

CS001: Computer Proficiency License

Premium Preparation Guide (Modules 4 - 6)

Author: ZB ZAIB Contact: +92 300 5427579 / 03435583148

Quranic Motivation

“Insaan ke liye wahi kuch hota hai jis ke liye woh khud mehnat aur koshish karta hai.” Reference: Surah An-Najm, Ayah 39

Module 4: Spreadsheets (Microsoft Excel)

Author: ZB ZAIB | Module 4

Lesson 1: Introduction to Excel

Simple Explanation: Microsoft Excel is like a digital notebook made of many small boxes (cells) where you can record numbers, names, and calculations. It helps you organize data in rows and columns so you can easily manage and calculate it.

Daily Life Example: Imagine you are keeping track of your monthly household expenses. Instead of writing them on a piece of paper where you have to manually add up the totals, you use Excel. You put the item names in one column and the prices in another. Excel can then automatically calculate the total for you.

Lesson 2: Understanding the Interface

Simple Explanation:

- **Ribbon:** The top menu bar containing all the tools (Home, Insert, Page Layout, etc.).
- **Name Box:** A small box that tells you exactly which cell you are currently clicking on (e.g., A1).
- **Formula Bar:** A long bar where you can see and edit the actual content or “math secret” (formula) inside a cell.

Daily Life Example: Think of a kitchen. The **Ribbon** is like your kitchen cabinet where all tools are kept. The **Name Box** is like a label on a jar telling you its location. The **Formula Bar** is like looking inside the jar to see the ingredients.

Lesson 3: Rows, Columns, and Cells

Simple Explanation:

- **Column:** Vertical lines of boxes labeled with letters (A, B, C...).
- **Row:** Horizontal lines of boxes labeled with numbers (1, 2, 3...).
- **Cell:** The single box where a row and column meet (like B5).

Daily Life Example: Think of a cinema hall. The **Columns** are the vertical aisles (A, B, C), and the **Rows** are the horizontal lines of seats (1, 2, 3). Your specific seat number (like B5) is the **Cell**.

Lesson 4: Workbooks and Worksheets

Simple Explanation:

- **Workbook:** The entire Excel file.
- **Worksheet:** The individual pages inside that file. By default, a workbook has three sheets.

Daily Life Example: A **Workbook** is like a complete “Register” or “Diary.” A **Worksheet** is like a single “Page” inside that register.

Lesson 5: Saving and Formatting

Simple Explanation: Saving ensures your work isn't lost. Formatting means changing how the text looks—making it bold, changing colors, or adjusting the size.

Daily Life Example: Saving is like putting your diary in a safe cupboard. Formatting is like using highlighters to make important notes stand out.

Lesson 6: Formulas and Functions

Simple Explanation: Formulas are mathematical instructions you give to Excel. Functions are “pre-made” formulas like SUM or AVERAGE.

Daily Life Example: A **Formula** is you writing “20 + 20 + 20”. A **Function** is like using a calculator's “Total” button to do it instantly.

Lesson 7: Sorting and Filtering Data

Simple Explanation:

- **Sorting:** Arranging data in a specific order (like A to Z).
- **Filtering:** Hiding the data you don't need and only showing what you want to see.

Daily Life Example: **Sorting** is like arranging clothes by color. **Filtering** is like picking out only “Blue” shirts to wear.

Module 5: Presentation (Microsoft PowerPoint)

Author: ZB ZAIB | Module 5

Lesson 1: Introduction to PowerPoint

Simple Explanation: PowerPoint is a tool used to create “Slides” to show information visually using text, images, and animations.

Daily Life Example: Imagine you are a teacher showing big posters with pictures to kids. PowerPoint is the digital version of those posters.

Lesson 2: Placeholders

Simple Explanation: Placeholders are the dotted boxes on a slide where you can type text or insert pictures.

Daily Life Example: Think of a photo frame. The frame is the **Placeholder**. It shows you exactly where the photo should go.

