- Edu401 final term 2022 by dazzling pg10
- EDU401 finalterm solved 2018 pg12

UMAR- Edu401- Final Term.

Q#1- Define positive peace?

Answer. Presence of conditions of well beings and just relationships, social, economic, political ecological.

2- Relationship between Quality education and environment education?

Answer.

① Quality education enables people to develop all of their attributes and skills to achieve their potential as human beings and members of society.

Quality education also provides the foundation for equity in society.

② Environment education is a process that allows individuals to explore environmental issues, engage in problem solving and take Action to improve environment.

3- Demand Side pressures?

Answer. In many countries education is viewed as an important way to gain social and economic advancement. Therefore the demand for education is high if governments cannot afford to provide and fund Quality education, then parent seeks private suppliers. This type of demand is "excess demand".

4- Systematic Research and population studies?

Answer. Systematic research investigations that might survey e.g. the relevant literature concerning the nature of learner.

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education.

5- Form of privatization?

Answer. Three common forms are:-

- ① Private provision
- ② Private funding
- ③ Private Regulation

6- Privatization policies?

Answer. Main policies are:-

- ① educational vouchers -
- ② Public School Liberalization.
- ③ Private contracting
- ④ Tuition credits and deductions.
- ⑤ Subsidies - And Assistance grants.
- ⑥ Home - schooling -
- ⑦ Private payments -

7- What is Madrasa education?

Answer. Madrasa originated from Arabic word "Darasa" which means "To study". Madrasa in general referred to school that imparts knowledge. But in context of South Asia Madrasa is often used for Islamic educational institutions along with "Darul- Aloom" and "Jamia".

The main subjects of Madrasa include.

- (i) - Quran.
- (ii) Hadith.
- (iii) - Fiqh -

8- Discuss demands of Madaris reforms?

Answer. Since 1999 the issue of Madaris reforms has been negotiated between the government and the administration of Wafaq or boards. It is not clear what development has been made so far. Madaris are major societal institutions. They have ardent followers so they can play vital roles for reforms of society.

9- What is privatization?

Answer. Privatization is also thought of as "liberalization" where agents are freed from government regulation.

10- Non Formal learning?

Answer. Learning that is not provided by an education or training institution and typically does not lead to certification.

11- Characteristics of informal learning?

Answer.

- ① Practice based informal learning is Holistic/organic.
- ② is Contextual
- ③ is activity and experience based
- ④ Arises in situations where learning is not main aim
- ⑤ is Activated by individual learners rather than ~~the~~ by teachers.
- ⑥ Workplace learning is often Collegial.

12- Term used for Attitude?

Answer. ① Empathy.

② Reconciliation.

③ Solidarity.

④ Social Responsibility.

⑤ Sense of Justice and equality.

What

13- Role play environment friendly schools for climate change?

Answer. Child friendly environment in schools and to ensure children's rights to learn in their own mother tongue. Children mother tongue should be employed as the medium of instruction.

14- Why population education is necessary?

Answer. Educational institutions in all countries should be encouraged to expand their curricula to include a study of population dynamics and policies including where appropriate life style. The solution of these problems basically upon social changes that will lead to greater equity and social justice.

15- Three sources from which internal efficiency comes?
Answer.

- ① Greater Competition.
- ② Superior ownership and managerial structures within the enterprises.
- ③ Enhanced accountability.

16- Why privatization happening?

Answer. There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Dominant pressures are -

- (i) - Demand - side pressure.
- (ii) - Supply side pressure.
- (iii) - General pressure.

17- Madrasa reform 2006?

Answer. In 2006 when the curricula were revised the government focused on revising the old curricula of the country to build reform,

18- When is conflict positive?

Answer. When we are able to resolve internal and interpersonal conflicts, using win-win problem solving every relationship will have some conflicts at some time or other.

19 Purpose of peace education?

Answer. Purpose of peace education are the elimination of social injustice the rejection of violence and the abolition of war.

20 Which elements are involved in philosophy of peace education?

Answer. ① Non-violence.

② Love as the basis of transformation.

③ Reverence for the environment and for life.

21. What is direct violence and positive peace?

Answer. Direct violence are war, torture, and child or women abuse.

positive peace is presence of conditions of well beings and just relationships social economic, political and ecological

22 How many level of literacy? Write their name?

Answer. There are three levels of literacy.

- (i) - Baseline literacy.
- (ii) - Functional literacy.
- (iii) - Multiple literacy.

23 How you use literacy as social practice?

Answer.

Literacy practice are used by us in our daily lives.

When we buy car, do the shopping visit the doctor, or pay a bill in this we engaged in social practice.

24 Write Note on Assimilation Model or Pluralistic Model;
Answer.

Assimilation Model Starting in the mother tongue, and continuing to national language immersion.

Pluralistic Model recognize the importance of language spoken at home, thus first language teaching is not restricted only to the early grades.

25- What is social cohesion?
Answer.

School should promote the social good, this is the main reason why they are publicly funded.

26 Write Note on Livigstone?

Answer. informal education or training occurs when teachers or mentors take responsibility for instructing others without sustained reference to an

intentionally-organized body of knowledge.

27. Productive efficiency?

Answer. This criterion refers to maximization of educational ~~refers~~ results for any given resource constraint.

28. Ways to evaluate privatization?

Answer.

① Freedom to choose.

This can give right to families to choose schools for their children that are premised on their values. First and clearly a priority.

29. Literacy rate of Pakistan?

Answer.

Literacy rate of Pak is 65%.
Male at 69%.
Females at 40%.

30- Demand pressure ?

Answer. Therefore the demand for education is high, and if governments cannot afford to provide and fund quality education, then parent seeks private suppliers -

31- Supply side pressure ?

Answer. The second factor that motivates privatization is the decline in the quality of and in some cases the reduction in funds available to.

32- Transend Approach ?

Answer. In trans-disciplinary stage, based on the preceding three or not, the problem that determines the choice of intellectual tools and they will usually have to come from tool chests of

several disciplines.

Such is the transcend approach all parties to a conflict have equal rights to be understood but not the same right to be accepted and supported.

33- Billets (2001). views on informal learning.

Answer. There is no such thing as informal learning.

(1) Sees learning as ubiquitous activity. Most learning take place outside formal educational settings.

34- Financing in privatization?

Answer (i) How much does the private school invest in education annually.

(2) How much schools cost to children from household in low middle and high income groups.

(3) How much profits they earn.

35- Erant on Learning?
Answer.

Learning take place mainly outside formal learning contexts.

Erant defination of non-formal learning is based on an investigation into learning in the workplace.

36- Colley and Hodikson

Formal -
Teacher as
authority.

Educational
Premises

Teacher
Control.

Informal,
No teacher
involved.

Non-educational
Premises.

Learner
Control.

37 Type of Learning?
Answer.

① Formal

② Informal

③ Non formal.

38- Type of prejudice?

Answer.

- ① Sexism -
- ② Classism -
- ③ Religious intolerance -
- ④ Edu for tolerancend respect.

39- Level of Aggregation?

Answer.

Society had been assumed to be nation or even the world. The Micro level -

in this level they must place more emphasis upon individual and family situations.

When Attention is focused on the learner it is Macro level -

40- Beckett views?

Answer. informal learning is not only more common but also more effective than formal learning -

1. Immersion model and national language model.

Immersion Model: Initial instruction is given in the national language with oral discussion and instruction permitted in the local language

National Language Model: Sole instruction in the national language, with no teaching in the mother tongue

2. Population Studies ?

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved. Facts, theories and concepts from a broad spectrum of academic disciplines and professional fields are needed to help individuals and societies fully understand population interactions and thus the effect of population factors on the quality of their individual and collective lives. The sum of this knowledge is referred to as population studies.

3. Freedom of choice for parents.

Two possible concerns arise as a result of greater freedom of choice for parents. The most important is the possibility that some choices are socially, culturally, or politically unacceptable. For example, a family may choose to educate its children in a manner intolerant to others in society, or it may choose an education that is segregated from other groups (e.g. by race, religion or income).

The other concern is that, even for those who value freedom of choice, the costs of deciding which school to go to --- or to change to --- may be high.

4. What role environment friendly schools play for climate change?

Discuss.

With a view to promoting a child friendly environment in schools and to ensure children's rights to learn in their own mother tongue, children's mother tongue should be employed as the medium of instruction.

5. characteristics of Beckett and Hager informal learning.

Characteristics to informal learning:

- Practice-based informal learning is organic / holistic.
- Practice-based informal learning is contextual
- Practice-based informal learning is activity- and experience-based
- Practice-based informal learning arises in situations where learning is not the main aim
- Practice-based informal workplace learning is activated by individual learners rather than by teachers / trainers
- Practice-based informal workplace learning is often collaborative / collegial

6. Privatization' define

'Privatization' is also thought of as a 'liberalization' --- where agents are freed from government regulations, or as 'marketization' --- where new markets are created as alternatives to government services or state allocation systems.

7. Innovation and renovation.

Innovation

The act of innovating; the introduction of something new, in customs, rites, etc.

renovation

The act or process of renovating; the state of being renovated or renewed.

8. Food is issue for education population.

While developing nations wrestle with agrarian reforms, the industrialized nations either produce enough food or have enough capital to purchase large quantities of foodstuff.

Although population growth is not the sole reason for the world's food problem, it is estimated that this growth accounts for about 70% of the medium-term increase in the total demand for food in developing countries.

9. Health care issues in population studies??

Next issue that we will discuss is health. Different family backgrounds, different cultures, financial situation all this helps in determining what kind of health facilities your family is able to provide to you. Without proper health care a child will not be able to make it through even the primary years of education.

If you have good health you are able to do a lot. Of course good health comes from lots of factors like:

food, nutrition, exercise, relaxation all of these contribute in good health.

Inequality and social conditions give rise to unequal and unjust health outcomes for different social units. We may have health facilities but more detailed facilities like medicine, injections, x-rays are not available. Government health care facilities do not guarantee proper health treatment. Private health care facilities are frightfully expensive. Again you are not able to afford that you will not be able to do well for your children and the children will not be able to do in education.

Poor nutrition includes poor protein intake children performed less in the achievement test. Protein is what human muscles are made of. Students who get more protein perform well in the achievement tests. **Iron** is an important part of the hemoglobin of the blood, less iron includes less energy and hence not able to get good education.

Along with malnutrition the problem is of **obesity**. Obesity comes in the families are privileged, where food is rich, they get fat/ obese. Children with obesity also get teased in schools, resultant in low self-esteem. When children get bullied like this they miss at the schools.

Physical environment is also important. You need to get exercise in the parks. Who can go there, of course people from good families?

Mental tasks such as concentration, memory recall can be compromised if you do not have good quality air in the room, poor ventilation, humidity can also affect your learning. Poor ventilation can cause a decline in the performance of the teacher as well as of the schools. Many

schools do not have even windows in the classrooms; such environment is not conducive for learning to happen.

10. human right?

