

Question No : 1 of 50

Which of the following does not come under the category of misuse?

Answer

- ☐ Eavesdropping
- ☒ Authorized access
- ☐ Hacking
- ☐ Fraud

Question No : 16 of 50

Which of the following is not a form of Information Classification?

Answer

- ☐ Government classifications
- ☐ Private Sector classifications
- ☒ Individual classifications ✓
- ☐ Both Government and Private Sector classifications

Question No : 21 of 50

Which of the following terms is a measure of the probability that the system will cause an accident ?

Answer

- ☒ Risk
- ☐ Hazard probability
- ☐ Accident
- ☐ Damage

Question No : 19 of 50

Contract between two parties should be clear, concise and _____.

Answer

- ☐ Mutual
- ☐ Conformance
- ☐ Custom
- ☐ Consistent

Question No : 15 of 50

Information security, sometimes shortened to _____.

Answer

☐ InfoSec

☐ InfoTec

☐ InfoJet

☐ InfoSet

Question No : 30 of 50

The term negligence in software liability refers to _____.

Answer

- ☐ Licensing
- ☐ System safety
- ☐ Ignore users
- ☐ Lack of care

Question No : 4 of 50

If copyright is to remain with the software house and the client is merely given permission to use the software, it is known as:

Answer

- ☐ Sale
- ☒ License
- ☐ Assignment
- ☐ Terms and conditions

Question No : 11 of 50

_____ is a Moral issue.

Answer

☐ Sending Email

☐ Sending Message

☐ Facebook Chatting

☒ Sending Spam

Question No : 29 of 50

ISO is concerned with software _____

Answer

- ☐ Liability
- ☒ Security
- ☐ Standard
- ☐ Performance

Question No : 24 of 50

Risk Management is a _____

Answer

- ☐ Sequential process
- ☒ Cyclic process
- ☐ Parallel process
- ☐ Side by Side process

Question No : 27 of 50

Facebook and MySpace are open to people _____ and older.

Answer

☐ 11

☐ 10

☐ 12

☐ 13

Question No : 10 of 50

Ethical hacking also called _____ computer hacking.

Answer

☐ Black hat

☒ White hat

☐ Red hat

☐ Gray hat

Question No : 8 of 30

The use of internet by individuals and organizations has not raised any issue.

Answer

- ☐ The statement is partially wrong
- ☐ The statement is partially correct
- ☐ The statement is True
- ☒ The statement is false

Question No : 3 of 50

The know-how which goes into the development of the product may be protected as which intellectual property?

Answer

- ☐ Patent
- ☒ Confidential Information
- ☐ Copyright
- ☐ Trademark

Question No : 7 of 50

How we protect our self from cyber crime?

Answer

- ☐ Use encrypted Word document
- ☐ Use Node pad
- ☐ Use key pad
- ☐ Use caution when you click links

Question No : 9 of 50

The process of attempting to gain or successfully gaining unauthorized access to computer resources is called _____.

Answer

- ☒ Hacking
- ☐ Hunting
- ☐ Lacking
- ☐ Modifying

Question No : 2 of 50

The Computer Misuse Act is an Act of the Parliament of the _____

Answer

- ☐ United States of America
- ☒ United Kingdom
- ☐ France
- ☐ Germany

DELL

Brute force attacker tries to login using _____

Answer

- ☐ Encrypted text
- ☒ All possible letter combinations
- ☐ Hash tokens
- ☐ Predefine password

Question No : 33 of 50

Listening to the private conversation of others without their consent is called _____

Answer

☐ Authentication

☐ Hacking

☒ Eavesdropping ✓

☐ Fraud

Question No : 31 of 50

One of the main concerns associated with a product mission critical applications is _____

Answer

☐ Safety and reliability

☐ Scalability

☐ Launch time

☐ End users

Question No : 32 of 50

Accessing a computer without the authorization of the owner is called _____

Answer

- ☒ Hacking
- ☐ Input fraud
- ☐ Output fraud
- ☐ Eavesdropping

Question No : 34 of 50

Regulation is concerned with _____

Answer

- ☐ personal information
- ☒ rules and directives
- ☐ defamation
- ☐ retention

Question No : 28 of 50

_____ is an Ethical issue over the Internet.

Answer

☐

Freedom

☒

Privacy

☐

Usability

☐

Liberation

Question No : 23 of 50

Which statement doesn't fall under the security controls?

Answer

- ☐ Controls that are intended to ensure that attacks are unsuccessful
- ☐ Controls that are intended to detect and repel attacks
- ☐ Controls that are intended to support recovery from problems
- ☐ Controls that are intended to ensure that attacks are successful

Question No : 25 of 50

Risk Assessment is _____.

