

ENG513

Mid-Term (Solved)

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Maha Malik

Language Teaching Methods

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q. Human language well-crafted and well organized comments (Topic #02)

We all know that human language is a well-organized and well-crafted instrument. That is to say, all the basic components of a language work in tandem in a coherent and systematic manner. They are certainly not a random collection of disparate units. From one perspective, a study of language is basically a study of its systems and subsystems. By treating language as a system, we are merely acknowledging that each unit of language, from a single sound to a complex word to a large text—spoken or written—has a character of its own, and each is, in some principled way, delimited by and dependent upon its co-occurring units. As we learn from any introductory textbook in linguistics, the core of language as a system consists of the phonological system that deals with the patterns of sound, the semantic system that deals with the meaning of words, and the syntactic system that deals with the rules of grammar.

Q. "Study of language is a study of its systems and subsystems. Elaborate. 5 (Topic #02)

Language as a system enables the language user to combine phonemes to form words, words to form phrases, phrases to form sentences, and sentences to form spoken or written texts—each unit following its own rules as well as the rules for combination. Crucial to understanding language, then, is the idea of systematicity. Language as a system, however, is much more complex than the description. A true understanding of the complexity of language requires a robust method of analysis. Using this "prewired" system, children are able to distill and develop the complex grammatical system out of the speech of their parents and caretakers. The system that the child is born with is common to the grammars of all human languages, and hence Chomsky calls it "Universal Grammar."

Q. Define any two meta-functions of language purposed by Halliday (Topic #3)

1. The ideational function represents the individual's meaning potential and relates to the expression and experience of the concepts, processes, and objects governing the physical and natural phenomena of the world around.
2. The interpersonal function deals with the individual's personal relationships with people.
3. The textual function refers to the linguistic realizations of the ideational and interpersonal functions enabling the individual to construct coherent texts, spoken or written.

Q. Halliday prefer culture learning to mind learning define (Topic #3)

For Halliday, language communication is the product or the result of the process of interplay between the ideational, interpersonal, and textual functions of language. Through this interplay, the meaning potential of language is realized. Learning a language then entails learning to mean. As the child interacts with language and language users, he or she begins to understand the meaning potential within the language, and develops a capacity to use it. It is only through meaningful interactive activities in communicative contexts that a learner broadens and deepens the capacity for language use. And, language use is always embedded in a sociocultural milieu. That is why Halliday (1973) preferred to define meaning potential not in terms of the mind but in terms of the culture."

Q. Hymes (1972) identified these factors, and has used an acronym SPEAKING to describe them. (Topic #3)

- Setting refers to the place and time in which the communicative event takes place.
- Participants refer to speakers and hearers and their role/relationships.
- Ends refer to the stated or unstated objectives the participants wish to accomplish.
- Act sequence refers to the form, content, and sequence of utterances.

- Key refers to the manner and tone (serious, sarcastic, etc.) of the utterances.

Q. Three components of Austin's speech act theory (Topic #3)

1. In performing a locutionary act, one often performs such an act as ―asking or answering a question, giving some information or an assurance or a warning, announcing a verdict or an intention, pronouncing sentence, making an appointment or an appeal or a criticism, making identification or giving a description, and the numerous like.
2. The perlocutionary act is the effect or the consequence of an utterance in a given situation.
3. For it to have what Austin calls illocutionary force, a speech act has to meet certain socially agreed upon demands or conventions. For instance, a statement like I now pronounce you man and wife has its intended illocutionary force only if it is uttered in a proper context (e.g., a church) and by a proper person (e.g., a priest). The same statement uttered by a clerk in a department store will not render two customers a married couple!

The statement gains its illocutionary force only because of the situational context in which it is uttered.

Q. Write any two language ideologies by Kristoky who thinks it is profitable to take language as ideaologies 5 (Topic #4)

- **First**, "language ideologies represent the perception of language and discourse that is constructed in the interests of a specific social or cultural group" (p. 8). That is, notions of language and discourse are grounded in social experience and often demonstrably tied to the promotion and protection of politicaleconomic interests.
- **Second**, "language ideologies are profitably conceived as multiple because of the multiplicity of meaningful social divisions (class, gender, clan, elites, generations, and so on) within sociocultural groups that have the potential to produce divergent perspectives expressed as indices of group membership" (p. 12). That is, language ideologies are grounded in social experiences that are never uniformly distributed across diverse communities.

Q. LTM in ancient time (Topic #7)

The history of the consideration of foreign language teaching goes back at least to the ancient Greeks. They were interested in what they could learn about the mind and the will through language learning. The Romans were probably the first to study a foreign language formally. They studied Greek, taught by Greek tutors and slaves. Their approach was less philosophical and more practical than that of the Greeks. In the Western world back in the 17th, 18th and 19th centuries, foreign language learning was associated with the learning of Latin and Greek, both supposed to promote their speakers' intellectuality. At the time, it was of vital importance to focus on grammatical rules, syntactic structures, along with rote memorization of vocabulary and translation of literary texts. There was no provision for the oral use of the languages under study; after all, both Latin and Greek were not being taught for oral communication but for the sake of their speakers' becoming "scholarly" or creating an illusion of "erudition." Late in the nineteenth century, the Classical Method came to be known as the Grammar Translation Method, which offered very little beyond an insight into the grammatical rules attending the process of translating from the second to the native language.

Q. David numan " one size fit all" jo approach iss k koi methods k naam btna tha (Topic #10)

David Nunan (1989, p. 97) referred to these methods as "designer" methods, on the grounds that they took a "onesize-fits-all" approach.

Q. professional theory. (Topic #11)

ENG513_Language Teaching Methods
Mid-Term (Solved)

A professional theory is a theory which is created and perpetuated within the professional culture. It is a theory which is widely known and understood like the developmental stages of Piaget. Professional theories are generally transmitted via teacher/professional training in colleges, polytechnics and universities. Professional theories form the basis of a shared knowledge and understanding about the "culture" of teaching and provide the opportunity to develop discourse on the implicit and explicit educational issues raised by these theoretical perspectives.

Q. View of language 5 marks (Topic #11)

The first, and the most traditional of the three, is the structural view, the view that language is a system of structurally related elements for the coding of meaning. The target of language learning is seen to be the mastery of elements of this system, which are generally defined in terms of phonological units (e.g., phonemes), grammatical units (e.g., clauses, phrases, sentences, grammatical operations). The second view of language is the functional view, the view that language is a vehicle for the expression of functional meaning. The communicative movement in language teaching subscribes to this view of language. This theory emphasizes the semantic and communicative dimension rather than the grammatical characteristics of language, and leads to a specification and organization of language teaching content by categories of meaning and function rather than by elements of structure and grammar.

Q. define methods in own views and chose two methods, write area indicator. (Topic #13)

A method is an application of an approach in the context of language teaching. An example of a method is the grammar-translation method. This method employs the memorization of various grammar rules and the translation of second language material to the student's native language. Students were able to develop the intellectual capacity to understand the new language through a deductive process of acquiring the rules of the language. The purpose is not to critique this method but to show how it was derived from the approach that the mind needs to be trained through intellectual exercises to be able to accomplish something.

- language-centered methods,
- learner-centered methods, and
- learning-centered methods

Q. What do you understand by "learning-centered Method". Give your answers in 3-4 lines. Also enlist any two methods. (Topic #14)

Learning-centered methods are those that are principally concerned with learning processes. These methods (e.g., the Natural Approach) seek to provide opportunities for learners to participate in open-ended meaningful interaction through communicative activities or problem solving tasks in class. The assumption is that a preoccupation with meaning-making will ultimately lead to grammatical as well as communicative mastery of the language, and that the learners can learn through the process of communication. In this approach, unlike the other two, language development is considered more incidental than intentional. According to learning-centered methods, language development is a non-linear process, and therefore, does not require preselected, pre-sequenced systematic language input but requires the creation of conditions in which learners can engage in meaningful activities in class. Proponents of learning-centered methods believe that language is best learned when the learner's attention is focused on understanding, saying and doing something with language, and not when their attention is focused explicitly on linguistic features.

