

ENG509

Midterm important questions 2024

VU360

Here are some important questions from ENG509 Virtual University Midterm 2024:

Lecture 1-5:

1. What is the definition of software engineering and its importance?
2. How do you explain the concept of software development life cycle (SDLC) and its phases?
3. What are the different types of software development methodologies (Agile, Waterfall, etc.) and their characteristics?
4. How do you explain the concept of software requirements engineering and its importance?
5. What is the concept of software design and its importance?

Lecture 6-10:

6. How do you explain the concept of software implementation and its importance?
7. What are the different types of software testing techniques (black box, white box, etc.) and their uses?
8. How do you explain the concept of software maintenance and its importance?
9. What is the concept of software project management and its importance?
10. How do you explain the concept of software quality assurance and its importance?

Lecture 11-15:

11. How do you explain the concept of software architecture and its importance?
12. What are the different types of software design patterns (creational, structural, etc.) and their uses?
13. How do you explain the concept of software development tools (IDEs, version control, etc.) and their uses?
14. What is the concept of software testing levels (unit testing, integration testing, etc.) and their importance?
15. How do you explain the concept of software deployment and its importance?

Lecture 16-20:

16. How do you explain the concept of software security and its importance?
17. What are the different types of software threats (malware, viruses, etc.) and their mitigation techniques?
18. How do you explain the concept of software scalability and its importance?
19. What is the concept of software reliability and its importance?
20. How do you explain the concept of software performance optimization and its importance?

Lecture 21-22:

21. How do you explain the concept of advanced software engineering topics (artificial intelligence, machine learning, etc.)?
22. What is the concept of software engineering innovation and its importance in modern times?
