ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON FEBRUARY 19, 2018 AT 10:37PM

eco 403

mcqs past sy b thy or new b thy

1: Define production firm a and rental firm

2: define q of tobin and its 3 finding of investment

3: what happened when Central Bank increase the money of supply

4: find consumption function data is given 5: find tax and government multiplier

6: define government multiplier and its formula 7: draw long run and short run consumption function

8: why aggregate supply run in long run is vertical and aggregate supply run in short and is horizontal

9: draw Phillips curve

baqi ni yad

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 23, 2016 AT 12:36PM

Mine paper today :x

most mcq's were related to solow growth model , one was from tobins q , and the rest were random ,

some short questions of 3 marks and long questions of 5 marks

www.ranapk.com

a graph was given with two statement one about solow growth model and one was golden rule and we have to ans..... 5 marks

one table was given in which income and consumption were given and we have to find out the MPC and APC..... 5 marks

tobin's equation related question 5 marks

one was related to M.F model IS and LM equation was required ...5 marks i think*

sholi wo 3 marks question bhhol gai :(yaad kr k share krte hon :x

best wala luck ppj :p

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON MARCH 9, 2016 AT 11:14AM

just had eco403 final term exam ,

not a single question from last papers

mostly was tables like .

Q- write 2 instrument of money supply --marks 2 or 3

Q- write note on 3 instrument of money supply -- mark 5

Q- something was written and we have to tell in table that money supply will be decrease or increase in output and 2 options was more .

Q- draw is curve and lm curve according to (someone name)

www.ranapk.com

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 25, 2015 AT 10:04PM

Total Mcqs were 58

Total subjective 7

The situation of increase in risk premium (q) is given in the following table. Write down the impact of increase in risk premium on Mundell-Fleming model on LM^* curve, interest rate and demand for money, whether they will increase, decrease or remain unchanged.

Situation

LM^* curve

Interest rate (r)

Demand for money

Keeping in view the consumption theories, define the indifference curve and its slope.

Graphically explain how liquidity preference theory determines the rate of interest.

Discuss the arguments in favor of fixed exchange rate and floating exchange rate.

Suppose in year 2013, budget deficit was Rs.17000, government debt was Rs.500000 and inflation was 7%. By using this hypothetical information, calculate by how much amount the budget deficit was overstated? What was the amount of surplus budget deficit?

Keeping in view the intertemporal choice model developed by Irving Fisher, define and explain intertemporal budget constraint with the help of graph.

Which factor adjusts to equilibrate the demand and supply of capital? Explain with the help of diagram.

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 25, 2015 AT 10:05PM

Today was Eco403 paper

Total Mcqs were 58

and totally new

www.ranapk.com

Total subjective 7

1. Sticky wage model equation Explain $w = w_x, p_e$
2. Difference between production firm and rental firm
3. Graphically explain short run equilibrium in IS-LM
4. Sticky wage model of aggregate supply

If Then

$P = P_e$?

$P > P_e$?

P

ECO403 FINAL TERM PAPER SHARED BY STUDENT

MY TODAY'S EXAMS 16/03/2015

Q-Illustrate the impact of an increase in money supply on the aggregate demand curve with the help of diagram.

Q-Write down three basic assumptions of the imperfect information model.

Q-Theory of business fixed investment uses two terminologies, one is production firms and the other is rental firms. How we can differentiate between these two terms?

Q-Investment is one of the important components of gross domestic product and depends on the real interest rate. State the reason why investment depends on real interest rate. What is the relationship between them?

Q-Differentiate between the adaptive expectations and rational expectations.

Q-Suppose that monetary base (B) = Rs.1000, the reserve deposit ratio (rr) = 0.5 and currency deposit ratio (cr) = 0.5. By using this information, CALCULATE:

- a) Money multiplier
- b) Total Money supply

If monetary base increased to Rs.1500, what will be the total money supply now?

www.ranapk.com

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 29, 2015 AT 4:48PM

exam was really long consisted on 65 questions and mushkil as well mcqs pichle lectures mei se bhi diye hue thelast 10 chapters mei se sunjctive aaya tha

2 questions were related to consumption

tax multiplier govt multiplier

$c_1 > y_1$, $c_1 < y_1$ explain

short run and long run consumption with graph

remember in prayers

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 30, 2015 AT 12:26PM

- 1) irving fisher and intertemporal choice?
- 2) the assumption the imperfect information model?
- 3) Short run and long run consumption function and graph?
- 4) in 1979, budget deficit = \$28 billion percentage 86% government 495 billion define budget deficit overstated ?
- 5) The sacrifice ratio
- 6) Long run and short run ka graph diya diya tha ussa define karnna tha

www.ranapk.com

good luck :)

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 22, 2014 AT 2:50PM

My today's ECO403 paper:

Total marks: 83

Total Qs: 55

Total MCQs: 46

The long (5 marks * 5) and short (3 marks * 4) questions are as follows:

1. MPC and MPS was given, compute govt. purchases multiplier.
2. differentiate b/w floating and fixed exchange rates.
3. differentiate b/w residential and inventory investment.
4. how does a tax cut affect output and consumption.
5. if stock market booms consumers get richer, discuss the effects of this event using IS-LM framework.
6. define inventory investment. why do firms want to hold inventory.
7. which component of output is crowded out by increase in govt. spending, what should govt. do to avoid crowding out.
8. what contribution did Simon Kuznet make in the consumption analysis.
9. how does the following events affect supply of housing?
 - a) a decrease in interest rate?
 - b) a decrease in population

www.ranapk.com

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON AUGUST 24, 2014 AT 10:12AM