Q. What is technique (Topic #15)

ENG513_Language Teaching Methods
Mid-Term (Solved)

A technique is implementation that which actually takes place in a classroom. It is a particular trick, stratagem, or contrivance used to accomplish an immediate objective. Techniques must be consistent with a method, and, therefore, in harmony with an approach as well. (Anthony, 1963, pp. 63-67). Example of technique: a common technique when using video material is called "silent viewing". This is where the teacher plays the video with no sound. Silent viewing is a single activity rather than a sequence, and as such is a technique rather than a whole procedure.

Q. What is a Theory? (TOPIC #15)

A theory is a system of assumptions, principles, and relationships posited to explain a specified set of phenomena. A methodology is often a whole set of methods developed according to a philosophical theory about how best to research and learn about natural or social phenomena.

Q. it is being debatable in Pakistan English language teachers are ignorant..... It is so far.... Do you agree? (Topic #18)

There is a lot more to English language teaching than merely slogging at grammar or cramming vocabulary for the sake of learning it. It is taught either as an abstract system (grammar) dealing with de-contextualized meaning or as communication dealing with contextualized meaning. Unfortunately, far too many teachers who are teaching English are truly ignorant of the broader communicative concept of English language teaching. They are teaching only 'syntax' in the name of grammar.

Q. ELT in Pakistan. Explain briefly. (Topic #18)

The practicality of the English language opens innumerable prospects in the social and financial world. Regrettably, in Pakistan, the way English language is taught leaves barely any ground for learners to properly incorporate this language in their daily communication. The major source of learning English in Pakistan is our school classrooms where, ironically, teaching amounts to nothing more than English spelling drills, some formal grammatical constructions, and precise definitions for an endless array of words which make the subject appear desolate.

Q. 3 issues in speaking or listening skills (Topic #21)

Classroom resources, unmotivated teachers, disinterested students, inadequate curriculum, non availability of teachers and textbooks.

Q. In Pakistani context name any 5 aspects which need to be considered while teaching reading in English? (Topic #22)

- Pakistani linguistic situation
- Social context
- Status of reading in English
- School system in Pakistan
- Use of Grammar Translation method

Q. Why writing skill of Pakistani students is poor? Reasons? (Topic #23)

- Situation in schools, colleges and universities
- Teaching writing: Practices in Pakistan
- Teacher training
- Writing skill and Pakistani examination system

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q. Low proficiency of language in Pakistan five reasons 5 marks (Topic #24)

- Bifurcated streams of education
- Methods‘ choices and SL Proficiency
- SL proficiency and difference in public and private schools
- Focus on reading and writing
- De-contextualized teaching and learning of English

Q. Role of HEC (Topic #25)

In order to bring qualitative improvement in English Language Teaching and Learning, Higher Education Commission in 2004 launched its exclusive language based project titled ‘English Language Teaching Reforms (ELTR)’. This project aims at building the capacity of English Language Teachers in higher education sector in Pakistan for effective and sustainable development. The project is part of the overall vision of prospective plan 2020, and pertains to human resource development in English Language Teaching and research in Higher Education. After the successful phase I, which catered 1398 teachers of colleges and universities, the ELTR launched its Phase II in 2010. The initial target was of professional training of 1400 ELT teachers through its Long and Short Term professional development programs.

Q. 3 strength of GTM (Topic #27)

1. Forming good academic knowledge of the target language
2. Training grammar accuracy
3. Developing students‘ memory

Q. Why GTM ineffective in teaching or Q. What are the major weaknesses of using Grammar Translation Method? (Topic #28)

- the lack of using language for communicative purposes
- lack of development of communicative skills
- little, if any, experience of speaking and listening

Q. why the learner are inefficient and tedious in GTM. (Topic #29)

- It doesn’t sound very motivating for a learner.
- It doesn’t sound trustworthy for a teacher.
- The mainstay of classroom materials for the grammar–translation method is the textbook.

Q. Describe GTM in Pakistani classroom? (Topic #30)

- Use of GTM in Pakistani schools
- Medium of instruction
- Streams of education
- Public vs. private
- Matriculation vs. O’levels

Q. Aims of direct method (Topic #31)

- DMT aims to build a direct way into the world of the target language making a relation between experience and language, word and idea, thought and expression, and rule and performance.
- It intends for students to learn how to communicate in the target language.

- DMT believes that learner should experience the new language in the same way as he/she experienced his/her mother tongue without considering the existence of his/her mother tongue.

Q. Advantages of DM (Topic # 33)

- Facilitates understanding of language
- Understanding of the target language becomes easier due to the inhibition of the linguistic interferences from the mother tongue
- It establishes bond between contexts
- Improves fluency of speech

Q. threats of direct method. (Topic #33)

- Lack of explicit rules lead to various misinterpretations and problems in creative use of language
- Time consuming drilling
- Ignores systematic written work and reading activities.
- Supports only limited vocabulary.
- Only the clever child can profit by this method.

Q. Structural situational principles ,selection, gradation and presentation (Topic #36)

- It primarily centered on the triple principles of selection, gradation, and presentation.
- Selection deals with the choice of lexical and grammatical content,
- Gradation with the organization and sequencing of content, and
- Presentation with the aims and activities of classroom teaching.

Q. language is a series of habit. (Topic #37)

Language learning is just a process of mechanical habit formation through repetition. Forming a habit, in the context of language learning, is described as developing the ability to perform a particular linguistic feature such as a sound, a word, or a grammatical item automatically, that is, without paying conscious attention to it. Such a habit can be formed only through repeated practice aided by positive reinforcement. Bloomfield (1942), a prominent structural linguist, in his Outline Guide for the Practical Study of Foreign Language, articulated the structuralists' view of language learning very succinctly: "The command of a language is a matter of practice, practice everything until it becomes second nature" (p. 16). He also emphasized that "Language learning is overlearning: Anything else is of no use" (p. 12)

Q. Characteristic of audio lingual method (Topic #37)

- language learning is habit-formation, mistakes are bad and should be avoided, as they are considered bad habits,
- language skills are learned more effectively if they are presented orally first,
- then in written form, analogy is a better foundation for language learning than analysis,
- the meanings of words can be learned only in a linguistic and cultural context.

Q. what is the correct order in which language skills are taught? (Topic # 39)

The language skills are taught in the order of listening, speaking, reading, and writing. Listening is viewed largely as training in aural discrimination of basic sound patterns. The language may be presented entirely orally at first; written representations are usually withheld from learners in early stages.

Q. audio lingual method procedure (Topic #39)

- The modeling of all learning by the teacher.
- The subordination of the mother tongue to the second language by rendering.
- English is inactive while the new language is being learned.

Q. Activity of audio lingual method (Topic #39)

The main activities include reading aloud dialogues, repetitions of model sentences, and drilling. Key structures from the dialogue serve as the basis for pattern drills of different kinds. Lessons in the classroom focus on the correct imitation of the teacher by the students. Not only are the students expected to produce the correct output, but attention is also paid to correct pronunciation. Although correct grammar is expected in usage, no explicit grammatical instruction is given. It is taught inductively. Furthermore, the target language is the only language to be used in the classroom.

Q. Audio lingual method enlist 5 types of drill? (Topic #39)

- Backward build up (expansion) drill
- Repetition drill
- Chain drill
- Single-slot substitution drill
- Multiple-slot substitution drill

Q. total physical response method (Topic #41)

TPR is a language teaching method built around the coordination of speech and action; it attempts to teach language through physical (motor) activity. Developed by James Asher, a professor of psychology at San Jose State University, California. Asher sees successful adult second language learning as a parallel process to child's first language acquisition. He claims that speech directed to young children consists primarily of commands, which children respond to physically before they begin to produce verbal responses. He feels that adults should recapitulate the processes by which children acquire their native language. A method that involves game-like movements reduces learner stress, he believes, and creates a positive mood in the learner, which facilitates learning.