There are implications of population composition ---- socio-economic, religious, and cultural/ethnic groupings ---- for the attainment of human rights and social justice.

The status of women and girls is a subject of particular concern today within the general area of social justice.

In the “World Population Plan of Action”, women’s rights are recognized in the following manner:

“Women have the right to complete integration in the development process particularly by means of an equal access to education and equal participation in social, economic, cultural, and political life.”

From a population standpoint, what is at stake in a number of nations is the right to women to make informed and conscious decisions of life-cycle events, but this freedom may not easily be obtained in societies where marked inequalities of opportunity exist between men and women.

11. Climate change effect on children?

On any given day, more than a billion children are in primary or secondary school.

However, many fail to complete their education, deterred by poor school quality and persistent challenges caused by deepening poverty, gender inequities, location, disabilities, chronic environmental degradation and climate related hazards.

Recent scientific findings indicate that a changing climate has a significant impact on our planet. In 2007, the Intergovernmental Panel on Climate Change (IPCC) issued its Fourth Assessment Report, so far the most convincing assessment on the science and implications of climate change.

This report concluded that only immediate and sustained action will stop climate change from causing irreversible and potentially catastrophic damage to our environment.

The IPCC noted that climate change will manifest itself in various ways, including:

- a. Rising temperatures, droughts and desertification
- b. Heavy precipitation, flooding and rising sea levels
- c. Extreme weather events such as cyclones, floods and droughts

12. Challenges in environmental education?

The main constraints faced by the teachers in integrating environmental education were time constraints and being overloaded with school work. These two main problems were also

recorded in previous studies (Shaari, 2009) , revealing that these were old and continuous challenges faced by teachers.

13. *integration.*

Some scholars consider that population education programs ---- and particularly school programs ---- are an integral part of other “educations”, such as developmental education or environmental education.

They argue that the goals and objectives of population education should reflect these “broader frame works” and might be appropriately and meaningfully integrated into them.

Before passing on to the question of integration, it seems necessary to indicate briefly the goals of both population education and other educational programs which are in some way related to population education.

14. *home schooling.*

5. Home – Schooling

Some families believe that neither existing public nor private schools can deliver an appropriate or desirable education for their children. These families may opt out of the education system entirely and school their children at home.

This is the ultimate form of education privatization: privately funded, privately provided, and monitored only very lightly by government agencies.

In the United States, home-schooling is a legitimate way of meeting the compulsory schooling laws, and over 800,000 students (1.7 per cent of all school-age children) are estimated to spend at least two years as home-schoolers.

15. Challenges Implementing Mother Tongue as Medium of Instruction ?

Challenges

Practical only in homogenous communities.

No teacher recruitment and training modalities have been developed yet.

As a result of external production, the Textbook Boards have not been able to prepare even basic elementary readers in any of the mother tongues

Current political unrest makes it difficult to implement changes in local contexts

16. *decision making*

Few individuals make population-related decisions outside a group context and in many cases, the

decision-making unit is the group itself, such a large family unit in Pakistan or a street committee in the local villages.

Less obvious but equally significant is the impact which the group has upon decisions made by individuals and within families. Clarifying these influences is part of the process of creating informed decision-makers. In all cases, the aim is to increase understanding of the inter-relationships between macro and micro units of the society .

However, the range of options that are theoretically open to individuals and groups may, in reality, be quite limited due to lack of equity and social justice and to the presence of cultural norms, traditions and taboos.

17. types of learning

- Formal
- Informal
- Non-formal

18. social cohesion

4. Social Cohesion

Schools should promote the social good; this is the main reason why they are publicly funded. What constitutes the 'social good' will vary from one society to another.

19. formal informal non formal learning

Non-Formal Learning:

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

Informal Learning: learning resulting from daily life activities related to work, family or leisure. It is not structured (in terms of learning objectives, learning time or learning support) and typically does not lead to certification.

20. eraut informal definition

Informal Learning: learning resulting from daily life activities related to work, family or leisure. It is not structured (in terms of learning objectives, learning time or learning support) and typically does not lead to certification.

21. private payment

6. Private Payments

More common, however, is the partial step towards such home-sourced privatization through payments by families for supplementary schooling. In some countries, it is also referred as 'home- tuitions'.

Many households directly contribute a large share of their household income to education through private tutoring or exam preparation. These payments are used to augment the schooling provided by the government.

22.write a note on the voucher.

Educational Vouchers

Vouchers are educational coupons that entitle each student to a prescribed amount of schooling.

A voucher system is very different. Each student is allocated an annual amount of funding that could be used to enroll in any eligible school.

The schools obtain revenues based on the number of students who enroll: if not enough students enroll in a particular school, that school has to cut its costs or close.

Education under a voucher system still involves government funding, but it need not involve government provision of schools.

By giving parents the power of being able to freely use the voucher, private choices are significantly expanded.

Vouchers need not cover all the costs of schooling, but may simply serve as an incremental inducement to enrolment.

In Guatemala, scholarships are targeted at female students, whose enrolment rates are typically low.

23. Relationship btw quality education and environment education.

QUALITY	ENVIRONMENTAL
---------	---------------

Quality education enables people to develop all of their attributes and skills to achieve their potential as human beings and members of society.	Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment.
Quality education provides the foundation for equity in society	Knowledge and understanding of the environment and environmental challenges.

24.ideological and culture in population education.

The nature and scope of educational programs are influenced by political and ideological orientations, and population education is not an exception to this rule. It is influenced by the views held in a particular society concerning the nature and significance of population matters in social, economic and political development and by the character and function of educational systems as such.

Ideological theories and culture provide a framework for setting goals and filters for selecting content.

People acquire population-related knowledge throughout their lives ---- a process of absorption which is generally part of a larger process of socialization.

Family, kin, peers and community play a dominant role in acquisition of a folk demography ---- the knowledge, attitude, values norms, systems of belief that people come to hold about population related matters, such as family and marital relationships, social customs, and status and role of women and children and the choice of residence.

Sometimes this learning is clearly perceived as having population repercussions; most often, however, it is, part of the conventional wisdom of the group or culture.

One of the goals of population education is to assist learners to identify, examine and understand their folk demography and implications it has for population decisions. In this way, the folk demography of learners becomes a significant content area of population education.

Identification of cultural differences and sensitivities is an important part of program planning and development for its raises issues about the relevance of the curricula, the adaptation of content and method to meet specific needs and the administration of decentralized programs.

25. Why privatization happening? Write dominants of pressure of privatization?

There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Following are the dominant pressures for Privatization:

1. Demand – Side Pressures
2. Supply-side Pressures
3. General Pressures

26. population education details.

The word population has at different times meant different things to different people. In the sixteenth century in England it was used as synonym for devastation, for laying waste.

Today most people associate the word population with growth though the depopulation of rural areas- both in industrialized and developing nations- its not an unusual phenomenon. Despite the popular association of population with fertility. It is also concerned with movement of people within and between nations and with morality.

This module, however, its not about population as such but about an educational process ---- Population Education ---- designed to help people understand the nature ---- and particularly the causes and consequences ---- of population events.

It is directed at people ---- as individuals or as members of groups, as decision-makers or potential decision-makers within their families, as citizens within a community, as leaders within a society and as policy makers within a nation.

All people are population actors, making population related decisions throughout their lives. The sum of their decisions shapes the nature of population forces (fertility, mortality, migration) which operate within a society and which then affect other social, political and economic forces.

In turn, the population, social, political and economic decisions made by the larger mass of people (the society or nation) influence the behavior of the individual, the families and the small communities in which they belong.

Population education in essence, is an educational response to contemporary economic, social and political issues.

27. Billet view of informal learning?

Billet (2001): There is no such thing as informal learning. All learning takes place within social organizations or communities that have formalized structures. Informal Learning is organic or holistic, engaging the whole person, so that intellect, emotions, values and practical activities are blended.

28. Privatization Policies in Education ?

The main policies and programs include:

1. Educational Vouchers
2. Public School Liberalization
3. Private Contracting
4. Tuition Credits and Deductions
5. Subsidies and Assistance Grants
6. Home – Schooling
7. Private Payments
8. Competition among Schools and Education Agencies

29. Demand – Side Pressures ?

- The first factor that can be cited to explain privatization in education is simple: many parents want it. In many countries, education is viewed as an important way to gain social and economic advancement.
- Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parents seek private suppliers. This type of demand is 'excess demand', over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is 'differentiated demand' and it may encourage privatization across all three sectors.
- Both excess and differentiated demand have increased in recent decades. Excess demand has grown because education has become more important for social and economic betterment: to get high-paying jobs, for example, workers must have a high level of skills and credentials that are only available from universities.

30. Differentiated demand has grown for two reasons.

- One is that many public schools offer education that is standardized or uniform. The greater the uniformity in the public schools, the larger the number of parents who will seek differentiated demand.
- The other reason is that economies and societies have become much more specialized. Many more trades and occupations have developed, and the education system must cater to these.

Q4. General pressure?

There are general pressures to privatize education systems.

- One such factor is global economic and social change. Globalization, linked with market liberalization, has both pressured and encouraged governments to seek more efficient, more flexible, and more expansive education systems.
- Privatization may be one response to these changes.

- Another factor that explains some of the growth in privatization is the encouragement of world aid agencies, such as the World Bank. Within the last decade, for example, the World Bank has given assistance to countries like El Salvador, Indonesia, Mali, the Dominican Republic etc.

Q5. Level and grades of madrassa?

The Madrassa Education system is organized in terms of the following levels and grades:

- “**ibtidaya**” - first to the fifth grades of primary education
- “**mutawasitah**” - sixth to eighth grades of middle school
- “**thanviyah-e-ammah**” - ninth and tenth grades
- “**thanviyah-e-kassah**” - 11th and 12th grades
- “**aliya**” - the university Bachelor’s degree (consisting of the 13th and 14th years)
- “**alimiyah**” - the Master’s degree (being the 15th and 16th years)
- “**takmeel**” - advanced post-graduate education

Q6: What is Madrassa Education?

The term ‘Madrassa’ originates from the Arabic word ‘Darasa’ which means ‘**To Study**’. Madrassa, in general, is referred to the school that imparts Knowledge. But in the context of Pakistan or even in Contemporary South Asia the term ‘**Madrassa**’ is often used for Islamic educational institutions along with ‘Dar-ul-aloom’ and ‘Jamia’.

The main subjects of Madrassa **Education include:**

1. Qur’an
2. Hadith
3. Fiqh

Q6. Contemporary concern of population education?

It is directed at people ---- as individuals or as members of groups, as decision-makers or potential decision-makers within their families, as citizens within a community, as leaders within a society and as policy makers within a nation. All people are population actors, making population related decisions throughout their lives. The sum of their decisions shapes the nature of population forces (fertility, mortality, migration) which operate within a society and which then affect other social, political and economic forces. In turn, the population, social, political and economic decisions made by the larger mass of people (the society or nation) influence the behavior of the individual, the families and the small communities in which they belong. Population education in essence, is an educational response to contemporary economic, social and political issues.

