ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

DEDICATION

This research project is solely dedicated to my supervisor, parents, family and friends.

ACKNOWLEDGEMENT

My sincerest thanks go to my supervisor, whose expertise, encouragement, and constructive feedback were crucial in shaping this work. I am immensely thankful to my parents for their endless love, prayers, and support during every step of this process. Their belief in me has been my greatest source of motivation. I also wish to express my gratitude to my siblings for their unwavering encouragement and understanding, which kept me focused and determined.

I would also like to extend my heartfelt thanks to my friends, whose constant motivation and positive words uplifted me during moments of self-doubt. Your companionship and support mean the world to me. This research would not have been possible without the contributions and encouragement of these remarkable individuals. To all of you, thank you for being there for me.

ABSTRACT

This study aimed to explore teachers' perceptions regarding the use of the Communicative Language Teaching (CLT) method in English classrooms at the secondary level in Burewala. The research focused on understanding the positive impacts of CLT and how English teachers perceive its implementation in their classrooms. The study was guided by two research questions: (1) What are the positive impacts of CLT for teaching English in the secondary-level classrooms of Burewala? and (2) What are English teachers' perceptions regarding the use of CLT in classrooms at the secondary level in Burewala? A structured questionnaire comprising 20 statements was used to collect data from secondary-level English teachers. The results highlighted that teachers generally perceive CLT as an effective method for improving language learning skills, engaging students, and fostering a more interactive and enjoyable learning environment. Teachers also acknowledged that CLT enhances students' fluency, listening comprehension, and critical thinking abilities. However, some challenges were also noted, such as the need for additional training and difficulties in assessment. Overall, the study found that CLT has a significant positive impact on English language learning at the secondary level, and teachers largely support its use.

Teacher's Perception Regarding the Use of the Communicative Language Teaching in English Classroom at Secondary Level in Burewala

Conversational skills or the communication skills are the most important factors for learning any language of the world. In a multilingual country where English is used as the official language; its teaching and learning also becomes compulsory. The value of learning English language communication have increased along with the increasing centuries (Denkci-Akkas, 2016). A large number of people have the knowledge of English and they can understand the context but they are not able to communicate in English. In Pakistani educational system teaching of English language has been an important thing from the beginning. Teaching of English language to their children is considered as a matter of prestige for the Pakistani parents. English is added in the beginning of the educational level and the Pakistani children begin learning English language from the basics for that sounds and English alphabets. The students feel it difficult for them to communicate the language that they have been learning from the start of their education. The students feel comfortable in English reading, listening and writing; however communicating it becomes difficult task for them. Communication is considered as an important factor and a milestone to achieve.

Communicative language teaching method is end-to-end a learner-centered approach. It includes the practical communication of the language as compared to the learning of the grammatical, vocabulary or the other language rules. It was introduced because of the limitations of the traditional methods for teaching a language. The traditional methods sharpen the grammatical rules of the students however these methods cannot make a student confident to use that language in their real life. Although CLT method has clear advantages for learning communication skills but even then implementations of this method in the classrooms is still a

topic of debate. Teachers lack the resources of using CLT method in the classrooms and even the educational authorities do not allow its implementations due to the large syllabus or assessments that are purely based on only the grammar and the vocabulary.

As stated above that the adoption of CLT approach in the classroom increases the conversational skills of the students, different researches have been done in this field. The researchers explored the attitudes of the teachers and the behavior of the students and determined the issues faced in the implications of CLT in classrooms (Anderson, 1993). However, CLT approach is also used in the classrooms in many of the inner circle nations. This study explores the barriers faced by the teachers in implementing CLT in the classrooms and also highlights the strategies that can be helpful in its effectiveness in different context of learning. This study investigates the implementations and impacts of using CLT method in the English classrooms; aiming to provide the clear insights regarding its effectiveness for improving the conversational skills of secondary level students.

