

BT405 Current Spring 2022 Final-Term

Questions

BT405 Current Questions Spring 2022

-  Role of Nanotechnology in Agriculture
-  How nanotechnology will fill our cracks
-  Nanocoating
-  Carbon nanotechnology
-  Write two properties of Nanosomes?
-  Define nanoPCR?
-  characterization of DNA-Au assemblies?
-  How form DNA nanostructure?
-  Mechanism of Adjuvants MF59?
-  Limitations of fluorophores?
-  Define Nanopore?
-  what are Biosensor
-  Types of Aptamers.
-  Write key features applications of microfluidics?
-  DNA assembly
-  Photolithography
-  Define Nanopores
-  What is Nanosomes

- 🌸 How Adjuvant improve the immune system of vaccine
- 🌸 Subfield of Nanotechnology
- 🌸 Explain the process of Dendrimers
- 🌸 What are the ways of Aptamers
- 🌸 Nano fertilizer Application
- 🌸 What are the types of FRET
- 🌸 How Nanotechnology helpful for scientists
- 🌸 What are Bioreceptors
- 🌸 Advantages of Transformation by Nanotechnology(5)
- 🌸 Procedure Production Of Aptamers(5)
- 🌸 Detail Note on Microarrays(5)
- 🌸 What is Biomimetics(2)
- 🌸 What are micro nutrients (2)
- 🌸 What are Dendimers(2)
- 🌸 Advanteges of Lithotherapy(3)
- 🌸 On which principal lithiotherapy is based(2)
- 🌸 Three role of Biotechnology (3)
- 🌸 Why Quantum Dots are attractive alternate to traditional method of dies? (2)

Regards 🌸 TABIH FATIMA 🌸