Answer

- ☒ Assessing Potential loss
- ☐ Assessing asset declaration
- ☐ Assessing value
- ☐ Assessing strength

Question No : 40 of 50

Don't use the same _____ for a social networking site and for your email.

Answer

☒ Password

☐ Picture

☐ First Name

☐ Last Name

Question No : 18 of 50

Intellectual property rights are often the most valuable _____ owned.

Answer

- ☐ Capital
- ☒ Assets
- ☐ Equity
- ☐ Liabilities

Question No : 26 of 50

How we can not protect our self from becoming a cyber victim?

Answer

- ☐ Lock down your profile information to people you accepts as a friend.
- ☐ Remember - social networking sites are a public resource – like a billboard in cyberspace
- ☐ Evaluate sites privacy settings
- ☐ By sharing the private information on social sites

Question No : 20 of 50

The reason for software bugs and failures is due to _____ ?

Answer

- ☐ Software Companies
- ☒ Software Developers
- ☐ Both Software Companies and Developers
- ☐ Clients

Question No : 13 of 50

The term _____ refers to principles, values and beliefs that define right and wrong behaviour.

Answer

- ☐ Empowerment
- ☒ Ethics
- ☐ Customer satisfaction
- ☐ Innovation

CS625 (Professional Practices)

Question No : 17 of 50

The name under which a product is sold may be registered as a _____

Answer

- ☐ Patent
- ☐ Copyright
- ☒ Trademark
- ☐ Designs Registry

Question No : 14 of 50

Which of the following statements is not true about Risk Management:

Answer

- ☐ We need to know where the gaps are
- ☐ What threats are likely
- ☐ How and how well the system is protected
- ☐ It is a one-time process ✓

Windows 10

Question No : 5 of 50

After acceptance of the product the warranty period is of how many days?

Answer

☐ 30

☐ 120

☒ 90

☐ 60

Question No : 6 of 50

If the ownership of copyright passes to the client, it is known as:

Answer

- ☐ Sale
- ☒ License
- ☐ Assignment
- ☐ Terms and conditions

Question No : 12 of 50

Intellectual property rights do not include _____

Answer

☐ Trademarks

☒ Software Design patterns

☐ Patents

☐ Copyrights

Question No : 12 of 50

Intellectual property rights do not include _____

Answer

- ☐ Trademarks
- ☒ Software Design patterns
- ☐ Patents
- ☐ Copyrights

Question No : 17 of 50

The name under which a product is sold may be registered as a _____

Answer

☐

Patent

☐

Copyright

☒

Trademark

☐

Designs Registry

Question No : 20 of 50

The reason for software bugs and failures is due to _____ ?

Answer

- ☐ Software Companies
- ☒ Software Developers
- ☐ Both Software Companies and Developers
- ☐ Clients

Short Q's:-

- 1- Name 3 CIA Information security principles.
- 2- What type of intellectual property protection applies to computer programs and compilations of computer programs.
- 3- Enlist at least three things which can be delivered to the client as a result of software contract?
- 4- Who benefits from data protection measures?
- 5- What do you think which information from the following we should not share on social media websites?
 1. Financial Information 3) Phone Number 5) Memes & Jokes
 - 2- CNIC 4) News Articles
- 6- For a competent software engineer which factors/traits are considered important. Enlist any three.
"L/A"
- ① There are how many categories of computer fraud? Enlist their names.
- ② Enlist the names of any four common hacking tools.

3) You are required to fill the column B against column A in the following table.

Pattern of Payment (A)	Payment % (B)
1. An initial payment	
2. At development stage	
3. At acceptance level	
4. At end of the warranty period.	

4) Which of the following are the advantages of internet?

- a. The internet provides a vast array of entertainment options.
- b. The internet has created new opportunities for cybercrime.
- c. The internet has made it possible for people to work from home or remote locations.
- d. The anonymity of the internet has made it easier for people to engage in cyber bullying, harassment and hate speech.

5) A computer network is a set of machines connect by a set of "Media".

- a) cables b) people c) social entities d) organizations.

Block A (Pattern of Payments)	Block B (Percentage of Payment)
1. An initial payment	10-30%
2. at development stage	30-50%
3. at acceptance stage	20-40%
4. at end of the warranty	10-20%

Penetration-Testing Methodologies

- **White box model**

Tester is told everything about the network topology and technology and is authorized to interview IT personnel as well. Makes the job easier for him

- **Black box model**

Company staff does not know about the test. Tester is not given detail about the network so the burden is on the tester to find out the details. The test determines if the security personnel are able to detect an attack.

- **Gray box model**

This mode of test is combination of both white and black box models. The company provides the tester with partial information about the network.