Personal Motivations

We are the students of applied linguistics, therefore our interest towards the language teaching and learning methods is natural. We have been taught English from the primary level to the intermediate level by using the traditional methods. When we came to the university level we had to face some challenges while communicating and this made our mind do this research. Therefore we decided to choose this field for research so that we can find out the effectiveness of using CLT method for teaching English.

Statement of the Problem

To help in developing the second language leaning, CLT methods are used by the private teachers in Pakistan from the elementary level of the education. Different issue are faced by the

school administrations or the educational authorities in implementing CLT methods in the Pakistani classrooms of English language (Nunan, 2003). The lack of the teachers professional teaching skills, large number of class, the syllabus to be covered, limited time of the classroom and the limited teaching resources are few issues that are highlighted by different researchers in their investigations. This is why it is important to understand all the aspects of implementing CLT in the classrooms (Li, 1998). The most common factor of the hurdle faced for implementing CLT method for teaching that was observed through literature related to CLT was the class size (Hu, 2005). Therefore this research is conducted to highlight the teacher's perceptions regarding the usage of CLT methods in teaching English to the secondary levels of the classrooms.

Objectives of the Study

- To explore the positive impacts of CLT for teaching English in the secondary level classrooms of Burewala.
- To find out the English teacher's perception regarding the use of CLT in classrooms.

Research Questions

- What are the positive impacts of CLT for teaching English in the secondary level classrooms of Burewala?
- What are the English teacher's perception regarding the use of CLT in classrooms at secondary level in Burewala?

Significance of the Study

This research will be significant for the teachers because through this research they would be able to find the effectiveness of using CLT approach for teaching in English classrooms. This research would be significant for the educational authorities as it would highlight the importance of learning a language without using the traditional methods. This research is also significant

because it adds a critical gap for future researchers regarding the practical implications of CLT method. The findings of this research will be significant for the policymakers as it will highlight the development of the curriculum and improved language teaching method. This research would be significant as it would highlight the benefits of implementing the usage of CLT in the classrooms based on the teacher's perceptions and this would also be helpful in removing the barriers of CLT implementations in the English classrooms.

Delimitation

This research is limited to the following:

- Teacher's perceptions
- Communicative language Teaching
- Secondary level
- Burewala

LITERATURE REVIEW

A fresh and evolving strategy called the "communicative language teaching method" aims to enhance student communication in and out of the classroom. According to Abate (2014), CLT is a technique that was first created in the 20th century. According to Richard (2001), changes made to British situational language methods in the late 1960s promoted the use of communicative teaching techniques. These European expert bodies are aware of the changes (Richard & Rodgers, 2001). According to Savignon (1991), after understanding that widely used language techniques had been created, educators, applied linguists, and other stakeholders advocated for a communicative approach in the 1960s in both Europe and the US. Social and psychological theories serve as the main theoretical pillars of communicative teaching methods. He emphasized speaking, which is the process of developing communication skills (Savignon, 1991).

The concept of communicative competence emphasizes the ability to communicate via a number of auditory devices in a range of social circumstances (Brown, 2007). Grammar understanding, sociolinguistic skill, and awareness of language usage norms are all components of social context (Savignon, 1991). Psychological and sociocultural theories are the most valuable cognitive resources for CLT. It put a lot of focus on communication skills, which suggests that young children's communication skills should be developed (Savignon, 1991). Contributions to the communicative technique, which is theoretical and useful in language training, have come from a multitude of academics and researchers. An abstract rule machine that maximizes the auditory system's statistics for the grammar of the languages it utilizes is referred to as "speaker's linguistic competence" (Chomsky). Nonetheless, he argues that spatial audio systems also incorporate an intricate set of guidelines known as "communicative competence" (Abate, 2014). The ramifications of CLT have a significant influence on the field of ELT. "Despite the lack of

consensus among experts regarding the suitability of CLT for China, the Ministry of Education was encouraged by the use of the atypical profile, believing it would provide a convincing solution to the significant problem of low ability of university college students. "People still use English for communication, despite years of official language monitoring (Hu, 2005). "Many years have passed since the CLT approach was introduced in Korea, but despite curriculum reforms and the passage of time, many Koreans are living without the effectiveness of the English language communication technique" (Vasilopoulos, 2008). An empirical study was conducted from Pakistan's point of view to ascertain the importance of utilizing communication techniques in ELT.