Q7. Liberalization?

‘Privatization’ is also thought of as a ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems.

Q8. Two assumptions of Peace education?

1. Conflict is ubiquitous
2. There are ways to transform it.

Q9. What is peace education?

Peace education is the pedagogical efforts to create a world at peace.

By peace, we mean more than the absence of violence (negative peace). Peace in its most positive aspects embraces ideas of justice, global sustainability and the eradication of structures that promote insecurity:

poverty, hunger, malnutrition, and lack of access to resources.

Q10. Eraut Non-formal learning?

Defines the dimensions of non-formal learning:

- The timing of stimulus (past, current, future)
- The extent to which such learning is tacit (tacit, reactive or deliberative)
- To the extent to which learning is either individual or social
- To the extent to which learning is either implicit or explicit
- Eraut's definition of non-formal learning is based on an investigation into learning in the workplace.

Q11: EU definition about Non formal learning ?

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured
(in terms of learning objectives, learning time or learning support)

Q12. Livingstone?

Formal, Informal & Non-Formal Learning of Adults:

Formal education occurs when a teacher has the authority to determine that people designated as requiring knowledge effectively learn a curriculum taken from a pre-established body of knowledge whether in the form of agegraded and bureaucratic modern school systems or elders initiating youths into traditional bodies of knowledge.

Non-formal or further education occurs when learners opt to acquire further knowledge or skill by studying voluntarily with a teacher who assists their self-determined interests, by using an organized curriculum, as is the case in many adult education courses and workshops.

Q13. Eraut's five features of formal learning?

- ✦ A prescribed learning framework
- ✦ An organized learning event or package
- ✦ The presence of a designated teacher or trainer
- ✦ The award of a qualification or credit
- ✦ The external specification of outcomes

Q14. Concept of Private Contracting?

Schools provide a range of services under the title 'education'. These include instruction, but they also provide food, sports facilities and welfare counseling. Many of these ancillary services could be provided by private firms under contract rather than by government agencies. If private contractors are more efficient at delivery, then governments may seek to encourage more contracting of educational services. Given this large number of services that schools provide that are not directly educational, numerous companies have emerged as contractors to the schools for textbooks, food, transport and cleaning services. In the United

States in the 1990s, a new niche opened up in the form of Educational Management Organizations (EMOs). These companies supply management services to schools (i.e. student assessment, budgeting and administration). Private contracting may therefore allow a school district to concentrate on education without also having to operate a cafeteria or transport service.

Q15: Define Positive peace ?

Presence of conditions of well-beings and just relationships: social, economic, political, ecological.

Q16. Problems in literacy?

Gender Differences:

- There is the great difference in the rates of enrollment of boys, as compared to girls in Pakistan.
- According to UNESCO figures, primary school enrolment for girls stands at 60% as compared to 84% for boys.
- The secondary school enrolment rate stands at a lower rate of 32% for females and 46% males.
- On July 09, 2012 the Senate passed a law on 'The Right to Free and Compulsory Education'.
- All over the world poverty is the main cause of low literacy rate.
- Now for the literacy rate compared to Sri Lanka and India that stand at a literacy rates of 91.2% and 61% respectively, Pakistan is lumbering at a mere 57.8%.
- Only less than 2% invested in the Education sector.
- Pakistan has also remained one of those few countries where education falls under the federal government

Q17: Implementation of environment education.

Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment. As a result, individuals develop a deeper understanding of environmental issues and have the skills to make informed and responsible decisions.

Q18: Demand side pressures.

In many countries, education is viewed as an important way to gain social and economic advancement. Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parents seek private suppliers. This type of demand is 'excess demand', over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is 'differentiated demand' and it may encourage privatization across all three sectors.

Q20: Systematic research

Systematic research – investigations that might survey, for example the relevant literature concerning the nature of the learner and his learning context.

Q21. Beckett and Hager informal learning?

Informal learning is not only more common, but also more effective than formal learning.

Q23: Terms use for attitude.

Following are the terms related with the attitude

- ✚ Empathy
- ✚ Reconciliation
- ✚ Solidarity
- ✚ Social responsibility
- ✚ Sense of justice and equality
- ✚ Joy in living
- ✚ In attitudes these things are of importance.

Q25. Three levels of Literacy?

There are three levels of literacy:

Baseline literacy

The bare minimum to be considered literate is baseline literacy. The ability to read very simple and ability to write very simple, is included in it. Further includes, the ability to do simple Quantitative (arithmetic) analysis. It may also include basic computer skills.

Functional literacy

The functional literacy means that you become functional within the society. In other words, a person is not dependent on reading the letter or writing something. It is an advanced level.

Multiple literacy

Further advanced level of literacy is multiple literacy. When one can become able to distinguish between different words of similar meanings. As there is a very minute difference in the synonyms of the words, if a person can distinguish those words then it is multiple literacy.

Q26: Why is Population Education necessary?

Programs of population education can contribute to solve either the population or the educational problems faced by individuals and nations. The solutions of these problems depend basically upon social changes that will lead to greater equity and social justice, greater independence and selfdetermination.

Q27: What are 3 sources from which internal efficiency comes?

Internal efficiency is expected to come from three sources:

1. Greater competition
2. Superior ownership and managerial structures within the enterprises
3. Enhanced accountability / incentive systems

Q29: Madarasa reform 2006

In **2006** when the curricula were revised, the government focused on revising the old curricula of the country to build reforms

Q30: Forms of privatization?

The three most common privatization forms include:

1. Private Provision
2. Private Funding

3. Private Regulation

Q31. Environmental education?

Most simply, environmental education is education in, about, and for the environment.

Environmental education is an “approach, a philosophy, a tool, and a profession,” built on the following

three goals:

1. To foster clear awareness of, and concern about, economic, social, political, and ecological interdependence in urban and rural areas.
2. To provide every person with opportunities to acquire the knowledge, values, attitudes, commitment, and skills needed to protect and improve the environment.
3. To create new patterns of behavior of individuals, groups and society as a whole toward the environment.

Q32: Discuss demands of Madaris reforms.

Since **1999**, the issue of madaaris reforms has been negotiated between the government and the administrations of wafaqs or boards. It is not clear what development has been made so far. Madaaris are major societal institutions. They have ardent followers, and thus they can play vital roles for reforms of society, but they do not pay much attention to the society besides influencing religion. It remains to be seen how madaaris can play a positive role for promoting peace and harmony in the society.

Q33: What is Privatization?

‘Privatization’ is also thought of as ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems.

Q35. What is peace education?

Peace education is the pedagogical efforts to create a world at peace. By peace, we mean more than the absence of violence (negative peace). Peace in its most positive aspects embraces ideas of justice, global sustainability and the eradication of structures that promote insecurity:

poverty, hunger, malnutrition, and lack of access to resources.

Q36. Private Regulation ?

- ✦ Education services can be monitored by those who receive the services directly, i.e. the students and their families.
- ✦ They will make sure that the education is of satisfactory standard --- either by refusing to enroll at poor quality schools or by demanding better services.
- ✦ Privatization can include giving parents more choice over what goes on in schools, or what types of school are available, even where all these choices are within the public sector.

Q37. Features of Formal and Informal Learning: Colley, Hodgkinson and

Malcom

FORMAL LEARNING	INFORMAL LEARNING
Teacher as authority	No teacher involved
Educational premises	Non-educational premises
Teacher control	Learner control
Planned and structured	Organic and evolving
Summative assessment;	No assessment
Externally determined	Internally determined
Interests of powerful and dominant groups	Interests of oppressed groups
Open to all groups, according to published criteria	Preserves inequity and sponsorship
Propositional knowledge	Practical and process knowledge
High status	Low status
Education	No education
Measured outcomes	Outcomes not precise; immeasurable
Learning mediated through agents of authority	Learning mediated through learner democracy
Fixed and limited time frame	Open-minded engagement
Learning is the main explicit purpose	Learning is either of secondary significance or implicit

Q38. What is Article 37B?

1973 the constitution says that state shall remove illiteracy and provide free and compulsory secondary education Article 37B. There are two things in this article. Remove illiteracy but how to remove illiteracy? Second point is compulsory and free secondary education, so it is even better than the conventions that we have studied. Secondary education means up to level 10 or matric

Q39. Goals in Conflict styles ?

Different styles have different goals

Competing: the goal is to win

Accommodating: the goal is to yield

Avoiding: the goal is to delay

Collaborating: the goal is multiple participation

Compromising: the goal is to find a middle ground.

Q40. Racism ?

It belief that different races possess distinct characteristics, abilities, or qualities, especially so as to distinguish them as inferior or superior to one another.

Q41. History of madrasa?

- The Madrassa Education has been prevalent since the time of Prophet Muhammad PBUH in the Muslim world. The examination of the status of madrassa in Islamic history testifies to its success due to strong sense of respect among the Muslims for 'Knowledge'.
- In the initial days of Islam, the aim of religious seminaries or Madaaris was preservation and spread of knowledge.
- Meanwhile it has been highlighted time and again that there is a need to reform the madaaris to transform the radical ideologies with real Islamic moderate values, and provide an applied-education mode where madaaris students become useful members of the society.

Q42. EU's Definition Formal Learning ?

Learning typically provided by an education or training institution, structured (in terms of objectives, learning time or learning support) and leading to certification. Formal learning is intentional from the learners' perspective

Q43. EU's Definition of Non-Formal Learning ?

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

Q44. EU's Definition of Informal Learning ?

Informal Learning: learning resulting from daily life activities related to work, family or leisure. It is not structured (in terms of learning objectives, learning time or learning support) and typically does not lead to certification.

Q46. Learning Types ?

- Formal

- Informal
- Non-formal

It is difficult to make a clear distinction between formal and informal learning as there is often a crossover between the two (McGivney 1999).

Q47. What are the methods to be used in population education ?

The emphasis on relevance, decision-making and future orientation raises questions concerning the methods to be used in population education activities: are certain methods particularly suited to population education? Intuitively, it might be suggested that methods which emphasize learner participation and practice of various skills would achieve the results desired by the population educator.

Q48. Literacy and Lifelong Learning?

- Implementation arrangement
- Delivery mechanism
- Mother tongue medium literacy programs should be emphasized.
- Implementation matrix
- Introduce and expand mother tongue literacy courses in local languages

Q49. How our changing climate affects children?

On any given day, more than a billion children are in primary or secondary school. However, many fail to complete their education, deterred by poor school quality and persistent challenges caused by deepening poverty, gender inequities, location, disabilities, chronic environmental degradation and climate related hazards.

The IPCC noted that climate change will manifest itself in various ways, including:

- Rising temperatures, droughts and desertification
- Heavy precipitation, flooding and rising sea levels
- Extreme weather events such as cyclones, floods and droughts

Q50. International Conventions for Free and Quality Education?

Provision of free and quality education has been declared as fundamental rights. They want all children to get basic elementary, secondary education.

Q51. Some Components of a peace education curriculum Peace Education ?

