CS 408 Final Term M. Umar Farooq

Important Questions

Q#1. It has been observed that most computers users use menue options for input instead of keyboard Accelerators? Reason.

Answer.

①- Menue options are easier to find.

②- You dont have to memorize the keys for menue options.

2- Define Active intervention?

Answer. Active intervention with participants understands of whatever is being tested.

3- What is Ubiquitos Computing?

Answer. It is a concept in Software engineering where computing is made to appear anytime and everywhere.

4- Which display device is very cheap and has fast enough response time for rapid animation with high color compatability?
Answer.

The CRT is a cheap display device and has fast enough response time for rapid animation coupled with a high color capability.

5 By breakdown Skelton plane into its components elements then how all pieces fit together to create this as whole user experience?
Answer.

Beneath that surface is the Skelton of the site the placement of buttons, tabs, photos and blocks of text. Skelton is designed to optimize the arrangement of these elements for maximum effect and efficiency.

6- Meta data in term of data processing?

Answer. Meta data is definational data that provides information about other data managed within an Application or environment.

7- As a system Analyst when it is useful to observe in contrast to observation process?

Answer.
Being an system Analyst Early in design, helps designers understand user needs. other type of observation are done later to examine whether the developing prototype meets users needs.

8- Five usability Goals of internet explo

Answer. ① Effectiveness.
② Efficieng.
③ Safety.
④ Utility.
⑤ learnability.

9- Semi-Structured interview.	Focus Group interview.
(i)- Combine feature of structured and unstructured interviews and use both closed and open ended Questions-	① Used in marketing political compaigning and social Science research-
(ii)- Use of determined Questions.	② Normally there are 10 people are involved.
(iii)- Require some level of training.	(iii) They are low cost.

10- Visual Art	① Visual design-
(i)- Visual Art is art such as paintings photographs, sculptures.	Visual design is way a piece of Artwork, a room, video game etc.
(ii)- Visual Art seperates those kind of Art from music, dance and drama.	Photoshop design for each page type, module within an app/site/software.
(iii) There is no designing for purpose	③ Creates or contributes to style guides.

11- Which theory claimed problem solving is both productive and reproductive what are controled vocabularies?

Answer.

Gestalt theory were answering the claims made by behaviorist that problem solving is matter of reproducing known responces or trial and error.

Controled vocabularies is provide a way to organize knowledge for subsequent retrieval.

They are used in subject indexing, schemas etc

12- How Active intervention perzomed?

Answer. Useful in early in design, excellent technique to use with prototypes because it provides a wealth of diagonistic information.

To do a usefull active intervation, you have to define your goals and plans the Questions.

13- Problem with Excise task?

Answer.

The problem with them is that the effort we expend in doing them dosent go directly towards our goals

14- Attentive environment?

Answer. Attentive environments are environments that are user and context aware.

15. Why Direct observation is not possible?

Answer. Sometimes direct observation is not possible because it is obtrusive or evaluators cannot be present over the duration of study, and so users activities are traked ~~identities~~ indirectly

16- Four disadvantages of low-fidelity prototyping?

Answer. ① Limited error checking

② Poor detailed specification to code to.

③ Facilitator-driven.

17- Evaluation. Usability.

(1) Focus on users and their tasks.

(2) Observe, measure and analyze their performance with the system.

Efficiency.
Accuracy.
Recall.
Emotional response

18 Type of Navigation? Answer.

(1) Navigation between multiple windows or screens.

(2) Navigation between panes within a window.

(3) Navigation between tools or menus in the

19- What are Ancillary Application windows?

Answer. Ancillary Application windows are windows that are not really part of the Application functionality but are provided as a matter of convention.

20 List three characteristics that must be present in good website ?

Answer.

① Good Keywords
② Simple design
③ Easy Navigation.

21- Wearable Computing ?

Answer. Wearable computing is the study of inventing, designing building or using the miniature body-borne computational and sensory devices.

22 Error Messages improvement techniques ?

Answer. ① Error prevention.
② Recogonization rather than recall.
③ Flexability and ficiency of use.
④ Help users recogonize, diagonise and recover from errors.

23- Soverign posture?

Answer. Programs that are best used full screen, monopolizing the users attention for long periods of time.

24 First step for primary persona?

Answer. Primary persona represent the primary target for the design of an interface. There can be only one primary persona per interface.

25 Blind undo or explanatory undo?

Answer. The user knows that triggering the idiom undoes the last operation but there is no indication of what that operation is. This is called blind undo. if the idiom include a textual

or visual description ~~then~~ of the particular operation that will be undone it is explantory undo.

26 Trunk test ?

Answer If you want to apply trunk test on web Navigation then it will be comprises.

1. what site is this ?
2. What page i am on ?
3. Major sections of site ?
4. What are my options at this level ?
5. Where i am in the scheme of things.
6. How can i search ?

27. Advantages of low fidelity ?

Answer. 1. Detect and solve major problems in early stage.
2. Easier to build and cost less.
3. Easy to carry and demonstrate.

28 Sensing Ability in technology ?

Answer. Sensors science and engineering is relevant to all

aspects of life including safety, security, monitoring and awareness in general.

29- Describe some formulas for color harmony ?

Answer. There are many theories of harmony.

① Analogous Colors.
Are any three colors.
Yellow-Green, Yellow orange.

② Complementry Colors.
Are any two colors which are opposite each other such as red and green and red-purple and yellow-green.

③ Natural Harmony.
Nature provides a perfect departure point for color harmony. Red Green Yellow creates a harmonious design.

④ ~~Color~~ Color Context.
How color behaves in relation to

other colors and shape is a complex area of color theory.

30- **List three Evaluation paradigm?**
Answer.
① Quick and dirty evaluations.
② Usability testing.
③ Field studies.

31- **Ali Needs to be able to telephone his contacts? What he needs now? Function Element.**
Answer. Function elements are
(i)- Voice Activation.
(ii)- Quick dial buttons.
(iii)- Selecting from list of contacts.
(iv) Selecting the name for email header.
(v) Auto-assignment of a call button.

32. **Steps in defining requirements in persona based design?**
Answer ① Creating problem and vision statement
② Brainstorming
③ identifying persona expectations.
④ Constructing the context scenario.
⑤ identifying Needs