"CLT gives teachers a satisfying experience, helps pupils communicate orally in a foreign language, and increases the confidence of beginners. CLT offers the capacity to understand expressions. Although the GTM provides a range of language teaching methodologies, the communicative approach—which emphasizes teaching grammar over language itself—is the most successful because it creates an immediate link between the instructor and the learner (Akram and Mehmood, 2011). English's function as an international language, the language of research, technical knowledge and competence, interchange, verbal communication, and workplaces is inherently hampered by Pakistan. Proficiency in spoken and written English is now necessary for both social and professional progress (Mansoor, 2004). This is why Pakistani primary colleges and higher education institutions such as universities and schools have made it a mandatory subject to teach. Nevertheless, once Pakistan gained its independence, English continued to be the official language there. Pakistan's school system is not conducive to learning English.

Warsi (2004) argues that despite the fact that students are mostly from rural areas and that English is taught as a mandatory language from elementary school through college, they are nonetheless able to communicate in English fluently. They are all four weak in language

proficiency. This situation is primarily the result of the Pakistani educational system. The techniques used in English language training are very set in stone. English is taught as a second language in Pakistan. Some people speak Urdu, the national language, as their native tongue. English will turn into a second language for them. However, English is the official language and Urdu is the second language for those whose mother tongues are other languages, such as Sindhi, Pashto, Punjabi, and many more (Warsi, 2004). Despite the fact that English is Pakistan's second language, Ahmed et al., (2011) argue that the nation's English language curriculum does not meet all of the required curriculum standards. The teachers don't act professionally and don't have the necessary training materials. Teachers use contextually relevant materials and antiquated pedagogical approaches while teaching English as a second language. Proficiency tests in English have demonstrated that classroom language education does not employ the most recent methods of assessment and evaluation (Warsi, 2004).

Except for areas related to language, all disciplines taught in higher education institutions, including colleges and universities, are taught in English (Mashori, 2010). English is taught as a first language in language and literature studies and is mandatory in Pakistani schools and institutions. Unfortunately, instead of utilizing the specific ELT-based communicative teaching methodologies, English professors at these universities still educate their students using the traditional lecture style in which they were taught (Raja, 2012). Pakistani universities are at capacity when it comes to English instruction. Private universities provide a range of English language courses, such as ESP, EAP, TESOL, TEFL, and English for Purpose. Another service offered to students by some non-government universities is pre-sessional English guides. Since the majority of college students at public universities come from staff members who speak English in a vernacular or non-elite manner, ESL or functional English guides are offered to assist students

in overcoming their natural tendency towards the language. Publications in ESL/Functional English are consequently seen as essential in assisting students in meeting their educational needs (Mansoor, 2004).

English language courses are supplied in big element at the undergraduate degree in conjunction with a few stage specially specific departments of the public universities. With assistance from the English Institute, these courses are offered in specialized departments within institutions. These institutions also hire academics to teach English as a mandatory subject; full-time instructors are expected to instruct core discipline students in English literature or linguistics. The departments involved in professional universities manage the English language program. Teachers in the English language program develop English guidelines on their own. The evaluation of the guides focuses on information and substance such effective paragraph writing and communication problems as well as practical language abilities (Shamim, 2011). There is a damage to English language instruction in private schools. Certain restrictions brought about by extensive training make it more difficult for instructors and students to teach and learn the English language. The course material becomes meaningless and meaningless.

