32. Current status of the activity associated with the process is called the.
    - Process status
    - Process class
    - Process association
    - Process state
33. Once on intruder(or perhaps on authorized user with malicious internet) gains access to a computer system the next step is usually to explore looking for information of internet or for places to insert…….?
    - Login software
    - Destructive software
    - Informative software
    - Acknowledged
34. Which of the following is true about TCP in comparison to UDP?
    - Less reliable and less efficient
    - More reliable but less efficient
    - More reliable and more efficient

ÂL-JÛÑÂÎD TÊCH

- Less reliable but more efficient

35. In the operating system the responsibility of memory manager is to allocate…….
    - Main memory
    - Mass storage
    - Cache
    - Register
36. An internet is a collection of…….
    - MAINS
    - Network of networks
    - Users
    - LANS
37. The process of using DNS to perform an address translation is called to……
    - DNS translation
    - DNS lookup
    - DNS pattern
    - DNS table
38. The application layer uses the…….to send and receive messages over the internet.
    - Transport layer
    - Network layer
    - Desktop layer
    - Link layer
39. Email is less time sensitive so the mail servers use……to transfer email.
    - UDP
    - HTTP
    - SMTP
    - TCP
40. Which of the following is not true about XML?
    - It can be used to encode sheet music
    - It is a sell descriptive language
    - It can be used to encode non-textual material as text file

ÂL-JÛÑÂÎD TÊCH

- It is a markup language based on HTML

41. Cloud computing services provide reasonable guarantees of……..and……

- Privacy, Security
- Reliability, Privacy
- Scalability, Security
- Scalability, Reliability

42. LAN stands for

- Local adapter network
- Local access network
- Local area network
- Local additional network

43. Link layer will be responsible to

- Reconstructs the original message according to the sequence numbers
- Determine which application receives on incoming message
- Deal with the communication details particular to the individual network in which the computer resides
- Determine the direction of the packet's next destination

44. In a general-purpose computer , a program called the…….is permanently stored in the machine's ROM.

- BOOT loader
- Botting
- Booting

45. Using MPEG techniques, video presentations can be successfully relayed over communication paths that provide transfer rates of.

- 80 Mbps
- 40 Mbps
- 90 Mbps

46. ……is the most demanded job in United State.

- System Agent
- IT Administrator
- Software Developer

ÂL-JÛÑÂÎD TÊCH

47. If we are interested to see the map of some location ,we can use map operator in the following way.
    - Location map
    - Map Location
    - Mph map
48. A program logic written in an ordinary language illustrating a structure similar to computer instruction is known as……..
    - Programs
    - Algorithms
    - Flowcharts
49. Wat is full form of PHP?
    - Personal Home Page
    - Private Home Page
    - Protected Home Page
50. Which data compression technique is suitable for situation where the long sequence.
    - Differential encoding
    - Relative encoding
    - Run length encoding
51. Google does not distinguish the capital letters or small letters.
    - Lower Case
    - Upper Case
    - This is called case-insensitive
52. Which protocol is suitable for wireless star networks?
    - CSMA/CD
    - CSMA/CA
    - ETHERNET
53. One bit can contain only……value.
    - Zero
    - One
    - Two

ÂL-JÛÑÂÎD TÊCH

54. Sds (Secure Digital Memory Cards) provide up to
    - 10 gbs of storage
    - 100 gbs of storage
    - Few gbs of storage
55. Which of the following the major drawbacks of Skype?
    - Free version is not available
    - It uses computer resources without owner's awareness
    - Call quality is not good
    - It takes a huge space on local drive
56. ANSI stands for.
    - Australian National Standers Institute
    - American National Standers Institute
    - Anglican National Standers Institute
57. Diameter of COMPACT DISK is
    - 10 centimeters
    - 11 centimeters
    - 12 centimeters
58. Multi-programming is a way to implement?
    - Time sharing
    - Real time processing
    - Interactive processing
59. Bit is
    - Basic unit of storage
    - Basic program of storage
    - Secondary unit of storage
60. Binary notation has two following representations
    - One's compliment
    - Three's compliment
    - Two's compliment
61. Which operation is used to invert all of the bits of an RGB bitmap image?

ÂL-JÛÑÂÎD TÊCH

- XOR
- NOT
- NOR
- OR

62. One term could mean more than on thing example word “Jaguar”is used in two meanings such as
    - Car and helicopter
    - Car and bus
    - Animal and car
63. 1 kilobyte (kb) contains……bytes.
    - 1020 bytes
    - 2024 bytes
    - 1024 bytes
    - 10000 bytes
64. How instruction can be fetched from the main memory to CPU?
    - By using Controller
    - By using Modem
    - By using bus
65. Which transfer the data from memory into the general purpose registers.
    - Control unit
    - Arithmetic unit
    - Logical unit
66. In which type of communication several signals are transferred at the same time each on a separate line?
    - Network Communication
    - Serial Communication
    - Parallel Communication
67. HDTV is the abbreviation of …….?
    - High demanded television
    - High defined television