- Emotions and feelings
- Anger and anger management
- Violence in media
- Communication
- Empathy
- Cooperation
- Self esteem
- Tolerance
- Conflict resolution
- Keeping safe
- Emotions and feelings

- How emotions affect behavior
- The effect of violence on the emotions and feelings of children

Q52. Implementing Privatization Programs?

Overall, there are many opportunities to privatize the provision, funding and accountability of educational services. Indeed, international reviews of the demand-side and supply-side policies show that many countries have implemented some form of privatization.

Q53. Strategies for developing accessible curricula?

1. Providing a flexible timeframe for students studying particular subjects.
2. Giving greater freedom to teachers in choosing their working methods.
3. Allotting time for additional assistance for classroom based work
4. Emphasizing aspects of pre-vocational training

Q54. Slow ?

Remember, it takes time to settle a conflict. Go slow at first because conflict resolvers usually encounter some rough roads in the beginning. keep using your I-way map to reach safer roads.

Q55. Handling of conflict ?

Peace studies explore handling of conflict by peaceful means. Conflict can be resolved through argumentation but how do we resolve a conflict peacefully is what we study in peace studies. Only then the peace can prevail.

Q56. Population studies?

Population studies is broadly defined as the scientific study of human populations. Major areas studied include broad population dynamics; fertility and family dynamics; health, aging, and mortality; and human capital and labor markets.

Q58. In your own words importance of EE in environmental friendly schools?

EE encourages students to research, investigate how and why things happen, and make their own decisions about complex environmental issues. By developing and enhancing critical and creative thinking skills, EE helps foster a new generation of informed consumers, workers, as well as policy or decision makers.

Q59. Give attitude values of peace education?

Attitudes / Values

self-respect
 respect for others
 gender equality
 respect for life
 compassion
 global concern
 ecological concern
 cooperation
 openness and tolerance
 justice

1social responsibility

Positive vision

Q60. Approaches of peace education?

Peace education tries to inoculate students against the evil effects of violence by teaching skills to manage conflicts nonviolently

Q61. Challenges of mother tongue?

The main issue in teaching mother tongue-based education in terms of reading is the lack of instructional materials. There are limited reading materials for students to develop their reading skills. The challenge is that students have difficulty in understanding some words they are not familiar with.

Informal education

or training occurs when teachers or mentors take responsibility for instructing others without sustained reference to an intentionally-organized body of knowledge in more incidental and spontaneous learning situations, such as guiding them in acquiring job skills or in community development activities.

- Informal learning is any activity involving the pursuit of understanding knowledge or skill which occurs without the presence of externally imposed curricular criteria ...in any context outside the pre- established curricula of educative institutions

Why is Privatization Happening

There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education. It is worth noting that some advocates of privatization are motivated by an ideological commitment to individual rights over government intervention. These advocates believe that a family's right to choose its own education is paramount.

Why is Privatization Happening

Following are the dominant pressures for Privatization:

1. Demand – Side Pressures

The first factor that can be cited to explain privatization in education is simple: many parents want it. In many countries, education is viewed as an important way to gain social and economic advancement.

Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parents seek private suppliers.

This type of demand is 'excess demand', over and above what is provided by the government.

Why is Privatization Happening 2. Supply-side Pressures

The second factor that motivates privatization is the decline in the quality of, and in some cases the reductions in funds available to, the public sector.

Many parents may feel that the local public school is inefficient in providing education of the type that is most needed; this dissatisfaction is reported by parents in very basic terms (such as the inability of the school to guarantee their children's safety).

In some cases enrolments have expanded much faster than funding, resulting in overcrowding, large classes, and double or triple shifts for delivery of instruction. Part of the perceived decline in quality may be a consequence of a fall in per-student funding.

Higher education often has a high cost per unit, governments expect students to bear an increasing financial burden for their higher education.

Why is Privatization Happening 3. General Pressures

In addition to these push-and-pull pressures discussed previously, there are general pressures to privatize education systems. One such factor is global economic and social change.

Globalization, linked with market liberalization, has both pressured and encouraged governments to seek more efficient, more flexible, and more expansive education systems. Privatization may be one response to these changes.

Diversity Private Education Pakistan

Diversity of private education in Pakistan is a characteristic feature and has tremendous implications for policy research but this aspect remains largely under explored in the literature. As a result, private sector as the provider of education has generally been treated as a homogenous category, though to a lesser degree than the public education sector. Ordinarily, differentiation is made between low- and high-fee schools, Urdu- and Englishmedium schools with different syllabi and between boys, girls and mixed schools. However, in reality the private educational institutions can be classified along a much broader range of categories.

Financing private Education in Pakistan

The size of private sector engaged in delivery of education services and its rapid growth in terms of number of institutions, teachers and enrolment draw attention to some fundamental questions pertaining to financing of private education in Pakistan.

Financing Private Education Pakistan

The data available to answer these and similar questions related to financing of private education is insufficient and whatever is available is too much scattered.

The deficiency of data is evident from the fact that the most comprehensive set of financing statistics are available only in the Census of Private Educational Institutions 1999-2000. Since then, considerable changes might have occurred in trends and patterns of investment, receipts and expenditure of private educational institutions but it is difficult to analyze those changes because National Education Census 2005 and NEMIS haven't collected this information.

Formal and Non-Formal Learning:

- uses the concept of non-formal learning, (no informal)
- learning takes place mainly outside formal learning contexts

- **Presents five features of formal learning**

- a prescribed learning framework
- an organized learning event or package
- the presence of a designated teacher or trainer

➤ the award of a qualification or credit

➤ the external specification of outcomes

Defines the dimensions of non-formal learning:

➤ the timing of stimulus (past, current, future)

➤ the extent to which such learning is tacit (tacit, reactive or deliberative)

➤ to the extent to which learning is either individual or social

➤ to the extent to which learning is either implicit or explicit

Eraut’s definition of non-formal learning is based on an investigation into learning in the workplace.

Define Positive peace.

Presence of conditions of well-beings and just relationships: social, economic, political, ecological

Q: Relationship btw quality education and environment education.

ANS:

Quality	Environment
Quality education enables people to develop all of their attributes and skills to achieve their potential as human beings and members of society.	Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment.
Quality education provides the foundation for equity in society.	Knowledge and understanding of the environment and environmental challenges

Implementation of environment education.

Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment. As a result, individuals develop a deeper understanding of environmental issues and have the skills to make informed and responsible decisions

Demand side pressures.

In many countries, education is viewed as an important way to gain social and economic advancement. Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parent seeks private suppliers. This type of demand is ‘excess demand’, over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is ‘differentiated demand’ and it may encourage privatization across all three sectors.

Systematic research and population studies.

Systematic research – investigations that might survey, for example the relevant literature concerning the nature of the learner and his learning context.

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

Q: Forms of privatization.

ANS: The three most common privatization forms include:

1. Private Provision
2. Private Funding
3. Private Regulation

Q: Privatization Policies in Education.

ANS: The main policies and programs include:

1. Educational Vouchers
2. Public School Liberalization
3. Private Contracting
4. Tuition Credits and Deductions
5. Subsidies and Assistance Grants
6. Home – Schooling
7. Private Payments
8. Competition among Schools and Education Agencies

What is Madrasa Education---5

The term ‘Madrasa’ originates from the Arabic word ‘Darasa’ which means ‘To Study’.

Madrasa, in general, is referred to a school that imparts Knowledge. But in the context of Pakistan or even in the contemporary South Asia the term ‘Madrasa’ is often used for Islamic educational institutions along with ‘Dar-ul-aloom’ and ‘Jamia’. The main subjects of Madrasa Education include:

1. Qur’an
2. Hadith
3. Fiqh

Q: Discuss demands of Madaris reforms.

ANS: Since 1999, the issue of madaris reforms has been negotiated between the government and the administrations of wafaqs or boards. It is not clear what development has been made so far. Madaris are major societal institutions. They have ardent followers, and thus they can play vital roles for reforms of society, but they do not pay much attention to the society besides influencing religion. It remains to be seen how madaris can play a positive role for promoting peace and harmony in the society.

What is Privatization---2

‘Privatization’ is also thought of as ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems.

Q: EU definition about Non formal learning.

ANS: Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

Characteristics of informal learning described by Beckett and Hager---5 Ø Characteristics to informal learning:

- Practice-based informal learning is organic / holistic.
- Practice-based informal learning is contextual
- Practice-based informal learning is activity and experience-based
- Practice-based informal learning arises in situations where learning is not the main aim
- Practice-based informal workplace learning is activated by individual learners rather than by teachers / trainers
- Practice-based informal workplace learning is often collaborative / collegial

○

Q: Terms use for attitude.

ANS: Following are the terms related with the attitude

- Empathy
- Reconciliation
- Solidarity
- Social responsibility
- Sense of justice and equality
- Joy in living

In attitudes these things are of importance.

Q: Why population education is necessary?

ANS: The “World Population Plan of Action” urged the need of population education in the following way: “Educational institutions in all countries should be encouraged to expand their curricula to include a study of population dynamics and policies including, where appropriate, family life, responsible parenthood and relation of population dynamics to socio- economic development and to international relations” Programs of population education can contribute to solve either the population or the educational problems faced by individuals and nations. The solutions of these problems depend basically upon social changes that will lead to greater equity and social justice, greater independence and self-determination.

Q: What are 3 sources from which internal efficiency comes?

ANS: Internal efficiency is expected to come from three sources:

- (a) Greater competition
- (b) Superior ownership and managerial structures within the enterprises
- (c) Enhanced accountability / incentive systems

Q: Why privatization happening? Write dominants of pressure of privatization.

ANS: There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Following are the dominant pressures for Privatization:

1. Demand – Side Pressures
2. Supply-side Pressures
3. General Pressures

Q: Madarasa reform 2006

ANS: In 2006 when the curricula were revised, the government focused on revising the old curricula of the country to build reforms.

What is Environmental Education----5

Most simply, environmental education is education in, about, and for the environment. Environmental education is an “approach, a philosophy, a tool, and a profession,” built on the following three goals:

1. to foster clear awareness of, and concern about, economic, social, political, and ecological interdependence in urban and rural areas.
2. To provide every person with opportunities to acquire the knowledge, values, attitudes, commitment, and skills needed to protect and improve the environment.
3. To create new patterns of behavior of individuals, groups and society as a whole toward the environment.

Changing climate affects children

On any given day, more than a billion children are in primary or secondary school.

However, many fail to complete their education, deterred by poor school quality and persistent challenges caused by deepening poverty, gender inequities, location, disabilities, chronic environmental degradation and climate related hazards.

Recent scientific findings indicate that a changing climate has a significant impact on our planet. In 2007, the Intergovernmental Panel on Climate Change (IPCC) issued its Fourth Assessment Report, so far the most convincing assessment on the science and implications of climate change. This report concluded that only immediate and sustained action will stop climate change from causing irreversible and potentially catastrophic damage to our environment. The IPCC noted that climate change will manifest itself in various ways, including:

- a. Rising temperatures, droughts and desertification

- b. Heavy precipitation, flooding and rising sea levels

- c. Extreme weather events such as cyclones, floods and droughts

Implementing EE 1

To respond to the needs of children most at-risk and marginalized by climate change, quality education aims to make all girls and boys more resilient to the impacts of climate change. Quality education is a key component of adaptive capacity, the knowledge and skills needed to adapt lives and livelihoods to the ecological, social and economic realities of a changing environment.