What should do after hacked?

- ☐ Shut down /Turn off the system
- ☐ Separate the system from network
- ☐ Restore the system with backup Or reinstall all programs
- ☐ Connect the system to the network
- ☐ Good to call the police

Tools of Hacking

Scanners

A program that automatically detects security weakness in remote host

Telnet

It is terminal emulation program that allows us to connect to remote system

FTP

FTP is one type of protocol but some time it is used as hacking tool, port 21 for the ftp. For connecting ftp we need some ftp s/w known as ftp client. For connecting ftp server you have to hammer that server.

Moral Issues Of internet

- ☐ Plagiarism
- ☐ Sending spam. People waste time deleting spam if the spam filter allows it through
- ☐ Companies monitoring staff use of the internet and e-mail
- ☐ Using someone's wireless internet connection without permission
- ☐ Using photo editing software to distort reality

Remedies for breach of copyright

- ☐ A copyright owner has all the usual civil remedies of search, injunction, damages and an action for an account of profits made in breach of copyright
- ☐ If it is shown that at the time of the infringement of copyright the defendant did not know and had no reason to believe that copyright subsisted in the work, then the plaintiff is not entitled to damages against the defendant

Remedies for breach of copyright

- ☐ A copyright owner is also given an important power to enter premises without using force in order to seize infringing copies, or articles specifically designed or adapted for making copies

Introduction

- ☐ Intellectual property rights are often the most valuable assets owned, used and developed by a software house.
- ☐ Intellectual property rights include:
 - Confidential information
 - Patents
 - trade marks
 - Designs

Copyrights protecting computer programs

Plagiarism

- ☐ the practice of taking someone else's work or ideas and passing them off as one's own.
- ☐ All of the following are considered plagiarism:
 - turning in someone else's work as your own
 - copying words or ideas from someone else without giving credit
 - failing to put a quotation in quotation marks

Plagiarism (continued)

- giving incorrect information about the source of a quotation
- changing words but copying the sentence structure of a source without giving credit
- for a computer program changing variable names only, or not changing the structure or flow of a program

Contracts for the supply of custom-built software at a fixed price

- ❑ Software suppliers try to use what are known as standard form contracts, which are used or intended to be used many times over.
- ❑ Such a contract might consist of:
 - a short introductory section
 - a set of standard terms and conditions
 - a set of appendices or annexes

Software contract
consist of?

Other types of software services contract

- There are four types of contractual arrangement which are widely used in connection with the provision of software services:

- fixed price
- contract hire
- time and materials
- consultancy

Types of SSC?
OR
4 types of contractual
arrangements?

Factors affecting system safety

- ☐ Hazard analysis
- ☐ Requirements and specification
- ☐ System Reliability and safety
- ☐ Design
- ☐ Testing and debugging
- ☐ Safety integrity analysis and risk assessment
- ☐ Documentation

Obtaining unauthorized access to a computer

- ❑ The second form of misuse identified by the Law Commission was **unauthorized obtaining of information from** a **computer**. It is sub-divided as:

- ❑ **Computer hacking:** **What is cmp hacking?**

Accessing a computer without the authorization of the owner.

In this case the person accesses the computer secretly for

stealing information, data or manipulation of data for diverse purposes

Continued...

- ❑ **Eavesdropping** **define eavesdropping**

Literal meaning listening or spying secretly

Types of hacking

Computer Misuse & Criminal Law

Introduction:

The media and popular computing press abound with tales of multi-million pound computer frauds and of the dangers to commercial companies, governmental data banks, financial institutions and national security from the activities of computer hackers

Computing and criminal activity

- ☐ Modern business process is done through utilizing computer software and hardware, i.e. some form of computer system is used in it.
- ☐ There has been a sharp rise in the number of crimes involving computing; and the Internet has undoubtedly created new security risks

Legal Liability

Introduction

System designers and software engineers may have legal responsibilities under statutes such as **the Health and Safety**

Product liability and the Consumer Protection Act 1987

Product liability is the area of law in which manufacturers, distributors, suppliers and retailers are held responsible for any injuries products cause.

