1. What will be the output of the following program? #include<iostream> using namespace std; class House private: int rooms; public: House() { cout<<"Entering the house"<<endl; House(int R) rooms = R; ~House() cout<<"Leaving the house"<<endl; }; class Kitchen : public House double size; public: Kitchen() : House() { cout<<"Entering the kitchen"; }; int main() Kitchen Obj; return 0;

A. Entering the kitchen Entering the house Leaving the house

B. Entering the house Entering the kitchen Leaving the house

C. Entering the house Leaving the house Entering the kitchen

D. Leaving the house Entering the house Entering the kitchen

---

2. In case of public inheritance between Base class A and Derived class B, which of the folllowing data members of Base class will be hidden in Derived class?

A. both public and private

B. private

C. protected

D. public

---

3. What will be the output of following C++ code? int a=5; cout<<a++;

A. 0

B. 5

C. 6

D. a

---

4. What is the name of Base class in the line below? class Truck : public Vehicle

A. Vehicle

B. Public

C. Truck

D. None of the given options

---

5. Which of the following is correct symbol of stream extraction operator?

A. >

B. >>

C. <

D. <<

---

6. cout is an object of ____ class

A. instream

B. istream

C. fstream

D. ostream

---

7. In the case of private inheritance, public members of the base class will be _____ in the derived class

A. Public

B. Hidden

C. Protected

D. Private

---

8. Which of the following is not the correct type of inheritance in C++?

A. protected

B. secret

C. private

D. public

---

9. Consider the code below, class class1 public: void func1(); ; class class2 : public class1 ; Function func()1 of class1 is _____ in class2

A. Hidden

B. Private

C. Public

D. Protected

---

10. In the case of protected inheritance, public members of the base class will be _____ in the derived class

A. Protected

B. Public

C. Private

D. Hidden