According to different researches on CLT method, it is seen that the maximum number of students in one class cause problems in implementing this method (Shamim, 2011). The unlimited rules and the pressure of completing the syllabus on time decreases the opportunities of using innovative teaching methods in the classrooms. The teachers need to perform as a ruler instead of just an instructor to introduce new ways of teaching in the classrooms in such cases (Raja, 2012). It can be analyzed from the already done research work that the traditional methods were used for teaching to the students in the schools and the colleges (Raja, 2012). It is a need to grow the teaching styles and add new methods in teacher trainings for teaching in the classrooms of

multilingual societies. His paper aimed to explore the large-class issues faced by the teachers in teaching at the university level. Mostly teacher uses lecture-technique for teaching ate the university level for teaching English. CLT should be used for teaching at this higher level of education to overcome the difficulties that the students will face in the future (Raja, 2012). In another research, it was argued that the innovative ways of learning a language interact the students for learning (Savignon, 1991) and (Richard & Rodgers, 2001).

In Pakistani context, the interactive trainings are not given to the teachers for teaching in different styles, they just follow the previously used teaching techniques with which they have been taught through for their students (Bughio, 2013). Teachers avoid innovative method of teaching English due to the large class size (Jimakorn & Singhasiri, 2006). Although the CLT is not considered as an attractive method for teaching to the English language students because it causes problems in the management of the class (Naidu, 1992). According to him the collaborative language teaching methods i.e. group work create a disorganized situation that becomes difficult for the teachers to control. The implementation of CLT becomes a difficult task for the teachers due to several reasons as stated above.

Maha Malik's Compilation

RESEARCH METHODOLOGY

Research Design

A descriptive research design was used to explore the positive impacts of CLT for teaching English in the secondary level classrooms of Burewala and to find out the English teacher's perception regarding the use of CLT in classrooms.

Research Method

Descriptive research design was used to find the perceptions of the teachers regarding the usage of CLT method for teaching English in the secondary level classrooms of Burewala.

Population

Five public schools (both boys and girls) was chosen from the area of the Burewala. Teachers teaching English to the grade (6-10) were the participants.

Sampling Technique

Convenient sampling technique was used to select the teachers of secondary level for attempting the survey.

Sample Size

1500 teachers both male and female was the participants of the survey. The schools were public schools (both boys and girls) from Burewala.

Research Instrument

The research tool for this study was the questionnaire. The questionnaire consisted of the twenty closed-ended questions. The questions were about the importance, positive and negative impacts, and the benefits of using CLT method for teaching English language in the secondary level classrooms.

Compilation

Reliability of the Questionnaire

Reliability of the questionnaire was measured by using statistical calculations. The value of Cronbach's alpha was calculated by using statistical software to check the reliability of the questionnaire.

RESULTS AND DISCUSSIONS

In this chapter the researcher has stated comprehensive view of the sample features and description of them. It is about the importance, positive and negative impacts, and the benefits of using CLT method for teaching English language in the secondary level classrooms. The survey was collected from the population and then analysis was done. The questionnaires were observed at the firsthand. The responses collected from the survey were summarized on the basis of the frequencies and percentage. A short statement interpreting each table is given under the table.

Table 1:Statement 1

The language learning skills of the learners of English are improved by using CLT method.

Attitude	Frequency	Percentage
Strongly Disagree	28	18.7
Disagree	20	13.3
Neutral	25	16.7
Agree	60	40
Strongly Agree	17	11.3
Total	150	100.0

Above given table directs that 11.3 % teachers strongly agreed and 40 % teachers agreed, 16.7 % teachers remained neutral 13.3 %, teachers disagreed and 18.7 % teachers strongly

disagreed to this statement. Maximum number of the respondents agreed that the language learning skills of the learners of English are improved by using CLT method.

Table 2: Statement 2

The students are more engaged in a CLT based classroom settings.