The Environment-friendly schools approach is most effective when it starts before school, continues throughout the child’s life cycle and leads to lifelong learning in adulthood.

EE in Environment-Friendly Schools

Many environment-friendly schools around the world have incorporated EE into their design, operation and curriculum. The most common strategies are:

Incorporating EE into the curriculum, with adaptations for the local context. Lessons on key climate change topics such as global warming, the greenhouse effect and weather-related disasters are not enough.

Productive Efficiency

This criterion refers to the maximization of educational results for any given resource constraint. It is important that any activity be conducted efficiently, because the resources used for it could be used for other activities

Edu401 Final Term Solved 2021+old paper's

Informal education

or training occurs when teachers or mentors take responsibility for instructing others without sustained reference to an intentionally-organized body of knowledge in more incidental and spontaneous learning situations, such as guiding them in acquiring job skills or in community development activities.

- Informal learning is any activity involving the pursuit of understanding knowledge or skill which occurs without the presence of externally imposed curricular criteria ...in any context outside the pre- established curricula of educative institutions

3. To create new patterns of behavior of individuals, groups and society as a whole toward the environment.

Changing climate affects children

On any given day, more than a billion children are in primary or secondary school. However, many fail to complete their education, deterred by poor school quality and persistent challenges caused by deepening poverty, gender inequities, location, disabilities, chronic environmental degradation and climate related hazards.

Recent scientific findings indicate that a changing climate has a significant impact on our planet. In 2007, the Intergovernmental Panel on Climate Change (IPCC) issued its Fourth Assessment Report, so far the most convincing assessment on the science and implications of climate change. This report concluded that only immediate and sustained action will stop climate change from causing irreversible and potentially catastrophic damage to our environment.

The IPCC noted that climate change will manifest itself in various ways, including:

- a. Rising temperatures, droughts and desertification
- b. Heavy precipitation, flooding and rising sea levels

SAHIL

c. Extreme weather events such as cyclones, floods and droughts

Implementing EE 1

To respond to the needs of children most at-risk and marginalized by climate change, quality education aims to make all girls and boys more resilient to the impacts of climate change.

Quality education is a key component of adaptive capacity, the knowledge and skills needed to adapt lives and livelihoods to the ecological, social and economic realities of a changing environment.

The Environment-friendly schools approach is most effective when it starts before school, continues throughout the child's life cycle and leads to lifelong learning in adulthood.

EE in Environment-Friendly Schools

Many environment-friendly schools around the world have incorporated EE into their design, operation and curriculum.

The most common strategies are:

Incorporating EE into the curriculum, with adaptations for the local context. Lessons on key climate change topics such as global warming, the greenhouse effect and weather-related disasters are not enough.

Productive Efficiency

This criterion refers to the maximization of educational results for any given resource constraint.

It is important that any activity be conducted efficiently, because the resources used for it could be used for other activities

Q1. Billet view of informal learning?

Billet (2001): There is no such thing as informal learning. All learning takes place within social organizations or communities that have formalized structures. Informal Learning is organic or holistic, engaging the whole person, so that intellect, emotions, values and practical activities are blended.

Q2. Privatization Policies in Education ?

The main policies and programs include:

1. Educational Vouchers
2. Public School Liberalization
3. Private Contracting
4. Tuition Credits and Deductions
5. Subsidies and Assistance Grants
6. Home – Schooling
7. Private Payments
8. Competition among Schools and Education Agencies

Q3. Demand – Side Pressures ?

- The first factor that can be cited to explain privatization in education is simple: many parents want it. In many countries, education is viewed as an important way to gain social and economic advancement.
- Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parents seek private suppliers. This type of demand is ‘excess demand’, over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is

‘differentiated demand’ and it may encourage privatization across all three sectors.

- Both excess and differentiated demand have increased in recent decades. Excess demand has grown because education has become more important for social and economic betterment: to get high-paying jobs, for example, workers must have a high level of skills and credentials that are only available from universities.

Differentiated demand has grown for two reasons.

- One is that many public schools offer education that is standardized or uniform. The greater the uniformity in the public schools, the larger the number of parents who will seek differentiated demand.
- The other reason is that economies and societies have become much more specialized. Many more trades and occupations have developed, and the education system must cater to these.

Q4. General pressure?

There are general pressures to privatize education systems.

- One such factor is global economic and social change. Globalization, linked with market liberalization, has both pressured and encouraged governments to seek more efficient, more flexible, and more expansive education systems. Privatization may be one response to these changes.
- Another factor that explains some of the growth in privatization is the encouragement of world aid agencies, such as the World Bank. Within the last decade, for example, the World Bank has given assistance to countries like El Salvador, Indonesia, Mali, the Dominican Republic etc.

Q5. Level and grades of madrassa?

The Madrassa Education system is organized in terms of the following levels and grades:

- **“ibtidaya”** - first to the fifth grades of primary education
- **“mutawasitah”** - sixth to eighth grades of middle school
- **“thanviyah-e-ammah”** - ninth and tenth grades
- **“thanviyah-e-kassah”** - 11th and 12th grades
- **“aliya”** - the university Bachelor’s degree (consisting of the 13th and 14th years)
- **“alimiyah”** - the Master’s degree (being the 15th and 16th years)
- **“takmeel”** - advanced post-graduate education

Q6: What is Madrassa Education?

The term ‘Madrassa’ originates from the Arabic word ‘Darasa’ which means ‘**To Study**’. Madrassa, in general, is referred to the school that imparts Knowledge. But in the context of Pakistan or even in Contemporary South Asia the term ‘**Madrassa**’ is often used for Islamic educational institutions along with ‘Dar-ul-aloom’ and ‘Jamia’. The main subjects of Madrassa

Education include:

1. Qur’an
2. Hadith
3. Fiqh

Q6. Contemporary concern of population education?

It is directed at people ---- as individuals or as members of groups, as decision-makers or potential decision-makers within their families, as citizens within a community, as leaders within a society and as policy makers within a nation. All people are population actors, making population related decisions throughout their lives. The sum of their decisions shapes the nature of population forces (fertility, mortality, migration) which operate within a society and which then affect other social, political and economic forces. In turn, the population, social, political and economic decisions made

by the larger mass of people (the society or nation) influence the behavior of the individual, the families and the small communities in which they belong. Population education in essence, is an educational response to contemporary economic, social and political issues.

Q7. Liberalization?

‘Privatization’ is also thought of as a ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems.

Q8. Two assumptions of Peace education?

1. Conflict is ubiquitous
2. There are ways to transform it.

Q9. What is peace education?

Peace education is the pedagogical efforts to create a world at peace. By peace, we mean more than the absence of violence (negative peace). Peace in its most positive aspects embraces ideas of justice, global sustainability and the eradication of structures that promote insecurity: poverty, hunger, malnutrition, and lack of access to resources.

Q10. Eraut Non-formal learning?

Defines the dimensions of non-formal learning:

- The timing of stimulus (past, current, future)
- The extent to which such learning is tacit (tacit, reactive or deliberative)
- To the extent to which learning is either individual or social
- To the extent to which learning is either implicit or explicit
- Eraut’s definition of non-formal learning is based on an investigation into learning in the workplace.

Q11: EU definition about Non formal learning ?

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support)

Q12. Livingstone?

Formal, Informal & Non-Formal Learning of Adults:

Formal education occurs when a teacher has the authority to determine that people designated as requiring knowledge effectively learn a curriculum taken from a pre-established body of knowledge whether in the form of age-graded and bureaucratic modern school systems or elders initiating youths into traditional bodies of knowledge.

Non-formal or further education occurs when learners opt to acquire further knowledge or skill by studying voluntarily with a teacher who assists their self-determined interests, by using an organized curriculum, as is the case in many adult education courses and workshops.

Q13. Eraut's five features of formal learning?

- A prescribed learning framework
- An organized learning event or package
- The presence of a designated teacher or trainer
- The award of a qualification or credit
- The external specification of outcomes

Q14. Concept of Private Contracting?

Schools provide a range of services under the title 'education'. These include instruction, but they also provide food, sports facilities and welfare counseling. Many of these ancillary services could be provided by private firms under contract rather than by government agencies. If private contractors are more efficient at delivery, then governments may seek to encourage more contracting of educational services. Given this large number

of services that schools provide that are not directly educational, numerous companies have emerged as contractors to the schools for textbooks, food, transport and cleaning services. In the United States in the 1990s, a new niche opened up in the form of Educational Management Organizations (EMOs). These companies supply management services to schools (i.e. student assessment, budgeting and administration). Private contracting may therefore allow a school district to concentrate on education without also having to operate a cafeteria or transport service.

Q15: Define Positive peace ?

Presence of conditions of well-beings and just relationships: social, economic, political, ecological.

Q16. Problems in literacy?

Gender Differences:

- There is the great difference in the rates of enrollment of boys, as compared to girls in Pakistan.
- According to UNESCO figures, primary school enrolment for girls stands at 60% as compared to 84% for boys.
- The secondary school enrolment rate stands at a lower rate of 32% for females and 46% males.
- On July 09, 2012 the Senate passed a law on ‘The Right to Free and Compulsory Education’.
- All over the world poverty is the main cause of low literacy rate.
- Now for the literacy rate compared to Sri Lanka and India that stand at a literacy rates of 91.2% and 61% respectively, Pakistan is lumbering at a mere 57.8%.
- Only less than 2% invested in the Education sector.

- Pakistan has also remained one of those few countries where education falls under the federal government

Q17: Implementation of environment education.

Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment. As a result, individuals develop a deeper understanding of environmental issues and have the skills to make informed and responsible decisions.

Q18: Demand side pressures.

In many countries, education is viewed as an important way to gain social and economic advancement. Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parents seek private suppliers. This type of demand is ‘excess demand’, over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is ‘differentiated demand’ and it may encourage privatization across all three sectors.

Q19. Population Studies ?

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved. Facts, theories and concepts from a broad spectrum of academic disciplines and professional fields are needed to help individuals and societies fully understand population interactions and thus the effect of population factors on the quality of their individual and collective lives. The sum of this knowledge is referred to as population studies.

Q20: Systematic research

Systematic research – investigations that might survey, for example the relevant literature concerning the nature of the learner and his learning context.

Q21. Beckett and Hager informal learning?

Informal learning is not only more common, but also more effective than formal learning.

Q22: Characteristics of informal learning described by Beckett and Hager.

Characteristics to informal learning:

- ❖ Practice-based informal learning is organic / holistic.
- ❖ Practice-based informal learning is contextual
- ❖ Practice-based informal learning is activity and experience-based
- ❖ Practice-based informal learning arises in situations where learning is not the main aim
- ❖ Practice-based informal workplace learning is activated by individual learners rather than by teachers / trainers
- ❖ Practice-based informal workplace learning is often collaborative / collegial

Q23: Terms use for attitude.

