

PSY511- ENVIRONMENTAL PSYCHOLOGY

FINAL TERM NOTES

CHATGPT 2K25

☐ CHAPTER 19–22: STRESS & AROUSAL

☐ STRESS KYA HOTA HAI?

Stress ek emotional ya physical pressure hai jo kisi mushkil situation mein feel hota hai — jaise exams, traffic, ya kisi ka naraaz ho jana.

☐ AROUSAL KYA HAI?

Arousal matlab jab tumhara mind aur body active ho jaaye kisi danger ya challenge ka response dene ke liye. Jaise jab tumhara dil tez dharkta hai ya haath kaanpte hain — ye body tumhe warn kar rahi hoti hai.

☐ BODY MEIN KAUN KAUN SE SYSTEMS ACTIVATE HOTE HAIN?

RAS (Reticular Activating System): Tumhari body ko alert krta hai.

Limbic System: Emotions control krta hai.

Hypothalamus: Hormones release krta hai stress ka samna krne ke liye.

☐ AROUSAL KE LEVELS

1. **Low Arousal:** Bore, sleepy — kaam mein man nahi lagta.

2. **Medium Arousal:** Best performance, mind active — yeh ideal level hai.

3. **High Arousal:** Zyada stress — kaam bigadne lagta hai.

□ **REAL LIFE EXAMPLE:**

Exam ke waqt jab tum thoda sa nervous hote ho, tumhara focus badhta hai (Medium arousal) → acha paper hota hai. Lekin agar zyada ghabra jao (High arousal) → sab bhool jaate ho.

□ **CHAPTER 23–24: GENERAL ADAPTATION SYNDROME (GAS) – Hans Selye**

□ **GAS:** Body ka response stress pe 3 steps mein hota hai:

1. **Alarm Reaction:** Pehla reaction — heartbeat tez, body alert ho jati hai.

2. **Resistance:** Body fight krti hai stress ke against — energy lagti hai.

3. **Exhaustion:** Agar stress lamba chal jaaye to body thak jaati hai — bimari ho sakti hai.

☐ **CHAPTER 25–26: MEASURING STRESS**

☐ **Stressors:**

Woh cheezein jo stress create karti hain:

Daily Hassles: Traffic, exams, noise.

Major Life Events: Death, divorce.

Cataclysmic Events: Floods, earthquake.

☐ **Chronic vs Acute**

Chronic Stress: Lamba chalta hai (jaise poverty).

Acute Stress: Jaldi aata hai, jaldi khatam hota hai (jaise test ka shock).

☐ **Measuring Stress (2 Tareeqay)**

1. **Qualitative:** Tum kya mehsoos krte ho (emotions, thoughts).

2. **Quantitative:** Intensity, duration, control (e.g., heartbeat, hormone level).

□ CHAPTER 27: MODERATORS OF STRESS

□ **Moderators** = Wo cheezein jo stress ko kam ya zyada karti hain:

1. **Attitude:** Tum stress ko positive soch se handle kro to wo kam lagta hai.
 2. **Control:** Agar lagta hai k tumhare paas situation ka control hai → kam stress hoga.
 3. **Hardy Personality:** Strong willpower aur resilience wale log stress se easily nikal jaate hain.
 4. **Social Support:** Friends/family se baat krna help karta hai.
 5. **Relaxation:** Deep breathing, yoga, prayer — body ko calm krte hain.
-

❑ CHAPTER 28: ENVIRONMENT & BEHAVIOR

❑ Behavior environment se influence hota hai.

Example:

Garmi mein log zyada gussa karte hain.

Peaceful park mein walk Karna → mood better hota hai.

❑ **My Lai Massacre Case:**

Soldiers ne logon ko maar diya sirf isliye kyun ke sab kar rahe the → environment aur group pressure ne behavior change kia. Ye example dikhata hai:

Group pressure (Conformity) + Stressful environment → unexpected behavior.