Q. Three hypothesis of Asher . (Topic #42)

1. Children develop listening competence before they develop the ability to speak.
2. Children's ability in listening comprehension is acquired because children are required to respond physically to spoken language.
3. Once a foundation in listening comprehension has been established, speech evolves naturally and effortlessly out of it.

Q. how does James Asher creator of the Total Physical Response Method, view stress in the act of learning? Or Q. Understand stress and define how students deal with stressful situations 5 (Topic #42)

An important condition for successful language learning is the absence of stress. First language acquisition takes place in a stress-free environment, according to Asher; whereas the adult language learning environment often causes considerable stress and anxiety. The key to stress free learning is to tap into the natural bio-program for language development and thus to recapture the relaxed and pleasurable experiences that accompany first language learning. By focusing on meaning interpreted through movement, rather than on language forms studied in the abstract, the learner is said to be liberated from self-conscious and stressful situations and is able to devote full energy to learning.

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q. Brain lateralization in total physical response (Topic #42)

Right- brain learning: Asher sees Total Physical Response as directed to rightbrain learning, whereas most second language teaching methods are directed to leftbrain learning. Drawing on the works by jean Piaget, Asher holds that the child language learner acquires language through motor movement - a right hemisphere activity. Righthemisphere activities must occur before the left hemisphere can process language for production.

Similarly, the adult should proceed to language mastery through right-hemisphere motor activities, while the left hemisphere watches and learns. When a sufficient amount of right hemisphere learning has taken place, the left hemisphere will be triggered to produce language and to initiate other, more abstract language processes.

Q. Define two central processes of bio program. (Topic #42)

1. Children develop listening competence before they develop the ability to speak.
2. Children's ability in listening comprehension is acquired because children are required to respond physically to spoken language.

Q. objectives of physical response method (Topic # 43)

The general objectives of TPR are to teach oral proficiency at a beginning level. Comprehension is a means to an end, and the ultimate aim is to teach basic speaking skills. A TPR course aims to produce learners who are capable, of an uninhibited communication that is intelligible to a native speaker. In TPR some goals are to be set and these are attainable through the use of action- based drills in the imperative form.

Q. Difference silence and repetition in silent method (Topic #47)

Silence	Repetition
Silence is considered the best vehicle for learning, because in silence, students concentrate on the task to be accomplished and the potential means to its accomplishment.	Repetition (as opposed to silence) "consumes time and encourages the scattered mind to remain scattered" (Gattegno 1976: 80)

Q. according to Gattegno " is the second language is different radically from the ist language" (TOPIC #47)

Having referred to these processes, however, Gattegno states that the processes of learning a second language are "radically different" from those involved in learning a first language: The second language learner is unlike the first language learner and "cannot learn another language in the same way because of what he now knows" (Gattegno 1972, p. 11). The "natural" or direct" approaches to acquiring a second language are thus misguided, says Gattegno, and a successful second language approach will "replace a `natural' approach by one that is very `artificial' and, for some purposes, strictly controlled" (1972, p. 12).

Q. What do the term inner criteria mean? (Topic #47)

Silent Way learners acquire "inner criteria," which play a central role "in one's education throughout one's life" (Gattegno 1976: 29). These inner criteria allow learners to monitor and self-correct their own production. It is in the activity of self-correction through self-awareness that the Silent Way claims to differ most notably from other ways of language learning. It is this capacity for self-awareness that the Silent Way calls upon, a capacity said to be little appreciated or exercised by first language learners.

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q. Items in Silent Way method in pronunciation lesson class (Topic #49)

Silent Way materials consist mainly of a set of colored rods, color-coded pronunciation and vocabulary, wall charts, a pointer, and reading/writing exercises, all of which are used to illustrate the relationships between sound and meaning in the target language.

Q. Community language learning draws on the counseling what the role of counseling? (Topic #51)

CLL is the name of a method developed by Charles A. Curran and his associates. Curran was a specialist in counseling and a professor of psychology at Loyola University, Chicago. His application of psychological counseling techniques to learning is known as counseling-Learning. CLL represents the use of Counseling-Learning theory to teach languages. As the name indicates, CLL derives its primary insights, and indeed its organizing rationale, from Rogerian counseling (Rogers 1951). In lay terms, counseling is one person giving advice, assistance, and support to another who has a problem or is in some way in need. Community Language Learning draws on the counseling metaphor to redefine the roles of the teacher (the counselor) and learners (the clients) in the language class-room. The basic procedures of CLL can thus be seen as derived from the counselor-client relationship.

Q. Humanistic technique (TOPIC #51)

Moskowitz defines humanistic techniques as those that blend what the student feels, thinks and knows with what he is learning in the target language. Rather than self-denial being the acceptable way of life, self-actualization and selfesteem are the ideals that the exercises pursue. The techniques help build rapport, cohesiveness, and caring that far transcend what is already there to help students to be themselves, to accept themselves, and be proud of themselves, and help foster a climate of caring and sharing in the foreign language class (Moskowitz 1978, p. 2). In sum, humanistic techniques engage the whole person, including the emotions and feelings (the affective realm) as well as the linguistic knowledge and behavioral skills. Q. language alternation explains with the help of CLl. (Topic #51) Students know the meaning and flow of an L2 message from their recall of the: parallel meaning and flow of an L1 message. They begin to holistically piece together a view of the language out of these message sets. In CLL, a learner presents a message in L1 to the knower. The message is translated into L2 by the knower. The learner then repeats the message in L2, addressing it to another learner with whom he or she wishes to communicate. CLL learners are encouraged to attend to the "overhears" they experience between other learners and their knowers. The result of the "overhear" is that every member of the group can understand what any given learner is trying to communicate (La Forge 1983: 4S)

Q. Three task of foreign language learners (Topic #52)

1. "to apprehend the sound system,
2. assign fundamental meanings, and
3. Construct a basic grammar of the foreign language."

Q. activities in community language teaching (Topic #53)

Translation. Learners form a small circle. A learner whispers a message or meaning he or she wants to express, the teacher translates it into (and may .interpret it in) the target language, and the learner repeats the teacher's translation.

Group-work: Learners may, engage in various group tasks, such as small-group discussion of a topic, preparing a conversation, preparing a summary of a topic, preparing a story that will be presented to the teacher and the rest of the class.

Recording: Students record conversations in the target language.

Transcription: Students transcribe utterances and conversations they have recorded for practice and analysis of linguistic forms.

Analysis: Students analyze and study transcriptions of target-language sentences in order to focus on particular lexical usage.

Q. role of material in CLL (Topic # 54)

Since a CLL course evolves out of the interactions of the community, a textbook is not considered a necessary component. A textbook would impose a particular body of language content on the learners, thereby impeding their growth and interaction. Materials may be developed by the teacher as the course develops, although these generally consist of little more than summaries on the blackboard or overhead projector of some of the linguistic features of conversations generated by students. Conversations may also be transcribed and distributed for study and analysis, and learners may work in groups to produce their own materials, such as scripts for dialogues and mini-dramas

Q. what is the role of students in community language learning (Topic #54)

Learner roles in CLL are well defined. Learners become members of a community - their fellow learners and the teacher - and learn through interacting with the community. Learning is not viewed as an individual accomplishment but as something that is achieved collaboratively. Learners are expected to listen attentively to the knower, to freely provide meanings they wish to express, to repeat target utterances without hesitation, support fellow members of the community, to report deep inner feelings and frustrations as well as joy and pleasure, and to become counselors of other learners. CLL learners are typically grouped in a circle of six to twelve learners, with the number of knower varying from one per group to one per student.

Q. 3 functions on music therapy. (Topic #56)

1. To facilitate the establishment and maintenance of personal relations;
2. To bring about increased self-esteem through increased self-satisfaction in musical performance; and
3. To use the unique potential of rhythm to energize and bring order.

