3 types of database:

Document Oriented database.

Object oriented database.

Relational database.

what is Telent and FTP?

Telnet

Telnet is a simple, text-based network protocol that is used for accessing remote computers over TCP/IP networks like the Internet.

FTP

www.vusolutionpoint.com

Download All File From VU Solution Point

File Transfer Protocol (FTP) is a standard network protocol used for the transfer of computer Files between a client and server on a computer network.

Array that take 5 elements

var array_name = [item1, item2, item3, item4, item5];

Simple html program to include email

<form>

Email :

<input type="email" name="email" placeholder="Enter Email">

</form>

Star topology.

Star topology is a network topology where each individual piece of a network is attached to a central node (often called a hub or switch). The attachment of these network pieces to the central component is visually represented in a form similar to a star.Star topology is also known as a star network.Has the ability to limit the impact of a single failure. In star