❑ CHAPTER 29: ATTRIBUTION THEORY

❑ **Attribution Theory:**

Hum doosron ke behavior ka reason dhundte hain:

Internal: “Ye banda ghussa karta hai kyunki ye aise hi hai.”

External: “Isne ghussa kia kyunki usse traffic mein delay hua.”

❑ **Errors:**

Fundamental Attribution Error: Dusron ki galtiyon ko unki personality se link krna.

Self-Serving Bias: Apni galti ka blame environment pe daal dena.

❑ **CHAPTER 30–31: CROWDING & PRIVACY**

❑ **Crowding (Definition):**

- “A psychological state where the number of people exceeds the perceived available space.”

❑ Jab tumhe lagta hai jagah kam hai aur log bohot zyada hain → irritation, anxiety, stress.

❑ **Privacy:**

- “Selective control of access to the self or one’s group.”

□ Jab insaan chahta hai kuch waqt akelay ya limited logon ke sath guzare, bina disturbance ke.

□ CHAPTER 32: NOISE POLLUTION

□ Noise (Definition):

➤ “Unwanted sound that causes disturbance in the environment.”

□ Zyada awaaz ka asar:

Sleep disturbance

Concentration down

Aggression ↑

Physical health effect (BP, stress)

□ CHAPTER 33–34: AIR & WATER POLLUTION

□ Air Pollution:

- “Contamination of the atmosphere by harmful chemicals or biological agents.”

☞ **Chemicals, smoke, industrial waste → stress, breathing problems, anxiety**

↑

☐ **Water Pollution:**

- “Presence of harmful substances in water bodies.”

☹ Contaminated water = illness + mental stress in communities

☐ **CHAPTER 35–36: BUILT ENVIRONMENT & BEHAVIOR**

☐ **Built Environment:**

- “Human-made surroundings that provide the setting for human activity.”

🏠 Jaise buildings, roads, furniture — ye sab tumhari mental health ko effect karte hain:

Windowless rooms = depression ↑

Green areas = relaxation ↑

□ **CHAPTER 37–38: ARCHITECTURAL DESIGN & HUMAN NEEDS**

□ **Good Architectural Design:**

- “A design that meets psychological, physical, and social needs of individuals.”

 Examples:

Natural light = better mood

Proper ventilation = comfort

Access to nature = mental health boost

□ **CHAPTER 39: HOUSING & PSYCHOLOGICAL WELL-BEING**

□ **Key Point:**

- “Housing is directly linked to physical safety and mental peace.”

 Poor housing = stress, insecurity, illness. Achha ghar = self-esteem, privacy, happiness ↑

☐ **CHAPTER 40–41: CLIMATE, SEASONS & MOOD**

☐ **Seasonal Affective Disorder (SAD):**

- “Depression that occurs at a specific time of year, usually in winter.”

☐ Kam sunlight → mood low → energy down ☐ Light therapy helps improve mood

☐ **CHAPTER 42: CLIMATE CHANGE IMPACT**

☐ **Key Point:**

- “Climate change affects human health, behavior, and well-being.”

🌪️ Extreme weather → mental health issues ↑ (fear, anxiety), especially in vulnerable populations.

❑ CHAPTER 43–45: SUSTAINABILITY & BEHAVIOR CHANGE

❑ Sustainable Behavior:

- “Behavior that reduces negative impact on the environment.”

♻️ Recycling, energy saving, water conservation → nature ka faida + long-term mental satisfaction.

❑ Behavior Change Techniques:

- “Methods used to motivate people to adopt eco-friendly behavior.”

💡 Tools:

Education & awareness

Rewards & penalties

Social modeling (log kya kar rahe hain, usse influence)

□ **READY RECAP STYLE MEIN:**

Crowding → mental stress

Privacy → personal control

Pollution (Noise, Air, Water) → physical + mental harm

Architecture → affect mind-set

Season & climate → mood swings

Sustainability → future ke liye responsible hona