Attitude	Frequency	Percentage
Strongly Disagree	12	8
Disagree	37	24.7
Neutral	25	16.7
Agree	60	40
Strongly Agree	16	10.7
Total	150	100.0

Above given table directs that 10.7 % teachers strongly agreed and 40 % teachers agreed, 16.7 % teachers remained neutral 24.7 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that the students are more engaged in a CLT based classroom settings.

Table 3: Statement 3

The students learn English language in a more interesting way through CLT as compared to the traditional teaching methods.

Attitude	Frequency	Percentage
Strongly Disagree	12	8
Disagree	20	13.3
Neutral	43	28.7
Agree	60	40
Strongly Agree	15	10
Total	150	100.0

Above given table directs that 10 % teachers strongly agreed and 40 % teachers agreed, 28.7 % teachers remained neutral 13.3 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that the students learn English language in a more interesting way through CLT as compared to the traditional teaching methods.

Table 4: Statement 4

CLT is helpful in encouraging students for using the English language in the classrooms.

Attitude	Frequency	Percentage
Strongly Disagree	12	8
Disagree	21	14
Neutral	25	16.7

Agree	76	50.7
Strongly Agree	16	10.7
Total	150	100.0

Above given table directs that 10.7 % teachers strongly agreed and 50.7 % teachers agreed, 16.7 % teachers remained neutral 14 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that CLT is helpful in encouraging students for using the English language in the classrooms.

Table 5: Statement 5

The listening comprehension of the students is improved by using CLT materials in the classrooms.

Attitude	Frequency	Percentage
Strongly Disagree	13	8.7
Disagree	21	14
Neutral	25	16.7
Agree	59	39.3
Strongly Agree	32	21.3
Total	150	100.0

Above given table directs that 21.3 % teachers strongly agreed and 39.3 % teachers agreed, 16.7 % teachers remained neutral 14 %, teachers disagreed and 8.7 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that the listening comprehension of the students is improved by using CLT materials in the classrooms.

Table 6: Statement 6

CLT is helpful in developing the conversational skills of the secondary level students.

Attitude	Frequency	Percentage
Strongly Disagree	28	18.7
Disagree	20	13.3
Neutral	26	17.3
Agree	59	39.3
Strongly Agree	17	11.3
Total	150	100.0

Above given table directs that 11.3 % teachers strongly agreed and 39.3 % teachers agreed, 17.3 % teachers remained neutral 13.3 %, teachers disagreed and 18.7 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that CLT is helpful in developing the conversational skills of the secondary level students.

Compilation

Table 7: Statement 7

Teachers feel motivated while teaching to the English students through CLT.

Attitude	Frequency	Percentage
Strongly Disagree	12	8
Disagree	37	24.7
Neutral	25	16.7
Agree	61	40.7
Strongly Agree	15	10
Total	150	100.0

Above given table directs that 10 % teachers strongly agreed and 40.7 % teachers agreed, 16.7 % teachers remained neutral 24.7 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that the teachers feel motivated while teaching to the English students through CLT.

Table 8: Statement 8

Teaching English through CLT method improves teacher's confidence.

Attitude	Frequency	Percentage
Strongly Disagree	12	8

Disagree	20	13.3
Neutral	43	28.7
Agree	60	40
Strongly Agree	15	10
Total	150	100.0

Above given table directs that 10 % teachers strongly agreed and 40 % teachers agreed, 28.7 % teachers remained neutral 13.3 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that teaching English through CLT method improves teacher's confidence.

Table 9: Statement 9

CLT method allows the authentic usage of the language in secondary level classrooms.

Attitude	Frequency	Percentage
Strongly Disagree	12	8
Disagree	21	14
Neutral	26	17.3
Agree	76	50.7
Strongly Agree	15	10

Total	150	100.0

Above given table directs that 10 % teachers strongly agreed and 50.7 % teachers agreed, 17.3 % teachers remained neutral 14 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that CLT method allows the authentic usage of the language in secondary level classrooms.

