Q.1 Which of the following is one of the purposes of using DDL commands?

A. creating and destroying databases

B. updating records into databases

C. inserting records into databases

D. manipulating databases

Q.2 Which of the following describe the Degree of a relationships in E-R Data Model?

A. Number of participating entity types

B. Number of participating relations

C. Number of participating constraints

D. Number of participating attribute types

Q.3 If A→ B and CB → D, then AC → D. 1. The above rule follows _____ inference rule.

A. Augmentation

B. Decomposition

C. Pseudo transitivity

D. Additivity

Q.4 In _____ join, only selected rows of a relation are made cross product with second relation.

A. Semi

B. Outer

C. Theta

D. Normal

Q.5 SQL stand for?

A. Standard query list

B. Structure query language

C. Standard query language

D. Structure query list

Q.6 The maximum PL/SQL size of data type "VARCHAR2" in DBMS is _____ bytes.

A. 28767

B. 42767

C. 32767

D. 52767

Q.7 _____ states that in a relation no attribute of a primary key (PK) can have a null value.

A. Null Constraint

B. Domain Constraint

C. Referential Integrity Constraint

D. Entity Integrity Constraint

Q.8 Indexes are built on _____to improve query performance.

A. Tables

B. Relationships

C. Columns

D. Records

Q.9 In the relational model, the number of attributes and number of tuples in a relation are termed as _____and _____respectively.

A. cardinality, degree

B. degree, cardinality

C. domain, degree

D. cardinality, domain

Q.10 In Relational Data Model, the _____ of a relation is the number of rows in that relation.

A. Domain

B. Constraint

C. Degree

D. Cardinality
