Topic#147

Models of Bilingualism

Overview:

- Bilingual communities have different needs
- Dissimilar aspirations and situations
- Different models of bilingualism
- Additive bilingualism
- Subtractive bilingualism
- Dynamic bilingualism
- Recursive bilingualism
- Plurilingualism
- Complexity of bilingualism in the 21st century
- Unprecedented pace of change
- Migration
- Globalization
- Technology

Topic#148

Subtractive Bilingualism

Loss of the first language:

- L1+L2- L1=L2
- Results from monoglossic ideologies
- Language attrition
- Immigrants' discouragement of the use of L1
- Role of schools
- Behaviorism
- Indigenous populations in several countries cut off from their families in boarding schools
- Language death

Context of Pakistan:

- Discouragement of the use of L1 in schools
- Language prestige and status
- Hegemony of English language

Topic#149

Additive Bilingualism

Adding to the linguistic repertoire:

- L1+L2=L1+L2
- Learning and maintaining two languages
- Presented by Lambert (1975)
- The concept entails two languages each equivalent to a monolingual repertoire
- Integrated approach missing
- In response to the Canadian bilingual identity declared in 1969.

Topic#150

Recursive Bilingualism

Revitalization of language:

- Old language revived
- The start is not from scratch as in additive bilingualism
- Not accessed systematically
- In bits and pieces aspects of language are revived
- Hebrew
- Language revived as new functions are ascribed to it
- Change in language itself possible

Topic#151

Dynamic Bilingualism

Complex:

- Process of simultaneously drawing upon different languages
- Non-linear
- Multimodal resources used
- Opportunities opened because of the technology
- Options in interaction
- Responds to the unpredictable terrain of communication
- Closely related to plurilingualism

Topic#152

Plurilingualism

Plurilingualism as competence:

- Use of multiple languages for different functions
- Common European Framework of Reference for a Languages

- Tolerance of other forms of languaging
- Acceptance of difference

Helpful in:

- ❖ Going beyond the concept of balanced bilingualism
- ❖ Conceptualizing hybrid language use
- ❖ Plolyglot dialogue/ receptive bilingualism

Topic#153

Questioning Assumptions

Overview:

- Bilingualism as social practice of individuals
- Not as just two languages spoken
- Translanguaging at the core

Problematizing:

- ❖ Semilingualism
- ❖ Language dominance
- ❖ Mother tongue and second language learners
- ❖ Heritage language learners
- ❖ How the terms have been used
- ❖ Need for challenging them

Two assumptions:

1) These terms emerge from a linguistic focus
2) Conceptualizing translanguaging means rejecting monolingual ideals and using a heteroglossic lens

Topic#154

Semilingualism

Assumption:

- Monolingual norm
- **Unequal performance of bilingual children** in different languages

Challenged:

- ❖ Languaging and discursive practices of bilinguals amid social and political constraints
- ❖ Term not useful but continues to be used to label
- ❖ Tanslanguaging not semilingualism

- ❖ Specific academic language proficiency development opportunity important
- ❖ Role of schools

Stigmatizing translanguaging practices leads to:

- Language shaming
- Low self-esteem and sense of identity- disempowerment
- Concept useful?

Topic#155

Language Dominance

Overview

- Psychological construct tested through reaction translation speed
- Dominant bilingual- superior competence in one language (Lambert, 1955)

Objections:

1) Speed reaction tests irrelevant as bilingualism is socially constructed – not practiced as a hobby and occupation (Fishman, et. al., 1971)
2) Dominance of one language in a certain function possible
3) **Language dominance task specific**
4) Bilinguals translanguage
5) Language dominance can be tested only if bilinguals are forced to use one language
6) Monolingual as the norm here- contested

Topic#156

Mother Tongue

What is mother tongue?

1) Language spoken at home in early childhood — may not be spoken now
2) Mother tongue = vernacular (UN, 1953)
3) Teaching of the MT and related cultures for migrant children (Council of European Languages)
4) Coining of the term to create awareness of common fatherland- nation state
5) Language later standardized as official (Kroon, 2003)
6) Related to power difference
7) Problem multiple languages at home?
8) Bilingual child and monolingual mother?

Four Criteria (Skuntnab-Kangas, 1981)

1) Origin
2) Competence
3) Function
4) Identification (self & others)

Critique:

- ❖ What if multiple languages spoken at home — single MT?
- ❖ What about translanguaging- father's language
- ❖ Officially assigned MT not spoken at home
- ❖ Singapore —ethnic languages considered home languages

Topic#157

Second Language Learners

Misconception:

- Translanguaging - identified as second language speakers (Pablo)
- Until what point does a migrant child remain a second language learner

Questions:

- Recursive bilinguals- second language speakers?
- Concentric circles of native, second language speakers and learners of English

New Understanding:

1) Conceptualizes — them as bilingual speakers and users
2) The concept robs the possibility of bilingualism to be seen as a norm
3) Emergent bilinguals- continuum
4) Difficult to assess at what point do they stop being second language learners? —accent?
5) Negative term

Topic#158

Heritage Language

Concept:

- ❖ Languages spoken by ethnic communities
- ❖ Popularity based on Canadian policy in 1960 for elementary schools
- ❖ In US becoming popular with the demonizing of the term 'bilingual'
- ❖ Revitalization of languages encouraged

Two Questions:

1) What proficiency in that language must one have?
2) What connotations does the term 'heritage' have?

The Concept:

- ❖ Ancient and old but focus future
- ❖ The emphasis on sole focus on heritage languages must not exclude translanguaging possibilities

Topic#159

Second Language Learning Process

Equivalent To:

- Emergent bilingualism
- No clear-cut boundaries when the learning process stops or does it?