Lesson 3: Slide Layouts

Simple Explanation: Layout is the arrangement of placeholders on a slide.

Daily Life Example: Think of a newspaper page. The way the headline and photos are arranged is the **Layout**.

Lesson 4: Inserting and Formatting Text

Simple Explanation: Typing information and changing its look (font, size, color) to make it easy to read.

Daily Life Example: It's like writing a “Welcome” sign with big, bright colors so everyone can see it.

Lesson 5: Animations and Transitions

Simple Explanation:

- **Animations:** Movement of objects *inside* a slide.

- **Transitions:** Movement effect when moving from *one slide to the next*.

Daily Life Example: Animation is like a character moving in a cartoon. **Transition** is like the “fade to black” effect in movies.

Lesson 6: Slide Master

Simple Explanation: A special slide that controls the look of every slide in your presentation.

Daily Life Example: Think of a school uniform. The school sets a “Master Rule” (the uniform), and every student looks the same.

Module 6: Internet and Communication

Author: ZB ZAIB | Module 6

Lesson 1: Introduction to the Internet

Simple Explanation: A massive global network connecting millions of computers to share information.

Daily Life Example: Think of the Internet like a giant global “Telephone System.”

Lesson 2: Web Browsers and Navigation

Simple Explanation: A **Web Browser** is the software to view websites. **Navigation** means moving between pages.

Daily Life Example: A **Web Browser** is like a “Car” that takes you to different “Destinations” (Websites).

Lesson 3: Understanding URLs

Simple Explanation: URL is the unique address of a website.

Daily Life Example: A **URL** is exactly like your “Home Address.”

Lesson 4: HTTP, HTTPS, and FTP

Simple Explanation:

- **HTTP/HTTPS:** Rules for sending web pages. HTTPS is secure.
- **FTP:** Way to transfer large files.

Daily Life Example: **HTTP** is a postcard. **HTTPS** is a locked box. **FTP** is a cargo truck.

Lesson 5: Search Engines

Simple Explanation: A tool (like Google) to find information using keywords.

Daily Life Example: A **Search Engine** is like a “Library Index.”

Lesson 6: Email and Communication

Simple Explanation: Sending digital letters and files instantly over the internet.

Daily Life Example: **Email** is the modern version of a “Post Office.”

Conceptual Definitions

Author: ZB ZAIB | Definitions

Term	Definition	Daily Life Example
Cell Reference	Unique address of a cell (e.g., A1).	Seat number in a stadium.
Workbook	Excel file with multiple sheets.	A complete notebook.
Formula	Expression to calculate values.	A cooking recipe.
Function	Predefined formula (e.g., SUM).	“Quick Cook” button on microwave.
Sorting	Arranging data in order.	Arranging books by height.
Filtering	Showing only specific data.	Using a tea strainer.
Placeholder	Dotted box for content.	“Reserved” sign on a table.
Slide Layout	Arrangement of placeholders.	Floor plan of a house.
Transition	Effect between slides.	Curtain opening in a play.
Animation	Effect on slide objects.	Cartoon character moving.
Slide Master	Controls global slide look.	A stamping tool.
URL	Global web address.	Complete postal address.
HTTP	Web transmission protocol.	Waiter taking an order.
HTTPS	Secure web protocol.	Locked briefcase for messages.
FTP	File transfer protocol.	Specialized courier service.
Search Engine	Tool to find info by keywords.	Yellow Pages directory.
Browser	Software to access the web.	A window to the world.
Email	Electronic mail.	Digital letter.
Spam	Unsolicited junk mail.	Unwanted flyers at your door.
Attachment	File sent with email.	Photo inside a letter.