Q:1 What is the difference b/w Life Cycle Hypothesis and Keynesia Consumption Function?(3marks) Q:2 Differentiate b/w Residential Investment and Inventory Investment?(3marks) Q:3 Write down National Income Identity and its components?(3marks) Q:4 The government decide to cut taxes to give the economy an extra boost. Describe the short run and long run impact of this tax cut in the IS-LM Framework. Assume that the company is at full employment level.(3marks) Q:5 Discuss the basic idea of corporate income tax and investment tax credit?(5marks) Q:6 Highlight the major difference b/w Modigliani's Life Cycle Hypothesis and Permanent Income Hypothesis?(5marks) Q:7 Discuss at least three reason why real wages are rigid?(5marks) Q:8 Discuss graphically the impact of a decrease in money supply on the IS-LM Framework?(5marks)

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON JULY 22, 2013 AT 9:05AM

Following questions today:(some I missed)

1- Use the following information about a hypothetical economy and calculate the amount of budget deficit overstated. Budget deficit = Rs.28 billion, $p = 8\%$, Government debt = Rs.490 billion.

2- Consider an economy described by the following equations:

$$Y = C + I + G$$

Where, $Y = 7,000$, $G = 1,000$, $T = 1,000$

$$C = 250 + 0.75(Y - T)$$

$$I = 1,000 - 50r$$

In this economy, compute private saving.

3- Different economists explained consumption theories differently. Keeping these theories in mind, highlight the difference between life-cycle hypothesis and the Keynesian consumption function.

4-

1. A. Differentiate between gross national product (GNP) and net national product (NNP).
2. B. In a country, the working-age population is 95,000. There were 15,000 discouraged workers and 12,000 unemployed laborers.

a) What is the labor force of this country?

b) Calculate the unemployment rate.

5- Suppose budget deficit was Rs.27 billion, government debt was Rs.495 billion and inflation was 7%. By using this information, calculate by how much amount, the budget deficit was overstated? What was the amount of surplus budget deficit?

www.ranapk.com

6- Define and explain intertemporal budget constraint with the help of graph.

Budget constraint comes when government income is less than expected expenses.

7- Residence is the need of every person. Many factors can affect the price, demand and supply of residence and residential investment. How this will affect the supply of new residential housing in the following cases?

- a) If there is a decrease in the real interest rate.
- b) If there is a decrease in the population.

ECO403 FINAL TERM PAPER SHARED BY STUDENT

20 july 2013

4 que 5 marks

4 que 5 marks

1. **Graphically discuss the impact of a fiscal expansion on output and exchange rate in the Mundell-Fleming model equilibrium under fixed exchange rate. (Marks: 5)**
2. -impact of decrease in money supply on IS-LM frame work with graph 5 marks
3. Fiscal policy under flexible exchange rate.....
4. Transactions theories of money demand.....5 marks
5. consumption & investment was given and we are required to find out (a) APC (b) MPC? 3 marks
6. If the CPI for the year 2001 is 176.4 and CPI for the year 2000 is 174 then what will the inflation rate of year 2000?3 marks
7. There was a graph of demand curve and supply curve and we have to find that what happens if :Income of consumers are high & Price of steel rises
8. effect of increase in MPC on investment

www.ranapk.com

ECO403 FINAL TERM PAPER SHARED BY STUDENT

on July 21, 2013 at 2:40pm

Just now done with my Eco403 paper here m gonna share all the subjectives which i copied just

1: Keep the concept of transaction theories of money demand in mind, and discuss the main points of this theory 5marks

3 : What contributions Simon Kuznet made in the consumption analysis? Discuss 5 marks

4 : Define Philips curve. Also explain this curve with the help of diagram 5marks

5: Keep the concepts of money demand theories in mind, discuss what will be the impact of an increase in each of the following variable on demand for money? 3 marks

1. a. Expected real return on bonds.
2. b. Expected inflation rate.
3. c. Real wealth.

6: Consider an economy described by the following equations: 3 marks

$$Y = C + I + G$$

Where, $Y = 7,000$, $G = 1,000$, $T = 1,000$

$$C = 250 + 0.75 (Y - T)$$

$$I = 1,000 - 50r$$

www.ranapk.com

In this economy, compute private saving.

7: Calculate the tax multiplier if, $MPC = 0.73$ 3 marks

Assume for an economy that Budget deficit = Rs.28 billion, $p = 7\%$, Government debt = Rs.470 billion. Calculate the amount of budget deficit overstated

MCQs were mostly from graphs so better to understand all but most of the mcqs were about IS - LM curve.

Please Dear mates pray for my result its my final semester i need lots of prayers.

JazakAllah

ECO403 FINAL TERM PAPER SHARED BY STUDENT

ON JULY 22, 2013 AT 8:19PM

Define Lm^* curve. Why it is vertical?

Cobb Douglas function

Tobin's and neoclassical investment model

Borrowing constraint and its conclusion

Find unemployment rate

Why prices are sticky in the short run

There was a graph of demand curve and supply curve and we have to find that what happens if :

Income of consumers are high

Price of steel rises

Robert Hall random walk theory

MCQs were very difficult all were new and tough and complicated
