Q. Elements / basic elements of sign language
Ans: Sign languages use hand shapes, movement, location, orientation, facial expressions, and non-manual markers. They are natural languages with their own grammar and are not universal.

Q. Language policy
Ans: Language policy refers to decisions about language use in a society. It includes language management, language practices, and language beliefs/ideology. It shapes identity, power, and access to resources.

Q. Translanguaging (definition + characteristics)
Ans: Translanguaging is the use of a bilingual's full linguistic repertoire to communicate and learn. Characteristics include flexible language use, meaning-making, inclusion, and cognitive support.

Q. Translanguaging vs code-switching
Ans: Translanguaging blends languages as one system for meaning. Code-switching alternates between two separate languages based on context.

Q. Dynamic vs receptive bilingualism
Ans: Dynamic bilingualism is flexible, adaptive language use. Receptive bilingualism means understanding a language without speaking it fluently.

Q. Flexible bilingualism
Ans: Flexible bilingualism is adapting language use according to context, purpose, and audience.

Q. Multiple bilingualism
Ans: Ability to use more than two languages with different proficiency levels.

Q. Phonological language borrowing (with example)
Ans: Borrowing of sounds from another language, e.g., English "th" sound approximated in Japanese.

Q. Subtractive bilingualism (Pakistan)
Ans: Learning English at the cost of Urdu or regional languages, causing language loss.

Q. Additive bilingualism
Ans: Learning a second language while maintaining the first language.

Q. Monoliterate bilingualism
Ans: Speaking two languages but literacy in only the dominant language.

Q. Macro vs micro alternation
Ans: Macro alternation assigns languages to subjects or courses. Micro alternation mixes languages within lessons.