Regardless of any contractual limitations of liability, if a product or any of its component parts are defective its manufacturer may be liable for damage under the **Consumer Protection Act (CPA)** or the common law of

negligence

Imp

Page 5

www.pakeeducation4u.com

Legal Liability

Negligence

The manufacturer or system designer has failed to take due care in the construction or design of the system, and this lack of care has resulted in failure leading to the injury

Page 6

✓ Categories of misuse

Under the study of the **English criminal law, the Law Commission** highlighted a number of **categories of misuse** of computers

- ☐ **Computer fraud**
- ☐ **Unauthorized obtaining of information from a computer**
 - **Computer hacking**
 - **Eavesdropping on a computer**
 - **Making unauthorized use of computers for personal benefit**
- ☐ **Unauthorized alteration or destruction of information stored on a computer**
- ☐ **Denying access to an authorized user**
- ☐ **The unauthorized removal of information stored on a computer**

✓ Computer Fraud

- ☐ The Law Commission defined computer **fraud** as conduct which involves the **manipulation of a computer or internet**, by whatever method, in order dishonestly to obtain money, property, or some other advantage of value, or to cause loss
- ☐ **Computer fraud is further divided into three categories**
 - **Input frauds**
e.g. intentionally entering false data or amending data into the computer
 - **Output frauds**
Output fraud involves stealing or misusing system output
 - **Program frauds**
Program fraud involves the dishonest alteration of a computer program

5hackers creeds

Hackers Code of Conduct

Hacker creed (Steven Levy's "Hackers: Heroes of Computer Revolution" - 1984):

- Access to computers should be unlimited and total.
- Always yield to the Hands-On Imperative
- All information should be free.
- Mistrust authority -- promote decentralization.
- Hackers should be judged by their hacking.
- You can create art and beauty on a computer.

Computers can change your life for the better.

Introduction

mcq

- ❑ **Information security**, sometimes shortened to **InfoSec**, is the practice of defending **information** from unauthorized access, use, disclosure, disruption, modification, inspection, recording or destruction. It is a general term that can be used regardless of the form the data may take (e.g. **electronic, physical**)

- ① Write names of four common Hacking Tools?
- ② Enlist the four moral issues associated with internet.
- ③ What are the categories of computer frauds, enlist them.
- ④ Write three risk controlling strategies?
- ⑤ GATT concerned the protection of intellectual property rights of which software's product.
- ⑥ What are two categories of infringement in contracts.
- ⑦ If you are competent software developer, which factors/traits of software will you prefer.
- ⑧ W. of F is true about data protection.
 - ★ Protection of information of employee
 - ★ " " organization rights
 - ★ " " organization repute.
- ⑨ Which of following is not advantage of internet.

Five statement were given and three were not whom I mentioned.

Taken By: QAZI SHOAIB HASSAN

★ All copyrights are reserved.

- ☐ A computer hacker is someone who develops, changes or attempts to circumvent computer security hardware or software.
- ☐ Intelligent, having advance knowledge of hardware and software.
- ☐ Can either happen for negative (criminal) or positive reasons.
- ☐ Criminal hackers develop computer malware or spyware to gain access to confidential information.

Page 3

www.pakeducation4u.com

Types of hacking

- ☐ Website Hacking
- ☐ Net Hacking
- ☐ Password Hacking
- ☐ Software Hacking
- ☐ Ethical Hacking
- ☐ Email Hacking
- ☐ Computer Hacking

Page 4

www.pakeducation4u.com

Website Hacking

- ☐ Hacking a website means taking control from the website owner to a person who hacks the website.

199/254

Finish

Page 5

- ☐ Project Managers
- ☐ Acceptance procedure
- ☐ Warranty and maintenance
- ☐ Termination of the contract

Other types of software services contract

- ☐ There are four types of contractual arrangement which are widely used in connection with the provision of software services:

- fixed price
- contract hire
- time and materials
- consultancy

Contract Hire

- ☐ The supplier agrees to provide the services of one or more staff to work for the client
- ☐ The staff work under the direction of the client
- ☐ Supplier's responsibility is limited to provide suitable competent people and replacing them if they become unavailable or said unsuitable by the client
- ☐ Payment is on the basis of a fixed rate for each man day worked
- ☐ Issues such as delay payments, acceptance tests and many others simply do not arise

Competence, training and experience

- ❑ Competence means “knowledge and the ability to apply that knowledge”
- ❑ There is an understood assumption that all those engaged in the design and development of safety system software are competent to perform the necessary tasks
- ❑ Factors such as training and relevant experience are also considered important traits for a competent software engineer

competence Software
engineer traits

Regulation and control of **personal** information: data protection, defamation and related issues

Introduction:

- ❑ We can not deny the dramatic impact which increasing computerization has had on the storage, processing, retention and release of information and data.

when is it acceptable to
use personal
information for purpose
other than those
mentioned in principle
of personal information
specifications??

Page 2

www.pakeducation4u.com

Introduction(Continued...)

- ❑ Computerization has revolutionized the handling and processing of information to such an extent that the data itself has now become a commodity which possesses commercial value and can be traded on the market in the same way as any other commodity
- ❑ The value to businesses is also enhanced by the fact that how easily and safely data can be transferred around the globe

Page 3
