

ENG512

Mid-Term

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

1) How many languages are in Africa? 11
2) First language? Language from birth
3) Bilingualism is not a static and unitary phenomenon.
4) Absence of the second language (conceptual) Exogenous bilinguality
5) 2nd point of Three stage model words are separate but Grammar mix
6) Language for feelings thought, praying_____ internal function
7) Domains of language behavior may differ from setting to setting.
8) The differences between dialect and languages are made on the basis of size
9) Monolingual communication is Communicative
10) Dimensions of Bilingualism are interlinked to each other.
11) Bilingualism does not have a single definition.
12) Which of the following is not the characteristics of Research_____(Biased)
13) In Norway people show_____Solidarity
14) Which is not the form of Language mixing_____. (phonetic)
15) Folk culture are highly valued: (Norway)
16) Degree of maintenance or shift may be quite different in each of several distinguishable domains of language behavior. (Domain variance)
17) For speakers of a minority language in an ethnic community (Economic)
18) The use of certain languages may be maintained by the pressure of political circumstances (political)
19) We may admit that the concept of reference _____ enables us to recognize some invariables of habitual language choice in stable multilingual settings it does so only at a considerable risk (Group membership)
20) The interconnections between the two languages comprise association (Translation system)
21) Bilingual education is _____from traditional language education programs that teach a second or a foreign language. (different)
22) 'Words from the two languages did not belong to two different speech systems but to one .' unitary language system
23) Language shift is resisted more in intimate situations.
24) Degree of maintenance or shift may be quite different in conjunction with more formal, less formal and intimate communication (Fishman, 1965a).
25) In language learning habit formation is a process in_____Behaviourism
26) As we translange, we____Support system. maximize
27) Students work side by side in different languages, through___computer-assisted instruction
28) IN Co-languaging, where the content is presented to different language groups through facilitative PowerPoint

Compilation

Maha Malik's Compilation

29) Which of the following is not a part of curriculum arrangement developed by Cen Williams. Listening

30) European commission presented Erasmus in____1987

31) Equity of time mean equal distribution of ____time

32) which of the following is not in adults bilingual development? simple communication

33) when monoglossic ideologies persist, monolingualism and monolingual schools are the norm

34) Early scholars of bilingualism, only considered____ Control of two languages as a sign of bilingualism. native-like

35) CALP abbreviation Answer: Cognitive academic language proficiency

36) Every language community must become aware of it's position in a dynamic world system of language due to_____ Globalization

37) in which country ethnic language are considered as home languages? Singapore

38) which of the following languages were taught in 4000 to 5000 ages? Greek- Latin

39) What is first language? (after birth)

40) Majority of Language? (Multilingual)

41) Simultaneous bilingualism means: Two languages at birth

42) Criticism upon bilingualism in US is may be because of swelling: Immigrants

43) Studies on the language development of bilingual children are based on_____ of children's play. Video-recording

44) Which domain is subdivided into language instruction, subject of instruction, and language of recess and entertainment. The school

45) Degree of maintenance or shift is quite different in conjunction with more formal and intimate communication. Situation variance.

46) Two languages, spoken by a section of a population, but used in a complementary way, one language referred for certain function is known as _____ ? Diglossic.

47) Code switching follows a discrete_____ of its own. Grammar

48) Pidginization is an example of _____ ? Change

49) The unitary language system interrupts in an individual at the_____ stage. Early

50) Bilingualism is a _____ concept, which involves the questions of degree, function, alternation and interference. Relative.

51) Certain styles within every language are considered to be_____ of greater intimacy, informality. Indicators

52) Formal education is mostly criticized on in _____ language Formal

53) A social network may be seen as a boundless web of ties which reaches out through a whole society, linking people to one another.

54) Bilingual education is different from traditional language education programs that teach a second or a foreign language.

55) Social and psychological realities are simultaneous.

56) balanced bilingualism means equal proficiency in both languages.

57) Balanced bilingualism is a rare phenomenon.

58) A person's native speech is regarded as an integral part of his family background, a sign of his local identity.

59) Children from very young age are sensitive to the context, who they are speaking to and choose languages accordingly.

60) Language shift process occurs When two languages compete for use in the same situations.

61) Bilingualism is not a static and unitary phenomenon.

62) At the age of Three years the child is thought to have developed or to be developing two separate representations of his/her language systems.

Q. Volterra and Taeschner's Three-Stage Model

1. **Stage 1**: Initial unification of both lexical and syntactic subsystems.
2. **Stage 2**: Differentiation of the lexicon, but continued unification of syntax.
3. **Stage 3**: Differentiation of both lexicon and syntax.

Q. Difference: Additive vs Subtractive Bilingualism

- **Additive**: A second language is added *without losing* the first language. Both are maintained.
- **Subtractive**: The first language is gradually *lost or devalued* while acquiring the second language.

Q. Situational Variance

This refers to the variation in language use depending on the situation or social event. For example, a person may switch between formal and informal codes within the same setting when roles change (e.g., from business talk to casual chat).

Q. How Language Is Stored in the Mind (Bilingualism)

Swain's **Common Storage Model**: Rules of both languages are stored in a common location initially and later tagged separately through differentiation. This explains early bilingual mixing.

