Post-Assessment

Question # 2 of 3 **Time Left: 84 sec(s)**

One of the reasons is short term focus of developers in performing the refactoring.

Select the correct option

Reload Math Equations

- ○ False
- ◉ True

Click to Save Answer & Move to Next Question

Question # 2 of 2 **Time Left: 71 sec(s)**

```
public class MonolithicConsoleUI {
public static void main(String[] args) {
    int counter = 0;
    while (true) {
        System.out.println("Counter: " + counter);
        int nextInput = Console.readInt();
        if (nextInput == 0) break;
        counter += nextInput;
    }
  }
}
```

Identify the output command in the above code.

Select the correct option

Reload Math Equations

- ○ while (true)
- ○ counter += nextInput;
- ◉ System.out.println("Counter: " + counter);
- ○ int nextInput = Console.readInt();

Question # 1 of 1 **Time Left: 87 sec(s)**

_____ is a major drawback in monolithic user interfaces.

Select the correct option

Reload Math Equations

- ( ) Mixed interfaces
- ( ) Hybrid code
- ( ) Simple code
- (•) Code duplication

Click to Save Answer & Move to Next Question

Fundamentally user interface has two parts.

Select the correct option

Reload Math Equations

- (•) Input and output
- ( ) It has only one part
- ( ) Two output console
- ( ) Two input console

Click to Save Answer & Move to Next Question

Question # 3 of 3 **Time Left: 79 sec(s)**

To remove the input and output code duplication in the example given in the video, which technique will be used?

Select the correct option

Reload Math Equations

- ( ) Waterfall MVC
- (•) MVC architectural pattern
- ( ) MVC console View
- ( ) MVC language

Click to Save Answer & Move to Next Question

Post-Assessment

Question # 3 of 3 **Time Left: 83 sec(s)**

User interface is combination of _____.

Select the correct option

Reload Math Equations

◉	View and controller
○	Depends on IDE
○	Inputs and view
○	Controller and output

Click to Save Answer & Move to Next Question

Question # 2 of 3 **Time Left: 83 sec(s)**

MVC divided the program logic into _____interconnected elements.

Select the correct option

Reload Math Equations

○	one
○	Zero
◉	Three
○	Four

Click to Save Answer & Move to Next Question

May be there are multiple views, so the question arises how to synchronize view and controller?

Select the correct option

Reload Math Equations

- ( ) With the help of Java
- ( ) Waterfall MVC
- ( ) With the help of .net
- (•) With the help of observer pattern

Question # 1 of 4 **Time Left: 83 sec(s)**

Different input and output user interfaces of an application make code _____.

Select the correct option

Reload Math Equations

- ○ Easy
- ◉ Duplicate
- ○ Enhanced
- ○ Recycle

Click to Save Answer & Move to Next Question

```
    while (true) {
            System.out.println("Counter: " + counter);
        int nextInput = Console.readInt();
        if (nextInput == 0) break;
            counter += nextInput;
    }
  }
}
```

counter variable initializes with _____ in the above code.

Select the correct option

Reload Math Equations

- ○ ++
- ○ 1
- ○ --
- ◉ Zero

Click to Save Answer & Move to Next Question

```
public class MonolithicConsoleUI {
public static void main(String[] args) {
    int counter = 0;
    while (true) {
        System.out.println("Counter: " + counter);
        int nextInput = Console.readInt();
        if (nextInput == 0) break;
        counter += nextInput;
    }
  }
}
```

Identify the output command in the above code.

Select the correct option

Reload Math Equations

○	while (true)
○	counter += nextInput;
◉	System.out.println("Counter: " + counter);
○	int nextInput = Console.readInt();

✔Comp

```
    int counter = 0;
    while (true) {
        JOptionPane.showMessageDialog(
         null, "Counter: " + counter);
        int nextInput = Console.readInt();
        if (nextInput == 0) break;
        counter += nextInput;
    }
  }
}
```

In the above code, input is _____.

Select the correct option

Reload Math Equations

- ○ Item base
- ○ Switch base
- ◉ Console base
- ○ GUI base
