Q.1 What do we call the structures in a tree that consist of a node and the nodes below it?

A. Subtrees

B. Leaves

C. Roots

D. Branches

Q.2 In the Java programming language, what is the equivalent term for an "activation" in the context of concurrent processing?

A. Task

B. Thread

C. Operation

D. Function

Q.3 What was the initial focus in the early years of computing regarding software quality?

A. Debugging process

B. Certification programs

C. Software engineering procedures

D. Software Analysis

Q.4 In the provided pseudo-code, what is the role of the "Current" variable? def FindMax(): max = first number in the list Current = second number in the list While (elements in the list exist) If (max<current) max=current Current = next value in the list

A. It stores the current value being compared

B. It holds the maximum value in the list

C. It indicates the position of the current element in the list

D. It represents the minimum value in the list

Q.5 What role do stakeholders play in the requirements analysis process?

A. Help in picking the suitable design tools

B. Help in choosing a development environment

C. Provide feedback for system requirements

D. Help the testing team to identify bugs

Q.6 What is the primary purpose of the Creational Design Pattern?

A. To manufacture physical products

B. To design graphical user interfaces

C. To create instances and promote reuse

D. To create a tightly coupled system

Q.7 A transaction requiring exclusive access will _____.

A. Be forced to wait if the item is already exclusively locked

B. Share the access with other transactions

C. Automatically gain access without checks

D. Grant shared access to other transactions

Q.8 The term cohesion refers to this _____.

A. control coupling

B. data coupling

C. external binding

D. internal binding

Q.9 Which company created the Rational Unified Process (RUP)?

A. Microsoft

B. Google

C. Apple

D. IBM

Q.10 Int i=1;

While(i<=5)

{

Cout<<i;

i=i+1;

}

How many times loop will execute?

A. 5

B. 2

C. 4

D. 3