Q. Characteristic suggestopedia (Topic #56)

Suggestopedia, also known as Desuggestopedia, is a method developed by the Bulgarian psychiatrist-educator Georgi Lozanov. Suggestopedia is a specific set of learning recommendations derived from Suggestology, which Lozanov describes as a "science concerned with the systematic study of the non-rational and/or non-conscious influences" that human beings are constantly responding to (Stevick 1976, p. 42 The most conspicuous characteristics of Suggestopedia are the decoration, furniture, and arrangement of the classroom, the use of music, and the authoritative behavior of the teacher. The claims for suggestopedic learning are dramatic. "There is no sector of public life where suggestology would not be useful" (Lozanov 1978, p. 2). "Memorization in learning by the suggestopedic method seems to be accelerated 25 times over that in learning by conventional methods." (Lozanov 1978, p. 27) Lozanov acknowledges ties in tradition to yoga and Soviet psychology. From raja-yoga, Lozanov has borrowed and modified techniques for altering states of consciousness and concentration, and the use of rhythmic breathing. From Soviet psychology, Lozanov has taken the notion that all students can be taught a given subject matter at the same level of skill.

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q. Why was the whole language instruction methods develop 2 3 line (Topic #61)

Whole Language instruction is a theory of language instruction that was developed to help young children learn to read, and has also been extended to middle and secondary levels and to the teaching of ESL.

Q. Define term phonic (Topic #61)

A focus on teaching the separate components of language such as grammar, vocabulary, and word recognition, and in particular, the teaching of phonics. Phonics is based on the theory that reading involves identifying letters and turning them into sounds

Q. What do thing about the authenticity emphasis in Whole language method (Topic #63)

The use of authentic literature rather than artificial, specially prepared texts and exercises designed to practice individual reading skills.

Q. Briefly explain any five major principles whole language instruction (Topic #63)

- the use of authentic literature rather than artificial, specially prepared texts and exercises designed to practice individual reading skills
- a focus on real and natural events rather than on specially written stories that do not relate to the students' experience
- The reading of real texts of high-interest, particularly literature.

Q. Role of learner in whole language classroom. (Topic #64)

The learner is a collaborator, collaborating with fellow students, with the teacher, and with writers of texts. Students are also evaluators, evaluating their own and others' learning, with the help of the teacher. The learner is selfdirected; his or her own learning experiences are used as resources for learning. Students are also selectors of learning materials and activities. "Choice is vital in a whole language class, because without the ability to select activities, materials, and conversational partners, the students cannot use language for their own purposes" (Rigg 1991, p. 526).

Q. Constructivist Learning theory? (Topic #65)

Constructivist learning theory holds that knowledge is socially constructed, rather than received or discovered. Thus, constructivist learners "create meaning," "learn by doing," and work collaboratively in mixed groups on “common projects”. Rather than transmitting knowledge to students, teachers collaborate with them to create knowledge and understanding in their mutual social context. Rather than seeking to "cover the curriculum," learning focuses on the learners' experience, needs, interests, and aspirations.

Q. activities of whole language instruction. (Topic #65)

- individual and small group reading and writing
- ungraded dialogue journals
- writing portfolios
- writing conferences

Q. Gardiner 1993 notes that traditional IQ tests measure only logic and language, yet the brain has other important types of intelligence comment in 4,5 lines (Topic #66)

Gardner notes that traditional IQ tests measure only logic and language, yet the brain has other equally important types of intelligence. Gardner argues that all humans have these intelligences, but people differ

in the strengths and combinations of intelligences. He believes that all of them can be enhanced through training and practice. MI thus belongs to a group of instructional perspectives that focus on differences between learners and the need to recognize learner differences in teaching. Learners are viewed as possessing individual learning styles, preferences, or intelligences.

Q. Five native intelligence that Gardner suggest for eight dimensional model of intelligence (Topic #66)

- Linguistic: the ability to use language in special and creative ways, which is something lawyers, writers, editors, and interpreters are strong in.
- Logical/mathematical: the ability to think rationally, often found with doctors, engineers, programmers, and scientists.
- Spatial: the ability to form mental models of the world, something architects, decorators, sculptors, and painters are good at.
- Musical: a good ear for music, as is strong in singers and composers.
- Bodily/kinesthetic: having a well-coordinated body, something found in athletes and craftspersons.

Q. Objectives of multiple intelligence. (Topic #68)

There are no goals stated for MI instruction in linguistic terms. MI pedagogy focuses on the language class as the setting for a series of educational support systems aimed at making the language learner a better designer of his/her own learning experiences. Such a learner is both, better empowered and more fulfilled than a learner in traditional classrooms. A more goal directed learner and happier person is held to be a likely candidate for being a better second language learner and user.

Q. Two stages of multiple intelligence. (Topic #70)

Stage 1: Awaken the Intelligence. The teacher brings many different objects to class. Students experience feeling things that are soft, rough, cold, smooth, and so on. They might taste things that are sweet, salty, sour, spicy, and so on. Experiences like this help activate and make learners aware of the sensory bases of experience.

Stage 2: Amplify the Intelligence. Students are asked to bring objects to class or to use something in their possession. Teams of students describe each object attending to the five physical senses. They complete a worksheet including the information they have observed and discussed

Q. Neurolinguistic Programming? (TOPIC #71)

neuro: Referring to the mind or brain, particularly regarding how states of mind (and body) affect communication and behavior. NLP teaches a structural way of viewing mind and body states, developing mental maps that show how things happen and how to change course.

Linguistic: Meaning that our mind and body states are revealed in our language and non-verbal communication. Language is the tool we use to gain access to the inner workings of the mind. Neurolinguistic programming language patterns teach us how to access unconscious information that would remain vague and unknowable otherwise.

Programming: This refers to the capacity to change our mind and body states. You've heard the term living on autopilot, right? To someone trained in NLP, this would mean that you are living according to your programming, which consists of habitual thoughts, feelings, reactions, beliefs, and traditions. Someone trained in neuro-linguistic programming knows how such programs are structured in the mind and how to

access them through conversation (language) so that outdated programs and autopilot behaviors can be changed.

Q. Two principles of NLP (TOPIC #72)

Outcomes: the goals or ends. NLP claims that knowing precisely what you want helps you achieve it. This principle can be expressed as "know what you want."

Rapport: a factor that is essential for effective communication maximizing similarities and minimizing differences between people at a non-conscious level. This principle can be expressed as "Establish rapport with yourself and then with others."

Q. Lexical Approach in language teaching. 3 (Topic #76)

Lexical approaches in language teaching reflect a belief in the centrality of the lexicon to language structure, second language learning, and language use, and in particular to multiword lexical units or "chunks" that are learned and used as single items. Linguistic theory has also recognized a more central role for vocabulary in linguistic description. Lexical approaches in language teaching seek to develop proposals for syllabus design and language teaching founded on a view of language in which lexis plays the central role.

Q. Give Trinomial example (0r any one of them) (Topic #77)

- **Binomials**: clean and tidy, back to front
- **Trinomials**: cool, calm, and collected
- **Idioms**:. dead drunk, to run up a bill
- **Similes**: as old as the hills
- **Connectives**: finally, to conclude
- **Conversational gambits**: Guess what!

Q. Lexical approach assumptions? (Topic #77)

- Encountering new learning items on several occasions is necessary, but requires sufficient conditions for learning to occur.
- Noticing lexical chunks or collocations is necessary but does not have sufficient condition for "input" to become "intake."
- Noticing similarities, differences, restrictions, and examples contributes to turning input into intake, although formal description of rules probably do not help.

