pg. 12

niMma mAlik’s compilations

Write the names of different published tests?

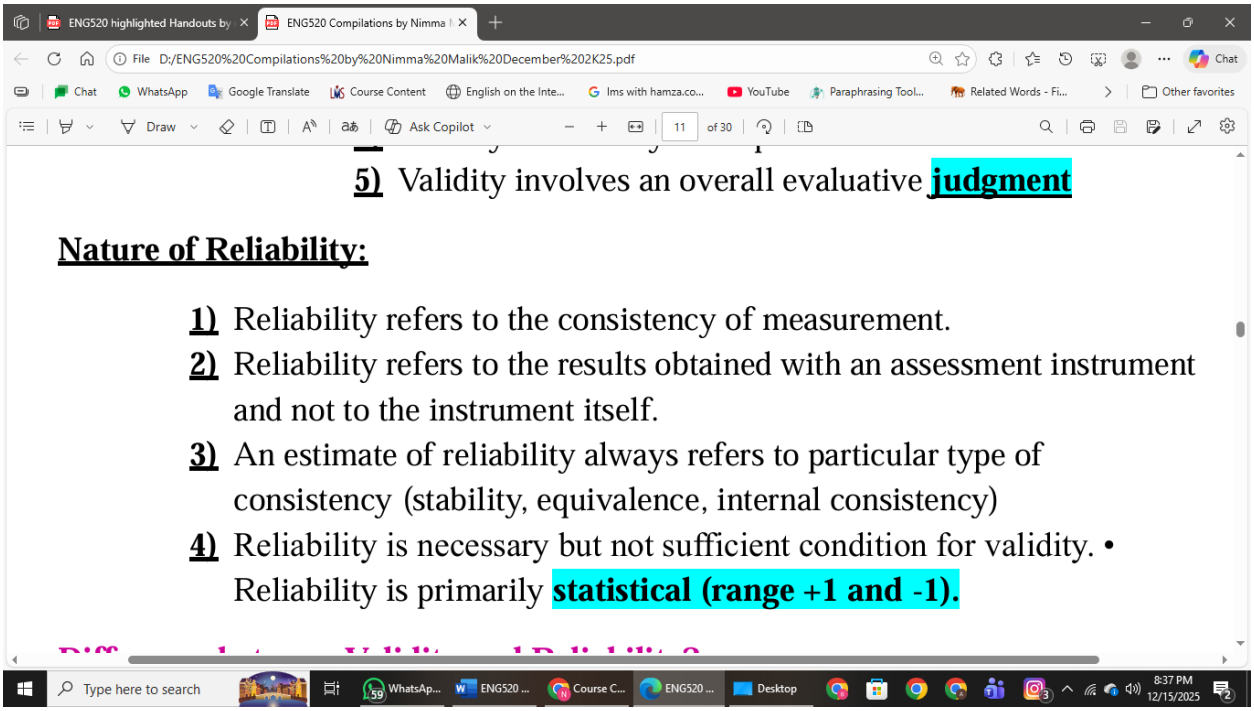

The two most value to the **instructional program** is:

i. Achievement tests
ii. Aptitude tests

In classrooms most used published tests are:

- Achievement tests
- Reading test

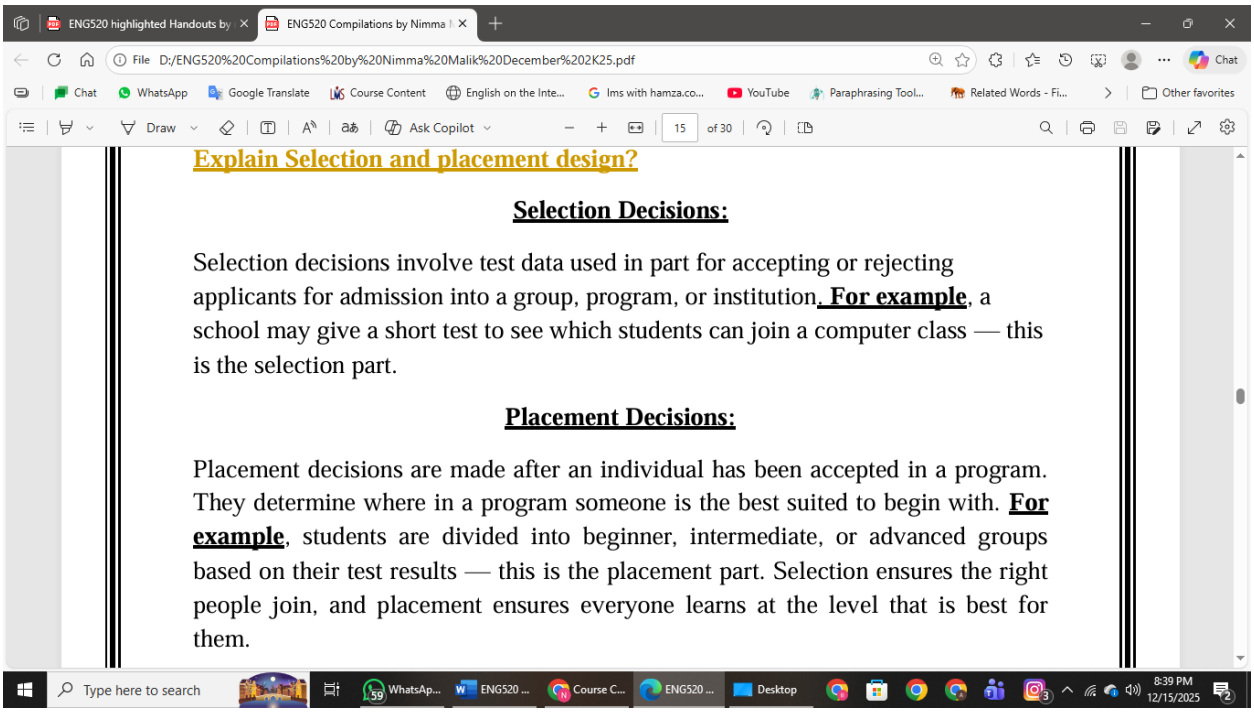

Long Questions:

5) Validity involves an overall evaluative **judgment**

Nature of Reliability:

1) Reliability refers to the consistency of measurement.
2) Reliability refers to the results obtained with an assessment instrument and not to the instrument itself.
3) An estimate of reliability always refers to particular type of consistency (stability, equivalence, internal consistency)
4) Reliability is necessary but not sufficient condition for validity. • Reliability is primarily **statistical (range +1 and -1).**

Explain Selection and placement design?

Selection Decisions:

Selection decisions involve test data used in part for accepting or rejecting applicants for admission into a group, program, or institution. **For example**, a school may give a short test to see which students can join a computer class — this is the selection part.

Placement Decisions:

Placement decisions are made after an individual has been accepted in a program. They determine where in a program someone is the best suited to begin with. **For example**, students are divided into beginner, intermediate, or advanced groups based on their test results — this is the placement part. Selection ensures the right people join, and placement ensures everyone learns at the level that is best for them.