Q. Main Reasons for Language Contact

Language contact arises due to:

- **Voluntary**: Migration, personal choices
- **Structural/non-voluntary**: Colonialism, globalization, education policies, war, etc.
  Other reasons: religious affiliation, oppression, technology, and economic factors.

Bilingualism, Models, and Theories

- **Volterra and Taeschner Model**: 3 stages of bilingual development—undifferentiated lexicon/syntax → differentiated lexicon → differentiated lexicon and syntax.
- **Intentionality Model**: Language acquisition depends on the child's active participation and social engagement (Bloom & Tinker, 2002).
- **Sawin's Common Storage Model**: Both languages of a bilingual child are initially stored in a unified system before differentiation.
- **Macro vs. Micro Alternation**:
  - **Macro**: Alternating languages across subjects/lessons.
  - **Micro**: Alternating within a lesson (natural bilingual usage).
- **Monoliterate Bilingualism**: Literacy is developed only in the dominant language; the native language is used only orally (e.g., Mali's pedagogy).
- **Flexible Bilingualism**: Modern bilingual education must allow dynamic, translanguaging-based methods that go beyond "1+1" bilingualism.
- **Multiple Bilingualism**: Fluency in more than two languages; common in multilingual societies, e.g., South Asia.
- **Translanguaging**: Dynamic use of multiple languages in a fluid, integrated way. Key characteristics include flexibility, dynamicity, and support of bilingual discourse.
- **Translanguaging vs. Code-Switching**:
  - *Translanguaging*: Strategic and pedagogical, used for meaning-making.
  - *Code-switching*: Typically alternates languages at sentence/word level.

Q. Key Concepts & Definitions

- **Additive vs. Subtractive Bilingualism**:
  - *Additive*: Two languages are maintained.
  - *Subtractive*: One replaces the other; common in Pakistan when L1 (e.g., Punjabi) is lost while learning English.
- **Semilingualism**: When a bilingual child shows lower performance in both languages compared to monolingual peers (now outdated).
- **Balanced vs. Dominant Bilingualism**:
  - *Balanced*: Equal competence in both languages (rare).
  - *Dominant*: One language stronger than the other; context/task dependent.
- **Language Shift vs. Language Attrition**:
  - *Shift*: Community-wide language loss.
  - *Attrition*: Individual's gradual language loss.
- **Indexicality in Linguistics**: Language signals social identity and group membership.
- **Unitary System of Language**: Early bilinguals treat both languages as one system before separation.

Q. Educational & Sociopolitical Themes

- **Skutnabb-Kangas on Linguicism**: Discrimination via language that restricts educational access to those who speak dominant languages.

- **Language Sanctity**: Language associated with sacredness and identity; e.g., Urdu in Pakistan symbolizes national identity.
- **Language as Choice**: Language acquisition is not neutral but a political and social choice, shaped by power and opportunity.
- **Language Policy Enterprise Dimensions**: Political, ideological, educational, and identity-based concerns in policymaking.
- **Power Dynamics in Language**: Language policies often preserve elite privilege; e.g., imposition of standard English in minority schools.
- **Symbolic Violence**: Language-based discrimination through institutional norms, promoting some dialects over others.

Q. Pedagogical Applications

- **Transformative Pedagogy**: Embraces learners' real-life language practices, integrating them into academic language teaching.
- **Convergent Bilingual Teaching**: Simultaneous use of home and school languages; encourages storytelling, dialogue, and comprehension.
- **Responsible Code-Switching**: Pedagogically planned alternation to aid understanding; not random mixing.
- **Transitional Bilingual Education**: Uses native language initially, gradually shifting to dominant language instruction.
- **Three Dimensions of Bilinguality**: Cognitive, social, and emotional access to two languages.
- **Learning Methods under Communicative Approach**: Emphasis on meaning, real-life use, and social interaction in learning.

Q. Children vs. Adults in Bilingualism

- **Three Differences in Development**:
    1. Adults use **metalinguistic awareness** better.
    2. Children are more **immersed and contextualized**.
    3. Adults learn faster with structured support.
- **Metalinguistic Awareness**: Bilinguals develop higher awareness than monolinguals due to constant comparison of language rules.
- **Cognitive Advantage**: Bilinguals outperform monolinguals in tasks requiring cognitive flexibility, attention, and problem-solving.

Q. Social Interaction & Identity

- **Bilingualism Enriches Family Relations**: Facilitates connection with extended family across generations and cultures.
- **Attitudes Toward Bilinguals**:
    - *Personal*: Pride, conflict, or neutrality.
    - *Societal*: Acceptance or discrimination depending on language prestige.
- **Three Language Choice Processes**:

1. Social pressure

2. Institutional influence
3. Identity assertion.

- **Three Uses of Language**:
  - Expressive
  - Referential
  - Interactional.

Q. Other Key Terms & Concepts

- **Diglossia**: Use of high (formal) and low (informal) language varieties in a community.
- **Constructive Language**: Language use builds relationships, identities, and power structures.
- **Language Configuration**: Arrangement of language functions, power, and roles in multilingual settings.
- **Language Functions Are Universal**: All languages serve basic functions: expressive, referential, and interactional.
- **Cognates**: Words that share origin and meaning across languages (e.g., "information" in English and French).
