

FINAL TERM Exam Questions

BIO201 Current SPRING 2021

MCQs from PPTs

1. define negative transcription (2marks)
2. 2:Define cell culture (2marks)
3. 3:define inclusion cell (i-cell) deases (3marks)
4. 4: Name subclasses of human antibody IgG (3marks)
5. 5: Name five growth promoting factors (5 marks)
6. 6: Explan the pocess of E.coli signalling(5marks)
7. Centrifuge machine and its function
8. Antibody produce on the surface of developing B cells
9. Enlist strategies of transcription regulations
10. ERGIC53 protein function
11. E. Coli signaling steps
12. How UV light help in sterilization

FaceBook Whatsapp Instagram Youtube @Biotechbrainybunch

13. pracrin signaling___(5)
14. application & air flow of laminar flow (5)
15. five antibiotics _(3)
16. which the phase of cell division opposite to the prophase & how..(3)
17. proto oncogene (2)
18. Which mechanism of bird used for migration (2)
19. Adult stem cell. Benefits and therapeutics uses.
20. 2. Phagocytes
21. 3. Signaling in olfaction
22. 4. If a DNA proves which antigen are initiate.....
23. .Write the name of five major growth promoting oncogenes? (5)
24. 2.what are CaMkinase II and their functions?
25. 3. What is kin recognition?
26. 4. What are the advantages of storing cell at low temperatures?
27. 5. What are transducer proteins?
28. Sterilization from uv light long
29. Epigenetics define
30. Difference between cytotoxic t cells
31. Helper t cells
32. Regents used in sterilization or equipments name at least five
33. What cells are responsible for cell mediated response
34. What are lysosomes
35. What is haemocytometer
36. What is role of PI3K?
37. What are growth prompting oncogenes

38. What is CaM kinase II. Give it's function in muscular movement
39. Cargo protein
40. cell culture
41. MHC types and difference them
42. laminar flow cabinet
43. What is the Function of signaling system.
44. What is the structure of Antibody?
45. What is Telophase.?
46. Difference between confluent monolayers and past confluent stages.
47. What are the Advantages of cell storing at low temperature.?
48. Synapse
49. Epigenetics
50. Proto oncogene
51. Endocytosis
52. How DNA packed in cell
53.
