MTH642 - Fluid Mechanics (Quiz 3)

Question # 1 of 10 (Start time: 10:39:03 PM, 15 June 2024)

Which term in the Bernoulli equation represents dynamic pressure?

Select the correct option

○	P_0
○	ρgh
◉	$1/2\rho v^2$
○	P

Question # 2 of 10 (Start time: 10:39:41 PM, 15 June 2024)

What principle does Bernoulli's equation describe?

Select the correct option

◉	Conservation of energy
○	Conservation of mass
○	Conservation of momentum
○	Conservation of charge

Question # 3 of 10 (Start time: 10:40:35 PM, 15 June 2024)

Which of the following conditions must hold for Bernoulli's equation to be applicable?

Select the correct option

- ○ Viscous fluid flow
- ◉ Incompressible fluid
- ○ Irregular flow patterns
- ○ High turbulence

Question # 4 of 10 (Start time: 10:41:07 PM, 15 June 2024)

What does the term ρgh represent in Bernoulli's equation?

Select the correct option

○	Pressure energy
◉	Gravitational potential energy
○	Total mechanical energy
○	Kinetic energy

Question # 5 of 10 (Start time: 10:41:33 PM, 15 June 2024)

Which of the following applications does NOT utilize Bernoulli's equation?

Select the correct option

○	Blood flow in arteries
○	Water flow through a pipe
○	Airplane wing design
◉	Heat transfer in a solid

Question # 6 of 10 (Start time: 10:41:57 PM, 15 June 2024)

What is the constant value in Bernoulli's equation along a streamline?

Select the correct option

○	Total mass
○	Total volume
○	Total momentum
◉	Total energy

Question # 7 of 10 (Start time: 10:42:33 PM, 15 June 2024)

When a fluid is brought to rest from a moving state, what pressure is attained?

Select the correct option

○	Total pressure
◉	Stagnation pressure
○	Dynamic pressure
○	Static pressure

Question # 8 of 10 (Start time: 10:43:05 PM, 15 June 2024)

Which of the following equations represents Bernoulli's equation in its standard form?

Select the correct option

○	$P + \rho v^2 + 2\rho gh = constant$
○	$P + \rho gh = constant$
○	$P + \rho v^2 + \rho gh = constant$
◉	$P + 1/2\rho v^2 + \rho gh = constant$

Question # 9 of 10 (Start time: 10:43:49 PM, 15 June 2024)

In the Bernoulli equation, what remains constant along a streamline?

Select the correct option

- (●) Total pressure
- ( ) Velocity
- ( ) Temperature
- ( ) Density

Question # 10 of 10 (Start time: 10:44:19 PM, 15 June 2024)

Which condition simplifies the Bernoulli equation for incompressible fluid flow?

Select the correct option

○	$V_1 = V_2$
○	ρ is variable.
○	$P_1 = P_2$
◉	ρ is constant.