Q. Write the role of learner in lexical method (TOPIC #79)

Others propose that learners make use of computers to analyze text data previously collected or made available "free-form" on the Internet. Here the learner assumes the role of data analyst constructing his or her own linguistic generalizations based on examination of large corpora of language samples taken from "real life." The most popular computer-based applications using corpora are built on the presentation of concordance lines to the learner that illustrates the contexts of use of some words or structures. However, learners need training in how to use the concordance effectively. Teaching assistance will be necessary in leading the learner, by example, through the different stages of lexical analysis such as observation, classification, and generalization.

Q. Note on theory of competency based language learning 5 (Topic #82)

ENG513_Language Teaching Methods
Mid-Term (Solved)

The major basis of CBLT is the "functional and interactional perspective on the nature of language (Richards & Rodgers, 2001, p. 143) which means that language learning always needs to be connected to the social context it is used in. Therefore, language is seen as "a medium of interaction and communication between people" who want to achieve "specific goals and purposes" (Richards & Rodgers, 2001, p.143). This especially applies to situations in which the learner has to fulfill a particular role with language skills which can be predicted or determined for the relevant context (Richards & Rodgers, 2001, p.143). In connection to this Competency Based Language Teaching shares the behaviorist view of learning that "certain life encounters call for certain kinds of language" (Richards & Rodgers, 2001, p.143). Another key aspect of both language and learning theory is the so called "mosaic approach to language learning" (Richards & Rodgers, 2001, p.143), which assumes that language can be divided into appropriate parts and subparts. Communicative competence is then constructed from these subparts put together in the correct order (Richards & Rodgers, 2001, p.143). All these aspects together show that CBLT is in some respects similar to Communicative Language Teaching (Richards & Rodgers, 2001, p.143).

Q. OUTCOMES of competemce learning (Topic #83)

CBT, by comparison is designed not around the notion of subject knowledge but around the notion of competency. The focus moves from what students know about language to what they can do with it. The focus on competencies or learning outcomes underpins the curriculum framework and syllabus specification, teaching strategies, assessment and reporting. Instead of norm-referenced assessment, criterion-based assessment procedures are used in which learners are assessed according to how well they can perform on specific learning tasks. (Docking 1994, p. 16)

Q. What are the stages of which learning outcomes are specified in a competency based curriculum. (Topic #85)

- Elements that break down the competency into smaller components and refer to the essential linguistic features of the text,
- Performance criteria that specify the minimal performance required to achieve a competency,
- Range of variables that sets limits for the performance of the competency - sample texts and assessment tasks that provide examples of texts and assessment tasks that relate to the competency.

Q. Hiladay 3 functions (Topic #87)

Halliday emphasized the triple macro functions of language

1. textual,
2. interpersonal, and
3. ideational.

Q. svivgons five c's (Topic #87)

1. The communication goal area addresses the learner‘s ability to use the target language to communicate thoughts, feelings, and opinions in a variety of settings;
2. The cultures goal area addresses the learner‘s understanding of how the products and practices of a culture are reflected in the language;
3. The connections goal area addresses the necessity for learners to learn to use the language as a tool to access and process information in a diversity of contexts beyond the classroom;

4. The comparisons goal area are designed to foster learner insight and understanding of the nature of language and culture through a comparison of the target language and culture with the languages and cultures already familiar to them; and
5. The communities goal area describes learners‘ lifelong use of the language, in communities and contexts both within and beyond the school setting itself.

Q. the acquisition /Learning hypothesis (Topic# 92)

The Acquisition/Learning Hypothesis claims that there are two distinctive ways of developing competence in a second or foreign language. Acquisition is the "natural" way, paralleling first language development in children. Acquisition refers to an unconscious process that involves the naturalistic development of language proficiency through understanding language and through using language for meaningful communication.

Q. Define Monitor Hypothesis in context with Natural Approach (Topic #92)

Conscious learning can function only as a monitor or editor that checks and repairs the output of the acquired system. The Monitor Hypothesis states that we may use learned knowledge to correct ourselves when we communicate, but that conscious learning has only this function. Three conditions limit the successful use of the monitor:

1. Time. Sufficient time for a learner to choose and apply a learned rule.
2. Focus on form. Focus on the correctness or on the form of the output.
3. Knowledge of rules. Knowing the rules is a prerequisite for the use of the monitor.

Q. On what basis did krashen and Terrell reject the earlier methods of language learning audio-lingual method? (Topic # 92)

They reject earlier methods of language teaching, such as the Audio-lingual Method, which viewed grammar as the central component of language. According to Krashen and Terrell, the major problem with these methods was, that they were built not around "actual theories of language acquisition, but theories of something else; for example, the structure of language" (1983, p. 1). Unlike proponents of Communicative Language Teaching, Krashen and Terrell give little attention to a theory of language. Indeed, a critic of Krashen suggested that he has no theory of language at all (Gregg 1984). What Krashen and Terrell do describe about the nature of language emphasizes the primacy of meaning. The importance of the vocabulary is stressed, for example, suggesting the view that a language is essentially its lexicon and only inconsequently the grammar that determines how the lexicon is exploited to produce messages.

Q. Natural order hypothesis (Topic #92)

According to the Natural Order Hypothesis, the acquisition of grammatical structures proceeds in a predictable order. Research is said to have shown that certain grammatical structures or morphemes are acquired before others in first language acquisition of English, and a similar natural order is found in second language acquisition. Errors are signs of naturalistic developmental processes, and during acquisition (but not during learning), similar developmental errors occur in learners no matter what their native language is.

Q. "Natural approach is for beginners to make them intermediates" Define. (Topic #93)

The Natural Approach "is for beginners and is designed to help them become intermediates." It has the expectation that students will be able to function adequately in the target situation. They will understand

the speaker of the target language (perhaps with requests for clarification), and will be able to convey (in a non-insulting. manner) their requests and ideas. They need not know every word in a particular semantic domain, nor is it necessary that the syntax and vocabulary be flawless, but their production does need to be understood. They should be able to make the meaning clear but not necessarily be accurate in all details of grammar. (Krashen and Terrell 1983, p. 71)

Q. What is pre-production stage (Topic #94)

In the pre-production stage, students "participate in the language activity without having to respond in the target language" (Krashen and Terrell 1983: 76). For example, students can act out physical commands; identify student colleagues from teacher description, point to pictures, and so forth. In the early-production stage, students respond to either-or questions, use single words and short phrases, fill in charts, and use fixed conversational patterns (e.g., How are you? What's your name?).

Q. Primary goal of instructional materials in the natural approach? (Topic #94)

The primary goal of materials in the Natural Approach is to make classroom activities as meaningful as possible by supplying "the extra linguistic context that helps the acquirer to understand and thereby to acquire" (Krashen and Terrell 1983, p. 55), by relating classroom activities to the real world, and by fostering real communication among the learners. Materials come from the world of realia rather than from textbooks. The primary aim of materials is to promote comprehension and communication. Pictures and other visual aids are essential, because they supply the content for communication. They facilitate the acquisition of a large vocabulary within the classroom. Other recommended materials include schedules, brochures, advertisements, maps, and books at levels appropriate to the students, if a reading component is included in the course. Games, in general, are seen as useful classroom materials, since "games by their very nature, focus the students on what it is they are doing and use the language as a tool for reaching the goal rather than as a goal in itself" (Terrell 1982, p. 121). The selection, reproduction, and collection of materials places a considerable burden on the Natural Approach teacher. Since Krashen and Terrell suggest a syllabus of topics and situations, it is likely that at some point collections of materials to supplement teacher presentations will be published, built around the "syllabus" of topics and situations recommended by the Natural Approach.

Q. name cooperative learning groups (Topic #96)

Cooperative learning is a group learning activity organized so that learning is dependent on the socially structured exchange of information between learners in groups and in which each learner is held accountable for his or her own learning and is motivated to increase the learning of others (Olsen and Kagan 1992, p. 8).

Q. Coelho (1992b, p. 132) describes three major kinds of cooperative learning tasks and their learning focus. Name them. (Topic #98)

1. **Team Practice from Common Input**: skills development and mastery of facts.
2. **Cooperative Projects**: topics/resources selected by students - discovery learning
3. **Jigsaw**: differentiated but predetermined input - evaluation and synthesis of facts and opinions.