Leads To:

- ❖ Reliance on L1 structures to understand L2 structures
- ❖ All new knowledge built on old knowledge structures

Translanguaging does not mean:

- Deficiency in language proficiency always
- Full knowledge of all languages simply may not be possible

Language Learning

- ❖ Continuous developmental process
- ❖ Maybe recursive and circular
- ❖ We are all language learners-continuum

Topic#160

Bilingual Abilities & Development

Bilingual abilities may:

- Differ in range
- Limited to oracy
- Limited to signacy
- Include literacy

Table 3.2 Language Abilities and development

Language Abilities

Oracy	Literacy	Signacy

Listening	Reading	Attending"
Speaking	Writing	Producing

Bilingual abilities may be:

- Receptive
- Productive
- Depending the use of different languages

Topics Covered:

- ❖ Circumstances that produce receptive bilinguals
- ❖ Bilingualism and language function
- ❖ Bilingualism obligatory or elective
- ❖ Bilingual development in children
- ❖ Bilingual children vs monolingual children

Topic#161

Bilingualism and Language Functions

Receptive & productive Skills:

- Related to language functions
- Possibility of functioning in other languages results in either type
- Linguistic use of bilinguals subject to political and social pressures
- Deaf children may only learn written standard —dominant language

Deaf children, depending on the opportunity to function may be:

- ❖ Competent bilingual sign users
- ❖ Not learn standard sign language
- ❖ Learn only one sign language

Bilingual education of deaf children:

- Has received little attention by the government
- Has greater flexibility
- Yet bounded by research, political and

Topic#162

Bilingualism: Elective or Obligatory

Bilingual development may be a choice:

- Learnt at schools or language centers
- Elective or elite bilingualism (Fishman, 1977 b)
- Formal learning — high status

Bilingual development may be not be a choice:

- ❖ Obligatory
- ❖ Immigrants — indigenous populations
- ❖ Deaf bilinguals
- ❖ Folk bilinguals (Fishman, 1977b)
- ❖ Circumstantial bilinguals (Valdes & Figueroa, 1994).

Difference may depend on also if they are:

1) Adult bilinguals
2) Child bilinguals

Topic#163

Bilingual Development in Children

Bilingualism in children is supported:

- ❖ Guides and newsletters for upbringing bilingual children
- ❖ Support at neonatal clinics for parents
- ❖ Encouraged in some western contexts
- ❖ Discouraged in others
- ❖ Difference between acquisition and learning

Krashen's (1981) distinction:

- Acquisition is natural picking up of another language (oracy first)
- Learning - formal process of engaging with a language

Another distinction:

- ❖ Acquisition of two languages simultaneously
- ❖ Learning of another language sequentially - less in use

Differences:

- Bilingualism as first language (Swain, 1972)
- Childhood bilinguals
- Emergent bilinguals

Topic#164

Bilingual vs. Monolingual Children

Bilingual development:

- ❖ Is comparable to monolingual development in children
- ❖ Milestones and timing are the same
- ❖ But they translanguage

Infants have the ability to:

- Differentiate between two linguistic sound systems
- And remember them
- This makes bilingualism possible

Bilingual children at the age of two can:

- ➢ Choose to use either language or
- ➢ Mix languages to function
- ➢ Some choose to produce only one language

Bilingual children producing only one language validate:

- ▪ Intentionality Model for Language Acquistion (Bloom & Tinker, 2002)
- ▪ Child agency at the core

Cummins (2000) Threshold hypothesis:

- ➢ Higher proficiency in a language lead to higher gains in learning also L2 learning
- ➢ Reading problems may stem from not reaching the threshold

Topic#165

Adult vs. Child Bilingualism

Child bilingualism:

- ❖ Well understood
- ❖ Studied intensively
- ❖ Also now compared with adult bilingualism

Adult bilingualism:

- ➢ Possible to learn another language later in life
- ➢ Erasumus programmes introduced in 1987
- ➢ No earlier working knowledge language but gained proficiency

Topics covered:

- Adult bilingualism
- Child bilingualism
- Differences
- Similarities

Topic#166

Adult Bilingual Development

Possible to:

- Learn a language and pursue a degree in it
- Apart from Erasmus-Tribal colleges -native languages
- Learn heritage language
- Make quicker process
- Develop cognitive association patterns
- Pathways might be different

Formal and informal settings:

- Adults use their metalinguistic skills more efficiently
- L1 structures support L2 structures
- Case of immigrants

Topic#167

Child Bilingual Development

Earlier the better:

- Early introduction of L2 encouraged
- Advantages for the acquisition process
- Yet no age- related differences in the learning process

Earlier the better?

