

ENG513

Mid-Term

ABSTRACT

This comprehensive collection of notes is accurately crafted to empower students to excel academically, ensuring they achieve a minimum of 80% marks in their examinations. The content is organized with clarity and precision, focusing on key concepts, critical analyses, and practical applications tailored to the syllabus. These notes serve as a reliable resource for both thorough preparation and last-minute revision. Designed to inspire confidence and mastery, this guide is an essential tool for students striving for academic excellence.

Spring 2025

ENG513_ Mid-Term_Spring 2025

MCQS by ◇☺siŁ℮₦t★©

1. LTM (Language teaching method)
2. Which teaching resource correlate with the teacher's philosophy of education____lesson plan
3. The lesson can be planted with different format
4. Need analysis serve as a bases for informed curriculum practice in ESP instructional design.
5. combine different methods and approaches____is called Eclectic approach
6. Tasks that are important in need analysis and useful in real world are real world task
7. Autonomy is not a steady state.
8. Another issue that has been paid more attention in recent years is the question of the____of curriculum, methodology, and teaching materials for local teaching contexts. (appropriateness)
9. Syllabus is critical piece of information between instruction and student.
10. Assignment in language____is of great significance? (teaching)
11. Reading as a process in which the reader has to go through the text in a more linear fashion, starting from the smallest unit in print. Bottom up
12. Refers to all those activities in which children engage in under the auspices of the school. Curriculum
13. Jenkins and Wells do not completely agree on the details of the Lingua Franca Core
14. foreign language teaching can be traced back to the ancient ___. (Greeks)
15. In their ____background, the language teaching methods and approaches differ from one another. (theoretical)
16. In which of the following studies the researchers do not have a preconceived idea of the phenomenon under investigation. (Descriptive studies)
17. In Pakistani education system large classes can be a hurdle in learners' autonomy.
18. The ____ teaching method is commonly used in Pakistani Bilingual context. (Grammar Translation)
19. Materials play a crucial role in shaping that ___ in any language. (instruction)
20. A good speaker is someone who is able to influence others with his or her words.
21. ICT stand for information and communication technology
22. Ten principles that maximize reading_____Given by Grabe

Q. Goals of Grammar Translation Method (GTM):

- To enable students to read and translate literature written in the source language.
- To further students' general intellectual development.

Q. Benefits of Discovery Learning (based on cognitive view):

- Active involvement of learners in the learning process.
- Meaningful learning (not rote learning) leads to internalization.
- Learners discover rules through engagement, promoting deeper understanding.

Q. "Human Language is Well Organized" — Comment:

Yes, human language is well-organized. It works systematically at multiple levels:

- **Phonological**: Sound patterns.
- **Syntactic**: Grammar rules.
- **Semantic**: Meaning of words.
  Each language unit (like a sound or word) relates meaningfully with others in a structured system.

Q. In the acronym SARD (in NLP): What are "R" and "D"?

based on NLP context:

- **R: Rapport** – Establishing harmony and connection.
- **D: Desire** – Motivating learners to want to learn.

Q. Savignon's Five Cs of Communication:

- **Communication**: Use language to express ideas, feelings, and opinions.
- **Cultures**: Understand the relationship between language and culture.
- **Connections**: Use the language to connect with knowledge beyond classroom.
- **Comparisons**: Understand nature of language and culture by comparing.
- **Communities**: Participate in multilingual communities locally and globally.

Q. Grammar Translation Method (GTM)

Goals:

- Enable students to read and translate literature.
- Develop intellectual discipline.

Strengths:

- Builds strong grammar accuracy.
- Enhances reading and writing skills.
- Develops memory.

Weaknesses (why it's tedious/incompetent):

- Focuses on rote learning and translation.
- Neglects speaking, listening, and communication.
- Considered boring, mechanical, and demotivating.

Q. Direct Method (DM)

Strengths:

- Encourages direct usage of language.
- Prioritizes oral communication and fluency.
- Grammar taught inductively.

Famous Schools Using DM:

- Berlitz School
- Inlingua Institute.

Q. Total Physical Response (TPR)

Activities:

- Imperative-based action drills.
- Role plays in real-life contexts (e.g. supermarket).
- Slide presentations and TPR kits (e.g. “Put the stove in the kitchen”).

Brain Lateralization:

- Right hemisphere processes motor activity first.
- Then left hemisphere develops abstract language functions.

Psychological Foundation:

- Based on stress-free, natural language acquisition.
- Relies on Asher's bio-program theory and trace theory of memory.

Role of Teacher:

- Active controller of input.
- Models commands and builds learning through physical responses.

Q. Neurolinguistic Programming (NLP)

Developed For:

- Improving communication, personal growth, and learning.
- Modeling behavior of successful communicators.

Why It Was Developed:

- To fill gaps in psychological practices and therapy.
- Later extended to language teaching as a humanistic method.