100 Conceptual Quiz Questions

Author: ZB ZAIB | Quiz

No.	Question	Correct Answer	Explanation
1	What is the intersection of a row and a column called?	B) Cell	A cell is the basic unit of Excel.
2	Which bar is used to enter or edit formulas?	C) Formula Bar	It shows and allows editing of cell content.
3	How are columns labeled in Excel?	B) A, B, C...	Columns are vertical and lettered.
4	How are rows labeled in Excel?	B) 1, 2, 3...	Rows are horizontal and numbered.
5	Default number of worksheets in a new workbook?	C) 3	Standard starting sheets are three.
6	Symbol every formula must start with?	C) =	Equals sign triggers formula mode.
7	What does the SUM function do?	C) Adds all numbers	Used for addition of a range.
8	File extension for Excel?	C) .xlsx	Standard modern Excel format.
9	What does 'Sorting' data mean?	C) Arranging in order	Organizes data alphabetically/numerically.
10	What does 'Filtering' data mean?	B) Showing specific data	Hides unwanted rows based on criteria.
11	Function for highest value?	B) MAX	Returns the largest value.
12	Function for lowest value?	A) MIN	Returns the smallest value.
13	What is a 'Workbook'?	B) Collection of sheets	The entire Excel file.
14	How to select an entire column?	B) Click column letter	Selects the whole vertical line.
15	What is the Name Box for?	B) Showing cell address	Displays the active cell reference.

No.	Question	Correct Answer	Explanation
16	Can you rename a worksheet?	A) Yes	Double-click the tab to rename.
17	Shortcut to save?	A) Ctrl+S	Universal save shortcut.
18	What does 'Average' do?	C) Calculates mean	Adds numbers and divides by count.
19	What is a 'Cell Range'?	B) A group of cells	Collection of two or more cells.
20	Tab for 'Sort & Filter'?	C) Data	Used for managing data.
21	Main purpose of PowerPoint?	B) Presentations	Designed for visual shows.
22	Dotted boxes on a slide?	B) Placeholders	Hold text, images, or charts.
23	Best view for reordering?	B) Slide Sorter	Shows thumbnails for easy moving.
24	What is a 'Transition'?	B) Between slides	Effect when moving to next slide.
25	What is an 'Animation'?	A) On slide	Effects applied to slide objects.
26	Key to start slideshow?	B) F5	Shortcut to start from beginning.
27	Slide Master use?	B) Global changes	Affects all slides in the deck.
28	PowerPoint extension?	C) .pptx	Standard PowerPoint format.
29	Shortcut for new slide?	B) Ctrl+M	Adds a new slide to deck.
30	Add videos to PPT?	A) Yes	Can insert files or online videos.
31	What is 'Slide Layout'?	B) Placeholder arrangement	Defines where content goes.
32	Tab for slide design?	C) Design	Contains themes and styles.
33	'Esc' during slideshow?	C) Ends show	Exits the presentation mode.
34	Print PPT slides?	A) Yes	Can print slides or handouts.

No.	Question	Correct Answer	Explanation
35	What is a 'Theme'?	B) Set of colors/fonts	Provides a consistent look.
36	How to delete a slide?	B) Press Delete	Removes the selected slide.
37	Notes Pane use?	B) Presenter reminders	Not shown to the audience.
38	Convert PPT to PDF?	A) Yes	Can save or export as PDF.
39	Handout Master?	B) Controls handouts	Defines layout for printing.
40	Tab for 'Animations'?	B) Animations	Dedicated to object movements.
41	What is 'WWW'?	A) World Wide Web	System of interlinked documents.
42	What is a 'Web Browser'?	B) Software for web	Tool to view websites.
43	What is 'URL'?	A) Uniform Resource Locator	Unique address of a web page.
44	Secure protocol?	B) HTTPS	Encrypted version of HTTP.
45	What is 'Email'?	B) Electronic Mail	Digital message exchange.
46	What is 'Spam'?	B) Junk mail	Unwanted bulk email.
47	Search Engine?	B) Tool to find info	Google, Bing, etc.
48	What is 'FTP'?	A) File Transfer Protocol	Used to transfer files.
49	Email 'Attachment'?	B) File sent with mail	Photos, docs, etc.
50	What is 'ISP'?	A) Internet Service Provider	Company providing internet.
51	What is a 'Hyperlink'?	B) Clickable link	Takes you to another page.