Table 10: Statement 10

Additional training is required for teaching English through CLT.

Attitude	Frequency	Percentage
Strongly Disagree	14	9.3
Disagree	20	13.3
Neutral	27	18
Agree	58	38.7
Strongly Agree	31	20.7
Total	150	100.0

Above given table directs that 20.7 % teachers strongly agreed and 38.7 % teachers agreed, 18 % teachers remained neutral 13.3 %, teachers disagreed and 9.3 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that additional training is required for teaching English through CLT.

Table 11: Statement 11

It is easy to assess the performance of the students and provide the feedback in a CLT based classroom.

Attitude	Frequency	Percentage
Strongly Disagree	29	19.3
Disagree	20	13.3
Neutral	25	16.7
Agree	60	40
Strongly Agree	16	10.7
Total	150	100.0

Above given table directs that 10.7 % teachers strongly agreed and 40 % teachers agreed, 16.7 % teachers remained neutral 13.3 %, teachers disagreed and 19.3 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that it is easy to assess the performance of the students and provide the feedback in a CLT based classroom.

Table 12: Statement 12

The critical thinking of the students is enhanced due to the usage of CLT method.

Attitude	Frequency	Percentage

Strongly Disagree	12	8
Disagree	36	24
Neutral	26	17.3
Agree	61	40.7
Strongly Agree	15	10
Total	150	100.0

Above given table directs that 10 % teachers strongly agreed and 40.7 % teachers agreed, 17.3 % teachers remained neutral 24 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that the critical thinking of the students is enhanced due to the usage of CLT method.

Table 13: Statement 13

The academic performance of the students increases when CLT method id used by the teachers.

Attitude	**Frequency**	**Percentage**
Strongly Disagree	12	8
Disagree	20	13.3
Neutral	41	27.3
Agree	61	40.7

Strongly Agree	16	10.7
Total	150	100.0

Above given table directs that 10.7 % teachers strongly agreed and 40.7 % teachers agreed, 27.3 % teachers remained neutral 13.3 %, teachers disagreed and 8 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed the academic performance of the students increases when CLT method id used by the teachers.

Table 14: Statement 14

CLT provides the learners innovative ways of learning a language.

Attitude	Frequency	Percentage
Strongly Disagree	12	8
Disagree	21	14
Neutral	25	16.7
Agree	74	49.3
Strongly Agree	18	12
Total	150	100.0

Above given table directs that 12 % teachers strongly agreed and 49.3 % teachers agreed, 16.7 % teachers remained neutral 14 %, teachers disagreed and 8 % teachers strongly disagreed

to this statement. Maximum number of the respondents agreed that CLT provides the learners innovative ways of learning a language.

Table 15: Statement 15

CLT is helpful in increasing the spiritual intelligence of the students.

Attitude	Frequency	Percentage
Strongly Disagree	14	9.3
Disagree	20	13.3
Neutral	26	17.3
Agree	60	40
Strongly Agree	30	20
Total	150	100.0

Above given table directs that 20 % teachers strongly agreed and 40 % teachers agreed, 17.3 % teachers remained neutral 13.3 %, teachers disagreed and 9.3 % teachers strongly disagreed to this statement. Maximum number of the respondents agreed that CLT is helpful in increasing the spiritual intelligence of the students.

Table 16: Statement 16

Students participate in the CLT based activities with zeal and zest.

Figure 1: Cumulative Results

The findings of the study indicate that the Communicative Language Teaching method is highly beneficial for enhancing students' English language proficiency at the secondary level. The majority of teachers agreed that CLT improves language learning skills, increases student engagement, and makes learning more interesting compared to traditional methods. This aligns with previous research, which suggests that CLT fosters active participation and real-life language usage, thereby making learning more meaningful for students. The study also found that CLT is

particularly effective in developing students' listening comprehension and conversational skills. This is because CLT emphasizes interaction and practical communication, which are essential for language acquisition. Additionally, teachers reported that using CLT in classrooms boosts their own motivation and confidence, as it creates a more dynamic and interactive teaching environment.