1) Early start of bilingualism not a necessary condition for full bilingualism
2) Empirical evidence for the critical age for L2 equivocal
3) Empirical evidence on both sides
4) Bilingual development in schools related to pedagogical and student factors
5) Early vs Late Immersion programmes in Canada mixed results

6) Differences between late and early onset of bilingualism in schools negligible later
7) Children more time to practice
8) Input less complex
9) Risk taking easier
10) Better learning may relate to certain aspects only

Topic#168

Adult vs. Child Bilingual Differences

Children:

- Communicative needs simpler
- Learning better supported with gestures and visuals
- Expectations from adults different

Adults:

- Communicative needs complex
- Learning less supported -urgency
- More language anxiety -motivation

Less evidence for:

- Critical period evidence not enough except for accent
- Problems in learning L2 in adulthood

However:

- Adults may be less able to achieve native competence in accent
- Proficiency in different L2 skills may be at different or similar level

Topic#169

Language Maintenance & Shift

Relate to:

- Stability or change in language use patterns
- Social, cultural and psychological changes
- Inter or intra group relations

Conditions needed for either:

- Co-existence of more than one language
- Relational status or privilege ascribed to languages

Conditions needed for either (Fishman):

- Pressures, social, economic or cultural to use or disuse a language
- Hence, it does not happen in a vacuum

Language shift:

1) Gradual reduction of the functions of a language
2) Over almost three generations
3) Minority languages-death
4) Received more attention than language maintenance
5) Minorities pressurized to assimilate

Language maintenance:

- Of minority languages disfavored
- Of majority languages taken as natural -uninteresting

Topics covered:

- Language revitalization
- Language and ideology
- Post-colonialism and hybrid identity and ideology

Topic#170

Language Revitalization

Graded Intergenerational Disruption Scale (GIDS) Fishman (1991)

- Stage-8: Spoken by isolated old folks
- Stage-7: Spoken by socially integrated but beyond child bearing age
- Stage-4: Used in lower levels of education
- Stage-3: Used in lower levels of work and across communities
- Stage-2: Used in lower government functioning and media
- Stage-1: Used in higher level government, educational and social sphere
- The higher the score the more language shift

The concept of reversal challenged

- Language shift is not reversal but revitalization –
- Move towards new use of language
- Mother tongue transmission imp

Topic#171

Language and Identity

Emphasis by nation states on:

1) Language as a symbol of national identity
2) Russian speakers not given citizenship until Estonian is learnt
3) On assimilation
4) Kurdish speakers denied the right to use their language across, Turkey, Iran and Iraq
5) Not unidirectional
6) Reflects affiliation with imagined communities
7) Symbolic, semiotic function

Rhetorical function:

1) Discursive construction of identity and solidarity
2) Language and identity in the face of globalization
3) Emotions, anxiety, attitudes important
4) Uni-directionality in the concept of identity challenged
5) Fluidity of identity
6) Link with language

Topic#172

Postcolonial and Hybrid Identity

Language and identity performance:

1) Reciprocal relationship between language and identity
2) Speech acts as acts of projection of self
3) Hybrid and postcolonial - use of language complex
4) Speakers do not adapt to the style of an interlocutor but adapt their image of self in relation to the other
5) Pragmatic concerns in accessing multiple linguistic and cultural resources
6) Choice of identity through language use-performativity (Pennycook, 2000)
7) Postcolonial identity involves sameness but also otherness
8) Hybrid identities multiple linguistic practices
9) Linking the present with the past

Construction of hybrid identities also rests on:

1) Race
2) Social class
3) Gender
4) Age
5) Geopolitical situation
6) Institutional affiliation

Language captures:

- Hybrid identities-location of self in relation to the other
- Geopolitics of borders
- Cultural practices
- Political messages
- Life situations

Topic#173

Language Ideologies

Language and sociopolitical systems:

1) Represent systematic patterns of behavior related to linguistic
2) Attitudes
3) Beliefs
4) Values
5) Social systems of domination - power differential
6) Subordination of groups access to resources
7) Positive or negative self-image
8) Language and symbolic capital (Bourdieu, 1991)
9) The role of schools in symbolic violence - the concept of being naturally superior
10) Produced by what people say or not say, do or not do through language they know (Blommaert, 1999)

Research focuses on:

- Sociohistorical, sociocultural and socioeconomic context
- Production of meaning through language choice and discourse
- Access to linguistic resources and identity construction

School role:

- Central to language ideologies
- Parental choices
- Bilingual education to challenge hegemonic language ideas

Topic#174

Language Policy and Language Rights

Topics:

1) Language policy-definition
2) Components and dimensions
3) Goals
4) Languages in education
5) Educational outcomes
6) Language rights
7) What do we mean
8) Significance
9) Language and poverty
10) Language and politics
11) Issues of equity

Topic#175

Language Policy

Defining language policy:

- Policy vs planning
- Policy and planning also subsumed into one another (Spolsky, 2004)

Three components (Spolsky, 2004):

1) Language management
2) Language practices
3) Language beliefs and ideology

Language management:

- Language planning
- Language intervention
- Efforts to manipulate language

Language practices:

- Habitual pattern of selecting among language varieties
- Ethnography of speaking (Hymes, 1967).

Language beliefs:

- About language
- About language use
- Ideologies

It can be:

- Planned and unplanned
- Dictated from top down
- Interpreted from bottom up
- Interactive not linear

Topic#176

Language Policy: Dimensions

Emergence of the field:

- The need for language-based identity after decolonialization
- Belief that language problems could be resolved by modernizing it

Three dimensions of LP enterprise:

1) Corpus planning
2) Status planning
3) Acquisition planning

Corpus planning:

- Changing the form of language
- Standardizing language forms
- Graphization – writing
- Modernization - adding vocabulary or changing it

Status planning:

- Modifying the status or prestige
- Ascribing functions in the working of the government
- Institutional work
- Education

Different actors in language planning:

- Individuals-Hebrew
- Government

- ❖ Communities and non-government organizations
- ❖ Other international institution

Acquisition planning:

- Developing learning opportunities
- Universities and schools
- Other opportunities

Topic#177

Language Policy: Goals

Seven goals of LP (Ager, 2001):