Rapport in NLP (SARD – R):

- Creating subconscious harmony and connection with learners.

Desire in NLP (SARD – D):

- Stimulating motivation and willingness to learn.

Q. Cooperative Language Learning (CLL)

Three Tasks:

1. **Formal Cooperative Groups** – last for several classes.
2. **Informal Groups** – short-term, for specific lessons.
3. **Cooperative Base Groups** – long-term support groups.

Team Practices (as example):

- Shared practice for mastery and skills.
- Each student ensures team understanding.

Role of Learner:

- Active participant in group learning.
- Mutual support and responsibility.

Q. Time in the Monitor Hypothesis:

According to Krashen, for a learner to use the Monitor effectively, **sufficient time** must be available to think, choose, and apply the correct rule. Without time, the learner cannot self-correct or monitor effectively.

Q. Alexander's Theory: Product vs. Process (1984):

- **Theory as Product**: Refers to finalized content knowledge — theories presented to teachers.
- **Theory as Process**: Refers to **"theorizing"**, the active intellectual activity teachers use to generate and reflect upon theory based on experience.
- Teachers should engage in theorizing, not just apply others' theories.

Q. Status of English in Pakistan:

- Symbol of prestige and high social class.
- Used as a medium of instruction in elite/private schools.
- Taught more as a **subject** (via GTM) than as a **language**.
- **Spoken and listening skills are neglected**, leading to low language proficiency.

Q. Four Areas (Goals) by Krashen & Terrell (Natural Approach):

1. **Basic Personal Communication – Oral** (e.g., announcements).
2. **Basic Personal Communication – Written** (e.g., letters).
3. **Academic Learning Skills – Oral** (e.g., lectures).
4. **Academic Learning Skills – Written** (e.g., note-taking).

Q. Which Language Is Ignored in CLT?

The **native (first) language** or **L1** is often ignored or discouraged in **Communicative Language Teaching (CLT)**, as the focus is entirely on using the **target language** for communication.

Q. Savignon's Five Cs – Communication Goals:

1. **Communication** – Express thoughts and opinions in various settings.
2. **Cultures** – Understand cultural practices through language.
3. **Connections** – Use language to access knowledge beyond the classroom.
4. **Comparisons** – Reflect on one's own and other cultures/languages.
5. **Communities** – Use language in real-world and lifelong contexts.

Q. ELT in HEC (Higher Education Commission):

HEC launched the **English Language Teaching Reforms (ELTR)** project in 2004 to:

- Improve ELT teaching quality.
- Train teachers (Phase I: 1398 trained; Phase II aimed at 1400).
- Emphasize both language teaching and research.

Q. Discourse – In Your Own Words:

Discourse refers to **connected spoken or written language** used in real social contexts. It carries meaning through structure (cohesion, form), purpose, and audience. It's more than just sentences—it's about **how language functions socially and ideologically**.

Q. Role of the Teacher in TPR:

- Plans and models new material.
- Provides optimal exposure.
- Controls input but avoids early correction.
- Encourages learners to speak **at their own pace**.
- Uses realia, actions, and detailed lesson plans.

Q. First Stage in Lazear's Syllabus Design (Multiple Intelligences):

- **Stage 1: Awaken the Intelligence** – Use **multisensory experiences** (touching, tasting, seeing, etc.) to engage and sensitize learners to the surrounding world.

Q. Audio-Lingual Method (Definition):

- Rooted in structural linguistics and behaviorist psychology.
- Focused on habit formation through **drills and repetition**.
- Emphasizes **listening and speaking** before reading and writing.
- Avoids use of L1; promotes automaticity and correct pronunciation via pattern practice.

Q. Aim of VOLL (Vocationally Oriented Language Learning):

- Equip learners with **vocational content knowledge** and **language skills**.
- Prepares students for **real-world professional communication** in fields like hospitality, tourism, IT, etc..

Three Main VOLL Tasks:

1. **Vocational Vocabulary Building**
2. **Vocational Knowledge Building**
3. **Functional Metalanguage Analysis**.

Q. Content-Based Instruction (CBI)

Key Assumptions:

- Language is best learned **through meaningful content**.
- Language is **text and discourse-based**, not just grammar-focused.
- Integrates all four skills (listening, speaking, reading, writing).
- Content should be **relevant and motivating**.

Categories (Instructional Focus Areas):

1. Language Skills Improvement
2. Vocabulary Building
3. Discourse Organization
4. Communicative Interaction
5. Study Skills
6. Content & Grammar Synthesis.

Q. Theory-Based Listening Types:

1. **Pre-listening** – Activating background knowledge.
2. **While-listening** – Focused comprehension.

3. **Post-listening** – Discussion, summarizing, etc..

Q. Three Lesson Plan Stages by Cunningham:

1. **Introduction** – Set purpose and engage learners.
2. **Foundation** – Activate prior knowledge.
3. **Brain Activation** – Prepare students to learn new content.
