Q.1 What will be the sum of 01101010 and 11001100 if both the patterns represent values stored in two's complement notation?

A. 00110000 in two's complement

B. 01110110 in two's complement

C. 00110110 in two's complement

D. 00110111 in two's complement

Q.2 TIFF is an acronym of ____?

A. Toggle Image File Format

B. Tagged Image File Format

C. Template Image File Format

D. Transform Image File Format

Q.3 Before the Stored Program concept, data was stored in memory while programs were a part of _____.

A. Cable

B. CPU

C. Cache

D. Bus

Q.4 Which of the following is a lossless data compression technique _____?

A. Transform coding

B. Frequency-dependent encoding

C. Discrete cosine transform

D. Binary encoding

Q.5 To store a character in computer memory, normally _____ bits will be required.

A. 1

B. 8

C. 28

D. 2

Q.6 _____ Boolean operation produces the output as 1 when both inputs are 1.

A. NOT

B. OR

C. XOR

D. AND

Q.7 Which one of the following techniques is used by adaptive dictionary system for encoding data?

A. Frequency-dependent encoding

B. LZW encoding

C. Relative encoding

D. Run-length encoding

Q.8 What is the term for dynamically allocating tasks to processors to ensure efficient usage?

A. Load balancing

B. Scaling

C. Load sharing

D. Multitasking

Q.9 If a string of 8 bits undergoes a right circular shift of 2 bits, how many bits are required for an equivalent left circular shift?

A. 6

B. 4

C. 8

D. 3

Q.10 The CPU needs at least _____ to retrieve an instruction from memory.

A. One nanosecond

B. Two nanoseconds

C. One billion second

D. Three nanoseconds