Q. How material are used in Cooperative language learning classroom. write with example. (Topic #99)

Materials play an important part in creating opportunities for students to work cooperatively. The same materials can be used as are used in other types of lessons but variations are required in how the materials

are used For example, if students are working in groups, each might have one set of materials (or groups might have different sets of materials), or each group member might need a copy of a text to read and refer to. Materials may be specially designed for CLL learning (such as commercially sold jigsaw and information-gap activities), modified from existing materials, or borrowed from other disciplines.

Q. Define 'Report' (Topic #110)

Teacher asks some pairs to report briefly to the whole class so everyone can compare findings, or begin a survey. (NB: There must be a purpose for others to listen.) Sometimes only one or two groups report in full, others comment and add extra points. The class may take notes. Teacher chairs, comments on the content of their reports, rephrases perhaps, but gives no overt public correction.

Q. Teacher expected to do in multi lingual class room (Topic #118)

Levelt's model is geared towards monolingual speakers, so the question arises how it may account for a multilingual speaker's language processing. Different attempts have been made to adjust in this context. For example, DeBot (1992) argues that the Conceptualizer is most likely to be language-independent, whereas the Formulator is language-dependent because it contains information about grammar. However, selection of the words from the right language requires the inclusion of language-related information in the preverbal message (DeBot, 2002). As the lexicon plays a central role in language processing, we will discuss these and other matters from the perspective of the multilingual mental lexicon.

Q. Do you think English language is the symbol of prestige and social class? (Topic #120)

It is another factor which play a vital role. English is the language of elite class in Pakistan and has prestige. The power of English cannot be denied when taking about the language teaching methods in Pakistan. It is used as the official language in various institutions of the country. In Pakistan, like most of other former colonies, English language is primarily a symbol of prestige and high social class. At the time of inception of Pakistan in 1947, English was supposed to continue as the official language till national language(s) replaced it. "However, English is as firmly entrenched in the domains of power in Pakistan as it was in 1947" (Rahman, 2003:4). The social and political factors have played a major role in maintaining the superiority of this language.

Q. learner centered pedagogists opted for a product oriented syllabus design. (Topic #185)

Product oriented syllabuses are those in which the focus is on the knowledge and skills which learners should gain as a result of instruction, while process syllabuses are those which focus on the learning experiences themselves. Process oriented, as the name indicates, is more focused on the process than the product.

Q. Role of teacher in MI (Muliple Intelligence)

The teacher role. The teacher may introduce his students to the existence of multiple intelligences and guide them in identifying, celebrating and making use of all their intelligences through language learning activities that exercise the students' multiple intelligences.

Q. Natural approach. 5 marks

The natural approach was strikingly different from the mainstream approach in the United States in the 1970s and early 1980s, the audio-lingual method. While the audio-lingual method prized drilling and error correction, these things disappeared almost entirely from the natural approach. Terrell and Krashen themselves characterized the natural approach as a "traditional" method[1] and contrasted it with

grammarbased approaches, which they characterized as new inventions that had "misled" teachers.[5] The natural approach shares many features with the direct method (itself also known as the "natural method"), which was formulated around 1900 and was also a reaction to grammar-translation.[6] Both the natural approach and the direct method are based on the idea of enabling naturalistic language acquisition in the language classroom; they differ in that the natural approach puts less emphasis on practice and more on exposure to language input and on reducing learners' anxiety.

Q. Convergence Dimensions

Convergence in language teaching refers to the integration of different teaching methods and approaches to meet the learner's needs. It aims to combine the strengths of various techniques for effective learning.

Q**. Britain's 1980 Movement**

Britain's 1980s movement in language teaching introduced **graded objectives**, which defined short-term learning goals. These objectives built upon each other incrementally, helping learners advance their knowledge and skills systematically.

Q**. Features of CBLT (Competency-Based Language Teaching)**

CBLT focuses on outcomes rather than processes. Key features include:

1. Focus on **life skills** rather than isolated language structures.
2. Task or performance-centered approach.
3. Modularized instruction, breaking learning into manageable parts.
4. Emphasis on **real-world tasks** and measurable outcomes.

Q**. Krashen's Affective Filter Hypothesis**

Krashen's **Affective Filter Hypothesis** explains how emotional factors influence language acquisition. A low affective filter allows input to pass freely, facilitating learning, while a high filter blocks input.
Three Attitudinal Variables:

1. **Motivation** – High motivation enhances learning.
2. **Self-confidence** – Learners with good self-image perform better.
3. **Anxiety** – Low anxiety levels improve language acquisition.

Q**. Lasonaz Theory**

This seems to be a spelling mistake. If you meant **Lozanov**, he is associated with **Suggestopedia**, a method using relaxation and music to enhance learning.

Q**. Empirical Evaluation of Individual Characteristics of Learners**

Empirical evaluation involves studying measurable characteristics like age, motivation, aptitude, learning style, and prior knowledge that impact language acquisition.

Q**. Features of Multimedia**

1. Integration of **text, images, video, and audio**.
2. Interactive and user-friendly.
3. Facilitates self-paced learning.
4. Enhances retention through multi-sensory input.

Q**. Teaching Writing in Pakistan**

Teaching writing in Pakistan often emphasizes grammar and rote memorization rather than creativity and process-based learning. Challenges include lack of teacher training, large class sizes, and insufficient resources.

Q. Niclon and Richard Model

This model focuses on practical approaches to teaching that combine theoretical principles with classroom applications. It links **approach** (theories and beliefs) to **design** (syllabus and activities) and finally to **technique** (actual procedures used during lessons).

Q**. Enlist Three Theoretical Views (Names Only)**

1. **Structural View**
2. **Functional View**
3. **Interactional View**.

Q**. Three Materials Provided in the Silent Classroom**

1. Color charts
2. Colored Cuisenaire rods
3. Fidel pronunciation charts.

Q**. One Advantage of Competency-Based Language Teaching (CBLT)**

CBLT is **outcome-based**, ensuring that students learn specific skills applicable in real-life situations.

Q**. Learning Point of View**

This refers to understanding how learners process knowledge, including theories like behaviorism, cognitivism, and constructivism, which explain how learning occurs.

Q**. Theatrical Project and Resource-Based Project (Explanation)**

- **Theatrical Project**: Focuses on performance-based activities where learners act out roles or scenarios to practice language.
- **Resource-Based Project**: Involves using real-world materials such as newspapers, audio, or videos to complete language tasks.

Q**. Theory of Language**

Theories of language include:

1. **Structural Theory**: Language as a system of structural elements like grammar and syntax.
2. **Functional Theory**: Focus on communicative functions of language.
3. **Interactional Theory**: Emphasizes language as a tool for social interaction.

Q**. Hypnosis**

Hypnosis in learning refers to a state of deep focus and relaxation, enhancing memory and retention. Lozanov's Suggestopedia incorporates aspects of hypnosis to create suggestive, stress-free learning environments.

Q**. Linguistics**

Linguistics involves the scientific study of language. The three major dimensions are:

1. **Phonetics and Phonology**: Sound systems of a language.
2. **Morphology and Syntax**: Structure and formation of words and sentences.
3. **Semantics and Pragmatics**: Meaning of language in context.

Q**. Dimension: Knowledge About Rules**

Language learners must understand:

1. **Descriptive Rules**: How language is used in reality.
2. **Prescriptive Rules**: How language "should" be used formally.
3. **Sociolinguistic Rules**: How language varies across social contexts.

Q**. Monitor Hypothesis and Direct Method (10 Key Aspects)**

- **Monitor Hypothesis**: Krashen argues conscious grammar acts as a "monitor" to correct output when accuracy is emphasized.
  10 Key Aspects of Direct Method:

1. Use of target language only.
2. Focus on spoken language.
3. Emphasis on listening and speaking.
4. Vocabulary taught through visuals.
5. Grammar taught inductively.
6. Pronunciation prioritized.
7. Small class sizes for interaction.
8. Focus on real-life situations.
9. Oral communication over written work.
10. Immediate feedback and correction.