1) **Identity:**
   - The case of France (Basque, Breton, Catalan)
   - Canada (English and French, except in Quebec)
2) **Ideology:**
   - ❖ No child left behind (US) based on English language assessment
   - ❖ English as mother tongue - Singapore?
   - ❖ Banning of sign language (1880s
3) **Image creation:**
   - ➢ Constructing a favourable view of their history and language
   - ➢ English language is strongly supported by US and UK
4) **Insecurity:**
   - When states or groups are wary of others
   - Namibia- English as official language rather than local or postcolonial German and Afrikaans
5) **Inequality:**
   - ❖ Social justice: non-sexist language-1970s
   - ❖ Charter for Regional and Minority Languages (1993)
   - ❖ Equating educational opportunities
6) **Instrumental motives:**
   - Learning a language for economic and social benefits
   - The case of English

Independence or Interdependence (Fishman, 2006):

- ➢ Ausbau (Urdu & Hindi)
- ➢ Uniqueness
- ➢ Purification
- ➢ Classicization

Topic#178

Languages in Education

LP at school level (Kaplan & Baldauf, 1997):

1) Determine languages in the curriculum
2) Identify the teachers
3) Determine who will learn
4) Determine the model, methodology
5) Who will design? How will it be used? Material design and dissemination?
6) Define assessment processes
7) Testing for placement
8) Formative and summative testing
9) Assessment processes for teacher performance
10) Assessment processes for systems
11) Physical and financial support

LP at school level:

- Defines the education system
- Role of languages in power hierarchy

Topic#179

Bilingualism and Human Rights

Language planning:

- Criticized for being elitist
- Manipulation for self-serving interests reproducing inequalities (Tollefson, 1991)

Language rights-reasons:

- In the face of linguistic imperialism
- Decline and loss of world's languages
- Historical, social and political construction of certain languages as minoritized

Language rights- four reasons:

1) The question of language shift
2) Learning of the dominant language at the expense of L1

3) The need to restore prestige to minority languages

Language rights- two categories (Skutnab-kangas & Phillipson, 1994):

- Individual rights (right to learn and use own language)
- Community rights (establish and maintain schools and curricula)

Language rights- two kinds (Skutnab-kangas, 2006)

1) Expressive or non-instrumental rights
2) Instrumental rights

Language rights- three principles for proper integration (Skutnab-kangas, 2006)

1) Promotion-oriented rights – participation
2) Territorial and personal rights
3) Traditional hard and soft laws

Topic#180

Bilingualism in the Curriculum

Discussion:

- Organization
- Relationship between different aspects, learners and communities
- Complex

Trans-disciplinary enterprise with perspectives that are:

- Ecological
- Sociocultural
- Sociopolitical
- Socioeconomic

Focus:

- Complexity
- Flexibility
- Allocation

Topic#181

Complexity Involved

Nature of complexity:

- Change and flux in geopolitical situation migration
- Material development whose culture
- Integration with wider community?
- Allocation of languages
- Arrangements to be made
- Degree of flexibility one has
- Limitations

Relationship between:

- Language and identity individual-communal and national
- Language policies of the state
- Political factors
- Global factors

Complex decision making:

- Choice of languages
- Role of other languages
- Transition points
- The exchange value of linguistic capital

Topic#182

Flexibility

Variability depends on:

- Material resources
- Human resources
- Societal goals
- External and internal pressures

Variability is acceptable:

- No one type of program better than the other
- Educational transition needs to be kept in mind
- Equity between languages does not mean equality

Bilingual program examples:

- Beginning with 90:10 (tribal 90 minority language, while the other strengthened
- Multilingual complexity
- Minority language 90% and regional 10% later minority language phased out by Eng.

Inherent flexibility:

- Translanguaging practices of teachers and learners
- Teachers alter these percentages
- Unequal allocation not a problem if respect shown to all languages

Topic#183

Bilingual Allocation

Time allocation:

- The model of 90: 10
- The dominant language given more emphasis —CLIL programs
- Sliding bilingual education 90:10
- Distribution of languages
- Equitable allocation 50: 50
- Equal number of subjects in different languages

Immersion bilingualism:

- Begins with 100 % use of majority child's second language
- Gradually reduced with child's home language

Topic#184

Bilingual Arrangement

Strict separation:

- Time determined
- Teacher determined
- Place determined
- Subject determined

Decisions about language arrangement:

- Strictly separating the languages
- Using them flexibly

Topic#185

Separation: Time

Allocation based on:

- Morning and afternoon
- One language a day followed by limited continuation the other day or weekly
- Roller-coaster arrangement common

In early grades:

- Confusion from alternating languages at the same time
- Coded signal helpful (colour)
- Good practice of keeping the same teacher throughout the day for support

Allocation based on:

- Same language at the same time
- Helpful if there is one teacher per grade
- Teacher needs to be highly proficient
- Preparation of materials

Topic#186

Separation: Teacher Determined

Languages divided for teachers:

- Can combine with time separation for languages
- At alternate time the teacher switches children
- Side-by-side

Side-by-side:

- Advantage teachers may be only receptive bilinguals in one language
- However, doubles the number of taught children
- Bilingual teachers act as monolingual
- Advantage-only one language is used at time
- Advantage-full proficiency in both languages not required
- Two teachers in the same class at the same time —each using one language
- Support to the students in the language they know best
- Cost is higher

Topic#187

Separation: Place Determined

Language assigned to different classrooms:

1) Used in several European programs

2) Useful — landscape of the classroom becomes enabling
3) Consistency
4) Used often in secondary schools
5) Advantage-language surround
6) Disadvantage- changing of rooms difficult at primary level
7) Discourages —contrastive analysis of languages
8) Often done with teacher determined arrangements
9) Even when classroom is not changed physical demarcation is useful
10) Writing the languages in different colors may also be useful
11) Encouraging contrastive analysis useful at later stages