Following are the terms related with the attitude

- ❖ Empathy
- ❖ Reconciliation
- ❖ Solidarity
- ❖ Social responsibility
- ❖ Sense of justice and equality
- ❖ Joy in living
- ❖ In attitudes these things are of importance.

Q24: What role environment friendly schools play for climate change?

Discuss.

With a view to promoting a child friendly environment in schools and to ensure children's rights to learn in their own mother tongue, children's mother tongue should be employed as the medium of instruction.

Q25. Three levels of Literacy?

There are three levels of literacy:

Baseline literacy

The bare minimum to be considered literate is baseline literacy. The ability to read very simple and ability to write very simple, is included in it. Further includes, the ability to do simple Quantitative (arithmetic) analysis. It may also include basic computer skills.

Functional literacy

The functional literacy means that you become functional within the society. In other words, a person is not dependent on reading the letter or writing something. It is an advanced level.

Multiple literacy

Further advanced level of literacy is multiple literacy. When one can become able to distinguish between different words of similar meanings. As there is a very minute difference in the synonyms of the words, if a person can distinguish those words then it is multiple literacy.

Q26: Why is Population Education necessary?

Programs of population education can contribute to solve either the population or the educational problems faced by individuals and nations. The solutions of these problems depend basically upon social changes that will lead to greater equity and social justice, greater independence and self-determination.

Q27: What are 3 sources from which internal efficiency comes?

Internal efficiency is expected to come from three sources:

1. Greater competition
2. Superior ownership and managerial structures within the enterprises
3. Enhanced accountability / incentive systems

Q28: Why privatization happening? Write dominants of pressure of privatization?

There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Following are the dominant pressures for Privatization:

1. Demand – Side Pressures
2. Supply-side Pressures
3. General Pressures

Q29: Madarasa reform 2006

In **2006** when the curricula were revised, the government focused on revising the old curricula of the country to build reforms

Q30: Forms of privatization?

The three most common privatization forms include:

1. Private Provision
2. Private Funding
3. Private Regulation

Q31. Environmental education?

Most simply, environmental education is education in, about, and for the environment. Environmental education is an “approach, a philosophy, a tool, and a profession,” built on the following

three goals:

1. To foster clear awareness of, and concern about, economic, social, political, and ecological interdependence in urban and rural areas.

2. To provide every person with opportunities to acquire the knowledge, values, attitudes, commitment, and skills needed to protect and improve the environment.
3. To create new patterns of behavior of individuals, groups and society as a whole toward the environment.

Q32: Discuss demands of Madaris reforms.

Since 1999, the issue of madaaris reforms has been negotiated between the government and the administrations of wafaqs or boards. It is not clear what development has been made so far. Madaaris are major societal institutions. They have ardent followers, and thus they can play vital roles for reforms of society, but they do not pay much attention to the society besides influencing religion. It remains to be seen how madaaris can play a positive role for promoting peace and harmony in the society.

Q33: What is Privatization?

‘Privatization’ is also thought of as ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems.

Q34: Relationship btw quality education and environment education.

QUALITY	ENVIRONMENTAL
---------	---------------

Quality education enables people to develop all of their attributes and skills to achieve their potential as human beings and members of society.	Environmental education is a process that allows individuals to explore environmental issues, engage in problem solving, and take action to improve the environment.
Quality education provides the foundation for equity in society	Knowledge and understanding of the environment and environmental challenges.

Q35. What is peace education?

Peace education is the pedagogical efforts to create a world at peace. By peace, we mean more than the absence of violence (negative peace).

Peace in its most positive aspects embraces ideas of justice, global sustainability and the eradication of structures that promote insecurity: poverty, hunger, malnutrition, and lack of access to resources.

Q36. Private Regulation ?

- Education services can be monitored by those who receive the services directly, i.e. the students and their families.
- They will make sure that the education is of satisfactory standard --- either by refusing to enroll at poor quality schools or by demanding better services.

- Privatization can include giving parents more choice over what goes on in schools, or what types of school are available, even where all these choices are within the public sector.

Q37. Features of Formal and Informal Learning: Colley, Hodkinson and Malcom

FORMAL LEARNING	INFORMAL LEARNING
Teacher as authority	No teacher involved
Educational premises	Non-educational premises
Teacher control	Learner control
Planned and structured	Organic and evolving
Summative assessment;	No assessment
Externally determined	Internally determined
Interests of powerful and dominant groups	Interests of oppressed groups
Open to all groups, according to published criteria	Preserves inequity and sponsorship
Propositional knowledge	Practical and process knowledge
High status	Low status

Education	No education
Measured outcomes	Outcomes not precise; immeasurable
Learning mediated through agents of authority	Learning mediated through learner democracy
Fixed and limited time frame	Open-minded engagement
Learning is the main explicit purpose	Learning is either of secondary significance or implicit

Q38. What is Article 37B?

1973 the constitution says that state shall remove illiteracy and provide free and compulsory secondary education Article 37B. There are two things in this article. Remove illiteracy but how to remove illiteracy? Second point is compulsory and free secondary education, so it is even better than the conventions that we have studied. Secondary education means up to level 10 or matric

Q39. Goals in Conflict styles ?

Different styles have different goals

- ✓ **Competing:** the goal is to win
- ✓ **Accommodating:** the goal is to yield
- ✓ **Avoiding:** the goal is to delay
- ✓ **Collaborating:** the goal is multiple participation
- ✓ **Compromising:** the goal is to find a middle ground.

Q40. Racism ?

It belief that different races possess distinct characteristics, abilities, or qualities, especially so as to distinguish them as inferior or superior to one another.

Q41. History of madrasa?

- The Madrassa Education has been prevalent since the time of Prophet Muhammad PBUH in the Muslim world. The examination of the status of madrasa in Islamic history testifies to its success due to strong sense of respect among the Muslims for ‘Knowledge’.
- In the initial days of Islam, the aim of religious seminaries or Madaaris was preservation and spread of knowledge.
- Meanwhile it has been highlighted time and again that there is a need to reform the madaaris to transform the radical ideologies with real Islamic moderate values, and provide an applied-education mode where madaaris students become useful members of the society.

Q42. EU's Definition Formal Learning ?

Learning typically provided by an education or training institution, structured (in terms of objectives, learning time or learning support) and leading to certification. Formal learning is intentional from the learners' perspective

Q43. EU's Definition of Non-Formal Learning ?

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

Q44. EU's Definition of Informal Learning ?

Informal Learning: learning resulting from daily life activities related to work, family or leisure. It is not structured (in terms of learning objectives, learning time or learning support) and typically does not lead to certification.

Q45. Challenges Implementing Mother Tongue as Medium of Instruction ?

Challenges

- ✓ Practical only in homogenous communities.
- ✓ No teacher recruitment and training modalities have been developed yet.
- ✓ As a result of external production, the Textbook Boards have not been able to prepare even
- ✓ basic elementary readers in any of the mother tongues
- ✓ Current political unrest makes it difficult to implement changes in local contexts

Q46. Learning Types ?

- Formal
- Informal
- Non-formal

It is difficult to make a clear distinction between formal and informal learning as there is often a crossover between the two (McGivney 1999).

Q47. What are the methods to be used in population education ?

The emphasis on relevance, decision-making and future orientation raises questions concerning the methods to be used in population education activities: are certain methods particularly suited to population education? Intuitively, it might be suggested that methods which emphasize learner participation and practice of various skills would achieve the results desired by the population educator.

Q48. Literacy and Lifelong Learning?

- Implementation arrangement
- Delivery mechanism
- Mother tongue medium literacy programs should be emphasized.
- Implementation matrix
- Introduce and expand mother tongue literacy courses in local languages

Q49. How our changing climate affects children?

On any given day, more than a billion children are in primary or secondary school. However, many fail to complete their education, deterred by poor school quality and persistent challenges caused by deepening poverty, gender inequities, location, disabilities, chronic environmental degradation and climate related hazards.

The IPCC noted that climate change will manifest itself in various ways, including:

- Rising temperatures, droughts and desertification
- Heavy precipitation, flooding and rising sea levels
- Extreme weather events such as cyclones, floods and droughts

Q50. International Conventions for Free and Quality Education?

Provision of free and quality education has been declared as fundamental rights. They want all children to get basic elementary, secondary education.

Q51. Some Components of a peace education curriculum Peace Education ?

- Emotions and feelings
- Anger and anger management
- Violence in media
- Communication
- Empathy
- Cooperation
- Self esteem
- Tolerance

- Conflict resolution
- Keeping safe
- Emotions and feelings
- How emotions affect behavior
- The effect of violence on the emotions and feelings of children

Q52. Implementing Privatization Programs?

Overall, there are many opportunities to privatize the provision, funding and accountability of educational services. Indeed, international reviews of the demand-side and supply-side policies show that many countries have implemented some form of privatization.

Q53. Strategies for developing accessible curricula?

1. Providing a flexible timeframe for students studying particular subjects.
2. Giving greater freedom to teachers in choosing their working methods.
3. Allotting time for additional assistance for classroom based work
4. Emphasizing aspects of pre-vocational training

Q54. Slow ?

Remember, it takes time to settle a conflict. Go slow at first because conflict resolvers usually encounter some rough roads in the beginning. keep using your I-way map to reach safer roads.

Q55. Handling of conflict ?

Peace studies explore handling of conflict by peaceful means. Conflict can be resolved through argumentation but how do we resolve a conflict peacefully is what we study in peace studies. Only then the peace can prevail.

Q56. Population studies?

Population studies is broadly defined as the scientific study of human populations. Major areas studied include broad population dynamics;

fertility and family dynamics; health, aging, and mortality; and human capital and labor markets.

Q57. Challenges in environmental education?

The main constraints faced by the teachers in integrating environmental education were time constraints and being overloaded with school work. These two main problems were also recorded in previous studies (Shaari, 2009) , revealing that these were old and continuous challenges faced by teachers.

Q58. In your own words importance of EE in environmental friendly schools?

EE encourages students to research, investigate how and why things happen, and make their own decisions about complex environmental issues. By developing and enhancing critical and creative thinking skills, EE helps foster a new generation of informed consumers, workers, as well as policy or decision makers.

Q59. Give attitude values of peace education?

Attitudes / Values

- ✓ self-respect
- ✓ respect for others
- ✓ gender equality
- ✓ respect for life
- ✓ compassion
- ✓ global concern
- ✓ ecological concern
- ✓ cooperation
- ✓ openness and tolerance
- ✓ justice
- ✓ 1social responsibility

- ✓ Positive vision

Q60. Approaches of peace education?

Peace education tries to inoculate students against the evil effects of violence by teaching skills to manage conflicts nonviolently

Q61. Challenges of mother tongue?

