

FINAL TERM Exam Questions

BIO201 Current SPRING 2021

MCQs from PPTs

1. Q:1 Describe the storage of triglycerides in plant and vertebrae?
2. Q:2 factor affecting of Tm?
3. Q:3 describe primary structure of DNA?
4. Q:4 Nomenclature of prostaglands?
5. Q: what carbon and nitrogen number in necleotide and neucleoside?
6. Define reaction velocity? And its affect on the reaction rate.
7. 2.What are globosides?
8. 3.Describe interaction of DNA.
9. 4.Give the common RNA slandered structure.
10. 5.characteristics of VLDL
11. 6.Acrolein test
12. Explain Synthesis of lipoxin
13. Difference between adenine and guanine
14. what is Km in michealis menton equation

15. Enlist 5 cofactors examples
16. How DNA duplex is intact.
17. write 5 properties of nitrogenous bases.
18. Advantages if triacylglecrol as stored fuel?
19. What is mediterraniean diet.
20. What do you know about KM in Mechlis menten equation?
21. Write yeild of DNA duplex.
22. Properties of waxes.
23. RNA types details (5)
24. ¶ chemistry of lipid meuchonic acid /esa kçh tha (5)
25. ¶ Structure of thymine & Uracil (2)
26. ¶How phosphate form (3)
27. Difference between nucleotide and nucleoside (2marks)
28. 2: write Michaelis-Menten equation (2 marks)
29. 3: write note on beeswax and spermatcei (3 marks)
30. 4: calculate the pKa value of lactic acid (from handouts example)
31. 5 : Explain interaction between DNA (5 marks)
32. 6: Characteristics of palmitic acid (5marks)
33. 3 unusual amino acid
34. Mediterranean diet
35. VLDL
36. Coenzyme
37. Sponification number
38. Charguff rules
39. which pentose sugar is present in nucleic acid
40. effect of pH on ionization
41. coposition of nucleotide
42. arachidonic acid
43. What is iodine number and its importance? (2marks)
44. Primary structure of Dna? (5 marks)
45. physical properties of Triacylglerols(5 marks)
46. what is reaction velocity and its affects on reaction rate?(3 marks)
47. Difference between Thyamine and Cytosine(2 marks)
48. Enzyme and the classification of enzyme. 10 marks

49. Properties of Nitrogen. 5 marks
50. Primary structure of DNA. 5 marks
51. Function of t-rna 3 marks
52. What is the simple lipids? Give two types? 3marks ka
53. Ak tha reaction order respect with substrate concentration? (5)
54. What is the enzymes? Give classification and examples? 10marks
55. Basic steps of enzyme kinetics (3 MARKS)
56. Biomedical importance of nucleotides (3 marks)
57. Describe small and large non-coding regulatory RNAs (10)
58. Describe primary structure of DNA (5 marks)
59. How phosphodiester bond is formed (2 marks)
60. Difference between uraciall and thymine? 2 marks
61. What do you know about kinetic enzymes? 2marks
62. What is the concentration of H in the 0.1M NaOH? 3marks
