BIO202 QUIZ 1 SOLVED

1. ____ is semi-quantitative test to detect presence of glucose in a solution.

a) Molisch's test

b) Benedict's test

c) Ninhydrin test

d) None of given

2. The terminal methyl and ____ carbon of glucose, galactose or mannose-forms the corresponding aldaric acid.

a) Carboxyl

b) Ketone

c) Aldehyde

d) Carbonyl

3. The condition in which the body fails to metabolize galactose is known as:

a) galactosemia

https://chat.whatsapp.com/L3BZ8hLwIS097iREnhTDNA

b) glucosuria

c) diabetes mellitus

d) hypoglycemia

4. Sugars are classified on the basis of number of carbon atoms present. An example of a tetrose is:

a) erythrose

b) glyceraldehyde

c) ribose

d) glucose

5. Simplest carbohydrate is ___.

a) Sucrose

b) Glyceraldehyde

c) Glucose

d) Glycerine

6. Monosaccharides can be subdivided further depending upon ___.

a) Number of carbon atoms

b) aldehyde groups

https://chat.whatsapp.com/L3BZ8hLwIS097iREnhTDNA

c) Number of carbon atoms and aldehyde or ketone groups

d) None of given

7. Isomeric forms of monosaccharides that differ only in their configuration about the hemiacetal or hemiketal carbon atoms are called ____.

a) anomers

b) stereoisomers

c) epimers

d) enantiomers

8. The oxidation of carbonyl carbon in monosaccharides yield products knows as:

a) aldonic acids

b) uronic acids

c) aldoses

d) furfurals

9. The substitution of a hydrogen for the hydroxyl group at C-6 of L-mannose produces ____.

a) D-mannose

https://chat.whatsapp.com/L3BZ8hLwIS097iREnhTDNA

b) L-glucose

c) L-rhamnose

d) L-mannosamine

10. Glucose and galactose are epimers which offer in the configuration around carbon no. ___.

a) 4

b) 2

c) 1

d) 6

11. If the carbonyl group is at an end of the carbon chain (that is, in an ___) the monosaccharide is an aldose.

a) Carboxyl group

b) Ketone group

c) Carbonyl group

d) Aldehyde group

12. When the oxygen from the -OH group in a monosaccharide is removed, the resulting compound formed is known as ___.

a) deoxy sugar

b) phospho sugar

c) amino sugar

d) carboxyl sugar