The main issue in teaching mother tongue-based education in terms of reading is the lack of instructional materials. There are limited reading materials for students to develop their reading skills. The challenge is that students have difficulty in understanding some words they are not familiar with.

Current papers compiled by DAZZLING

[7:39 pm, 14/03/2022]: Edu 401

Timing 5 PM

1. Explain the role of gender as an equity issues in education.

Ans:

Next equity issue is based on gender. Gender equity has been an issue in Pakistan and it still is.

The disadvantaged group is females.

Their opportunities for success in education

It means that even if girls come to school, they are not allowed to take subjects / fields that they

will like to get in. For example, physics, teachers and parents do not appreciate girls taking physics

as subject. If girls are provided with proper education then they can be responsible citizens of

Pakistan.

The statistics related to the number of primary schools, teachers, literacy rates, and net enrollment

rates is given as under for better understanding.

Why and how the female students be the disadvantaged group at all level be it schools, colleges,

and universities.

Schools

The number of primary schools for both boys and girls is important. It is required in order to ensure

equality in education. Here is the list of schools in Pakistan. The breakdown is given province

wise.

2. Write about population debate

Population phenomena affect so many aspects of life at so many different levels ---- political

relations, resources, the environment, food and nutrition, health, social services, education,

employment, human rights,---- that nations, regions and individuals have differing viewpoints about population questions. "The consideration of population problems cannot be reduced to the analysis of population trends only. It must also be borne in mind that the present situation of the developing countries originates in the unequal processes of socio economic development which have divided peoples since the beginning of the modern era. This inequity still exists and is intensified by lack of equity in international economic relations with consequent disparity in levels of living. Different population structures and different levels of development combine to make developing and industrialized nations view similar social issues from different angles.

3. What do you know about progress planning

Ans

4. Write a note on equity in evaluating privatization programs

Ans: **Equity**

This criterion refers to a universally accepted goal of schooling: the quest for fairness in access to educational opportunities, resources and outcomes by gender, social class, race, language origins and geographical location of students.

Equity can be assessed in terms of inputs --- do all students receive an appropriate amount of funding and resources from the state, commensurate with their needs? Do students with special needs get appropriate schooling?

5. Explain how technology enabled education in boosting engagement by promoting interests and participating through the enablement and enforcement of interaction between the students?

Ans:

6. Highlights the elements of curricula while looking at the peace education history? some elements of the curricula

- an understanding of war and its causes
- an understanding of violence and its causes knowledge of the military and its structures
- an understanding of some principles of world order, including the united nations system
- an understanding of the role of citizen participation

7. What is Livingstone (2001) view on formal ,Informal and no formal learning of Adults?

Formal, Informal & Non-Formal Learning of Adults:

Formal education occurs when a teacher has the authority to determine that people

designated as
requiring knowledge effectively learn a curriculum taken from a pre-established body of knowledge
whether in the form of age-graded and bureaucratic modern school systems or elders
initiating
youths into traditional bodies of knowledge
Non-formal or further education occurs when learners opt to acquire further knowledge or skill by
studying voluntarily with a teacher who assists their self-determined interests, by using an
organized curriculum, as is the case in many adult education courses and workshops.

8. Explain the persuasion and prescription in relation to population education?

No education system, anywhere in world is free from some degree of persuasion and prescription,
despite the theoretical commitment to truth telling. Training for citizenship and developing the
sense of being part of a nation usually involves elements of conditioning. Furthermore,
no
educational process can be totally value free, because any selection of facts involves
conscious
and unconscious value choices.
Population education faces these general problems and is also potentially confronted with
a more
direct conflict between theory and practice: the degree to which the educational system
can or should
directly support the population policies of the nation.
If the government has determined that the small family shall be the norm, or that
migration must
take place in order to relieve dense population, or that country's population should
increase, what
is the proper and possible role of the educational system?

9. Discuss how to make financing in private education more effective?

The data available to answer these and similar questions related to financing of private
education
is insufficient and whatever is available is too much scattered.
The deficiency of data is evident from the fact that the most comprehensive set of
financing
statistics are available only in the Census of Private Educational Institutions 1999-2000.
Since then, considerable changes might have occurred in trends and patterns of
investment,
receipts and expenditure of private educational institutions but it is difficult to analyze
those
changes because National Education Census 2005 and NEMIS haven't collected this

information.

The Census 1999-2000 showed that annual investment by the private sector was Rs. 2.5 billion whereas the recurrent expenditure amounted to about Rs.12 billion in the year preceding the Census.

10. What are the student adjustment Mitigation strategies?

Many environment-friendly schools around the world have incorporated EE into their design, operation and curriculum.

The most common strategies are:

Incorporating EE into the curriculum, with adaptations for the local context. Lessons on key climate

change topics such as global warming, the greenhouse effect and weather-related disasters are not enough.

At-risk communities must develop local adaptation policies and practices, addressing disaster risk

reduction, emergency preparedness and locally relevant sustainable development options.

A nationally significant, child-focused, participatory approach works best. In South Africa, for example, stakeholders including the National Environmental Education Program and the weather service designed curricular material for climate change.

The tools included resource guides, training workshops, a competition among schools and a national media campaign

Strategies to raise awareness: Media campaigns, messaging through youth radio programs, theatre and music, conferences, environment day celebrations, and other events and programs within and outside of school can complement formal curricula and significantly strengthen learning.

These strategies require collaboration with non-governmental organizations and the private sector.

In Albania, for example, the Child-Led Environmental Education Initiative created a partnership with

local companies that introduced schools to recycling, curricular reform, teacher training and a communitywide media campaign.

As a result, nearly half of the children in selected schools adopted at least one environmentallyfriendly behavior at home.

11. Write about the articles 37 B of the constitution of Pakistan 1973 about?

1973 the constitution says ***that state shall remove illiteracy and provide free and compulsory secondary education Article 37B***

12. Explain migratory population trends?

Migratory population shifts ---- which are seldom anticipated or planned for ---- place an extra burden both on the area receiving inhabitants and on the area from which the migrants have come.

In the typical situation, rural areas in developing countries lose their better education youth ---- the

people most capable of future leadership and innovation to the cities. Migration may so seriously cripple a community that it is forced to discontinue its services and cut back employment opportunities.

13. Write a short note on demand side pressure?

ANS: In many countries, education is viewed as an important way to gain social and economic advancement. Therefore, the demand for education is high, and if governments cannot afford to provide and fund quality education, then parent seeks private suppliers. This type of demand is 'excess demand', over and above what is provided by the government. In addition, many parents want for their children an education different from that offered in public schools. This is 'differentiated demand' and it may encourage privatization across all three sectors.

20 Mcq all from file @Imran file

Except on or two they are from handouts

Paper was easy

Kuch mcqz imran files sy thy or kuch handouts but agr imran all in one file achy sy ki ho to hope so woh b solve ho jain gy ..

1. Q. prevalence of madrassa education in Pakistan

The Madrassa Education has been prevalent since the time of Prophet Muhammad PBUH in the Muslim world. The examination of the status of madrassa in Islamic history testifies to its success due to strong sense of respect among the Muslims for 'Knowledge'.

' In the initial days of Islam, the aim of religious seminaries or Madaaris was preservation and spread of knowledge.

' Meanwhile it has been highlighted time and again that there is a need to reform the madaaris to transform the radical ideologies with real Islamic moderate values, and provide an applied education mode where madaaris students become useful members of the society

2. Q.Eu definition of non-formal learning

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

3. Q.what is privatization

‘Privatization’ is also thought of as ‘liberalization’ --- where agents are freed from government regulations, or as ‘marketization’ --- where new markets are created as alternatives to government services or state allocation systems

4. Gender difference in school

Gender Differences:

‘ There is the great difference in the rates of enrollment of boys, as compared to girls in Pakistan.

‘ According to UNESCO figures, primary school enrolment for girls stands at 60% as compared to 84% for boys.

‘ The secondary school enrolment rate stands at a lower rate of 32% for females and 46% males.

‘ On July 09, 2012 the Senate passed a law on ‘The Right to Free and Compulsory Education’.

‘ All over the world poverty is the main cause of low literacy rate.

‘ Now for the literacy rate compared to Sri Lanka and India that stand at a literacy rates of 91.2% and 61% respectively, Pakistan is lumbering at a mere 57.8%.

‘ Only less than 2% invested in the Education sector.

‘ Pakistan has also remained one of those few countries where education falls under the federal government

5. Gender discrimination in school

6. What is population education and explain its traces

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved. Facts, theories and concepts from a broad spectrum of academic disciplines and professional fields are needed to help individuals and societies fully understand population interactions and thus the effect of population factors on the quality of their individual and collective lives. The sum of this knowledge is referred to as population studies.

7. Role of research in population education.

Systematic research – investigations that might survey, for example the relevant literature

concerning the nature of the learner and his learning context.

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

8. Q freedom of choice for parents

9. Q .Billet in formal learning

Billet (2001): There is no such thing as informal learning. All learning takes place within social organizations or communities that have formalized structures. Informal Learning is organic or holistic, engaging the whole person, so that intellect, emotions, values and practical activities are blended.

10. Hanger learning.

Informal learning is not only more common, but also more effective than formal learning

11. Q demand side pressure

12. Q non formal education

Defines the dimensions of non-formal learning:

- the timing of stimulus (past, current, future)
- the extent to which such learning is tacit (tacit, reactive or deliberative)
- to the extent to which learning is either individual or social
- to the extent to which learning is either implicit or explicit

Eraut's definition of non-formal learning is based on an investigation into learning in the workplace

13. How teacher can change rigidity into flexibility in school

Strategies for developing accessible curricula

1. Providing a flexible timeframe for students studying particular subjects
2. Giving greater freedom to teachers in choosing their working methods
3. Allowing teachers the opportunity of giving special support in practical subjects (e.g. orientation, mobility) over and above the periods allotted for more traditional school subjects.

4. Allotting time for additional assistance for classroom based work
5. Emphasizing aspects of pre-vocational training

14. How technology reduce geographical region for learning

Equity

This criterion refers to a universally accepted goal of schooling: the quest for fairness in access to educational opportunities, resources and outcomes by gender, social class, race, language origins and geographical location of students.

Equity can be assessed in terms of inputs --- do all students receive an appropriate amount of funding and resources from the state, commensurate with their needs? Do students with special needs get appropriate schooling?

Edu 401

Mcqs mostly from files and 5 mcqs from mid

Subjective imran wali file sa

1.Demand side pressure 2

2.Two assumption of

1. Conflict is ubiquitous
2. There are ways to transform it

3.peace education

Peace education is the pedagogical efforts to create a world at peace.

By peace, we mean more than the absence of violence (negative peace). Peace in its most positive aspects embraces ideas of justice, global sustainability and the eradication of structures that promote insecurity: poverty, hunger, malnutrition, and lack of access to resources.

4.Two concern Freedom of choice

Two possible concerns arise as a result of greater freedom of choice for parents. The most important is the possibility that some choices are socially, culturally, or politically unacceptable.