Topic#188

Separation: Subject Determined

All subjects in two languages:

- Many programs offer a mixture of the full or partial biliterate kinds
- Some subjects, though not the same material is taught in both languages
- Encouraged for 'biliterate bilingualism' (Fishman, 1976)
- Does not reflect the social reality
- Partial biliterate programmes

Requires:

- Alot of teacher collaboration regarding the content
- Especially where teachers are sharing students

Different language for different subjects:

- Common in secondary schools
- Math, Science and Technology in English
- Other subjects in vernaculars common
- Religious and state language

Topic#189

Arrangements: Flexible Convergent

Flexible convergence:

- Flexible use of language that aims at language shift
- Subtractive bilingualism
- Common across Pakistan also

Flexible use of languages in classrooms:

- Under researched
- Most often used in bilingual classrooms
- Natural translanguaging

Flexible convergence two patterns:

- Random code switching
- Monoliterate bilingualism

Flexible use of languages in classrooms:

- Under researched
- Most often used in bilingual classrooms
- Natural translanguaging
- Stigmatized in language classrooms

Topic#190

Random code switching:

Random code switching

- Code-switching in education unplanned as in real life
- The effect might not be potentially useful in education
- Often used in bilingualism
- Code-switching similar to style-switching in monolinguals
- Follows from having access to more codes
- Code-switching for multiple reasons

Topic#191

Code-switching: Academic Concerns

Random code-switching in academics:

1) Research shows that academic results are worse with mixing as compared to separation approach (Cummins and Swain,1986)
2) Newer research supports it in content subjects
3) Teachers often no control over their code- switching
4) May promote shift to the more powerful language-rather than develop bilingualism
5) When two languages have unequal status
6) Benefit comes from knowing when one has code-switched and why
7) Properly used cognitive skills enhanced for non-language subjects
8) May erode minority languages
9) Promote subtractive bilingual frameworks
10) Remains questioned

Random code-switching:

- ❖ New Concurrent Approach (Jacobson & Faltis,1990)
- ❖ Not to code-switch intra-sententially
- ❖ Has not becom epopular

Topic#192

Code-switching: Pedagogical Tool

Benefits:

1) When used carefully can encourage the learning of a language also
2) Offers scaffolding group work
3) When used carefully can encourage the learning of a language also
4) Offers scaffolding group work
5) Deeper understanding following from questioning
6) Connecting with learners
7) Explaining with all the linguistic tools available
8) Connecting with learners
9) Explaining with all the linguistic tools available
10) Legitimizing translanguaging

Disadvantage:

- Language use will base on teachers own language proficiency and preference
- Too much left to chance
- Those in minority might be ignored

Topic#193

Monoliterate Bilingualism

Literacy in only dominant languages:

1) The case of Phipllipines
2) The gist of the lesson in Filipina or English
3) Content in either
4) Explanation in vernacular
5) French the medium of instruction from class 5 onwards
6) Thirteen national languages are Used to encourage dialogue and story telling
7) The vernacular never used for reading and writing
8) Example of Mali
9) Convergent pedagogy
10) Simultaneous use of mother tongue and French

11) French only for writing
12) More research required to compare efficacy of one programme structure in comparison with the other
13) Depends on the goals of education

Topic#194

Flexible Multiplicity

Recursive language practices:

- Bilingual practices need to be encouraged home languages
- Prepare for academic and non-academic discourse
- Bilingual practices are recursive
- Can be built upon
- Code switching considered bad planned

Focus:

- Bilingualism in the 21" century?
- Micro and macro alternation
- Five flexible multiple arrangements
- Significance

Topic#195

Bilingualism in the 21" century

Demands ability to:

- Translate
- Translanguage
- Design information bilingually
- Operate in an increasingly complex sociocultural context
- More than the ability of two monolinguals in different contexts
- Adaptive nature of bilingualism

Focus on:

- Not just developing two different languages
- But also, multilingual and plurilingual practices
- Align with how languages are spoken in real life contexts

Topic#196

Macro and micro alternation

Macro alternation of languages in education:

- Division of subjects and languages assigned clear
- One language dominates subject instruction
- The other language may also be used
- Use of languages carefully controlled to make one dominant
- Emphasizes bilingualism of the context

Micro alternation of languages in education:

- One dominant language but language alternation within a subject
- Has been criticized
- Yet closer to bilingual practices
- Has to be handled with careful understanding by the teachers
- More flexible
- Efficient
- Benefits mitigated if thoughtlessly used

Topic#197

Flexible Arrangements: Significance

Language shift and maintenance:

- Not related to bilingual arrangements but the goal of the programme
- Functional inter-relationship between the languages to be maintained

Related to the issue of:

1) The role of L1 inL2 teaching and learning
2) L1 scaffolding for the learning of the other language
3) Second language learning problematic if L1 considered of lower status
4) Educational significance of different languages for different subjects
5) Concept construction and academic register

Topic#198

Flexible Arrangements: Introduction

Different bilingual arrangements:

1) Focus on developing multiple multilingual practices
2) Responsible code-switching both ways
3) Preview/ view/ review
4) Trans-languaging
5) Co-languaging
6) Cross-linguistic work and awareness
7) Challenging a few assumptions
8) Considering the context
9) Considering the goals of the programme
10) Challenging a few assumptions
11) Considering the context
12) Considering the goals of the programme

Topic#199

Using Responsible Code-switching

Increasing evidence:

- Challenges negative associations with code-switching
- CS moderates the alienation felt towards L2
- Code-switching a resource

Evidence:

1) Need for creating awareness of CS in teacher education programmes
2) CLIL programmes shown the benefit of CS
3) CS to re-gain student attention
4) Reinforcement of subject content
5) Challenging contradictions and misinterpretations of different linguistic codes
6) Relevant in multilingual contexts
7) Resource to solve problems
8) Teachers must monitor both the quantity and quality of their code-switching

Topic#200

Code-switching: Monitoring

Too much code-switching:

- May lead to delay in the learning of an additional language
- Over reliance on the use of one language
- Confusion in terms of understanding

Too little of code-switching:

- Disengaging
- Defeats the purpose of bilingual education
- Responsible thinking about the use and benefit of code-switching

Topic#201

Code- switching as Pedagogical Tool

Use as a resource:

1) Defining a word
2) Providing a linguistic summary
3) Summarizing a lesson
4) Focusing on language structure
5) Hybrid language use is more complex than simple CS
6) Systematic
7) Strategic
8) Affiliative
9) Sense making process
10) Focus on expanding written and oral expression
11) Establishing relationships of trust

Topic#202

Classroom Examples

Chinese in Us English classrooms:

- Encouraging use of Chinese in English writing classes
- Developed writing skills faster
- Cross-linguistic analysis
- Difference in strategies

In situations of unequal power between languages:

- Protecting minority language important (Fishman, 1991).
- Space along and apart from majority language
- Responsible code-switching a means to it

Val d' Aoste bilingual programs:

- Use micro and macro alternation mode in reading and writing
- Encouraged to write in one but switch to another when feel comfortable - tests

- Cognitive skills and learning of languages?

Topic#203

Dynamics of Unequal Power

Situations of Linguistic Hierarchy:

1) Reflect social inequality
2) Bilingual education needs to be carefully positioned
3) Not enough to 'allow' use of minority language
4) During minority language majority language instruction code-switching to be planned
5) Flexibility is a must
6) Protecting the minority language important
7) Responsible code-switching is one way Minority language along with majority
8) Space for minority language use separately

Topic#204

Other Bilingual Arrangements

Significance:

- Thinking of a range of bilingual practices
- Rethinking the role of the minority languages in education
- Adaptation for context specific use

Focus:

- Preview/View/ Review
- Translanguaging in the curriculum
- Advantages of translanguaging

Topic#205

Preview/ View/ Review

Use of two languages to:

- Preview
- View
- Review
- Convergent multiple arrangement

Convergent multiple arrangement:

- Gist of the lesson given in home language (preview)
- Lesson taught in second language
- Lesson reviewed in home language

Convergent multiple arrangement at initial stages:

- Gist of the lesson given in the second language (preview)
- Lesson explained in home language
- Lesson reviewed in second language

Topic#206

Translanguaging

Dynamic bilingual programme:

1) Another language to discuss and write or projects
2) Deliberate arrangement in the curriculum
3) Development of both languages – aim
4) Two languages used simultaneously in the same class
5) Hearing, reading and or signing of lesson in one language
6) Development of work in the other
7) Another language to discuss and write or projects
8) Deliberate arrangement in the curriculum
9) Development of both languages - aim

Topic#207

Translanguaging: Advantage

Four Benefits:

1) **Development of competence in the weaker language**

- Maximizing learning opportunities with scaffolding
- Transitions to build confidence and reduce anxiety

2) **Deeper understanding of the subject matter**

- Space for learner agency or co- construction of knowledge
- Building on existing knowledge

3) **Home-school cooperation**

- Maximizing support systems
- Increasing relevance

4) Integration of fluent speakers with early language learners

- Developing communities of learning — supporting each other
- Both languages encouraged

Topic#208

Translanguaging: Flexibility

More flexible than described:

- Concurrent use of languages is alternated
- Variations possible depending on learner needs Cognitive and
- academic demands
- Thinking about learning outcomes - goals
- The destination before the way to it
- No single right answer fit for purpose thought through

Clarification:

- Not just code-switching
- Normalizes bilingualism without functional separation
- Separation of languages for receptive and productive use

Topic#209

Translanguaging: Classroom Examples

Advanced biology class:

- ❖ Text in English
- ❖ Supplementary material in Spanish
- ❖ Instructional dialogue in Spanish
- ❖ Writing both in English and Spanish
- ❖ For the Advance Placement Examination in English
- ❖ Spanish in writing
- ❖ English essays drafted on Spanish ones

Fifth-grade translanguaging arrangement:

- All text and discussion in Spanish
- Lesson review in English
- Test in English-Spanish English dictionaries allowed

Fifth-grade dual language classroom in US:

- Social studies in Spanish
- State test both in English and Spanish
- Only one student opts for exam in English

Topic#210

More Bilingual Arrangements

Topics:

Cross-linguistic Awareness

- Nature of cross- linguistic awareness
- Application in classroom

Co-languaging

- What is the nature of co-languaging
- Application of co- languaging

Cross-linguistic Awareness- importance

- What do we want to achieve
- Advantage

Topic#211

Co-languaging

Simultaneous use of two languages:

1) Documentary in English-subtitles in another
2) Vice versa
3) Students may work side by side in different languages in computer assisted learning
4) Inclusive
5) Reserves room for the main language of instruction
6) Often used at tertiary level
7) Same material in two or more languages
8) Use of technology facilitative-power point
9) Material presented in two languages-different colours

Topic#212

Cross-linguistic Awareness

Contrast between:

- Structures
- Vocabulary

- ❖ Discourse patterns
- ❖ Styles

Blending of bilingual arrangements:

- ❖ Strict separation and flexible convergence
- ❖ Some subjects dedicated to different languages
- ❖ Others brought together for cross linguistic awareness

Much attention is paid to:

- Bilingual authors' use of cross-linguistic strategies for different effects
- Replication
- Analysis of actual bilingual practices

Contrast offers:

- ❖ Instructional space for cross-linguistic work
- ❖ Opportunity to translanguage
- ❖ Use languages flexibly
- ❖ As experienced bilingual authors and communities

Topic#213

Cross-linguistic Awareness: Importance

Cross-linguistic space:

1) Creates linguistic tolerance towards different varieties
2) Acknowledges the value of languages not used in classrooms
3) Creates metalinguistic awareness
4) Develops association between learners and | the languages learnt
5) Creates understanding of the commonalities between languages
6) Clarifies difference between them
7) Reaches beyond the languages of instruction
8) Discusses languaging patterns in classroom and community
9) De-pathologizes home cultures

Topic#214

Translanguaging: A Closer Look

Topics:

- Translanguaging — some considerations
- Reaction to immersion programmes

Topic#215

Translanguaging in Classrooms

Bilingual practices in classrooms:

- Translanguaging
- Mapped on the sociocultural context
- Despite language separation

Kindergarten class in US:

- Strict separation of languages, subjects and teachers
- Children change classrooms
- Grouped in terms of second language
- Translanguage in other spaces
- Scaffold each other

Transglossia (Ofelia, 2006):

- Translanguaging in informal contexts
- Separation of languages as per subject

Topic#216

Translanguaging vs. Translation

Translanguaging important to:

- Resolve the issue of multilingual classrooms
- When languages are widely different from each other

Translanguaging and translation:

- Can be a form of translation
- Indirect translations or direct
- Purpose is understanding |

Topic#217

Translanguaging vs. Translation

Europeon School of Brussels:

- Adolescents

- Three languages in the curriculum

Bilingual practices:

- Exclusive use of languages in certain formal contexts
- Translanguaging in others

Translanguaging practices:

- Depended upon the addresse
- Receptive bilingualism was accepted norm
- Translanguaging and learning

Bilingual practices' data:

- Translanguaging between two Italian students
- Translanguaging between a Dutch, Spanish and French student

Topic#218

Translanguaging: Considerations

Translanguaging — bending and blending:

- Bending better than breaking
- Important for pedagogical purposes — relevance to 21st century skills

Translanguaging stigma:

- Robs of bilingual possibilities
- Hides natural translanguaging
- Educators need to address the issue
- Linguistic shame
- Monoglossic ideologies
- Shift towards dominant language

Topic#219

Reaction to Immersion Programmes

Challenging of immersion programmes:

- Self-esteem and confidence threatened
- Language ideologies perpetuated
- The voice of the minority students suppressed
- The same disregard taught for minority languages

- Languages of the minority are ruthlessly disregarded
- Home languages — a pathology

Topic#220

Models of Bilingual Teaching

Two languages in the Same classroom:

- ❖ Supportive of learning by bilingual children
- ❖ Sensitive to their needs

Three models of teaching/learning:

- Convergent
- Immersion
- Multiple

Use of two languages:

- ❖ The goals may be different
- ❖ Gradual transition into majority language

Topic#221

Convergent Teaching

Two languages in the same classroom:

- Both languages used and allowed
- The main focus is on teaching in one main clearly identified language

Goal:

- ❖ Developing academic proficiency in the dominant language
- ❖ The other language is a supportive role

Two languages in the Same classroom:

- Language integration only temporary
- Follows a flexible convergent arrangement

Topic#222

Immersion

Use and forms:

- ❖ Developmental bilingual programmes
- ❖ CLIL-two-way immersion
- ❖ Translanguaging does occur

Use:

- Clear and explicit institutional policy
- In language revitalization of minority languages
- In prestigious bilingual programmes

The Belief:

- ❖ Languages are best taught in isolation
- ❖ Monolingual immersion will support the independent use of languages

Topic#223

Multiple Bilingual teaching

The Goal:

- ❖ Develop both languages
- ❖ Enhance learning by separating both languages strictly
- ❖ Develop plurilingualism
- ❖ Support translanguaging
- ❖ Encourage multilingual awareness

Use:

- Subject taught in one and —group work through translanguaging
- Contrasting of languages — metalinguistic discussion
- Multiple languages in a classroom
- Blending of the languages
- With bilingual separation

Topic#224

Complexity of Decisions

The emphasis should be on:

- ❖ Clarity of goals
- ❖ Understanding of consequences
- ❖ Evaluation of impact
- ❖ Training of the teachers
- ❖ Developing schools' leaders
- ❖ Support while making different decisions-complex

- ❖ Consideration of the sociocultural context
- ❖ Understanding of language attitudes of teachers and learners

Multiple:

- Approaches
- Methods
- Strategies

Topic#225

Approach and Methods

Bilingual education:

- ❖ Teacher's belief in the system important
- ❖ Multiple methods and approaches
- ❖ The complexity of context invites multiple approaches

Transmission approach:

- Knowledge as a series of facts- outside the knower
- Organization-simple to complex
- Learners' empty vessels
- Prevalent in traditional classrooms
- Accepted norm in society

Constructivist approach:

- ❖ Knowledge —a social negotiation
- ❖ Relevance to the context important
- ❖ Social context — relationships important
- ❖ Knowledge to be built on what the learners know
- ❖ Application of knowledge to social context important

