Q.1 Which of the following can be the behavior of an object "Usman"?

A. Address

B. Eat

C. Age

D. Name

Q.2 Which of the following is an advantage of encapsulation?

A. Information Hiding

B. Increase Memory Usage

C. Complexity

D. Inefficient Code

Q.3 Specialization means that derived class is behaviorally _____ with the base class.

A. Complex

B. Same

C. Incompatible

D. Compatible

Q.4 If you do not initialize static data member of a class of int type, it is automatically initialized with _____.

A. 1

B. 0

C. Null

D. -32767

Q.5 Composition is a strong relationship because _____.

A. Composed object can't exist independently.

B. Composed object's relationship depends on the number of objects.

C. Composed objects are dependent on the relation type.

D. Composed objects can exist independently.

Q.6 The _____ tells the compiler what task the function will be performing.

A. Function calling

B. Function declaration

C. Function Header

D. Function definition

VU TOOLKIT

Q.7 Which of the following is a strong relationship?

A. Polymorphism

B. Composition

C. Inheritance

D. Association

Q.8 When an object is initialized, _____ is automatically called by the compiler.

A. Constructor

B. Object

C. Function

D. none of the given

Q.9 Which of the following statement is TRUE about a class's Static Member Function?

A. It can only be called by a particular object of class.

B. It is used to access static data members only.

C. It can access constant data members of the class.

D. It can access non-static data members.

Q.10 Which of the following is NOT true about constructor?

A. Constructors are commonly public members of a class.

B. Constructor does not have return type.

C. Constructor is a special function which can have different name than class name.

D. Constructor is used to initialize data members of a class.
