Q.1 NULL is an invalid address and _____.

A. Accessible
B. Points to the last current node of the list
C. Points to the start point of the list
D. Inaccessible

Q.2 In the statement template <T>, T represents_____.

A. Integer data type
B. Character data type
C. String data type
D. Generic data type

Q.3 If we use singly linked list to implement list, then there is an issue that it gives difficulty when we:

A. We will increase its size
B. Move forward in the list
C. Move backward in the list
D. We will decrease its size

Q.4 _____ is the major factor to see the efficiency of a program.

A. Code
B. Correctness
C. Time
D. Quality

Q.5 "end()" method of list performs it's tasks in

A. Three steps
B. Two steps
C. Many steps
D. One steps

Q.6 Local variables of a function are stored in,

A. Binary Search Tree
B. Stack
C. Queue
D. AVL Tree

VU TOOLKIT

Q.7 At the time while evaluating an expression, if we want to give higher precedence to lower precedence operator, we used _____.

A. Comas

B. Operands

C. Dots

D. Parenthesis

Q.8 The first step to add a node in a linked list between the existing nodes is

A. newNode->getNext();

B. newNode->setNext();

C. currentNode->getNext();

D. newNode->setNext(currentNode->getNext());

Q.9 In the calling function, after the execution of the function called, the program continues its execution from the _____after the function call.

A. Next line

B. Previous line

C. Beginning

D. End

Q.10 Array cells are _____ in computer memory.

A. Store in multiple variables

B. Contiguous

C. Store in multiple functions

D. Random