Despite these advantages, some challenges were identified in the implementation of CLT. One of the primary concerns was the need for additional teacher training to effectively employ CLT techniques. Without proper training, teachers may struggle to integrate CLT effectively into their lessons. Another challenge was related to assessment methods. Traditional assessment techniques may not fully capture the learning outcomes of CLT, necessitating the development of new evaluation strategies. Furthermore, while CLT promotes real-life language usage, teachers highlighted that some students still struggle with fluency and require additional support. Overall, the study underscores the need for teacher training and curriculum adjustments to maximize the effectiveness of CLT in secondary-level English classrooms.

CONCLUSION

The study concluded that the Communicative Language Teaching method plays a crucial role in enhancing English language learning at the secondary level in Burewala. Teachers perceive CLT as an effective approach that improves students' language skills, engagement, and confidence. The findings demonstrate that CLT fosters an interactive and student-centered learning environment, which is beneficial for both teachers and students. However, challenges such as the need for professional training and assessment difficulties need to be addressed to ensure the successful implementation of CLT. Despite these challenges, the overall perception of teachers towards CLT remains positive, indicating its potential to significantly enhance English language instruction in secondary schools. The study highlights the importance of adopting modern teaching methodologies that focus on communication and real-life language use to improve students' learning outcomes.

Recommendation

Based on the findings, several recommendations can be made to improve the implementation of CLT in secondary-level English classrooms. First, professional development programs should be organized to equip teachers with the necessary skills to effectively implement CLT. Training workshops and seminars can help teachers understand CLT methodologies and integrate them into their teaching practices. Second, assessment methods should be revised to align with the communicative nature of CLT. Traditional testing approaches may not fully capture students' progress in communication skills, so alternative assessment techniques such as peer evaluations and oral proficiency tests should be considered. Third, schools should provide adequate resources, including CLT-based teaching materials, to support teachers in creating

interactive and engaging classroom environments. Additionally, class sizes should be managed to ensure that teachers can give individual attention to students and facilitate meaningful interactions. Lastly, further research should be conducted to explore the long-term impacts of CLT on students' academic performance and language proficiency. By addressing these recommendations, educational institutions can enhance the effectiveness of CLT and improve English language learning outcomes at the secondary level in Burewala.

Compilation

1)	The language learning skills of the learners of English are improved by using CLT method.
2)	The students are more engaged in a CLT based classroom settings.
3)	The students learn English language in a more interesting way through CLT as compared to the traditional teaching methods.
4)	CLT is helpful in encouraging students for using the English language in the classrooms.
5)	The listening comprehension of the students is improved by using CLT materials in the classrooms.
6)	CLT is helpful in developing the conversational skills of the secondary level students.
7)	Teachers feel motivated while teaching to the English students through CLT.

Compilation

8)	Teaching English through CLT method improves teacher's confidence.
9)	CLT method allows the authentic usage of the language in secondary level classrooms.
10)	Additional training is required for teaching English through CLT.
11)	It is easy to assess the performance of the students and provide the feedback in a CLT based classroom.
12)	The critical thinking of the students is enhanced due to the usage of CLT method.
13)	The academic performance of the students increases when CLT method id used by the teachers.
14)	CLT provides the learners innovative ways of learning a language.

Compilation

15)	CLT is helpful in increasing the spiritual intelligence of the students.
16)	Students participate in the CLT based activities with zeal and zest.
17)	A positive classroom environment is easy to maintain with the help of the CLT.
18)	The student's fluency of English language is developed by the usage of CLT method.
19)	CLT usage has a positive impact on the learning of English at secondary level.
20)	CLT increases the usage of real-life situations in the English classrooms.