For

example, a family may choose to educate its children in a manner intolerant to others in society,

or

it may choose an education that is segregated from other groups (e.g. by race, religion or income).

The other concern is that, even for those who value freedom of choice, the costs of deciding which school to go to --- or to change to --- may be high.

5.Role of environmental friendly school

EE encourages students to research, investigate how and why things happen, and make their own decisions about complex environmental issues. By developing and enhancing critical and creative thinking skills, EE helps foster a new generation of informed consumers, workers, as well as policy or decision makers.

6. Health care issues in

Next issue that we will discuss is health. Different family backgrounds, different cultures, financial situation all this helps in determining what kind of health facilities your family is able to provide to you. Without proper health care a child will not be able to make it through even the primary years of education.

If you have good health you are able to do a lot. Of course good health comes from lots of factors like:

food, nutrition, exercise, relaxation all of these contribute in good health.

Inequality and social conditions give rise to unequal and unjust health outcomes for different

social units. We may have health facilities but more detailed facilities like medicine, injections, x

rays are not available. Government health care facilities do not guarantee proper health treatment.

Private health care facilities are frightfully expensive. Again you are not able to afford that you will not be able to do well for your children and the children will not be able to do in education.

Poor nutrition includes poor protein intake children performed less in the achievement test.

Protein is what human muscles are made of. Students who get more protein perform well in the

achievement tests. **Iron** is an important part of the hemoglobin of the blood, less iron includes less

energy and hence not able to get good education.

Along with malnutrition the problem is of **obesity**. Obesity comes in the families are

privileged, where food is rich, they get fat/ obese. Children with obesity also get teased in schools, resultant in low self-esteem. When children get bullied like this they miss at the schools.

Physical environment is also important. You need to get exercise in the parks. Who can

go there, of course people from good families?

Mental tasks such as concentration, memory recall can be compromised if you do not have

good quality air in the room, poor ventilation, humidity can also affect your learning. Poor

ventilation can cause a decline in the performance of the teacher as well as of the schools. Many

schools do not have even windows in the classrooms; such environment is not conducive for learning to happen

7. Population studies

Population studies is broadly defined as the scientific study of human populations. Major areas studied include broad population dynamics; fertility and family dynamics; health, aging, and mortality; and human capital and labor markets.

8. Decision making

Few individuals make population-related decisions outside a group context and in many cases, the decision-making unit is the group itself, such a large family unit in Pakistan or a street committee in the local villages.

Less obvious but equally significant is the impact which the group has upon decisions made by individuals and within families. Clarifying these influences is part of the process of creating informed decision-makers. In all cases, the aim is to increase understanding of the interrelationships between macro and micro units of the society .

However, the range of options that are theoretically open to individuals and groups may, in reality,

be quite limited due to lack of equity and social justice and to the presence of cultural norms, traditions and taboos.

ANS: There are many factors driving privatization in education. These factors differ in intensity between countries and across the three sectors of primary, secondary and tertiary education.

Following are the dominant pressures for Privatization:

1. Demand – Side Pressures
2. Supply-side Pressures
3. General Pressures

Q: Madarasa reform 2006

ANS: In 2006 when the curricula were revised, the government focused on revising the old curricula of the country to build reforms.

Final Term Paper Edu401

By Awais Ahmad Zaidi

1. -----philosophical ideas involved concepts of educating for peace.

a) Dewey's

b) Einstein's

c) Newton's

d) Jinnah's

2. Which of the following is not a source of conflict?

a) Empathy

b) Anger and Anger Management

c) Violence in the media

d) Communication

3. April 2000 countries combined together, to ensure Education for All (EFA).

a) 165

b) 163

c) 164

d) 166

4. Till 1971 the total number of Madaaris in Pakistan were

a) 137

b) 245

c) 908

d) 2861

5. A motivation for greater freedom of choice is to make the education system more

a) Accountable

b) adjustable

c) Transparent

d) Flexible

6. Methodological issues also concern of different ways of adding population education to the school curriculum

a) Effectiveness

b) Efficiency

c) Objectivity

d) Selectivity

7. Policy makers must decide which of these is appropriate, and which would have the greatest impact in raising the quality of educational services.

- a) **Reforms**
- b) Solutions
- c) Problems
- d) Issues

**8. Even for those who value freedom of choice, theof deciding which school to go to --
- or to change to may be high.**

- a) Revenue
- b) Costs**
- c) Price
- d) Expense

9. Training for citizenship and developing the sense of being part of a nation usually involves elements of.....

- a) Cognitive
- b) Humanism
- c) Behaviorism
- d) Conditioning**

10. In the Netherlands, the proportion of schools administered by private school boards is almost

- a) 40
- b) 70
- c) 80%.**
- d) 90%

11. When is conflict positive? 2 marks

Answer: When we are able to resolve internal and interpersonal conflicts, using win-win problem solving every relationship will have some conflicts at some time or other. When we use win-win problem solving, it strengthens its relationship. When we do not, it destroys it.

12. What is the purpose of peace education? 2 marks

Answer: Purposes of peace education are the elimination of social injustice, the rejection of violence and the abolition of war.

13. Which elements are involved in philosophy of peace education? 2 marks

Answer: Non violence

Love as the basis of transformation—translated into caring classrooms

Reverence for the environment and for all life

14. What is direct violence and positive peace? 2 marks

Answer: Direct Violence: The examples of director violence are war, torture, and child and women abuse.

Positive peace: Presence of conditions of well-beings and just relationships: social, economic, political, And ecological.

15.How many levels of literacy. write their names only. 2marks

Answer: There are three levels of literacy

- 1) **Baseline literacy**
- 2) **Functional literacy**
- 3) **Multiple literacy**

16.How you see Literacy as social practice ? 3 marks

Literacy as social practice

- Literacy practices are used by us in the practices of our everyday lives.
- When we buy a car, do the shopping, visit the doctor, or pay a bill, we are engaged in social practices in which literacy give us help.

- There are culturally accepted ways of engaging in social practice and these can vary across cultures and over time, greeting people etc

17. Write a note on Assimilation Model and Pluralistic Model . 3 marks

Assimilation Model: Starting in the mother tongue, and continuing to national language immersion

Pluralistic Model: Recognizes the importance of the language spoken at home; thus, first language teaching is not restricted only to the early grades.

18. What is relation of peace education with environment education? 3 marks

19. How Private education reduce the burden of Govt Schools? 3 marks

20. What is social cohesion ? 3 marks

Answer:

Social Cohesion :

Schools should promote the social good; this is the main reason why they are publicly funded. What constitutes the 'social good' will vary from one society to another.

21. Write a note on Livingstone (2001) 5 marks

Informal education or training occurs when teachers or mentors take responsibility for instructing others without sustained reference to an intentionally-organized body of knowledge in more incidental and spontaneous learning situations, such as guiding them in acquiring job skills or in community development activities.

- Informal learning is any activity involving the pursuit of understanding knowledge or skill which occurs without the presence of externally imposed curricular criteria ...in any context outside the reestablished curricula of educative institutions

This definition has a different organizing principle – the relationship between the teacher / mentor and learner.

22. Question: EU's Definitions (EC 2001) | 5 marks

Formal Learning:

Learning typically provided by an education or training institution, structured (in terms of objectives, learning time or learning support) and leading to certification. Formal learning is intentional from the learners' perspective

Non-Formal Learning:

Learning that is not provided by an education or training institution and typically does not lead to certification. It is, however, structured (in terms of learning objectives, learning time or learning support).

Q23: Why Student should study the population education? 5 marks

Population education is not an attempt to develop a new discipline. Although demography and folk demography form the core of knowledge needed for population education, they do not cover the whole range of issues involved.

Facts, theories and concepts from a broad spectrum of academic disciplines and professional fields are needed to help individuals and societies fully understand population interactions and thus the effect of population factors on the quality of their individual and collective lives. The sum of this knowledge is referred to as population studies.

These studies raise a number of issues. Since the potential sources of information are vast, and since culture and ideology, among other things, will play a large role in determining what is most relevant to the needs of any particular group, there is no agreement on what should or should not be included.

Various factors and assumptions act as filters in determining the priority given to areas of knowledge and the framework used to organize the knowledge selected for inclusion.

Unfortunately, much of what is known deals with larger population units, making it difficult to extrapolate findings that can be applied to smaller units, like the community, the family and the individual. This encourages the generalized belief that population education deals primarily with national or global concerns, whereas in reality, the problem is caused by the inadequacy of available data.

Question 24 Describe briefly Productive Efficiency. 5 marks

This criterion refers to the maximization of educational results for any given resource constraint. It is important that any activity be conducted efficiently, because the resources used for it could be used for other activities.

Education privatization may be an important way to enhance efficiency: economists have given many reasons as to why private agents use resources in a more efficient manner than government agencies.

The strong argument for privatization rests mainly on productive efficiency. We note here that this argument refers to internal efficiency, i.e. how efficiently a chosen output is performed.

Question 25

Briefly describe the ways to Evaluate Privatization Programs. 5 marks

Answer: A comprehensive framework for evaluation presented here has four criteria, allowing for many aspects of the privatization policy to be understood and assessed.

1. Freedom to Choose

This criterion refers to the rights of families to choose schools for their children that are premised on their values, educational philosophies, religious teachings and political outlooks.

Advocates argue in favor of increasing opportunities for parents to choose their children's education for two reasons.

First, and clearly a priority, parents have a fundamental right to decide what is in the best interest of their children.

Parents are likely to have greater incentives to sustain and improve their children's welfare than would a government agent. Parents have a better idea of the educational needs of their children and of which learning styles they prefer.

Although some parents may be derelict in their obligations to their children, this is likely to be the exception rather than the norm. Where there are varied preferences among students, freedom of choice becomes especially important.

Q 26: What are the implications of diversity in the provision of education? 5 marks

It is important to understand that unlike the government schools, different types of private schools entail different implications in terms of their impact on policy and socio-economic milieu.

From one point of view, diversity in the private educational marketplace is a response to variance in the demand which already exists in the society.

However, some believe that from the vantage point of harmony and equality in the society, the very fact that private educational institutions are configured to a diverse range of social, economic, ideological and religious lines is a matter of concern.

This apprehension is best explained by the fact that a textbook used in a private school preaches to the students that listening to music, watching television and even playing carom board or flying kites are sinful acts.

On the other hand, there are many private schools which teach music to children in regular classes and promote liberal arts.

Therefore, the two types of schools are producing two groups of students with entirely opposite worldviews. This case illustrates the potential implications of different types of schools for social harmony, peace and national integration.

Edu401 1 march 2017

Final term..

Q1: how quality education is related to free n accessible education?

Q2: what r the 2 assumptions about peace education?

Q3: how liberalism related to private school system?

Q4: what r the challenges of implementing mother tongue as medium of instruction?

Q5: EU definition of formal learning?

Q6: EU concept of non formal learning?

Q7: why population education is necessary?

Q8: peace education?

Q9: what is privatization?

Q10: how parents freedom is related to the education of their children in private institutions?