Topic#226

Approach and Methods

Bilingual education:

- ❖ Teacher's belief in the system important
- ❖ Multiple methods and approaches
- ❖ The complexity of context invites multiple approaches

Transmission approach:

- Knowledge as a series of facts- outside the knower
- Organization-simple to complex
- Learners' empty vessels

Topic#227

Language of Instruction

Depends on:

- The approach used
- Design of the programme
- Methods and strategies

Choice based on:

- ❖ Position of strength
- ❖ Types of students and their age
- ❖ Involving of different learning styles

Focus on:

- Grammar approach
- Communicative approach
- Cognitive approach

Variation in:

- ❖ Extent of use of a language
- ❖ Choice of language of instruction
- ❖ Utilization of a language in relation to the other

Topic#228

Grammar Approach

Bilingual instruction important (Lessow Harley, 2005):

- ❖ Cognitive and language development linked
- ❖ Allows development of the school language
- ❖ Cognitive and language development linked
- ❖ Allows development of the school language
- ❖ Meaningful communication

Bilingual education:

- Always blends language and content
- Should encourage all languages

Three forms:

1) Grammar-transiation method out of vogue.
2) Direct method focusses on inference of grammar structures from repetitive patterns.
3) Audiolingual method— listening and practicing structures

The focus of grammar approach:

- Teaching and learning of grammar and structures
- Explicit instruction
- Practice of grammar

Topic#229

Communicative Approach

The focus:

- Meaningful language use
- Two forms
- Immersion method
- Integrated Content- based Instruction

Immersion Use:

- Promotes use of simplified contextualized language use
- Language and content objectives prepared concurrently

ICB-key features:

- Adaptation of immersion
- Focus on language and literacy
- Language teachers — rather than content teachers

Immersion method:

- Useful for revitalization of language
- Often used in immigration seducation

Immersion method- key features:

- Meaningful input
- Opportunities for interaction-wait time
- Carefully planned language connected to students' background

Topic#230

Cognitive Approach

The focus on:

- Construction of meaning through multiple language use

- Learner agency

Strategies:

- ❖ Skimming and scanning
- ❖ Selective listening
- ❖ Engaging with texts- note taking etc
- ❖ Asking for clarifications

Comparison with communicative approach:

- Both based on constructivist assumptions
- Focus difference- communication vs. metacognitive skills

Focus on:

- ❖ Developing metacognitive skills
- ❖ Learner autonomy
- ❖ Supporting declarative, procedural and conditional knowledge

Topic#231

Social Justice and Social Practices

Topics covered:

- Two basic pedagogical principles-interlinked
- Social justice
- Social practices

Table 13.2 Bilingual Education Pedagogy Principles

Social Justice	Social Practices
Equity	Interactions and involvement
Language of child / language tolerance	Language
Expect actions and rigor	Collaborate ion and group work
Assessment	Relevance

The need for:

- Transformative education (Cummins, 2000)
- Pedagogy that is based on the principle of social justice

Topic#232

Equity- Interactions and Involvement

Social justice equity:

1) Power dynamics either reinforced or challenged
2) Non-threatening to student identities
3) Culturally and linguistically responsive pedagogy
4) Equal opportunities to participate
5) Collaborative
6) Equity of language not time
7) No academic | trackin
8) Equal opportunities to participate
9) Collaborative
10) Equity of language not time

Collaborative Descriptive Inquiry:

- Opinions and voices in relation to text explored
- Non- interruption by teacher-shared understanding
- Disciplined

Social practices- Interactions:

- Meaningful not scripted
- Social construction of meaning
- Instructional conversations not

Three steps (Gibbons, 2002):

- Starting with open- ended questions
- Slowing down dialogue-wait time and response
- Responding to the meaning — listening carefully

Topic#233

Bilingualism and Tolerance

Effective pedagogy with:

- Use of home languages
- Developing home school connect
- Respecting communal values
- Availability of bilingual books
- Clear display of home languages
- Respect for plurilingualism even when standard is taught

Practices-language focus:

- Disciplinary and academic language
- Discussion about language style and structure
- Different genres

- Production of written and oral texts
- Critical language awareness (Fairclough, 1992; 1999)

Topic#234

Expectations and Rigour

High expectations and mutual respect:

- Amplify not simplify
- Environment which facilitates risk taking
- Not just remedial drills

Engage the students to:

- ❖ Synthesize
- ❖ Generalize
- ❖ Explain
- ❖ Hypothesize
- ❖ Arrive at conclusion

Focus on:

- Structure
- Vocabulary-high frequency words
- Style
- Metacognitive skills

Metacognition includes (Dermody & Speaker, (1995):

- ❖ Tracking thinking in relation to specific situations
- ❖ Monitoring comprehension
- ❖ Corrective action

Cooperative learning:

- Group work — different types and purposes
- Creating a reason for interaction
- Constructing meaning and problem solving
- Dictagloss
- Jigsaw puzzle
- Communicative gap
- Cognitively demanding tasks

Topic#235

Assessments & Relevance

Social justice focusses on:

- Formative assessments
- Validity of tests
- Performance assessment-what they can do in real life

Assessments may include:

- ❖ Integrative assessments
- ❖ Dictations
- ❖ Clozed passages

Focus on:

- Summative assessments
- High stakes- language of the test?

High relevance:

- ❖ Of subject matter to student experiences
- ❖ Inclusion of identity texts (Cummins, 2006)
- ❖ Involving parents and communities
- ❖ Relating classroom content to broader sociocultural context
- ❖ The 21st -century bilingualism is complex and dynamic

Remember me in your Prayers