ÂL-JÛÑÂÎD TÊCH

- High definition television

68. ……tag only shows the particular pages related to it.
    - @
    - *
    - **
    - #
69. Which of the following are the graphical objects used to represent commonly used applications?
    - GUI
    - Icons
    - Drivers
    - Windows
70. Which of the following is the correct term for the graphical user interface used in operating systems?
    - GUI
    - Icons
    - Drivers
    - Widows
71. Which of the following is responsible for facilitating communication between the operating system and hardware devices?
    - GUI
    - Icons
    - Drivers
    - Windows
72. Which term is used to refer to the operating system environment with graphical interface and windows?
    - GUI
    - Icons
    - Drivers
    - Windows
73. Which of the following is not a type of software but rather a user interface concept?
    - GUI
    - Icons
    - Drivers
    - Windows
74. Which of the following are small graphical symbols that represent files, folders, or applications?

ÂL-JÛÑÂÎD TÊCH

- GUI
- Icons
- Drivers
- Windows

75. Which term is used to describe the software components that enable communication between the operating system and hardware devices?

- GUI
- Icons
- Drivers
- Windows

76. Which term is used to refer to the graphical interface and windowing system in an operating system?

- GUI
- Icons
- Drivers
- Windows

77. Which of the following represents the visual elements and controls used by users to interact with a computer system?

- GUI
- Icons
- Drivers
- Windows

78. Which term is used to describe the individual software programs that allow an operating system to communicate with specific hardware devices?

- GUI
- Icons
- Drivers
- Windows

79. ……. Is a malware which gathers data about your activities on the system and forwards it to the outside party without your consent.

- Virus
- Worms
- Spyware
- Trojan Horses

80. The HTML source document consist of two sources …… and ……

- Frames and head
- Frames and title
- Head and title
- Head and body

81. CGI stand for

- Common Gateway interface Google
- Common Graphics interface

ÂL-JÛÑÂÎD TÊCH

- Command Graphic interface
- Command Gateway interface

82. Which of the following is a form of VoIP that allows two or more PCs to share a call with minimal hardware requirement.
    - Wireless VoIP technology
    - VoIP soft phones page 131
    - Embedded VoIP phones
    - Analog telephone adapters
83. The dispatcher is responsible for allocating……..
    - Peripheral devices
    - Memory space
    - Time slices page 107
    - Access to files
84. XML standard notational system is called……..
    - Makup language
    - Making language
    - None
    - Markup language page 139
85. User can see directories or files by using…….
    - Window explorer Google
    - Internet explorer
    - Microsoft explorer
    - User interface
86. Which of the following sources provides information on HTML tags as well as a platform to run your HTML code for exercise?
    - W3school
    - Facebook
    - Yahoo
    - Wikipedia
87. If a bit falls off the right end, which technique is employed to position it in the hole at the left end?
    - Arithmetic shift
    - Circular/rotational shift page 89
    - Logical shift
    - Dimensional shift
88. The operating system switches the CPU to non-privileged mode……..
    - After a memory check
    - When shutting down
    - During every process execution CONCEPT
    - At startup

The CPU typically switches to non-privileged mode when executing user processes to enforce security and stability, allowing the operating system to control access to system resources.

ÂL-JÛÑÂÎD TÊCH

89. Which of the following are the graphical objects used to represent commonly used application?

- Drivers
- GUI
- Icons Google
- Windows

90. …….is a farm of VoIP service, which consists of such devices that allows to user to connect his or her traditional telephone to phone service provided by on access ISP.

- Analog telephone adapters page 131
- Soft phones
- Wireless VoIP technology of Smartphone
- Embedded VoIP phones

91. The transfer of data sequentially is known as

- Parallel communication
- Simple communication
- Direct communication
- Serial communication Google

92. The computers of the……..were not very flexible or efficient.

- 1950s and 1960s
- 1930s
- 1961s and 1970s
- 1940s and 1950s page 95

93. The major tool for maintaining security in operating systems involves……..

- Changing privilege levels
- Altering memory cells
- Extending time slices
- File manager supervision page 115

94. The……..uses the transport layer to send and receive messages over the internet.

- Link layer
- Application layer page 145
- Network layer
- Data layer

95. ……is essentially a notational system by which a text document along with the documents appearance can be encoded as a simple text file.

ÂL-JÛÑÂÎD TÊCH

- HTML page 140
- All of above
- XML
- UML

96. Which of the following can be the basic purpose of using “www w3school.com” website?

- To learn web development
- To watch entertainment videos and movies
- To access a collection of cooking recipes
- To explore travel and tourism information

97. Starting with the bit pattern 1100, what is the number of right circular shifts required to achieve the initial pattern?

- 8 times
- 3 times
- 4 times Google
- 2 times

98. What type of software is employed for tasks specifically tied to machine utilization?

- Application software Google
- Device drivers
- System software
- Utility software

ÂL-JÛNÂÎD TÊCH