Q. Differentiate Alexander's Theory (1834): Product vs. Process

- **Theory as Product**: Focuses on **content knowledge** or final outcomes.
- **Theory as Process**: Refers to **intellectual activity** involved in theorizing, which teachers should engage in to develop reflective practice.

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q**. Status of English in Pakistan**

English holds a significant position as a:

1. **Prestigious language** tied to social mobility.
2. **Medium of instruction** in higher education.
3. **Language of the elite** and power structures.
   Challenges include poor teaching quality, exam-focused learning, and lack of communicative competence.

Q**. 1st Stage of Lazear Syllabus Design in MI (Multiple Intelligences)**

The first stage is **Awaken the Intelligence**:

- Involves **multisensory experiences** like touching, smelling, and observing to activate learners' awareness of different intelligences.

Q**. Ivan Pavlov's Conditioned Response**

Ivan Pavlov's theory explains how behaviors can be learned through **associations**.

- **Stimulus-Response**: A neutral stimulus (e.g., a bell) paired with an unconditioned stimulus (e.g., food) leads to a conditioned response (salivation) after repeated associations.

Q**. Subjective**

Subjective approaches emphasize **individual interpretations** and experiences rather than objective facts. Examples include qualitative research, which focuses on descriptive and process-oriented analysis.

Q**. Opportunities and Threats of GTM**

- **Opportunities**: Helps students read **classical literature** and develop vocabulary.
- **Threats**: Fails to promote communicative skills and is criticized for being **boring** and **inefficient**.

Q**. LTM (Language Teaching Method)**

LTM refers to structured approaches to teaching a language, including methods like GTM, Direct Method, and Communicative Language Teaching.

Q**. Four Areas Given in Terrel and Krashen**

Krashen and Terrel outlined four key areas of language learning:

1. **Listening**
2. **Speaking**
3. **Reading**
4. **Writing**.

Maha Malik's Compilation

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q**. Which Language Was Ignored?**

In traditional GTM, **spoken and conversational forms** of the target language were often ignored, with emphasis solely on written grammar and translation exercises.

Q. Communicative Language Method

Communicative Language Teaching (CLT) emphasizes:

1. **Real-life communication** over rote memorization.
2. Interactive tasks like pair work, role-playing, and group discussions.
3. Focus on **fluency** as well as accuracy.
4. Learners engage in authentic tasks to develop communicative competence.

Q**. Le Fored Structural View of Language**

The structural view sees language as a system of interrelated structures used to encode meaning. It emphasizes:

1. Phonological units (e.g., sounds, syllables).
2. Grammatical units (e.g., phrases, sentences).
3. **Behaviorist psychology** principles like habit formation.

Q**. Role of Learner in Cooperative Language Learning**

Learners are:

1. **Collaborators**: Work in groups and pairs to complete tasks.
2. **Active participants**: Plan, monitor, and evaluate their learning.
3. **Tutors**: Share information and help peers succeed.

Q**. Parallel Text Activity**

Parallel Texts involve using two translations of the same story or text. This activity helps learners:

1. Compare linguistic choices of translators.
2. Discuss vocabulary, syntax, and style differences.
3. Engage in meaningful interpretations and analysis.

Q**. Challenges in Grammar Translation Method (GTM)**

1. Overemphasis on **translation and grammar rules**.
2. Lack of focus on **speaking and listening skills**.
3. Mechanical and uninspiring teaching methods.
4. **Exam-oriented** approach that limits communication.

Q**. Life Without Language**

Language is fundamental to human life because:

ENG513_Language Teaching Methods
Mid-Term (Solved)

1. It facilitates **communication** and **social interaction**.
2. It helps in expressing thoughts, emotions, and identity.
3. Without language, progress in education, technology, and relationships would be unimaginable.

Q**. Three Elements of Successful Group-Based Learning in Cooperative Learning**

1. **Positive interdependence**: Group members support one another.
2. **Individual accountability**: Each member contributes equally.
3. **Social skills**: Communication, leadership, and conflict management are developed.

Q**. Flexibility in Neurolinguistic Programming**

Flexibility in NLP refers to adapting communication styles and strategies to meet learners' needs. Teachers adjust approaches based on:

1. Learners' preferred sensory modes (visual, auditory, kinesthetic).
2. Feedback and situational demands to achieve successful outcomes.

Q. Status of English in Pakistani Schools

1. **Prestigious role** of English as a medium of social mobility.
2. Public schools rely on **rote learning** with GTM dominating teaching methods.
3. Private schools focus more on speaking and modern approaches.
4. Lack of trained teachers and effective resources reduces learners' proficiency.

Q**. Two Hypotheses Underlying Gattegno's Work (Silent Way)**

1. **Learning is facilitated** if the learner **discovers or creates** rather than remembers and repeats.
2. Learning is enhanced through **physical objects** like rods and charts.

Q**. Three Constraints of ELT in Pakistan**

1. **Inadequate resources** and overcrowded classes.
2. **Unenthusiastic teachers** and lack of professional development.
3. Influence of **social, cultural, and political factors** on language policy.

Q**. Goal of TPR (Total Physical Response)**

The goal of TPR is to develop **listening comprehension** and **reduce learner stress** through physical response to commands. It is based on Asher's belief that listening precedes speaking.

Q**. Paltridge et al. (2009): Four Distinct Subprocesses in Writing**

1. **Planning**: Generating and organizing ideas.
2. **Drafting**: Translating ideas into written text.
3. **Revising**: Refining content, structure, and style.
4. **Editing**: Correcting grammar, punctuation, and mechanics.

Q**. Repeated Viewing in Extensive Viewing**

ENG513_Language Teaching Methods
Mid-Term (Solved)

Repeated viewing allows learners to:

1. Enhance comprehension through multiple exposures to a text.
2. Improve vocabulary retention and listening skills.
3. Notice and internalize linguistic patterns over time.

Q**. Five ESP (English for Specific Purposes) Materials**

1. Case studies
2. Authentic workplace texts (emails, reports)
3. Industry-specific vocabulary guides
4. Role-play scenarios
5. Simulated workplace tasks.

Q. Define Content-Based Instruction (CBI)

CBI is an approach to language teaching where instruction is organized around **content** or subject matter rather than language structures. Language is learned as a by-product of understanding meaningful information.

Q. Issues of Linguistic Identity and Power in Pakistani Bilingual Context

1. **Colonial Heritage**: English is associated with power and prestige.
2. **National Language Issue**: Urdu is a symbol of unity but spoken by a minority.
3. **Regional Languages**: Local languages face marginalization.
4. **Code-Switching**: Used for instructional purposes but complicates linguistic identity.
5. **Power Dynamics**: English dominates education and employment sectors.

Q**. Five Teacher Training Factors**

1. **Content knowledge**
2. **Pedagogical skills**
3. **Communication techniques**
4. **Use of technology**
5. **Classroom management strategies**.

Q**. Skill Separation**

Skill separation refers to teaching **language skills (listening, speaking, reading, writing)** in isolation.

- Historically promoted by audio-lingual methods.
- Modern approaches emphasize **integration** of skills for realistic language use.

Q**. Quantitative Research**

Quantitative research focuses on **numerical data** to analyze and explain phenomena.

- It uses statistical tools to measure relationships, patterns, and outcomes.
- Examples: Surveys, experiments, and structured observations.

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q**. Categories of CBI**

1. **Theme-Based Instruction**
2. **Sheltered Content Instruction**
3. **Adjunct Model**.

Q**. Three Lesson Planning Stages**

1. **Pre-lesson (Planning)**: Defining objectives and materials.
2. **During-lesson (Execution)**: Implementing activities and engaging learners.
3. **Post-lesson (Assessment)**: Reviewing outcomes and assessing learning.