No.	Question	Correct Answer	Explanation
52	What is 'Bcc'?	B) Blind Carbon Copy	Hidden recipients.
53	What is 'Cc'?	A) Carbon Copy	Sends copy to others.
54	'Subject' line?	B) Brief title	Tells what mail is about.
55	'Downloading'?	B) Receiving data	From internet to computer.
56	'Uploading'?	B) Sending data	From computer to internet.
57	'Homepage'?	B) First page	Main entry of a website.
58	'IP Address'?	A) Internet Protocol	Unique numerical label.
59	'Phishing'?	B) Fraudulent attempt	Tricking for info.
60	'Cloud Storage'?	B) Online storage	Saving files on servers.
61	Function for conditional sum?	B) SUMIF	Adds based on criteria.
62	Absolute Reference?	B) A1	Locks the cell reference.
63	Pivot Table?	B) Summarize data	Reorganizes large datasets.
64	Hide a column?	B) Right-click > Hide	Removes from view.
65	Conditional Formatting?	B) Format by value	Automatic styling by rules.
66	Data Validation?	B) Restricting entry	Controls what users type.
67	Freeze Panes?	B) Keep visible	Locks rows/cols while scrolling.
68	What is a 'Macro'?	B) Recorded actions	Automates repetitive tasks.
69	Trend chart?	B) Line Chart	Shows changes over time.
70	Parts of a whole chart?	B) Pie Chart	Shows proportions.

No.	Question	Correct Answer	Explanation
71	Slide Show view?	B) Full screen	Audience view.
72	Add a picture?	B) Insert tab	For adding external items.
73	Rehearse Timings?	B) Practice duration	Tracks time per slide.
74	Background music?	A) Yes	Can play across slides.
75	SmartArt?	B) Visual diagrams	Represents info visually.
76	WordArt?	B) Decorative text	Artistic text effects.
77	Animation order?	B) Animation Pane	Reorders and times effects.
78	Presenter View?	B) Speaker view	Shows notes and next slide.
79	PPT as Video?	A) Yes	Export as MP4/WMV.
80	Slide Size?	B) Dimensions	Aspect ratio (16:9, etc.).
81	Web 'Cookie'?	B) Small data file	Remembers preferences.
82	Private mode?	B) No history	Doesn't save browsing data.
83	Web 'Cache'?	B) Temp storage	For fast loading.
84	'Bookmarking'?	B) Saving address	Quick access to favorites.
85	'Bandwidth'?	B) Transfer capacity	Amount of data over time.
86	'Wi-Fi'?	B) Wireless tech	Cable-free networking.
87	'Firewall'?	B) Security system	Blocks unauthorized access.
88	'Malware'?	B) Malicious software	Viruses, etc.
89	Social Media?	B) Networking platforms	Sharing and connecting.
90	E-commerce?	A) Online trading	Buying/selling online.

No.	Question	Correct Answer	Explanation
91	‘VoIP’?	A) Voice over IP	Calls over internet.
92	‘Blog’?	B) Online journal	Sharing thoughts online.
93	‘Wiki’?	B) Collaborative site	Users edit content.
94	‘Streaming’?	B) Play while download	Real-time media.
95	‘Modem’?	B) Connection device	Connects to internet.
96	‘Router’?	B) Forwarding device	Directs network traffic.
97	‘Domain Name’?	B) Website name	Human-readable address.
98	URL Extension?	B) TLD	.com, .org, etc.
99	‘Netiquette’?	B) Internet manners	Polite communication.
100	Digital Signature?	B) Validation technique	Authenticity check.