Q**. Initial and Advanced Stages**

- **Initial Stage**: Focuses on basic language skills (listening, speaking, reading, writing).
- **Advanced Stage**: Emphasizes complex tasks like critical analysis, fluency, and academic writing.

Q**. Three Main VoLL Tasks (Vocationally Oriented Language Learning)**

1. **Workplace-related tasks**
2. **Professional communication activities**
3. **Simulated real-life scenarios**.

Q. Digital Media

Digital media plays a crucial role in modern EFL (English as a Foreign Language) classrooms. Key uses include:

1. Providing **multimodal literacies** (text, visuals, audio).
2. Promoting **global communication** through tools like blogs and podcasts.
3. Supporting **self-paced learning** with feedback systems and grammar tools like Purdue OWL and Hot Potatoes.

Q**. Curriculum**

A **curriculum** is a theoretical document that defines the:

1. Overall goals of education.
2. Educational philosophy and political trends.
3. Learning purposes and teacher-student roles.

Syllabus vs Curriculum:

- **Syllabus**: Practical, classroom-level document detailing topics and tasks.
- **Curriculum**: Broader, defining general educational aims.

Q**. Vocational English for Specific Language**

Maha Malik's Compilation

ENG513_Language Teaching Methods
Mid-Term (Solved)

Vocational English, under **English for Specific Purposes (ESP)**, equips students with language skills tailored to their professional fields. Examples include:

1. English for Hotel Management.
2. English for Tourism.
3. English for Engineering.

Q**. Guidance for EFL**

Effective EFL guidance includes:

1. Providing extensive input through reading and listening.
2. Encouraging real-world communication tasks.
3. Utilizing digital media for autonomous learning.
4. Offering **feedback-driven** activities like grammar correction software.

Q**. Factors of Lesson Planning**

1. **Learning Objectives**: Goals for student outcomes.
2. **Materials**: Resources and tools used.
3. **Activities**: Tasks that achieve the objectives.
4. **Timing**: Time allocation for each activity.
5. **Assessment**: Measuring learning progress.

Q**. How Extensive Reading Affects Learners' Autonomy**

Extensive reading helps learners:

1. Develop **self-directed learning habits**.
2. Enhance vocabulary and comprehension skills.
3. Build confidence and motivation through enjoyable reading.
4. Promote **lifelong learning** beyond formal education.

Q**. Monolingual Language**

Monolingual refers to using **one language exclusively** for communication and learning. It contrasts with **bilingual** or **multilingual** approaches where learners switch between languages.

Q**. Pica, Kanagy, and Falodun Task Classification**

Pica et al. (1993) classified tasks based on **interaction types**:

1. **Jigsaw tasks**: Sharing information to complete a whole.
2. **Information-gap tasks**: Filling missing details through communication.
3. **Problem-solving tasks**: Collaborating to find solutions.
4. **Decision-making tasks**: Choosing outcomes after discussion.
5. **Opinion exchange tasks**: Sharing and debating ideas.

Q**. Syntactic Syllabus and Analytic Syllabus**

1. **Syntactic Syllabus**: Focuses on the systematic teaching of grammar and language structures in a **linear order** (e.g., verbs, nouns, sentence types).
2. **Analytic Syllabus**: Presents language in **chunks** or meaningful tasks. Learners analyze these tasks to derive grammatical structures implicitly.

Q**. What Are Communicative Strategies?**

Communicative strategies are **techniques learners use to overcome difficulties** during communication, such as:

1. Asking for clarification.
2. Paraphrasing.
3. Using fillers and hesitation devices (e.g., "um," "well").

Q**. How Does Tomlinson Define Authentic Text?**

Tomlinson defines **authentic texts** as those that:

1. Reflect real-world communication.
2. Are not simplified for learners.
3. Help learners engage meaningfully with language and content.

Q**. Conference Assessment Requires Teachers to Do**

Teachers must:

1. Hold **one-on-one conferences** with learners.
2. Provide specific feedback on strengths and weaknesses.
3. Set achievable targets to improve performance.

Q**. Principles for Extensive Reading Approach by Day and Bamford**

1. Students read **large amounts of material** for pleasure and knowledge.
2. Focus is on **meaning**, not word-by-word comprehension.

Q**. Types of Speaking Tasks (Names Only)**

1. **Information Gap Tasks**
2. **Role-Playing**
3. **Jigsaw Tasks**
4. **Problem-Solving Tasks**
5. **Opinion Sharing Tasks**.

Q**. Cunningham Lesson Plan Stages**:

- Introduction
- Foundation
- Brain Activation
- Body of New Information

- Clarification
- Practice and Review
- Independent Practice
- Closure.

Q. **Cohesive Devices and Meta Discourse Markers**:

- Cohesive Devices: Connect sentences and ideas (e.g., *and, but, therefore*).
- Meta Discourse Markers: Show the writer's intent (e.g., *in conclusion, firstly*). Both ensure coherence in the text.

Q. **Phases of Lesson Planning**:

- Objectives
- Learning activities
- Practice
- Evaluation.

Q. **Pica, Kanagy, and Falodun (1993)**:
They classified tasks based on **interactional demands**:

- **Jigsaw**
- **Information-gap**
- **Problem-solving**
- **Decision-making**
- **Opinion exchange**.

Q. **Communicative Strategies**:
Techniques used to overcome communication breakdowns or express ideas effectively during oral communication (e.g., paraphrasing, gestures, circumlocution).

Q. **Why Use Communicative Strategies During Oral Communication?**
They help maintain conversation flow, clarify meaning, and overcome language barriers.

Q. **Three Team Performance Functions**:

- Task completion
- Coordination
- Decision-making.

Q. **Define the Term Curriculum**:
A broad plan outlining educational goals, content, and methods of instruction.

Q. **Difference Between Explanatory and Exploratory Research**:

- **Explanatory**: Explains causal relationships.
- **Exploratory**: Investigates a problem to gain insights without conclusive answers.

ENG513_Language Teaching Methods
Mid-Term (Solved)

Q. **Repeated Reading**:
A reading strategy where learners repeatedly read a passage to improve fluency and comprehension.

Q. **Difference Between Traditional and Performance-Based Tests**:

- **Traditional**: Focuses on written tests for factual knowledge.
- **Performance-based**: Assesses practical application and skills.

Q. **Functions of a Lesson Plan**:

- Provides a teaching framework.
- Ensures alignment with learning goals.
- Helps manage time effectively.

Q. **Terral Kashan Model**:

The **Krashen and Terrell Model** refers to the **Natural Approach**, a language teaching methodology developed by **Stephen Krashen** and **Tracy Terrell** in the early 1980s. It focuses on *naturalistic language acquisition*, similar to how children acquire their first language. The model emphasizes:

1. **Comprehensible Input**: Learners acquire language when exposed to input slightly above their current level (i+1).
2. **Focus on Meaning, Not Form**: Language learning occurs through understanding messages, not explicit grammar instruction.
3. **Silent Period**: Beginners should have time to listen and process language before speaking.
4. **Lowering Affective Filters**: Anxiety and stress should be minimized to create a conducive learning environment.
5. **Stages of Language Acquisition**:
    - Pre-production (Silent Stage)
    - Early Production
    - Speech Emergence
    - Intermediate Fluency
    - Advanced Fluency

Q. Write a short note on the role of a learner in a Suggestopedia Classroom.

1. **Introduction**: The teacher teaches the material in "a playful manner" instead of analyzing Lexis and grammar of the text in a directive manner.
2. **Concert session (active and passive):** in the active session, the teacher reads with special intonation as selected music is played. Occasionally, the students read the text together with the teacher, and listen only to the music as the teacher pauses in particular moments. The passive session is done more calmly.
3. **Elaboration**: The students sing classical songs and play games while "the teacher acts more like a consultant
4. **Production**: The students spontaneously speak and interact in the target language without interruption or correction.
